STATE AGRICULTURAL SOCIETY

OCCIDENT STAKE OF 1917

Trotting Stake for Foals of 1914

Entries Close Monday, Jan. 4, 1915

To be trotted under the direction of the State Agricultural Society in 1917. Entries to close January 4, 1915, with Chas. W. Paine, Secretary, at the office in Sacramento. One Hundred Dollars entrance, of which $10 must accompany nomination; $15 to be paid January 1, 1916; $25 to be paid January 1, 1917 and $50 thirty days before the race. The stake of 1917 should receive a large entry and be very valuable. Every breeder should enter in it.

CONDITIONS:

Mile heats. Race to be three heats. Each heat a race. One-third of the money will be allotted for division in each heat, and money allotted for the heat divided as follows: Fifty per cent to the first colt, twenty-five per cent to the second, fifteen per cent to the third and ten per cent to the fourth. The Occident Cup and $400 to be added by the Society, to be awarded to colt standing highest in the summary. Distance 100 yards. Otherwise N. T. A. Rules to govern.

Nominators are not held for the full amount of entrance in case colt goes wrong; but forfeit payments made, which relieves them from further responsibility, and declares entry out.

REMEMBER THE DATE OF CLOSING, JANUARY 4th, 1915.

Write for Entry Blanks.

A. L. SCOTT, President. CHAS. W. PAINE, Secretary, Sacramento, Cal.

A "RELIEF" MEASURE WHICH FAILS TO RELIEVE.

We do not believe that we are by nature especially "cantankerous," or "agin' the government," or adverse to changes in racing rules which would be conducive to improvement in conducting successful harness meetings, but we seem to have some difficulties in arriving at the conclusion that all the proposals which the rules committee of the Grand Circuit will make to the stewards at their executive session are really for the best interest of the sport. As is noted elsewhere in this number, we have yet to find reason to accord approval to the suggested four heat race system, nor are we in any way inclined to support the proposed amendment to the win-race rule.

Here is the version of the last mentioned matter: "In order to eliminate all trifling with the present race record rule, the committee requests that the parent racing association shall amend the win race record rule in order to give the judges of a race the power to inflict an eligibility record on a horse, which wins a heat, but does not win the race, providing the judges believe that the driver intentionally lost the race."

At first glance such a course might seem to offer an improvement over conditions that prevailed in 1914 under the workings of the rules as they were applied, but on closer study it meets with less favor, insofar as we ourselves are concerned. The longer we consider it the less we like it, and we are inclined to the belief that the parent associations will not place the proposed amendment on record. The course taken by the rules committee can mean to us but one of two things, either that they are seeking to dodge the responsibility of enforcing the established rules of racing and are seeking a ruling that will impose a mere subterfuge of a penalty (this being the belief to which we are inclined), or that they propose for the season of 1915 the most rigid enforcement of rules that the history of racing has witnessed in a goodly number of years.

It is a matter of general knowledge among horsemen that the dissatisfaction arising from racing under the no-record rule in 1914 is traceable largely to the judge's stand. The rules committee in their recommendation imply a disinclination to apply present rules — or possibly, not probably, a desire for still more stringent rules. To us it appears that the former is much more apt to be the case.

The rules as they stand at present offer a most effective and salutary remedy for "trifling with the race record rule"—simply fine, suspension or expulsion. This remedy the judges have not been inclined to administer, though it may readily be seen that a few doses of this nature would put a pretty effective check on a spread of the epidemic. Compared to a stiff fine, suspension or expulsion, the infliction of an eligibility record would be about as a ladylike slap on the wrist would be to a good stiff hook on the jaw from a man's sized man. As a penalty for flagrant infraction of racing rules it is no more than a farce, and the eligibility record could be administered only as an aftermath to a deliberate "misdemeanor," for which there is a very plainly defined and presumably compulsory penalty.

Here is where the rules committee, in track parlance, have overlooked their hand: They ask the "strengthening" of the no record rule by the adoption of their proposed amendment, but they have sought no suspension of the clause providing for "competent judges for the day or race who shall understand the rules of this association, **and shall rigidly enforce the same,"** nor do they request any alteration in the wording of Section 6, Rule 27, which reads: "Every heat in a race must be contested by every horse in the race, and every horse must be driven to the finish. Should a driver or rider be found guilty of violating this rule he shall be **fined, suspended, or expelled."**

Seeking a light penalty as an avenue of escape from "offending" lawless drivers or owners, the committee really seeks the establishment of a governing clause **whose application must of necessity be followed by fine, suspension, or expulsion.**

Given the adoption of their proposed amendment, any trio of judges who "believe that the driver intentionally lost the race" and apply a penalizing eligibility record and then fail to discipline the driver himself by fine, suspension, or expulsion, **are themselves liable to the limit penalty which the parent association has in its power to impose.**

The no record rule has been unsatisfactory in its working largely because the judges have been loath to inflict punishment already provided for. How much more willing will they be to inflict the further penalty that the adoption of the rules committee's proposal would inflict? The committee has failed to ring the bell with this shot at the no record target and we incline to our previously expressed opinion that given an enforcement of the fundamental rules of racing it will be found a real aid to the racing industry—otherwise the quicker it is rescinded, not doctored, the better.

1915.

Again we have turned the page of the calendar that puts another three hundred and sixty-five days into the dead and gone past; again we have "rung out the old, rung in the new," and stand at the threshold of another of Father Time's mansions—1915.

Nineteen-fifteen!

Ever since the day when the big figures went up on the Spreckels Building, fifteen minutes after we had the news that we were to entertain the world at the celebration of the opening of the Panama canal, that date has been one that, both literally and figuratively, loomed large in the eyes of Californians.

And now the year is with us in reality and our dreams are coming true. One of our expositions has opened amid scenes of classic grandeur, and down on the water front just inside the Golden Gate the other and greater one is receiving the finishing touches that will make it ready against the coming of its opening day, February twentieth. Millions have been spent that the progress of the world during the last decades may be fittingly portrayed, and now that the work is done—and well done—California opens her hospitable portals to the peoples of all the nations and bids them welcome. No state in the Union has more to offer to the visitor than has California; no state can surpass her in the heartiness of her invitation to all to come during 1915, and no state can greet the stranger within her gates with greater warmth or a truer welcome.

Not yet has it been realized fully what the exposition and the opening of the canal mean to California and the coast country from San Diego to Vancouver. Great things are expected by all, but the passing of time will doubtless bring even greater, farther reaching benefits than have been anticipated by the most sanguine. With the tide of immigration that will follow in the years immediately succeeding these great events of 1915—not so much immigration from foreign shores, but a fresh impetus to the westward course of the star of empire in our own country—will come the settling of our thousands upon thousands of vacant acres and an unprecedented growth to our cities. Almost before we know it, so subtle is the march of progress, the California of the future will offer almost as great a contrast to the California of today as does the Golden State we know and love so well offer to that wilderness territory familiar to a generation gone.

Serenely glorying in the splendors of her past, unalterably confident of her future grandeur, California welcomes you, 1915; as in the days of '49 when the hunting cry of the gold seekers echoed around the world and brought to her shores the hordes of hardy pioneers who reaped rich harvests from her bounteous hills and paved the way for the coming of our present civilization, so now has her call reached to the farthest highways and byways of the planet bidding all who will to come and join with her in an even greater glory, and to the thousands upon thousands who will heed the call she promises a bounteous reward of health, and wealth, and happiness.

THAT 1915 CIRCUIT.

More of our eastern friends are finding favor in our plan to arrange circuit dates that would provide racing straight through the latter part of the season without conflict, but almost all make the mistake of saying that such a circuit would limit Columbus and Lexington to one week each, contrary to their usual custom.

Presuming that the Grand Circuit in 1915 will afford the same number of meetings as in 1914, only the latter meetings of the circuit would be inconvenienced even to the extent of a week's advance in dates, and the length of the various meetings would be in no way curtailed.

Last year the Grand Circuit opened at Cleveland on July 20 and closed at Lexington on October 17, the continuity of the circuit having been interrupted one week (September 14-19) to allow for the Michigan State Fair. By opening this year's circuit on July 19 and with no break in the circuit, ten meetings can be arranged that will close racing at Lexington on October 9 (one week earlier than last year) and yet allow two weeks each for the Columbus and Lexington meetings. This would allow horsemen who so desired to take in one week of the Dallas meeting, could their dates be so arranged, race at Phoenix October 18-23, and arrive at San Francisco in ample time for the opening of the exposition trots on October 30.

Dallas, however, has already claimed October 16-31 and cannot reconsider until their meeting this month, which would interfere with Phoenix giving her meeting on the above dates if adhered to. Phoenix, however, enjoys ideal weather all through November, and might be inclined to hold her meeting after the exposition, in which case she would be directly in the path of eastern stables homeward bound, some of which she might hold for the winter, as there are few superior wintering grounds. Such a plan on Phoenix' part would also allow the usual arrangement of dates for Columbus and Lexington and allow Grand Circuit horses to go to the Michigan State Fair.

Our case is up to the various associations and it is for them to say whether or not they will conflict with us. The exposition has broken all records in providing horsemen with great opportunities for money earning both in number and richness of the stakes and purses offered, and in the plant provided for staging these events. Their share is done—the success of the meetings devolves upon horsemen themselves from this point on, and upon the co-operation of other associations in providing a smooth "right of way" for all parties concerned. We feel that the exposition is solely and wholly within its rights when it respectfully solicits this support and co-operation, which it richly merits.

HERE ARE THE JOHANNA TREAT YOUNGSTERS

Palm City, Cal., December 27, 1914.

Mr. James Cartwright,
Missoula, Mont.

Dear Sir:—

In reply to a letter from you published in the Breeder and Sportsman of December twelfth in regard to information concerning Johanna Treat and her progeny, will state that I still own Johanna Treat, and have at present:

The four-year-old colt Johano by Carlokin 2:07½, now at Pleasanton in charge of Horace Feindel;

A two-year-old by The Bondsman, entered in futurity stakes and very promising;

A yearling by Nuristo 2:10¼, which in my judgment is as fast a colt as Johanna Treat has ever produced;

A weanling by Adansel 2:14½ (Adam Treat) entered in futurity stakes.

For further information you may address

F. W. WADHAM.

Palm City, San Diego County, Cal. R. F. D. No. 1.

SECRETARY SHEPARD'S FOUR HEAT SYSTEM.

Secretary H. D. Shepard of the Columbus Driving Park Company presented to the rules committee of the Grand Circuit during its Monday meeting at Cleveland, last week, a new race plan which is designed to end the race with four heats only. This plan will be threshed out thoroughly before being presented to the final rules committee, which meets in Detroit January 12, and already has the endorsement of a number of Ohio horsemen who have "mulled it over" personally with Mr. Shepard.

The rule is to be framed as follows: The first horse to win two heats is the race winner. Whenever a horse wins two heats he is to be ruled out and sent to the barn. It will be raced on the point system, with the exception that heat winners have precedence over a 2-3-4 place. A winner of a second heat is considered better than the winner of a first heat, and so on, provided the time of that heat equals or is faster than the previous heat. When two horses tie in the summary for a position in the race, a horse having been given second position once is considered better than a horse having been given a second position twice, provided that his second position was made after the other horse secured his second position or the heat was faster or equaled the time of the heat the horse with two seconds was secured in, and the horses making a dead heat shall count for each horse making it.

One of the advantages claimed for this plan is that, "knowing how many heats would be raced, a definite time of starting and ending the program could be arranged for. It would make the racing faster and better, as the horse winning two heats first goes to the barn the winner. The race from then on would develop new interest, as the others would all have a better chance, and they would have to be fighting for a good position all the time, as there might be a tie in points and then the one standing nearest the front in the fastest time would be the winner of the second part of the money."

In support of the plan its sponsors submit the following examples which cover a fairly wide range of racing probabilities:

Example No. 1—2:08 class trot:

Cheeney	5	1	1	ro.
Robt. Milroi	1	7	5	1
Bon Zolock	8	3	3	2
Peter Thompson	9	2	2	3

Time—2:06¼, 2:07, 2:07¼, 2:06¼.

Cheeney won first money because she won two heats first. Milroi second because he won two heats. Zolock third because the fourth heat was made in faster time than either one of Peter Thompson's.

Example No. 2—2:15 class trot:

Doctor Thorne	4	4	1	1
Morine	3	1	2	4
Poletta	1	2	4	2
Alfonso	2	3	3	3

Time—2:10½, 2:09¼, 2:08½, 2:08¾.

Doctor Thorne won first money by winning two heats. Morine took second money by winning a heat faster than Poletta, although Poletta had a smaller number of points.

Example No. 3—2:10 class trot:

Tommy Horn	1	4	1	ro.
Lady Grattan	2	3	4	1
Marigold	3	1	2	4
Dago	4	2	3	2
Derby Boy	5	5	5	3

Time—2:07¾, 2:08¼, 2:08½, 2:08¼.

Tommy Horn won first by winning two heats. Lady Grattan got second because, if horses stand alike as to both time and summary, the position goes to the horse winning the fourth heat. Her time, while equal with the second heat, is considered better because it was made in a later heat.

Example No. 4—2:05 class pace:

Directum I	1	1	ro.	
Walter Cochato	5	2	1	3
Flower Direct	2	6	3	1
Longworth B	3	3	4	2
Branham Baughman	6	4	2	4
Zombrewer	4	5	5	5

Time—2:09¼, 2:04¾, 2:04¼, 2:04¼.

Directum I is first because of winning two heats. Cochato second because his 10 points beat Flower Direct with 11 points, even if Flower Direct's fourth heat did equal Cochato's third heat of 2:04¼, or 10 points beat 11 points outside of heat winners.

Example No. 5—2:10 class pace:

Lowanda	4	3	2	1
Sellars D	3	2	1	4
Nelly G.	2	1	4	3
Don Patch	1	4	3	2
Hal J	8	5	6	7
Irish Lad	9	7	6	6
Princess Patch	10	6	7	5

Time—2:09, 2:08¾, 2:08½, 2:08¼.

Lowanda gets first money because fourth heat was fastest. Sellars D. is second because third heat was faster than second heat. Nelly G. is third because second heat was faster than first heat. Don Patch is fourth because he won a heat in slowest time. Hal J. is fifth because of 26 points. Irish Lad is sixth Galley SIX— —
by his 27 points and Princess Patch seventh on account of 28 points.

Example No. 6—2:04 class pace:

Leata J.	1	0	ro.	
F. Bogash Jr.	2	0	0	ro.
Mack Thistle	5	2	0	1
Del Ray	3	4	2	3
Edith C.	4	3	3	2
View Elder	6	5	4	ro.

Time—2:03½, 2:03, 2:02, 2:04¼.

Leata J. wins and goes to the barn after the second heat, a dead one. Bogash wins second money and goes to the barn at conclusion of third heat. Mack Thistle gets third money and Del Ray fourth because he was second in the third heat, the fastest heat in the race.

Secretary Shepard suggests that interested parties give his system careful consideration before its presentation to the committee for official sanction or rejection. Racing in the east and racing here on the coast do not run in absolutely parallel lines, though governed by the same rules, which may have something to do with the unfavorable view we take of the proposed system, for, frankly speaking and in understandable racetrack English, "we don't see it."

Example by example, let us look it over—consider that we have paid our dollar for a reserved seat and that our money is helping to pay the purse.

In example one we have a fine juicy split heat race—until Cheeney gets two and the gate, Robert Milroi winning the first and fourth. Bon Zolock gets third money over Peter Thompson because he was second once in faster time than either of Peter Thompson's two seconds were made in—yet Peter Thompson was the contending horse in two good heats when the winner, the best horse under the rule, was still in the race.

In example two a similar objection is raised in the placing of Poletta third to Morine's second, the placing being made on a time basis in which the difference is three-quarters of a second. Poletta ranks higher in points and went a more consistent race—and we confess to a liking for consistency as well as speed.

In example three we mourn the loss of Tommy Horn from our field of vision after the third heat, but agree with the placing of the balance of the field, as in case of a tie we are inclined to favor the horse whose speed lasted longest.

In example four our main objection is the fact that we get our champion blanketed for the day after two times out, one heat of which was very slow—and we leave it to Dr. Dodson if it isn't mighty aggravating to all concerned to have to watch Directum I win a slow heat! No fault with other placing.

Example five, placed properly under the circumstances, but would have suited our dollar interest better to have had winners of three first heats race off tie in fourth heat, regardless of the win-race rule.

Example six is to our notion—as a dollar spectator—a "powerful disappointment, powerful so." We stood right up and hollered when Frank put Leata's nose ahead of Tommy Murphy's Bogash horse. Then when the pair of 'em pulled a dead one we sure jumped up and whooped and in our enthusiasm slapped the blond lady's shoulder like she was an old friend and her husband never even noticed it! Seemed like we couldn't hardly wait for 'em to come out again. Goin' some, eh folks? Pullin' a dead one in 2:03! Gee! That's a sure pippin! There they come now! Why, where's that Jones filly? Ain't comin' out? G'wan! How's that? "Sheparded"! Gosh! and then gosh again! So darned sore, couldn't work up much enthusiasm over the Bogash horse and Mack Thistle going a dead one a second faster. Answer blond lady's friendly smile and that homely husband saw it and swelled up like a poisoned pup. Bigger 'n we are too! Oh well, maybe Frank and Mack will do it again, or anyway race a nose finish. Here they are! Huh? Bogash? Why don't Tommy get out here? He don't generally ball things up! Huh? Say it again! "Sheparded"! Come on out o' this before we get in trouble! Let's beat it while the beatin 's good.

All jokes aside and right absolutely on the dead level, that last example, to us, bears all the earmarks of what might have been a real hair raiser just naturally all shot to h—excuse us—pieces!

Possibly we have failed to give the proposal due consideration. Possibly, too, its sponsors may have looked upon the "child of their brain" with the not unusual too fond parental eye. One of the advantages claimed is that "knowing how many heats would be raced, a definite time of starting and ending the program could be arranged for." Why better for four heats than for three? In a card of four races, every heat a race, with tied horses going a fourth heat, there will not be sufficient uncertainty to cause inconvenience save in isolated cases.

"It would make the racing faster and better, as the horse winning two heats first goes to the barn the winner." Right here we split emphatically. The majority of the people like to see a race really won, and the idea of stimulating interest by sending the best horses to the barn seems rather a backward manner of going about it, to us. We want to see the good ones race—otherwise we would have stayed at home. Bet you fifty that Leata would have beaten Bogash the third heat if they—and there you are. There is too little real, satisfying, convincing evidence that we saw a horse win a horse race.

You will also note that in the examples given, the time holds out wonderfully well. In split heat races where the winner or winners of the first one or two heats remain contending horses this is not unusual, or unexpected. However, we believe that if all instances of the winner or winners of the first one or two heats being removed from competition by distance or "dogging" or plain hard racing luck could be tabulated, in the majority of cases the succeeding heats would be found to have deteriorated in crowd pleasing caliber and to have been raced in slower time. There can be cited instances of races of the "procession" type where the elimination of one horse would lead to a better balanced field, but as the field is racing for but second, third and fourth money what difference in the keenness of their place contests would the removal of the accepted winner accomplish? If anything, his continued presence would be more likely to serve only to bring them home that much faster.

The rule presents one weird feature. It lays stress to the value of speed in the final stages of the race in the casting up of the summary, giving evidence to a high regard for lasting speed—plain, old-fashioned "bottom." At the same time it opens up a field of wonderful promise for the two heat sprinters by making it possible for the latter to annex a first money in two heats that they could not possibly secure in four, if raced out. The situation created is scarcely tenable.

The rule may be far better than it appears to us. Like its originators, we would like to hear from any of our readers who have opinions concerning the same, for or against. Any opinions on this or any other matters are welcomed and get a fair hearing. We are open to conviction any time you can prove it to us that we are wrong. We might even be convinced of error in this case and we may have a hammer out of the box at a bad time, but——

Now if Leata and Frank Bogash had gone just—Good night!

DEATH CLAIMS W. J. MILLER.

A game and long-drawn-out battle for life was brought to a close shortly after three o'clock last Saturday afternoon at the Lane Hospital in this city, when death came to relieve the sufferings of Wendelin J. Miller of Chico, who had been an inmate of that institution since early in November. For almost three years he had been in very poor health, having undergone a number of operations, and for some weeks practically no hope had been held out for his recovery. Mrs. Miller and a nephew, J. E. Holub, were with him at the end.

Mr. Miller was a native Californian and was widely known as a man of wealth and success in banking, ranching, stock raising and horse breeding, his modest operations in the latter having met with a success that carried his name far and wide among horsemen. Katalina 2:11¼, Chiquito 2:10, Choro Prince 2:08¾ and other lesser lights of the turf carried his colors to the front over coast tracks, but the youngsters of his own breeding were the campaigners that brough him the greatest fame as a horseman. The first of these to achieve prominence was Capitola, the produce of Lulu Mack to the cover of Dan Logan. As a two-year-old her record of 2:17¾ stood as the season's best performance for fillies of the age and gait, and as a three-year-old she won straight through her short campaign and reduced her record to 2:14½. Closely following Capitola's success in 1912, John Malcolm, also bred by Mr. Miller, won the two-year-old pacing division of the Breeders Futurity at Santa Rosa and in so doing established the then world's record of 2:11½ for two-year-old pacing geldings. Bondaline, his most recent starter, won one heat and second money in the two-year-old pace of the Breeders Futurity at Salinas last year, proving his speed and gameness by going the race on three legs. Save for his untimely death Mr. Miller would doubtless have had the pleasure of winning further laurels this season with the horses in Loren Daniel's care owned largely in partnership with the latter.

Commenting on his death, the Chico Record says in part, that Mr. Miller had been one of the most active men in Butte county, mentally and physically. He was a prodigious worker and personally directed his wide and varied interests. He had been president of the First National Bank of Chico for four years and was a director of the people's Commercial and Savings Bank. He owned a fine ranch of 1200 acres a few miles south of Chico, on which he made his home for ten years up to the time he came to Chico to reside four years ago. His other holdings included a tract of 2,100 acres in Glenn county, 8000 acres of grazing and farming land near Pentz, and a half interest in the Union Hotel property in Chico.

Although a young man when death came, for more than twenty years he had been active in the direction of large affairs. When but twenty-one years old he assumed active management of the estates of his father, Joseph Miller, and his uncle, Wendelin Miller, and in those years he greatly increased the Miller estates. Mr. Miller, enterprising and energetic, was a producer. His wealth always was active and, believing in the future of Butte county and the Sacramento valley, he invested his capital there. His life was an example which any young man might well follow. He was honest and upright, his word was his bond.

He was a man of warm impulse, true to his friends and whose great wealth developed no unpleasant characteristics. As a citizen, he was one of whom any city or town might well be proud. He supported many civic improvements and his progressive ideas brought him to the front rank of projects looking toward municipal improvements, as well as of business enterprises which fathered community development.

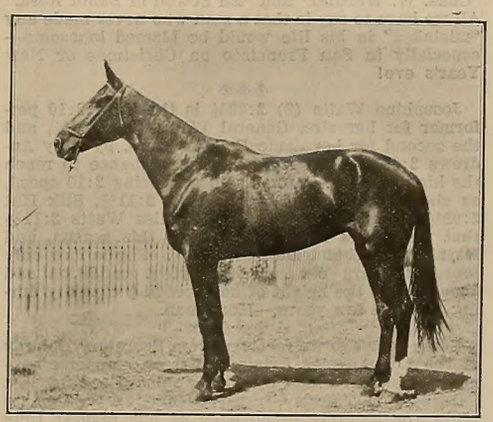
Wendelin J. Miller was born August 27, 1873, at Frenchtown, Butte county, near Yankee Hill. His father, Joseph Miller, was a native of Germany, who came to the United States in 1856 and to California in 1858, becoming a pioneer stockman and butcher of Butte county, and his mother was Julia A. Benjamin, a native of Wales, who died in Chico almost two years ago.

Brook Nook and Ruby Dell

Last of the Great Horse Farms of the Northwest

Thirty years ago or more in the Silver Bow mining country in Montana, by the sale of the St. Lawrence mine, were engendered the plans whose fulfillment gave to the Northwest her greatest plant for the production of the light harness horse. Emboldened by the success of his venture in the St. Lawrence, its late owner determined to put his all at stake in the test of a profound and deepseated theory of his own evolution concerning the trend of the big vein of copper bearing ore (above which is reared the city of Butte) after it left the hill. Down "on the flat" he erected his plant and went quietly and doggedly about his task, in the face of adverse advice of friend and mining expert, of engineer and geologist. He had made up his mind where the vein should be, and there would he sink his shaft, not elsewhere. Day by day as time passed on the bucket cables lengthened—and the working funds sank lower. Day by day the silent miner was urged to quit his foolishness while he yet had the means to relocate in a more auspicious spot. Argument proved futile, and at last friend and wellwisher left him to go his way to certain ruin. Deeper and deeper went the shaft, lower and lower sank the operator's resources, until the day was almost in sight when work would stop for lack of funds—and then the bucket brought up something that was not as other bucket loads had been. The Mountain View had become a producer. In 1887 the property was purchased by the coalition of great copper interests, and the name of Charles Xavier Larrabee was added to the roster of American millionaires.

Most men newly enriched plunge into excesses of some description, or at least into the indulgence of certain previously prohibited desires and inclinations, and in this matter Mr. Larrabee was no exception, as one of his first acts was to lay the basis for his entrance into the ranks of great horse breeders, his prevailing "weakness" at all times in his life being his great love for a good horse. Not far from the mouth of Alder Gulch—far famed as the world's greatest bonanza placer camp in many a generation—he purchased the first tract of the thousand fertile acres that compose the present Ruby Dell ranch, and went in person to the hills of Vermont for the horses to stock it with, returning with a band of choice mares that were, principally, members of Vermont's great family of the Morgan. The Morgan stallion Prospect that had been brought to Montana in 1882 by Robert Vaughn of Sun River was the first premier of Ruby Dell, where he was later kept company by a son of Commodore Belmont and a son of Tempest, both bred in Montana at Belmont Park by Colonel W. H. Raymond. Prospect was never kept at Brook Nook, though numerous of the ranch's produce today carry a cross to him, and Old Glory, the famous Jubilee de Jarnette show gelding owned by J. D. Farrell of Portland, is out of one of his daughters.



In 1889 Mr. Larrabee extended his operations to the upper valley of the Ruby—known locally to old timers as the Stinkwater and officially as the Pasamari—which had long been famous as a horse producing country, and under the shelter of the points of the benches on Greenhorn creek began the construction of the headquarters plant that today presents the appearance of a rural "settlement" and is known, with the fifteen thousand acres lying under its fences, as Brook Nook. No place could be named more appropriately; no matter where you may be on the ranch you are not far removed from either cozy nook or tumbling brook, for within the confines of its outer boundaries is embraced the meeting place of many waters, waters that, flowing in inexhaustible volume from the springs and snowbanks in the fastnesses of the Snow Crests and the Tobaccoroots, not merely slake the thirst of man and beast with cold, sparkling draughts, but bring to the thirsting thousands of acres in valley and on bench the blessed moisture that by its benign influence clothes their nakedness here with the verdure of alfalfa and the native grasses, there with the shimmering gold of ripened grain.

With his enlarged facilities Mr. Larrabee began levying on both east and west for breeding stock that suited his particular fancy. Mares by Electioneer, Monbells, Ansel and other California sires found their way to Brook Nook, as did those from Kentucky's greatest farms. A little band of eight or ten daughters of Altamont played an important part in the history of the ranch, and the original Morgan matrons received additions from time to time of sisters of similar blood strains, as Mr. Larrabee was ever a friend to the Morgan, and was its largest breeder. Brook Nook matrons were sent on long journeys to the courts of Red Wilkes, Allie Wilkes, Robert McGregor, Wilkes Boy and others of their kind in Kentucky.

Shortly after Brook Nook was comfortably established, Mr. Larrabee purchased of Col. Raymond the stallion that had long been the premier at Belmont Park, Commodore Belmont. In 1892 came Alaska, from the Haggin establishment; in 1895 Alcone, for whom his owner had a most profound regard; late in the nineties, Alfonso, and a few years later The King Red, the present head of the stud. Other standard stallions owned at the ranch were Keeler, Allouez, Special Telegram, Vice Regent, and sons of Norval, Simmons, Wilkes Boy and Allie Wilkes were at various times in service but disposed of as not being quite up to requirements. Stallions of home production were also used, of which the very best is Letrado (3) 2:25, at present in service, and whom Mr. Henry L. Miller, the superintendent, regards as the equal of any sire owned on the ranch in his time, which covers the larger portion of a decade.

Among the Morgans Mr. Larrabee has always had the best the country afforded. Lambert Boy spent some years at the ranch, as did the great show horse and sire of show horses, Jubilee de Jarnette 2:29¼. Spokane 2:15¾, a "standard bred Morgan," being registered both ways, was a good trotter and a sire of quality, and in the purchase early this year of Frank Allen 4694 A. M. R. the ranch became owner of what is conceded to be one of the very finest and truest types of the Morgan of today. Unfortunately Mr. Larrabee did not live to see the horse after he came west.

In the matter of speed, considering the number of animals yearly produced, Brook Nook has established no wonderful record as records go these days, but at that she has furnished some most excellent racing timber, has produced the champion show horses of the northwest with unfailing regularity, and has sent out into the world thousands of individuals of the very highest type of equine beauty and general usefulness. Up until the middle nineties or a bit later Mr. Larrabee raced a modest stable and intended constructing a covered track at the ranch so that his youngsters might receive their necessary education and training, but unfortunate experiences with the wrong kind of trainer turned him against the racing end of the game and he devoted his efforts solely to breeding. Usually a few youngsters were worked lightly and given records at the state fair at Helena, or sold privately at the ranch, and in this manner some excellent racing material has been uncovered. I am sure that in Letrado (3) 2:25 (by Alcone and out of Lilili by Alfonso 2:29¾, second dam L'Oriol by Red Wilkes, etc.) Mr. Larrabee bred the greatest colt trotter ever foaled in the northwest, for if any horse of that section ever had the genuine qualifications of a good one, Letrado is that one. Both Mr. Miller and Howard Vinson, as well as S. E. Larrabee, urged strongly that he be sent east and "given a chance," but Mr. Larrabee would not depart from his usual custom and the boy was given a time record of 2:25 in the mud at Helena. As a sire he is amply justifying his owner's course in reserving him for stud duty, and Mr. Miller writes glowingly of his youngsters. It was also Mr. Larrabee's practice to take a small stable to Oregon, where he could see them occasionally and have them developed for sale, usually by the Lindseys.

SEA WAIF

by The King Red—Sea Queen by Vice Regent. A Brook Nook product and P.-P. I. E. stake entry owned by Hugo Schmidt, Spokane.

Had Mr. Larrabee adhered to his original plans, I am very confident that Brook Nook would have sent many winning campaigners to the races, and attained a truly enviable standing among the leading speed nurseries of the world, for the material to work on most certainly was at all times at hand.

Many "paper breeders" have thrown up their hands in horror after a perusal of certain Brook Nook pedigrees wherein were mingled and countermingled, crossed and again crossed, the blood of the trotter and the Morgan. Whether or not the extensive crossing of the two strains was a portion of Mr. Larrabee's original intentions I am not aware, but with racing foresworn and the establishment's main aim the production of a horse of a certain standard of individual excellence, the families were thoroughly crossed with gratifying results. Visitors to the ranch who are qualified to speak with authority on the subject state that there is no more uniformly excellent band of horses, in conformation, color and action, at any breeding establishment of magnitude in the range of their acquaintance. They cleaned up most of the show classes at the Lewis and Clark exposition at Portland, the Brook Nook mare Alondra being the grand champion of the event, and ribbons have come their way at Madison Square Garden. Before Mr. Larrabee's death he had planned to fit for the Panama-Pacific show rings at least a car load of his representative youngsters, and it is hoped that the estate will carry out his plans.

Brook Nook and Ruby Dell at present support in excess of six hundred horses, in addition to the considerable array of work animals necessary for the operations of haying, grain raising, and feeding during the winter. Crops of fifteen thousand bushels of oats and twelve to sixteen hundred tons of hay are about the usual run—and such oats! Southern Montana is famous for the oats it sends to the cereal factories of the east, and none of the exported product exceed in quality that used on the Larrabee ranches for the regular "three-a-day." I have fed my saddle pony at either ranch on oats that frequently weighed 48 to 52 pounds to the bushel.

In addition to his horses, Mr. Larrabee's great pride lay in the herd of some three hundred registered Shorthorn cattle he had established at Brook Nook, the foundation stock coming, I think, from the Grassmere herds of William Warfield in Kentucky, new bulls being brought into service as needed from among the best strains obtainable. There is a wide demand throughout the northwest for Brook Nook bulls at a most excellent price.

Mr. Larrabee's death last fall robbed the American light harness horse of one of its very staunchest friends, and the country at large of a most esteemed citizen and a thoroughly successful, unassuming gentleman. Like most men of success in large ventures his personal characteristics and ideas along his favorite subjects for consideration were most pronounced, and he asked no man to do his thinking. Once a satisfactory mutual understanding existed between himself and his lieutenants, however, there ensued in every case a long and intimate connection. His leading men of affairs are men who have, for the greater part, grown old in his service.

Unlike many great ranch properties that have not long remained intact following the death of the master, Brook Nook and Ruby Dell will retain their present identity for at least some years to come, though the stock may be disposed of and the lands leased en masse. It was always the deepest wish of the owner, in which Mrs. Larrabee heartily concurred, that one or both of his sons develop a love and an aptitude for extensive farming and stock raising, and it is not probable that the properties will in any way be altered in extent until the day arrives that the sons are grown to manhood and give the word to put them on the market. Mr. Larrabee left a large fortune which bore no taint of frenzied finance, and the boys may choose any course in life so far as their financial resources are concerned.

Of the many members of the fraternity of "trotting hoss writers" who have visited Brook Nook and Ruby Dell ranches and subsequently devoted space to their description, probably none are so familiar with the "home life" of the place as myself, as it was my fortune to live for some years in the Ruby Basin, and at different times to be connected in some temporary capacity with Brook Nook—in the breaking barn, delivering shippers and scrappy young studs at the end of the railroad, or handling the dry bunch on the open range some twenty miles deeper in the hills. It is a case of home, sweet home for me. Put me down anywhere in Montana south from Sheridan to Monida and I'll show you where to put your horse and what part of the table to get your feet under. Perhaps that explains my weakness for "visiting" with Brook Nook horses whenever I run across them in my travels, and why I hope strongly that Young Charley or Ned may see fit to perpetuate the name of Larrabee among the great horse breeders of America.—[Neal.]

Some weeks ago at the International 1:55 Farm at Savage, Minn., grand old Effie Powers 2:08¼ answered the last call and said good by to a world in which for years she had played a promising part. "Aunt Effie," as the daughter of Anderson Wilkes and Fannie Powers was known affectionately by "the boys," started on her long and illustrious career in 1893, being at that time a three-year-old, and that season secured a record of 2:12¾ in a winning race with aged performers, which at that period was an exceptionally meritorious performance. As a four-year-old, she reduced her record to 2:10½; as a five-year-old, she together with Pretoria Wilkes 2:13½, placed the team record for pacers at 2:12¾ and it remained the world's record for about a month. In 1896 she won nine firsts, five seconds, a third and fourth out of fourteen starts, reducing her mark to 2:10¼. From that season on, she continued to race with great consistency, engaging in not far from a hundred and fifty races during her public career. After being purchased by Mr. Savage, she was shortly retired and during the remainder of her life produced three foals; two of them, Liberty Patch 2:08¾ and Power Patch 2:09¼, entered the 2:10 list this season, and the other, Cavalier Patch, now the property of H. D. Sober of Tarentum, Pa., will ultimately do likewise, as he displayed extreme speed before meeting with an accident which caused his training to be discontinued temporarily.

NOTES and NEWS

Winter.
Zero weather.
And a bit of sleighing.

◈ ◈ ◈

So reads the Horse Review's salutation in the "T. and P." department.

◈ ◈ ◈

Ours is a bit different. Scratch out the above and pretend this is the head of the column:

◈ ◈ ◈

Winter time.
Pleasant weather.
And some fast matineeing.

◈ ◈ ◈

And then add this:
Green grass on the range.
Wheat and barley looking fine.
Alfalfa making mighty nice pasture.

◈ ◈ ◈

Give the grazing bands a bit more salt—fresh green feed is pretty soft.

◈ ◈ ◈

And then peel an eye at these two "side by each":

◈ ◈ ◈

Chicago, Dec. 26, six below zero!

Riverside, Dec. 26, San Jacinto lowers track pacing record to 2:09½!

◈ ◈ ◈

There were places steen degrees colder than Chicago on that day "down east," but Chicago will do for comparison.

◈ ◈ ◈

Do you blame us for picking on Chicago? Look at what John C. Bauer sprung in the Christmas Horse Review:

◈ ◈ ◈

"Chicago has a world-wide reputation as a climatic paradise. (You gentlemen of California and Florida please keep quiet)."

◈ ◈ ◈

Well, who said anything?

◈ ◈ ◈

Anyway "we ain't no gentleman"—just plain Bill—so that lets us out.

◈ ◈ ◈

When we win one more heat we will be "Sheparded" and go to the barn!

◈ ◈ ◈

Who put Maymack in the world's record list?

◈ ◈ ◈

Hush, chile; Charlie de rider, ob course!

◈ ◈ ◈

Get the hook!

We'd rather have that than be "Sheparded," anyway.

◈ ◈ ◈

The printer is to blame for this—he wanted something right quick to fill up a hole in the last form, and New Year's eve coming on right now.

◈ ◈ ◈

He says two more lines will do.

◈ ◈ ◈

Two lines? Thank heaven for that!

◈ ◈ ◈

We heard you say amen! (That's the two.)

◈ ◈ ◈

And one for luck—Happy New Year!

◈ ◈ ◈

Dan Hanna of Cleveland, Ohio, long time friend of the trotter and prominent road and matinee driver, spent a few pleasant hours in San Francisco recently, en route home from a trip to Honolulu.

◈ ◈ ◈

The hoof-and-mouth outbreak has caused the Canadians to quarantine against United States horses, so that they will be unable to compete in the winter program of ice racing.

◈ ◈ ◈

California horses and horsemen lost a mighty good and valued friend last Saturday when death claimed Wendelin J. Miller of Chico, breeder of the pacing champions Capitola and John Malcolm. More fitting note of our misfortune appears elsewhere.

◈ ◈ ◈

Mrs. Anita Baldwin McClaughry, daughter of the late Lucky Baldwin, has applied for and been granted the registration of a number of thoroughbreds bred at Santa Anita, which leads to the inference that she may race a stable of horses from the old place that produced so many sensational winners.

◈ ◈ ◈

Eastern rumor has it that Vance Nuckols will apply to the civil courts for relief from the penalty of expulsion recently imposed by the trotting tribunal. Our guess is that Vance will in no way hasten his reinstatement by such a course.

◈ ◈ ◈

Will Hall, the Chronicle's former handicapper who has been doping them out on the Canadian circuits and in the east this season, has been spending the holidays with San Francisco friends and reports that thoroughbred racing is coming back strong in the sections visited. He is most optimistic over the outlook at New Orleans, and will probably go there to take in the "business men's meeting" which is scheduled for the forty days following January first.

Ed Geers took J. Malcolm Forbes 2:08 to Memphis to sample for next year, and the son of Bingen evidently still "has it with him" as he worked recently in 2:12½ for the G. O. M.

◈ ◈ ◈

"Diamond Joe" Costen, a familiar figure to followers of the Grand Circuit for many years, died recently at the Hotel Breslin in New York. The safe in the office held $30,000 in diamonds for him at the time of his death, and his trunk revealed several thousand dollars in large bills, checks, and other valuables.

◈ ◈ ◈

E. R. Dunn of Seattle who is wintering at San Jose, was among our callers this week and speaks enthusiastically of the spirit of enterprise displayed by the the second for her dam Bell Andrews, by Billy Andrew track manager, T. O. Webber, as Mr. Dunn states that there is a marked improvement in the methods of running the grounds from end to end.

◈ ◈ ◈

The Nelson controversy is raging with unabated violence in Chicago, in spite of the recent cold spell. The bike folks have brought up more of their heavy artillery, and the high wheel advocates have made numerous sorties with their cavalry, backed by a number of bomb spilling airmen. When will this crool war be over?

◈ ◈ ◈

Duke of Ormonde, the seven-year-old son of Orsini-Santa Bella, has been purchased from the estate of the late Wm. O'B. Macdonough by Garret D. Wilson of Kentucky. Only six of the 1912 foals by Duke of Ormonde were registered, and of these but two were started in 1914, one being the winner Andromeda. W. M. Wallace is reported to have refused an offer of $6000 for the Duke of Ormonde—Gold Lace yearling purchased at auction last September for $900.

◈ ◈ ◈

Last week we wrote "Alarich, bred by Chas. W. Winter of Alhambra and at present the property of Wm. Loftus of Whittier," and also referred to "Ed Sewell of Santa Paula," but the "jinx" caught us in the Christmas hurry and it appeared in print as "Chas. W. Whittier" and "Ed Sewell of Santa Rosa." All we have to say is that a man who never made any "mistakes" in his life would be blamed lonesome—especially in San Francisco on Christmas or New Year's eve!

◈ ◈ ◈

Josephine Watts (3) 2:09½ is the third 2:10 performer for her sire, General Watts (3) 2:06¾, and the second for her dame Bell Andrews, by Billy Andrews 2:06¼. Bell Andrews has a chance to reach the high mark of Paronella in producing 2:10 speed, as she is the dam of Bierne Holt 2:11½, Silk Hat 2:09½, Josephine Watts 2:09½, Miss Watts 2:11½ that was timed in 2:07 in a race this season, and Royal Watts that trialed in 2:12¼. She is now only fourteen years old ,and in perfect condition and should be at the height of her breeding capacity during the next few years.—Horseman.

◈ ◈ ◈

Some days ago we received from Secretary Delorey of the Los Angeles Driving Club an extensive program of events which the club proposed staging last Saturday or Tuesday, rains permitting. Going to press considerably in advance of our regular time we have not yet learned whether the meeting was held as planned, but if so we will have a complete account next week. At all events we hope it was held before the end of the year on a good track, as in that case California had an almost sure new 2:10 trotter, and a good chance to regain the pacing championship for three-year-old geldings.

◈ ◈ ◈

William Morrison, Elmo Montgomery's right hand man in the training and racing business, dropped in to say hello Tuesday and impart the news that Jim Logan 2:01¾ and Lock Logan are "back at the old stand" at Woodland where they will shortly be joined by the youngsters that Elmo has been jogging at home. It was the original intention to winter at Sacramento, but considerable inconvenience was experienced by Mr. Montgomery in making the frequent round trips from his home to the State fair grounds track, hence the move back to Woodland, easily reached by auto from the Montgomery ranch at Davis. Woodland didn't seem exactly natural without them, anyway.

◈ ◈ ◈

At the Columbus Driving Park they are racing over the ice, with the footing nightly restored by an application of a liberal dose of water spilled from the old reliable sprinkler. In this way a coating of several inches of ice has been laid in the straightaway and eighths are being reeled off on both side of :15. This is one branch of winter sports we are compelled to foreswear, but we 'spose we'll "manage to make out" with matinee pacers hitting the good old plain dirt faster than 2:10. Then the chariot races and battle of roses at Pasadena helped out some, and there are more matinees we haven't heard from yet. It's hard, of course, but we'll manage to pull through someway on our own brand of midsummer winter sports.

TODAY!

Three per cent entries close for the $20,000 Panama-Pacific stakes for 2:10 trotters and 2:06 pacers. F. W. Kelley, Sec., 610 Exposition Building, San Francisco.

Make entries for the Occident Stake of 1917, for trotting foals of 1914. Chas. W. Paine, Sec., Sacramento, Cal.

The program announced for the winter meeting of the Cuban-American Jockey Club provides purses ranging from $500 to $1000 for the main events, racing commencing January 7 and continuing for sixty days. P. A. Brady is to be the presiding judge, James Milton starter, and T. C. McDowell, W. P. Burch and C. H. Lansdale the stewards.

◈ ◈ ◈

The heavy rains caused racing at Juarez to be postponed for several days this week, but the weather is not the only game that the association there is up against. Attendance has been poor, with the betting very light owing to dissatisfaction with the syndicate's odds. It is also rumored that Mexican authorities are interested in an outside book which accepts wagers on Juarez entries and for other points as well, and present indications are that the meeting may be cut to fifty days.

◈ ◈ ◈

Secretary Delorey drops us a line from Los Angeles to the effect that the McDonald stable is quartered at Exposition Park, and that both Mr. McDonald and Assistant Trainer Ed Avery are more than pleased with the winter climate and the track and stable facilities offered by the Los Angeles plant, and well they may be, for the track is the peer of any for winter work and the stables provide solid comfort and convenience. Star Winter 2:05, McCloskey 2:06¼, The Duchess 2:07¼, Laramie Lad 2:09½, Adbell M. 2:09¾, Baron Todd 2:11¼ and Margot Hal 2:04¼ are the members of the stable that are attracting the most attention, and the entire string is in the pink of condition. Mr. McDonald and family are comfortably located at 730 Carondelet street, and with the winter delights for which California is noted to engage their leisure hours it is quite probable that the exposition trots will come all too soon for their pleasure.

CHICO TRACK PASSES OUT.

The course that has been foreseen for some time concerning the old "Speedway track" at Chico has at last been taken, and within a short time the parceling out of the famous grounds to individual buyers of small tracts will have begun and the Speedway will be no more. Trials and troubles a-many have beset the Chico track in recent years, and since 1911 there has been no meeting given there. For the last year or so the grounds have been preserved intact largely through the efforts of the late W. J. Miller and Loren B. Daniels, who have used it as a training ground. Mr. Daniels shifted his headquarters to Sacramento, and a few days ago title to the grounds reverted to the original owner, J. F. Entler, and the work of subdividing it into ten-acre tracts was immediately gotten under way. It is understood that existing improvements will go with the grounds, so that new owners of some tracts will find considerable building material right at hand.

The grounds at Chico are convenient, nicely improved, the grandstand is a commodious double-decker, and the track is one of the best on the coast. It has been the scene of some historic battles, and its passing is regrettable but inevitable under existing conditions in California, as the land value is very high and its earning capacity as a fair grounds or racing plant practically nothing. The association has tried hard to hang on until relief was in sight either in the shape of a district fair appropriation or the restoration of pool selling, but were forced to give up the struggle.

Chico and Butte county are "trackless"—and some day a racing plant will have to be built all over again. Here's hopin', anyway—and the old gal cashes in with her boots on, which helps her memory!

DENMARK PROHIBITS EXPORT OF HORSES.

Copenhagen, Dec. 26.—The export of horses from this country has now been totally prohibited, after various restrictions previously published had not had the desired effect. The number of horses which have been exported to Germany since August cannot be given. The statistical department has been forbidden to answer the question, but in circles that ought to know—that is to say the trade—the figures are estimated at 100,000. Denmark is a horsebreeding country, but the annual export under normal conditions rarely exceeds 30,000. Despite the huge export, there is no scarcity here, and the farmer and the army have all the horses they want. Complaints are made that the government did not put an export duty upon horses when the boom commenced, for without affecting the export such a tax would have brought a large sum into the exchequer. As it is, enormous profits have been reaped by private individuals, who took advantage of Germany's embarrassment, knowing that money was no object. German buyers have now left for Norway and Sweden, where the export of horses has not yet been prohibited.—Press Dispatch.

All of which is both interesting and instructive, and is simply so much more evidence in support of the contention that we have made ever since the opening of hostilities, that the horse breeders of America are on the eve of the greatest period of prosperity that they have known in many, many years. Sell all the geldings or scrub mares you will, but hold onto your matrons of any degree of desirability, breed them to the very best stallion you have access to—and in this day and age almost every locality affords a few good sires—and you will be amply repaid in future cash returns.

THE NESMITH YOUNGSTERS OF THE CLAY EDWIN FAMILY.

Writing from Los Angeles concerning the nearly a score of youngsters at his establishment that are descendants of the dead Clay Edwin 0972 (full brother to Edwin Clay 2:08¾ and Amber G. 2:13¼), Mr. Wm. H. Nesmith states that in over forty years of intimate connection with the breeding industry he has never struck a bunch like them, as he has yet to put the harness on a poor one or one that does not possess natural speed. Some of the family were bred by him at his former home in Chillicothe, Missouri, but quite a number have been foaled since he has been a resident of California.

Julia Clay has held the Pasadena track record for over two years, her two circuits of that oval standing as a matinee mark for Southern California. Her best mile since has been in 2:08, last half in 1:03½, last quarter in :29¾. Just before the recent rains Mr. Nesmith gave her a week's light jogging and an easy workout, and three days later she stepped the last half of a second mile easily and of her own free will in 1:05. Her pilot is confident of going the route this season in 2:05, so she ought to make them trot to beat her when she starts for the money.

In Happy Clay Mr. Nesmith has developed a double gaited chap that takes kindly to either way of going. Originally put to pacing he soon stepped quarters in :30 and halves in 1:04; put to trotting he went the route in 2:19, half in 1:06, during his fifth workout, and later worked three heats at the trot in 2:16, 2:16 and 2:17. After he had not paced for over a year Mr. Nesmith tried a little experiment with him and paced him a mile in time of his own choosing in 2:15; twenty-five minutes later he came back out carrying five ounces more weight and with his head lowered and without urging by whip or tongue trotted a mile in the same notch. Three days afterward at Pasadena in a matinee he won a sixty-five dollar harness as a trotter, defeating Alarich, St. Patrick, and other good ones.

Clay Bell, a full sister to Julia Clay and a year younger, with short work paced quarters in :32, and put to trotting turned her fifth workout in 2:26, half in 1:11. Happy Clay, full brother to these two, early in his work trotted miles in 2:24, with quarters in :35. King Clay, at two and a half years, with thirty days' jogging to cart, paced in 2:29 at his third hitch to a bike, and has since turned the trick in 2:16½, half in 1:05, quarter in :32, and eighth in :14¾, so that it looks like a case of "there with the goods" for him.

Mannie Clay with little work paced quarters in :36 as a three-year-old, and Imbro Clay, three years old, the only son of Imbro 2:12¼ and out of Bedelia Clay, has had but little and infrequent work, but a few days ago trotted quarters in :36. Bedelia Clay and Birdie Clay were barely broken to harness when they trotted below three minutes, and the remaining youngsters all show equal promise. Though a long time breeder, the education of the Clay Edwins has been Mr. Nesmith's first active training in person, and the results attained are certainly gratifying.

In addition to these Mr. Nesmith is handling his fast Star Pointer—Direct stallion King Lilly Pointer and four youngsters by him from Clay mares.

FASIG-TIPTON CO. MAKE RUSSIAN SHIPMENT.

American breeders who have figured that the European market for our trotters is entirely shut off owing to the war will learn with surprise of the recent shipment made by the Fasig-Tipton Company via the Wilson line to Hull, England, from where the journey will be completed to Russia by way of Norway. The "personnel" of the consignment is as follows:

Stallions.

Vice Commodore 2:11 (sire), b. h., foaled 1901, by Bingen 2:06¼, dam Narion, by Arion 2:07¾; second dam Nancy Hanks 2:04.

Del Coronado 2:09¾ (sire), by McKinney 2:11¼, dam Johannah Treat, by Thomas Rysdyk. Brown stallion. Foaled 1897.

Zolock, pacer, 2:05¼ (sire), b. h., foaled 1895, by McKinney 2:11¼, dam Gazelle 2:11½ (dam of Zephyr 2:07¼, etc.), by Gossiper.

Cascade 2:06¾, ch. h., foaled 1907, by The Peer 2:15¾, dam Cuneiform, by Lord Russell.

Memaster 2:11 (sire), br. h., foaled 1903, by Moko, dam Ozama (dam of Ozanam 2:07, etc.), by Director 2:17.

Mares.

Miss Adbell, pacer, 2:06¼, b. m., foaled 1902, by Adbell 2:23, dam Luzelle (dam of Borazelle 2:09¼, etc.), by Patron 2:14¼.

Icon 2:10, b. m., foaled 1902, by Peter the Great 2:07¼, dam Alberta by Albert W.

La Boudie 2:10, b. m., foaled 1903, by Wilask 2:11, dam Resemble, by Earl.

Carmen McCan, pacer, 2:09½, br. m., foaled 1905, by The Bondsman, dam Peekaboo, by Kaiser.

Neva 2:10¼, br. m., foaled 1903, by Kellar 2:16¼, dam Eda Orr 2:16½, by Atwood. In foal to Silent Brigade 2, 2:10¾.

Tuna 2:08¼ (dam of Tuna Z., 3, 2:12¼), b. m., foaled 1900, by James Madison 2:17¾, dam Ituna, by Steinway. In foal to Dillon Axworthy 3, 2:10¼.

California is more than well represented, and it is hoped that our old campaigners will arrive safely at their new homes across the sea. The fact that the big horse dealers are able to market horses of this caliber abroad in spite of the conflict that has embroiled the other half of the world is most excellent proof of the hold the American trotter has gained in foreign lands to which he has been introduced.

DEATH OF JOHN H. SHULTS.

John H. Shults, the widely known breeder, died at his apartment in the Murray Hill Hotel, New York, on Thursday night, Dec. 10, after an illness from pneumonia of but six days' duration. He was stricken with the disease on Dec. 5 when about ready to journey with his family to the south for the winter.

Mr. Shults was born in Germany about seventy-nine years ago and came to this country when only fifteen years of age. He commenced his career as a baker, and by dint of great energy he successfully established the greatest bread making industry in the country. He later organized the Shults Bread Company, with a capital of $6,000,000. For some years past he has not been in active business.

He had been one of the best patrons of the trotting industry in the United States, and at one time one of the country's biggest breeders. He made a sensation when he bought the stallion Pancoast 2:21¾, about 1886, for $28,000. This was the first really noted horse purchase Mr. Shults made, and it marked the beginning of the later world's noted breeding establishments of Shultshurst and Parkville Farms, at Port Chester and Brooklyn, N. Y. In 1889 he paid $8,500 for the yearling colt Baron Rose, son of Stamboul 2:07½ and Minnehaha, which at that time was the largest auction price paid for a youngster of similar age. Baron Rose obtained a four-year-old record of 2:29¾, but proved a disappointment in the stud, although the precocious stallion was a sire at the early age of six years. He bought the now great family establisher, Axworthy (3) 2:15½, as a colt, developed him into a noted sire, and sold him some years later to William Simpson, of New York, for $21,000. Axworthy was the greatest stallion that Mr. Shults placed upon his notable farm. His successful rising young son, Guy Axworthy (4) 2:08¾, was bred at Shultshurst Farm, which is probably the best trotter raised by Mr. Shults. During the same quarter of a century life of the Parkville Farm, Mr. Shults employed many of the best trainers and drivers in the business, having in his employment at one time more than one noted trainer. Chas. G. Moser, Andy McDowell, Al. Thomas, W. W. Shuitt, Mart Devery, John Cheeney, Frank Philips, John Driscoll, and many others aided materially in creating the great breeding establishment.

Some years ago Mr. Shults sold his Parkville farm for about a million and a half dollars. The last horse bought by the prominent breeder was the yearling colt Junior Stokes (1) 2:20¼, (3) 2:19¼, by Peter the Great 2:07¼; dam Tillie Thompson, which was sold in the Old Glory sale of 1912, for the sum of $2,600. Although Mr. Shults has not been actively engaged in his hobby to any pretentious extent for the past few years, his large breeding operations produced many trotters whose representatives are among the big winners of the turf for some years, and that will likely continue as such for decades to come.

Mr. Shults' demise takes one of America's old-time and greatest breeders. He is survived by a wife and daughter.—Horse Review.

PROPOSED CHANGES IN GRAND CIRCUIT RULES.

The Grand Circuit rules committee met December 22 in Cleveland to consider the plan of conducting racing on the big line in 1915, and will present a number of recommendations to the stewards of the circuit when they assemble in the course of the next few days at Detroit. Several important matters were discussed, and the committee submits these proposals to the governing body:

First it is proposed that the Grand Circuit have charge of the judges' stand and that section 2 of article 11 shall read hereafter:

"The stewards shall appoint a starter and judges for the circuit and the expense of the same shall be assessed pro rata upon the members which are assigned dates at the annual meeting."

In order to eliminate all trifling with the present race record rule the committee requests that the parent racing associations shall amend the win-race rule to give the judges of a race the power to inflict an eligibility record on a horse which wins a heat but does not win the race, providing the judges believe that the driver intentionally lost the race.

Entries to all races will be limited to not more than two horses from an actual owner or from an authorized agent.

In all early closing events horses must have a win record which makes said horse eligible to the event, and no horse shall be eligible whose non-winning race record (heat record) is faster than the record defined by the class of the said early closing event.

One horse may be named in two races during the same week for a total of 7 per cent, but must pay full 5 per cent for every start.

Hereafter racing conditions must specify if two or more horses from the same stable shall be allowed to start in the same race.

Race allowances of 1914 shall be continued in 1915, if claimed at time entry is made. This includes the four second allowance, earned by not finishing within the money.

The above alterations are either additions or modifications to the present code, but the following recommendation is an innovation to racing methods.

After a long debate the committee was unanimous in recommending that each member of the Grand Circuit should try out the four-heat race as proposed by H. D. Sheppard, secretary of the Columbus Driving Club, discussed elsewhere in this issue.

MATINEE AT RIVERSIDE.

While the Atlantic seaboard and the central west were gripped by the coldest weather experienced in years on the day after Christmas, things went on much as usual in California. A welcome rain visited portions of the state, but down at Riverside they celebrated the 26th of December with a rousing matinee, the first of such events held over the new track. Five classes and a special filled out a nice program, and the time in the special speaks pretty well both for track and weather conditions, as San Jacinto established a new pacing record for the track of 2:09½, the former record being 2:11¾, that being the fastest heat paced by Della H. at the fair last fall. G. H. Judd's May D. annexed the 2:35, best time 2:32; Ula Tolus (O. E. Folk), the free-for-all trot, best time 2:15; Frank H. Holloway (Hemet Stock Farm), the 2:24 mixed, best time 2:25; Halo (Perry Patton), the 2:20 hobbled pace, best time 2:22½, and Hi Yu (C. D. Hatch), the 2:35 trot, best time 2:31.

CALIFORNIA THOROUGHBREDS SELL WELL AT CHARLESTON.

That thoroughbreds are coming into their own again in pretty fair shape was evidenced in the recent sale at Charleston, S. C., of a number of yearlings and horses in training from the stables of Lawrence & Comstock, largely the product of their Oakwood Stock Ranch in Placer county The yearlings sold as follows: Black filly by Joe Carey—Bonnie Lissak, $1250; bay colt by Salvation—Mi Reina, $1200; bay colt by Tim Payne—Arcadia Belle, $1150; chestnut colt by Salvation—Illusion, $750; chestnut filly by Salvation—Escarola, $625; bay colt by Joe Carey—Sain Shot, $350; bay colt by Tim Payne—La Poeta, $275; bay filly by Salvation—La Reine Empress, $250; chestnut colt by Salvation—El Sonora, $200; bay filly by Tim Payne—Directa, $125; bay filly by Tim Payne—Ardiente, $100; brown colt by Joe Carey—Sula H., $100; bay filly by Tim Payne—Dally, $70. The horses in training brought these prices (the first three bred by A. B. Spreckels): Valas, b g (2) by Puryear D.—Olathe, $1025; Saturnus, ch c (2) by Solitaire II—Formella, $600; Al Bloch, br c (4) by Voorhees—Georgia VI, $425; Travel Light, b m (5) by Jean Beraud—Little Hackney, $100; Candleman, b c (2) by Extinguisher—Alma K., $40.

SPECIFICATIONS FOR HORSES OR COBS FOR THE BRITISH ARMY.

Previous operations in "army stock" by even fairly experienced horsemen have proven that choosing riders and gunners and marketing them at a big profit is no royal road to fortune, as in many instances the large percentage of rejections at the final inspection has knocked profit "galley west." That buyers or owners may pass judgment intelligently on animals they propose buying or selling, we present the following latest British requirements and grounds for rejection, for which we are indebted to Dr. Dalziel:

Example: For Active Service:

Height (without shoes), 14½ to 16½ hands. (5% grays.) Age, 5 to 10 years.

Riding Cobs (not ponies), geldings and mares (not in foal) in fair flesh and condition, able to carry 210 lbs., under active service conditions.

Sound in action, wind, eyes; practically sound otherwise.

Strong, active and sufficiently fast.

Good constitution.

Short, well-shaped back and legs.

Roomy, well ribbed.

Good, clear, straight action.

Strong, clean legs and feet, properly shaped and placed.

Quiet, without vice, well broken and mouthed.

Teeth complete, well shaped, not tampered with.

Color, not very light gray or white.

The remount officer is the sole judge as to suitability.

Grounds for rejecting any horse, no matter what his other conformation may be:

(a) Small, weak quarters.
(b) Flat sides (having due regard, however, to the country in which they are bought).
(c) Long, weak, bending pasterns.
(d) Split up and leggy or both.
(e) Small joints.
(f) Close hocks or action.
(g) Legs not being well placed.
(h) Any mark of brushing which is not clearly due to bad shoeing.
(i) Any indication of weak constitution.
(j) Very straight pasterns.
(k) Small or uneven feet.
(l) Vice of any kind.
(m) Evidence of fistulous withers.
(n) Evidence of any operation on the teeth.
(o) Bad condition.
(p) Parrot mouth or undershot.
(q) Capped elbows.
(r) Marks of whip or spur, not done under the eye of the inspector, or undue sweating, being properly indicative of vice or bad manners.
(s) Very short docks.

Drink Jackson's Napa Soda.

How I Would Manage a Meeting

Written for the Trotter and Pacer by FREDERICK WATSON.

Every so often someone springs a bundle of personal ideas regarding harness racing and the ways and means of conducting a successful meeting—sometimes substantial and sometimes fanciful. Generally, however, the men who submit them have certain grounds for their suggestions that at least appear valid and justifiable in their own minds, and from almost all of them some ideas may be obtained whose adoption or modification would lead to a betterment of conditions—in fact most of the improvements made in racing conditions have been the result of "far fetched notions," originally.

So it is with the following article which appeared in the Christmas number of the Trotter and Pacer, sponsored by Frederick Watson. Mr. Watson creates some natural conditions in basing his plans that are not always available to track managers in the way of location and surrounding population and a good many of his ideas are not applicable to the everyday conditions of the average track, but there are a number of suggestions that could be heeded with profit by any association.

Reasonable or unreasonable, however, it is interesting to note the conditions under which this one man of general experience in the game would conduct his meeting—or at least thinks he would:

By way of introduction to this article permit me to say that the various opinions expressed herein are entirely my own and I cheerfully assume all responsibility therefor; that the editor of this paper is in no way to blame for any remarks herein that may not be favorable to or acceptable by track managers, secretaries, associations, campaigning owners, drivers or any one in any manner connected with the light harness horse business or pleasure who may feel themselves criticized by any comments I may make. If any personal names are used they do not refer actually to the persons themselves as individuals, but are used to designate the various grades of those who take part in harness racing; for instance, the Murphy, Cox or Geers stable means a large stable handled by a prominent driver as compared to the one horse campaigned by Si Corntassle, of Podunk Corners. Unlike the man called upon to make a speech at a dinner, I cannot put forth the excuse "Unaccustomed as I am to public speaking (or writing), etc.," for I have been in print weekly for over ten years at a stretch, so do not feel the least bit bashful about expressing my opinion and expect lots of adverse criticism as a matter of course, so Mr. Track Managers, get together, get out your hammers and start the knocker's chorus, you won't disturb my peace of mind in the least. I expect a big howl of objections and shall be disappointed if I don't get it, for I am going to hand you some pretty radical suggestions in regard to managing a race meeting.

As I noticed for the past two or three seasons that the half-mile track meetings have been more successful and entertaining than those at the mile tracks, particularly those in the middle sections of the Grand Circuit series, I shall select a mile track for my field of operations and we will now presume that I am secretary and manager of a mile track located near some good sized city with a fair number of smaller towns and villages within a fifty-mile radius and the usual available country, or farmer, population within driving distance. I select the mile track in preference to the half-mile as I want the hardest business proposition of the two. In accepting the position as secretary I have also stipulated that I shall be manager in fact as well as in name, that I am "absolute boss," no committees or stockholders to take "instructions" from and no one, owner or stockholder, to object to or interfere with my management. As to the actual owners of the track, they must put a rental price on the property for, say, twenty days during which time they have absolutely no "authority" at all and also agree to permit me and those I employ to enter the grounds and carry out such arrangements in preparation of the meeting at any time within sixty days, exclusive of the twenty days above mentioned, prior to the meeting. If my meeting opened August 15, for instance, the track is mine absolutely from August 5 to August 25 with the sixty-day privilege commencing June 5.

For an association I would not have three, four or ten stockholders but as many hundred, if I could get them, and the shares would be from ten dollars up, perhaps it would be more financially correct to say that the subscription shares would be ten dollars each, but there would be practically no limit to the number a man could buy. I would require $20,000 or more to be subscribed in this manner: The track owners might put in $2,000 each if there were five of them and they wanted the big end of it and the other $10,000 would be subscribed by the hotel and business men of the city; the more subscribers I had the better it would suit my purposes as each one would be a booster for the meeting "because he had some money invested." The conditions of subscription would be simple. Whatever amount you subscribed you would stand to lose or pro rata of the amount in accordance with the amount lost on the meeting. If $20,000 was subscribed and $20,000 was lost on the meeting each man who put up $10 would lose $10, likewise would lose $10 for each $10 he put up. If the meeting was run at a net loss of $5,000 each subscriber would lose 25 cents of each dollar he put up. Equally so if the meeting was a financial winner each subscriber would get his money back and a profit pro rata on each dollar in accordance with the pro rata profit on the meeting. I make a special point of explaining this because I want to show that if one hundred men put up $100 apiece and two hundred men put up $50 apiece there would be three hundred financially interested boosters and if the meeting was a $5,000 loser it would cost the $100 men only $25 each and the $50 men only $12:50. and a meeting that cost $5,000 over and above all receipts would certainly mean a lot of money spent in and around the town, much of which would "drop into the cash drawers" of many of the above referred to subscribers.

Of course I know that it is easy to lose $5,000 on a meeting if you give a $10,000 purse and two or three others for $5,000 each, but that is a brand of foolishness I would NOT be guilty of. I might be called crazy in regard to some of my race track ideas, but putting up big money for early-closing events that developed into virtual cinch walk overs would not be one of my foolish moves. Regarding the amount and conditions of my purses offered I will speak more fully later.

From practical experience in a variety of occupations in and around race tracks I will say that the main cause of the failure to make trotting meetings pay is that the managers thereof devote almost their entire efforts to catering to the horsemen. They arrange their programmes to suit the campaigning owners and virtually have to do so because they call upon those horse owners to pretty nearly if not quite race for their own money; then they advertise, as they express it, "Where the horsemen will see it"; that part of it is all right when advertising FOR entries, but they follow the same plan when advertising the meeting itself. At the meeting where horsemen are catered to, any prominent horseman almost can get a "badge"; delays and postponements are permitted because some horse owner must be satisfied, everything is done to "please the horseman." Why, if all the horsemen within five hundred miles of the average mile track meeting were to come and all pay their way in it might make business for the coroner and undertaker, as there might be some deaths from heart failure due to the unusual operation of "buying" an admission ticket, but it would not make even a decent crowd, in numbers.

The three things necessary to a successful race meeting are: An attractive programme, a good attendance and good management. Of course, good weather is necessary, but that being uncontrollable by the secretary I will leave that feature to luck and Providence. An attractive programme not only means one that is attractive to horse owners, but one that is attractive to the gate paying public. It is easy to make a programme attractive to horse owners; simply make it easy to "get a piece of money" without having to put up big entrance fees. To make it attractive to the public it must be full of variety and excitement, carried out without tiresome waits and delays; races that are real contests, not jogging walk overs for the favorite and these must be managed like the quick relays of the ever changing circus acts with the view of pleasing the audience rather than the performers. To get the good attendance has been the puzzle of track managers for years and getting harder every year. No wonder, either, for there has been no advancement in their methods of trying to get the gate paying public to step up and buy a ticket of admission.

To get the attendance you must cater to the people both in regard to what they want to see and what they want to pay to see it ,and it is no use to expect a crowd at the gates even if you arrange an attractive programme at popular prices unless the crowd knows about what you have to show and what it costs to see it, therefore I would put the prices of admission on the "popular" basis, 25 cents to get inside the gates and this would admit to the centre field and up the stretch above the grandstand enclosure; 50 cents would include the grandstand at the wire; in addition to this I would have some reserved seats at 25 cents additional in the main grandstand, also some private boxes at from $2.50 to $5 each in addition to the $1 per head grandstand admission ticket, each box having five chairs. By this schedule of prices I would provide for the poor working man who liked to take an afternoon off at the expense of losing half a day's pay and who could not afford to pay admission rates equal to another half-day's pay; for the store clerk who would bring his girl to the races and could afford 50 cents apiece for admission, but could not afford $1 each; for the regular race goer who was accustomed to pay the $1 tariff and for the wealthy individual who wanted all the exclusive privileges that money could buy and did not care what it cost, and I would further take good care that everyone who read a newspaper or had eyes to see a poster on the wall or an advertising card in a store window knew that the cost of seeing the races was

25 CENTS, 50 CENTS and $1.

In addition to this I would give EVERY person who paid admission, whether 25 cents or $1, a score card free.

I never could see why the patron of a race track who paid $1 admission should be taxed ten per cent more for a programme, worse still at the twice-arounds where the admission is 50 cents. Of course, the idea is to "sell" the score card privilege, but I would get more money out of it for my association by selling the advertising spaces on the score cards at lower rates and making that space really worth buying by giving away the programmes; it is done at the theatres and variety show houses and can be done at the race track. I know many track managers will ridicule the idea of a 25 cents general admission fee because they argue that the man who would not give a dollar to see the racing that they furnish would not give anything; quite right too, only they overlook the fact that those they refer to are the very limited few regulars who are enthusiastic horsemen; the people I would go after are the many thousands who would like the fun but did not value it at a dollar; that amount would take four of the family to the best vaudeville show in town. If I got four thousand of these 25 cents people at my meeting, and I would get them, too, I would have $1,000 gate money that the one-dollar-gate-track-manager would never see no matter what size purses he gave.

Now, a few words as to advertising: As far as advertising for entries goes there can be no question as to the medium in which to insert the announcement of the meeting; the horse papers would get mine and get it big, but I would not waste my space giving detailed particulars of special conditions, etc., nor would I pay out good money to have the name of the association in large type and other entirely immaterial attributes of the meeting prominently displayed. The dates of meeting, rate of entrance fees, size of purses, name of city where the track was, list of classes, etc., date of closing of entries and secretary's name and address. There you have the six prominent features and those properly displayed in a quarter-page space would attract the attention of everybody who had a horse to race; at least they would the way I would have them "set up" and printed.

My conditions and the details of the classes etc., would be on the entry blank and although I would like to tell you minutely all about them I know that the editor could not spare the space here. Instead of saying "Under American (or National) Association rules" with exceptions I would say "with every exception I can possibly put in," for I personally have very little opinion of the value of those rules, and should probably break nearly every rule in the book that relates to track management. (That is my view of the case not the editor's.) I would not need the protection of the parent association to collect my suspensions, because I would not have any; no entry would be accepted unless the fee accompanied the entry and no horse could start unless the starting fee was paid, so I would not need any collection agency. I would have no book accounts either with the trainers of the biggest stables or the "home" trainers; everybody would pay spot cash or "nothing doing," and every purse would be paid spot cash at the wire. As to classes I would have handicaps at various distances and genuine selling races with all the recognized "selling race" rules that are in force on the running tracks; I also would have saddle races, handicaps, with weight up to handicap, also some genuine novelty races that would amuse the "non-professional crowd." Any heat races I had would be best 2 in 3 limited to ten starters and only the horses that stood for money could start in the third heat, if the race was still unfinished, and that would mean not over three starters in the third heat for I would have but

Three moneys: 75 per cent to 1st.
15 per cent to 2nd.
10 per cent to 3rd.

And my entrance fees would be:

One per cent to enter.
One per cent additional to start.
One per cent additional from money winners.

And no horse could appear on the entry list unless his entry fee was paid, no starter could get in the "saddling paddock" until he had a ticket showing that his starting fee was paid. This would apply to everybody, a Murphy, Cox, Geers or Si Corntassel.

All entries to regular events would close 15 days prior to the opening date of the meeting.

I would have some special events to which entries would close the night before the race and in my programme would be classes to permit the owner to start every horse he had from the top notch free-for-aller to the 2:25 class trotter or pacer that could not beat 2:15, each with an equal chance of getting in the money in their respective classes for each would race against horses of their own grade.

Now, boys, you who do the driving I mean, look at what I would offer: For $20 you could enter in a $2,000 purse; for $20 more you could start in the race if your horse was not sick or lame at the time starters had to be named, 5 p. m. the night before the race, and this would mean 5 p. m., not 5:05 p. m. and not the next day, and the "Twenty" would have to be

(Concluded on page 12.)

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

NEW YEAR'S EVE AT MONTE JUANCULO.

"Jack, do you know this is New Year's eve," explained my partner as he rose from the supper table and whittled up some plug-cut for his pipe. "The stage must be at the Bar and it would be kinder home-like if we were to get a letter tonight," he continued. "I haven't any real close kin, but if you are going down you might ask for me."

"All right," I answered, "it's getting kind of late to start, but I guess I can make it; I can at least make the store by sundown, for it's all down hill."

Shorty and I were living in a cabin on the middle fork of the Stanislaus and were removed from the trading store about five miles. The winter so far had been a mild one, but the road—or rather the trail—was exceedingly rough and precipitous. I left the camp after a few moments directed to compiling a list in the way of blasting powder and larder replenishings that were to be packed in to our mines the following day by the storekeeper on his burros.

I was called back after I had gone some distance by "Shorty" who met me within speaking distance, his voice pitched into a megaphone key, with the suggestion that I ask the storekeeper if he had any canned mincemeat.

"We can have a pie, anyway," was his parting shout. I nodded assent, and with a farewell wave of the hand, I was off again.

The trail led me through dense growths of manzanita and chaparrel. The madrone trees were luxuriant with their wealth of crimson berries. Great patches of gorgeous color were spilled everywhere, though harmonizing beautifully against the chrome green of the leaves. I had some art schooling back in the "States" (as we used to term the East), and I thought how correct Nature was in her color scheme.

The hills of the western middle distance covered with their coats of chemisal and deep purple shadows looked like some royal mantle in the setting sun.

The day was dying, and I was alone in the land of memories. I thought of my boyhood days at home, the preparations that night for the holidays, and I longed to be back that winter's eve with the old folks again. Lost in meditation, I had not noticed the approach of any one until I was saluted by "Jim," the Digger Indian who made periodical visits to our cabin, begging for chamuck, tobacco, discarded clothing or, in fact, anything that caught his eye.

If it was our day at home, Jim called, and if we happened to be calling ourselves we always knew that Jim had been there. He was up in social ethics, for he surely carried away something that would come in handy, just to remind us that he had called.

Jim and I are friends now, but there had been a coolness between us. Coolness, however, is hardly the word. It was rather a hot time—I remember the occasion well.

I was seated in the cabin one Sabbath morning doing my week's mending and heard Jim's familiar grunt outside.

"Mornin'," said he.

A cordial "hello" reassured him that he was welcome.

A discarded pair of trousers had been thrown across the branches of a laurel bush a few feet removed from the cabin door. Jim spied the garment and called my attention to the fact that his legs were sans covering.

"Presenta pantoloonas?" he asked.

"Yes; I no want 'em," I replied in pigeon English.

"Bueno hombre," said Jim.

"Don't mention it," retorted I.

Jim squatted himself on the ground and proceeded to draw on the misfits. Raising himself promptly to a standing position to admire them, he looked at me inquiringly for a moment—that expression I shall always remember with reminiscent glee.

Yelling as though all the Indians were off the reservation he bounded down the zig-zag trail, swearing like a demon. From every rent in the too-well worn trousers, and from every buttonhole and other means of exit, there buzzed yellow-jackets. They had taken up their abode in the seat of the pants and Jim had gotten inside of their firing line. They were handing out ammunition to him of the tobasco order, and I could hear the echo of his howls long after he had departed. He cut my acquaintance for a spell, but a few days subsequent I met him down the gulch, and squared myself with him by giving him a ham that was considerably off flavor. His legs on that occasion were marvelously and exquisitedw tattooed. There were unique patterns of fleur-de-lis and designs for crests with punctuation marks everywhere.

Jim has since gone to the "Happy Hunting Grounds," but I enjoyed his friendship before he passed away.

Well, to resume, I reached the store, ordered my goods, stood the storekeeper off until the next clean-up, secured two letters for myself and one Woman's magazine for the Widow Bangs, who resided a little farther up the gulch, gossiped awhile with the boys, and commenced my trip home. The night had fallen, and, after lighting my tallow candle and placing it securely in the lantern, I trudged along.

Thoughts of "Shorty" brought one regret. There was no letter or token for him, and I hated to go home without bringing him something, so I retraced my steps and bought him a new pipe and a stock of a little better brand of tobacco than he had been using.

"Shorty" had borne rather a hard name before I found him, and rumor had it that he had once dealt faro at Hangtown—ran a game with "Texas Bill."

The boys said that his partner had fallen from an elevation and broken his neck at a large gathering of miners one night, and that "Shorty" had left for our diggin's on the same date. I never asked my partner about it, for he had always been a good mate, and I though him all right. I was off again and up the trail for home.

Were you ever among the mines? Do you remember the old prospect holes and abandoned shafts? These were, perhaps, six feet in diameter and often more than one hundred feet in depth. The abandoned shafts were generally left uncovered, and often a stray horse or burro would fall in and perish. I had always a horror of falling into one of them. On the way up the trail that night my candle was extinguished by a sudden gust of wind. I felt for a match in every pocket in my garments, but in vain. I was in the dark and would have to feel my way. The night had grown intensely dark and there were signs of a coming storm, but I trusted to extreme caution to help me out.

The occasional hoot of an owl, and the rustle of some predatory animal, together with the fitful wail of the mind, did not help my vertebrae.

I proceeded cautiously in the darkness, but wandered from the trail. I was lost. Presently I tried to study my location, and after standing still turned in an opposite direction, stumbled—and stepped into space! My fears had been realized. I was in one of those dreadful pits.

Falling some distance I struck against a timber and grabbed it with a death clutch. It was badly decayed. The creaking noise as it settled into the jagged walls of the shaft, followed by the fragments that were displaced, gave signals that it was straining with my weight. What if it should suddenly give way and hurl me to the bottom of the pit to lie there maimed and bleeding without possible help. Perhaps I would be killed outright. Of the two options, if submitted when I was more composed, I would have chosen the latter.

I was badly frightened. I thought of my friends at home, of my past life, and the greed for adventure and Mammon which had lured me from home influences and peaceful environments and brought me to this miserable end. Great beads of cold perspiration stood out on my forehead, and I was almost gone from despair and exhaustion. I felt as though I had already been stricken with death and that the world was falling from under me. My agony was so overwhelming that I cried.

Another creaking of the support again warned me of my peril. The next warning was more violent and brought down quite an amount of the loose portions of the rock. Then came the crash, and then—Oh! horrors! I lost consciousness.

It was broad day when I came to. "Shorty" was standing over me. There was rebuke in his eyes and disgust in his voice as he exclaimed from the edge of a four-foot hole:

"You must have had a h—— of a bat aboard last night."

———o———

Rem-U M C Notes.

A total of 41 shooters came out for the shoot of the Lansdale (Pa.) Gun Club on Dec. 5. G. S. McCarty of Woodbury, N. J., tied for first place with scores of 46x50 while E. Springer of Wildwood, N. J., was a close second with 45x50. F. S. Tomlin of Glassboro, N. J., J. F. Hineline of Collingswood, N. J., W. H. Kling of Camden, and W. O. Downs of Pitman, N. J., tied for third place, getting 44 kills out of 50. All but one of the above named winners used Remington-UMC shells. This was the final regular shoot of the season.

An interesting meet was staged by the Missouri Athletic Club of St. Louis, on Dec. 7, at which the two high men, both of St. Louis, shot Remington Pump guns and Arrow shells. B. F. Williams carried off first honors with 94x100, F. P. Ford taking second place with 91 breaks to his credit.

The North Dupo (Ill.) Gun Club held a shoot on Dec. 9, at which T. F. Norton of St. Louis was high man with 83x100 using Arrow shells. The same shooting equipment was used by A. Killam who led the professionals with 99x100.

R. Jacob, Wm. Lowther and W. Robinson, all of St. Louis, shooting Remington guns and Nitro Club shells, took the first three places at a shoot held by the Stringer Hunt and Field Club of Brevator, Mo.

J. K. Andrews, of Straasburg, Pa., R. H. McCoy, of York, Pa., and Harry Zeamer, of Columbia, Pa., all shooting Nitro Club speed shells, carried off first, second and third honors respectively at the shoot of the Red Lion Gun Club held October 28.

RE-STOCKING QUAIL COVERTS.

Transplanting quail from one section of this State to another has been figuratively a thorn in the side of the Fish and Game Commission. For the purpose of restocking shot-out localities, or of infusing new blood in run-down bevies, quail have been trapped and liberated in new ground—but only a few times. The main obstacle in carrying out this scheme is the most strenuous objections raised by the sportsmen and others of the supply locality.

The "kick" and "roar" against taking away "their birds" is systematic and persistent, and who can blame the men interested? The Commission did several years ago trap quail in Monterey and Santa Cruz counties—not many, at that—and liberated the birds elsewhere. A good move and joyously acceptable to the fellows at the receiving end, but report is that the Santa Cruz and Monterey men have not to this day ceased expressing their dissatisfaction at the "loss of their birds."

Another illustration was when the Pacific Coast Field Trials Association endeavored to secure birds from the Bakersfield and Button Willow country, where the birds are in flocks of thousands in some sections, and well protected, too, the overtures were rejected emphatically, which action is a fair indication of the situation all round. That is the whole truth in a nutshell. It is difficult to secure a stock of blue or valley quail anywhere, so it is alleged.

The desert quail variety is plentiful in the lower part of the State and across the border, and could be secured in any necessary numbers. This bird, however, is undesirable. It will not thrive in every habitat where the valley quail does, particularly in the northern counties.

The Mexican quail, a bird just about first cousin to the valley quail, is easy enough to get and, it is reported, would fill the bill. Efforts tending to secure large consignments of this variety were progressing harmoniously until the unsettled state of affairs across the border during the last three years ensued and stopped proceedings.

That the valley quail can find congenial quarters elsewhere than in the coverts of the foothills is shown by four limit bags shot by a quartet of Stockton hunters on the "islands"—leveed and cultivated land, where the birds found a plenty of feed, with shelter and roosting quarters in the willows on the levee banks.

The Mearns quail is a variety found in New Mexico, Texas and Arizona, and which, from the description given of it, would probably thrive in California. It is not so game a bird as our California quail or the Bob White, yet it is a fairly swift flyer. Its food qualities are very highly praised by those who have eaten it. The Mearns quail would fall an easy victim to pot hunters, as it stands and regards with great curiosity all who come near it. Yet when flushed it goes away at a speed great enough to afford considerable sport. There is no doubt that after being hunted for two or three seasons the birds would become more shy, and would cease to deserve the name now given them—"fool quail."

The Mearns is about the size of our valley quail, and the male is beautifully marked, with stripes of black and white on his head, mahogany breast and flanks and a jet-black belly. The female is very sober in her colorings. These birds feed largely on roots, which they dig out with very sharp claws, also boring after them with their bills. The pinon nuts are relished by them, as well as the larvae of the crane fly, and various insects. This gives to their tender flesh a distinctive and delicious flavor that is furnished by no other bird. That they are hardy and able to take care of themselves is proved by the fact that the country to which they are indigenous is infested with owls, skunks, bobcats, foxes and coyotes. They can stand cold weather, and range the mountains to a height of 9,000 feet.

The feeding grounds of the Mearns quail can be distinguished by small holes of from two to four inches deep scattered here and there. These have been dug in search of roots, and in them the quail crowds, when approached, sometimes not rising until struck with a stick or whip. They rise more readily, though, at the approach of a dog, and fly a good distance. They do not gather in such large coveys as do the Bob Whites and the valley quail.

"Aside from his aesthetic and epicurean advantages," says a writer in describing him, "the Mearns quail has the Bob White beaten in one respect as a game bird—the male and the female are very unlike. The female Mearns quail can scarcely be distinguished from the female Bob White at fifteen feet, whereas the gorgeous markings of the male, particularly his black belly, make him conspicuous from the moment he leaves the ground. Of what immense importance this is to the careful, conscientious, or even careful, sportsman! On the covey rise, no valuable time need be lost, but on the contrary one's shooting should be improved by the moment required to differentiate between the sexes, which would bridge over that uncomfortable period before shooting time as effectually as the advice of Mr. Cleveland's old quail shooter of those who chew tobacco.

"The proportion of males to females among the Bob White quail is in favor of the male, perhaps somewhere near seven to five; it is quite two to one among the Mearns. Frequently coveys of from eight to ten birds are found composed entirely of males. This will be of inestimable value in the preservation of the birds, as taken together with the distinctive markings of the males, it makes the killing of 'seed hens' inexcusable."

HUNTING NOTES.

For regular and consistent limit bag returns, the duck hunters who have visited the Los Banos country have no cause for dissatisfaction. Early in the season sprig and mallard were plentiful. At present the birds in that section are mostly teal, widgeon and spoonbills. Geese and swans are also very plentiful, but those wary birds keep well up in the air out of range of everything save an aeroplane gun; swans, however ,are exempt. Members of the Field and Tule Gun Club, at Los Banos, have had no trouble since the opening day in shooting limits. Near Ingomar G. H. T. Jackson, Ramon Jackson and Andrew Jackson have had similar experiences. Theodore Kytka's recent Los Banos duck hunt was a limit bag of cinnamon teal. Widgeon and teal "by the million," is the report from Gustine and the West Side hunting grounds.

The latter resort is equipped with over sixty duck blinds. Gustine is also well established for gathering toll from the webfeet flocks. Both resorts have been the rendezvous of hundreds of gunners since the season opened. The machine brigade have had rather tough going over the adobe roads recently.

Nearby shooting districts, particularly the bay shore blinds, have kept the unattached trigger-pullers busy recently at less expense than the long trips to club reserves and with the pleasing results of fat canvasbacks and bluebills galore. In this respect there has been a shift of the shooting zone from one side of the bay to another, according to wind and weather conditions. Along the Petaluma creek marshes last Sunday, for instance, the shooting was over by 10 o'clock a. m., where a week previous the ducks were gathered in most plentifully. Below Black Point, out on the bay, however, a number of hunters were successful in getting canvasbacks.

Reports from the Sonoma and Napa marshes for the past week do not indicate that there was an avalanche of ducks up that way; the weather was too fine.

The sprig and mallard flocks that left the Suisun marsh section during the rainy spell seem to be working gradually back to the ponds and overflows again. These birds are reinforced with canvasbacks and bluebills from the bay, blackjacks and a few gadwall. Widgeon, teal and spooneys also have been a bit apparent. While the sport has been fair on the inside preserves the past week, the Joyce island gun clubs have had the best shooting. Up beyond Honker bay, at the Chiquita Club ponds, H. G. Hebgen, G. Finch, A. H. Drussick and Fred Kewell have recently shot mixed bags of mallard, teal, geese and canvasbacks.

Near Gridley, mallard ducks are the most plentiful variety in the marsh lands. At the Noyes Gun Club Frank Ruhstaller and other members have no trouble in getting limits each time out.

Along the San Pablo shore, near Pinole, big drafts have been made the past week on the visible supply of bluebill ducks. Hundreds of gunners have been enjoying the shooting offered along the Contra Costa shore the past week.

What is offered in the line of black sea brant shooting near the head of Tomales bay may be inferred from Al Wilson and Bob Sangster's three-day shoot, when forty-nine of these wary birds were bagged.

The annual harvest of spoonbill ducks is now being gathered by many gunners, who shoot on the lower Alameda marshes. The crop is a bountiful one, and the birds, northern migrants, are as fat as rolls of butter. Ray Chisler, who shoots on one of the ponds near Newark, has had several limit shoots recently. Arden Gun Club members and guests, Charles H. Kewell, Dr. J. Sylvester, Harry Sangstack, Jack Connolly, Anton Korbel, Rube Haas and others, have enjoyed fine sport at the club preserves on the big salt ponds near the Coyote hills. The Coyote Gun Club members, Dr. Gross and others, have also secured limit bags on the adjoining ponds.

Farther south, hunters who start out from the drawbridges have been getting canvasback limits. J. F. Knick, Dr. Cornwall, Ed Dowd, William Carrera, Louis Holdman and others, who work around from the bridges to Mowry creek, have been having good shooting. Hundreds of other gunners in that region have also had from good to fair sport. Bluebills have not been very plentiful. This variety will work down that way soon, it is believed.

Mt. Eden and Alvarado hunters have also had a cut in on the spoonbill visitors; that is, at the inside fresh water ponds. The bay shore gunners have got more canvasbacks than spooneys.

The Greenbrae marshes and the open bay waters off Point San Quentin have been well shot over recently by a big detachment of men and boy hunters, who have, on different days, when the weather was favorable to that district, got good strings of ducks.

* * *

Lynn Sischo of Los Banos was arrested on a charge of murder by Sheriff T. A. Mack, who placed his prisoner in the Merced jail. The arrest grew out of the killing of Deputy Fish and Game Commissioner George Rodolph, the warrant being sworn to by Irwin G. Rodolph of this city, the father of the dead game warden.

Earl Farnsworth, who was wounded by Deputy Farnsworth, is in a critical condition in a hospital at Los Banos. Sischo and Farnsworth are well known market hunters. The killing occurred when Rodolph overhauled the two for an alleged game law violation.

* * *

Game birds were reared at the State game farm near Haywards this year as follows: Pheasants, 2,665; quail, 193; wild turkeys, 216.

FISH LINES.

Many anglers up to this week had been exercising their time-honored privilege of grumbling—if not at the weather conditions, then at the reversal of fisherman's luck, when good fishing is offered, and but a short time, at the end of the open season, in which to enjoy it—for the close season began today.

Reports from Duncan's Mills, the objective point on Russian river for local steelhead rodsters, were that the river had cleared up enough to make it worth while for a try in the Austin pool. A dozen boats were counted about the Austin pool one day last week. The report that twelve steelhead were caught tensed up the local rodsters to the degree that some enthusiasts left Wednesday for the scene of trouble. The advance guard was followed Saturday by a large delegation, and a number of nice sized fish have been taken.

The Austin pool, in which flows the clearer waters of Austin creek, should be in proper shape for spoon fishing this week. At all events there are the good old stand-by baits, gobs of salmon roe and Tyee or prepared salmon eggs.

Russian river steelhead anglers have been bothered by the crayfish in the river. These crustaceans have become a decided pest—they clean the baited hooks as fast as the fishermen put out their tackle.

Credible reports are that many large steelhead trout have been speared in Salmon creek since the bar opened and enabled the fish to run up stream. Dave Hearfield, Ned Bosqui and other members of the Salmon Creek Rod and Gun Club were fishing the fine pools above the bridge this week.

A large delegation of California Anglers' Association members were on the tidewater banks of Paper Mill creek, near Point Reyes, Sunday. A week previous but few steelhead were caught there, although large fish were seen to run up stream. The charm of this fine fishing water is that it is a resort where bank fishing is easy and unobstructed, except on the up-stream stretches above the railroad bridge—the narrows, for instance, where the brush is thick, and the creek at present too deep for wading.

Nicasio creek's contribution of adobe-colored water was exhausted, making acceptable fishing water. In fact, a midweek trip by Michel Gario proved that there was a run of small steelhead fish going about three to the pound. He landed a nice catch and was progressing finely until he was located, or rather his bait was, by a large school of suckers. This bottom scouring pest is most plentiful in the Paper Mill tidewaters and is the bane of the trout angler. The suckers were evidently following the steelhead upstream to gorge on eggs of the spawning fish—that they are partial to fish eggs was shown by the voracious manner in which Gario's hooks were stripped of roe. It is not a bad plan in fishing this creek, or any steelhead water, for that matter, to try three baited hooks—the bottom double hook with fresh salmon roe, the next with shrimp and the third hook with an angleworm. When you find out what the fish's choice of bait is, use it.

A fine eleven-pound steelhead was caught by Harry Leap recently. While out shooting he saw the fish "rolling" near the mouth of Mud creek. He went after his rod and tackle and landed the fish in a short time.

For those who did not care to go that far, and during the few remaining days of the season, a trip to Mill Valley Junction put one in touch with the tidewaters of Mill creek, where nice baskets of steelhead have been picked up in past years. Or on farther to Escalle's where Ross creek offers the chance for a fine fish or more. W. J. Street landed two nice fish, and other anglers were lucky last week.

The report that large steelhead are in the tidal lagoon, on the shore, north of Point Bonita, should have prompted an investigation by anglers this week who are familiar with that location.

Napa creek, just above the town, has a good reputation for satisfactory steelhead fishing, under recent rainy and present fair weather conditions. The same hint applied to Sonoma creek at Schellville. Schultz slough, a tributary of Petaluma creek and the drainage outlet of San Antone creek, is in the same category.

In fact, during the past week, any of the Coast creeks having lagoons or the inside bay confluent creeks, have marked their location with fresh-water invitation to the steelheads, and the angler should have found it worth while to put his rod and tackle together. Across the bay, San Leandro creek, provided the water is flowing over the dam, is a sure bet for some steelhead. The lower waters of Alameda creek, known locally as Sunol creek, can always be counted on for steelhead under conditions such as the present. Large steelheads were seen during the week by passing hunters.

Stevens creek could hardly be suggested, owing to reported obstructions, which would keep the fish out. When the Crystal Springs dam is running over, the waste water running down the creek tempts trout up stream. At the lower end of the bay Penetentia, Coyote and Guadalupe creek tidewaters are well worth a trial.

Down the San Mateo coast, near Tobin, San Pedro creek, meandering unsuspectingly through the vegetable gardens, has produced many big fresh run steelhead in past seasons. The tidal waters at the mouths of Tunitas, San Gregorio, Pomponia, Pescadero, Gazos, Waddell and Scott creeks, all easily reached by machine, are well known and favorite steelhead fishing resorts, and were well prospected Sunday and the past week.

The Salinas river, at Moss Landing, the Carmel, below Monterey, and the San Lorenzo river and Soquel creek at Capitola, were also on the steelhead map, if past reputation for large fish and full creels are any guide.

* * *

The Fish and Game Commission has received from the State Printer 100,000 fishing licenses for 1915, which will be distributed throughout the State to county-clerks and others and be ready for purchase by the fishing fraternity after Jan. 1, on which date the 1914 licenses expire. Local rodsters can secure these necessary documents at any of the sporting goods stores or at the office of the commission in the Mills building. The amount received and turned in to the credit of the commission's fund for this year is $67,000 in cash. There is outstanding, and in the hands of various county clerks, about $18,000 which, when deposited with the State Treasurer, will give a total estimated at about $85,000 contributed in the shape of fishing licenses by the rodsters for the protection and propagation of fresh and salt water game fishes in the waters of this State.

In a way, what may be the benefits to the Waltonians for the license moneys paid in can be inferred from the following brief summary of trout and salmon fry bred at the various State hatcheries during the season of 1913-1914, viz.:

Sisson hatchery, trout fry 7,832,000; salmon fry, 21,307,115; Tahoe hatchery, trout 2,977,000; Price creek (Humboldt county), trout 406,000, salmon 3,948,000; Ukiah, trout 550,000; Wawona, trout 222,000 —a total of 37,242,115 trout and salmon fry. The State hatcheries have now on hand and ready for liberation early next year about two and a quarter million young salmon. Along with this the hatcheries planted 11,987,000 trout—steelhead, rainbow, Loch Leven, German brown and Eastern brook baby trout, and 21,750,850 salmon fry—a grand total of 33,647,850 hatchery-bred fish distributed throughout the rivers, creeks and lakes of this State during the season just closed.

* * *

The annual angleworm drowning convention will begin April 1, when the coast streams will be open for steelhead trout fishing, and black bass fishing in District No. 2. During the interim striped bass fishing in salt or fresh water will require a license of $1 for citizens or $3 for aliens or non-residents of this State.

* * *

The new government fish ladder at the Derby dam in the Truckee river has been strongly criticized by Fish and Game Commission officials of this State and Nevada after a recent inspection trip. The new ladder, it is alleged, designed to save hundreds of tons of fish from destruction annually while trying to pass over the dam, falls short of filling the plans and specifications in several phases. Senator Mills of Nevada, and Engineer Gilmore, have advised that the structure built be not accepted. The ladder, it is claimed, is 39 feet shorter than the original plans accepted by Secretary Lane, and accordingly it will be impossible for trout and other fish to pass through it and over the dam.

* * *

Possibly striped bass fishermen may be tempted to try Napa creek, near the railroad drawbridge, tomorrow, having in mind recent catches of large fish. Last Sunday E. J. Humphrey landed a 27 pounder, and L. Gotthelf captured a seven and a nine pounder. The San Antone regulars had another blank day last Sunday. As a matter of fact, the striped bass have deserted the bay waters. The net fishermen who have the faculty of locating the fish here and there and have taken but few bass for the past two weeks. The market shipments of striped bass mainly come from Martinez and Black Diamond. All of the bass caught are now taken in the San Joaquin river.

* * *

Salmon are beginning to run at Santa Cruz, a few having been taken during the past fortnight. During the present run of the fish up the Sacramento, an Oroville fisherman, Luther Wakeman, has hooked twenty-nine large fish at different times, his largest fish scaling forty pounds.

* * *

Halibut fishing, with rod and line tackle, is destined to prove one of the big attractions of Tomales bay in the near future.

—o—

Deer Numerous.—Fawns and does are more plentiful this fall than ever before, according to H. H. Guill of Chico, Butte county, special deputy of the Fish and Game Commission, in a recent report. In the Deer creek section, the land of Ishi, the aborigine, Guill declares that during three days' travel he saw 126 does and fawns and two bucks. "Deer are as thick as sheep," he said.

The young deer were feeding in the thickly forested mountain regions and may be found in herds all along Deer creek and along Mill creek, which has its source at the foot of eruptive Mt. Lassen. Guill predicts that the coming season, which is open in that district after August 15, 1915, will be one of the best in the history of the State. The effort to protect California game is beginning to bear results in all parts of the State. The persistent attack on the vicious, life-destroying mountain lions, it is claimed, is also doing much toward the conservation of the game animals.

The California Fish, Game and Forest Protective League recommends that the bag limit for deer be changed from two to one; spike bucks or younger fawns be protected, and running of deer with dogs be prohibited in open season.

FIELD DOGS.

Whether it is that less field dogs are being broken, that the quail shooters are beginning to better understand the value of the dog in hunting these birds, or that on account of the protection given the quail by the non-sale law the supply in many sections has increased and thereby multiplied the number of quail hunters, there has been a greater demand for field dogs for several seasons past than ever known in the State before. This demand has been so far in excess of the supply that many would-be purchasers have been unable to supply their wants.

There is a chance for some one, who will raise and break for private shooting a class of dogs full of hunting sense and devoid of the nervousness of the field trial candidate, to establish a good business in that line. The average sportsman has to be educated in the use of a field dog for some time before he can either appreciate or handle a high-class dog. For that reason the fast, wide ranging, nervous dog is not what he wants, nor in fact what he needs to begin with. If he goes afield with such a dog he is disappointed with him, and disappointed with his day's shoot. He cannot control him and cannot keep him where he thinks he ought to be. The result is that, be the dog ever so good, in the hands of the inexperienced man he becomes spoiled and is soon worthless. The result is that the dog is condemned because of the lack of experience of the man. No man can work a fast, high-strung, nervous dog and keep his mind on the size of the bag he hopes to make without spoiling the dog in a short time. The dog, therefore, for the inexperienced man to begin with should be what the field trial man calls a "plug" hunting dog. In other words a slow, non-excitable, quiet worker that will practically handle himself. After a season's work with such a one as this he will begin to understand the higher benefits to be derived from the use of a better animal. He will occasionally see even the sluggish worker strike a beautiful attitude on his points, worth to his growing love more than all the birds he has bagged in the day's hunt. He will then begin to see his dog's faults and try to correct them, and gradually take as much interest in the work of the dog as in the work of the gun. When he arrives at this stage of appreciation he will have learned how to handle a good dog and feel that something with more dash, more go, and more fire in him would materially add to the pleasure of his day's sport. When he has thus fitted himself to enter the higher school of sportsmanship—and not till then—will he fully appreciate a high-class dog, or will such a one be of any use to him. There are a few men, it is true, that may begin with the high-class trial winner as a shooting companion. But they are men of such a keen appreciation of animal intelligence that a fine cast, or a snappy, stylish point so appeals to their finer sensibilities that they almost forget that they have a gun in their hands in their admiration of the picture. Such men will watch every movement of their dog, and if he varies in the least from their ideal of perfect performance, he will be promptly corrected and kept under perfect control. But such are a very small minority of the inexperienced sportsmen.

It is for this reason that trainers fail so often to make sales of really good dogs; whereas if they would try to supply the demand for the slow, quiet, methodical worker in the first place, they would find ready sale for their better dogs a year or two later to the same customer when he had learned to appreciate and handle one.

Such dogs as the average man should begin with can be raised, broken and sold at the price the beginner is willing to pay. The mortality among puppies of this character is small. They are not nervous and excitable, and they train with but little work. You and I will call them "plugs," but they will point staunchly and they will retrieve. They are the objects by which the kindergarten lessons in upland shooting are learned, and as such they are necessary to prepare the beginner for the higher school wherein he learns to handle and appreciate the perfect high-class performer.

EXPOSITION INTERNATIONAL BENCH SHOW.

The failure of the A. K. C. Coast representatives to run the Exposition show—under A. K. C. rules—has prompted the Goo Goos to hold a rival show. In connection with this enterprise we quote a prominent sporting writer on one of the San Francisco dailies, which is timely and offers a suggestion or two for all fair-minded sportsmen:

"We trust that the dog show people will not become confused over the 'Panama-Pacific International Dog Show' and the so-called 'Golden Gate International Dog Show,' both scheduled for 1915 in San Francisco. The Panama-Pacific Show will naturally be the big attraction, from the fact that competition will be open to all. This show is being given world-wide publicity and is getting liberal contributions from persons in California who are always ready to aid projects that are to constitute features of the big fair. The 'Panama-Pacific' will undoubtedly be the greatest dog show of our time, and though there is no desire on the part of anybody to belittle or hinder those who are working to make the other show a success, at the same time the use of the word "international' may occasion confusion to persons residing outside of California and perhaps among a few of our own people."

THE NEW YORK SPORTEMEN'S SHOW.

The coming Sportsmen's Show, February 20-27, at the new Grand Central Palace, New York City, will be in the twentieth year of Sportsmen's Shows of international scope in New York City and the 1915 exhibition, because of unprecedented conditions due to the European war, affecting both industries and transportation, will be combined with New York's fourth annual Travel Show. As most sportsmen must under existing game conditions in North America be travelers to fish or hunt the temporary junction of these two exhibitions which have so many interests in common will be compatible.

The general manager of the approaching Sportsmen's and Travel Show is Captain J. A. H. Dressel, who originated and founded sportsmen's shows and who is working arduously and seriously to revive, rejuvenate and reform the sportsmen's show idea, which has during its twenty years of life, like most thing of human creation, undergone many mutations chiefly due to varying conditions of trade and sentiment. Despite the adverse business conditions sufficient commercial support and co-operation was assured by December first to warrant the carefully made statement that the high ideals of the best exhibitors and patrons of these popular exhibitions will be to a great extent realized.

Shooting and fishing lead the van of outdoor sports and these will be well represented but in addition every legitimate phase of the outdoor life will be considered and included. As one of the foundation stones of success for the next Sportsmen's Show and its successors an honorary auxiliary committee is being assembled from the ranks of big game hunters, naturalists, geographers, explorers and photographersof wild life. Leaders of the world in achievements in some of these fields are Americans and some of

these are held in reserve until the body of the committee is built up so that they can know and be satisfied with their associates. Acceptances in writing have already been received from Anthony Fiala, Dillon Wallace, James L. Boyce, Col. Charles L. Jones, Daniel J. Singer, Herbert K. Job, William Beebe and Charles Johnson Post. Some of the gentlemen invited are on lecture tours, others are in far-away lands engaged in field work and four are in the European war zone. When the committee is complete, with twenty-five members, its list will briefly state the achievements of each member and the books describing them of which the member is the author.

The actions of the show will be quite sufficient with trapshooting, fly-casting and the shooting competition, over nineteen rifle ranges, of the public school boys of the New York Public School Athletic League; besides, probably, archery, fencing maybe, and fire-making by friction and various other activities important in outdoor life.

Manufacturers of explosives, arms ammunition and other munitions of war, who also provide hunters with their guns and cartridges are unable to cope with their orders from Europe for military uses, but when peace returns, as it must eventually, the sportsmen will again be the principle patrons of the gun and loading companies and their interests and sentiments should not be neglected because Mars is an occasional good customer, and it is believed that this will be generally remembered and considered by the manufacturers who have heretofore supplied the commercial foundation for New York's old established Sportsmen's Show, which has always proved the annual rallying point for the hunters, anglers and all outers.

Drink Jackson's Napa Soda.

THE DU PONT POWDER COMPANY'S 1915 GUN CLUB TROPHY.

For several years it has been the custom of the Du Pont Powder Company of Wilmington, Delaware, to assist the gun clubs throughout the country in keeping up the interest of their members by suggesting attractive and equitable forms of contests among all members of the club, and by providing suitable trophies as rewards of merit for the successful shooters.

To keep abreast of the times in the matter of the form of trophies to be given, and to cater to the wishes of the shooters themselves has always been the aim of the Du Pont Company. Mention of some of the forms of trophies given in the past makes interesting reading, and at the same time indicates the trend of opinion among the shooters.

For years it was the custom to give silver loving cups as gun club trophies. These were followed by handsomely framed "DuPont Dog" pictures. Next came the bronze figures of pointer and setter dogs, and last but not least, the DuPont Company originated the idea of presenting gun clubs each year with appropriately designed and attractively gotten up sterling silver watch fobs.

The popularity of these fobs with the shooting fraternity has been undoubted, and have done much to make the local club shoots popular with and interesting to all, especially when the contests for same were operated on the very equitable "DuPont Added Target Handicap System" as suggested by that company.

For 1915 a still greater step forward has been planned by the DuPont Powder Company in the matter of its gun club trophies, and during the coming year they will present to local gun clubs throughout the country, for a series of contests similar to those which have been suggested in the past for other trophies, a handsome sterling silver full size tea spoon, especially designed and manufactured for the DuPont Powder Company by the world famous Jewelry firm—Tiffany & Co. of New York, whose fame as the leaders in their line is known and recognized throughout the world.

The idea of a spoon trophy, which is original with the DuPont Powder Company, must appeal to all trapshooters as an exceptionally good one. No matter whether a shooter is a "family man," a "bachelor" or a youngster just budding forth into manhood, he can find a suitable use for the trophy spoon, which is, by the way, a very "useful" trophy, and will appeal strongly to the "women in the case."

The design of the DuPont Gun Club Spoon is at once novel and appropriate, being a figure of a trapshooter worked into the handle, and the workmanship is the very last word in the art of die making and silversmithing. It is predicted that the DuPont 1915 sterling silver gun club trophy will be one of the most popular with the shooters of the many trophies offered by the DuPont Company to the trapshooting fraternity.

It is worthy of note, also, that the DuPont Powder Company is continually in the lead with new ideas which will be pleasing to the trapshooting fraternity, and which make for the advancement and popularity of the grand game of trapshooting, which is rapidly assuming a leading place as an out-of-door pastime.

The announcements to gun clubs and shooters of the DuPont 1915 sterling silver gun club trophy will be ready for mailing in a few days, and we predict the unprecedented popularity of this new idea of the DuPont Powder Company in the way of a season trophy for a series of local club shoots.

A HANDSOME CALENDAR.

Carrying out the annual custom, the Winchester Repeating Arms Company has issued, for 1915, a typical calendar—one of a long continued series illustrating and exploiting most graphically scenes in the hunting country and incidents that arouse the intense interest of sportsmen the world over.

The present calendar is up to the former appealing standard and will arouse the enthusiasm of every devotee of the sporting rifle.

A "battle in the clouds" is depicted by the artist which both in color, drawing and action is suggestive to a degree of a tragedy in wild life. A mountain goat—it may be on an abrupt cliff in the Rockies, Selkirks, British Columbia or faraway Alaska—is defending its offspring from the beak and talons of an eagle. The assaulting raptor apparently has the advantage of position—the goat, shielding the kid with its body, is fending off the attack with vigilant horns, and backed up on a narrow rocky ledge she stands holding off the enemy. Truly a striking picture and not exaggerated.

AN INNOVATION IN TRAPSHOOTING.

The "hand trap" designed by Jack Fanning is destined to become most popular with Coast shooters. This "little joker" has been given a thorough trying out and has stood the test satisfactorily. The operator can throw the targets at any angle or height and with a speed and curve unknown to the shooter. Forty-five to 50 yards, known angles, has been the usual trap proposition. The new device—called now the "Du Pont Hand Trap," can send a target 60 or 80 yards easily. The new trap has the endorsement of the expert shooters and can be had for a moderate price—$4.00. Every gun club should have one or more. Individual trap shooters will, we are confident, send in many orders to Wilmington, Del.

HOW I WOULD MANAGE A RACE MEETING.

(Concluded from page 8.)

put up right then, too; for this $40 you would have a chance to win $1,480 first money net, $280 second money or $180 third money. If you had a no-account horse in your stable that did not belong in the $2,000 purse grade there would be a $600 race that cost you $6 to enter and $6 more to start with the chance of winning $444 net first money, $84 net second or $54 third. Is this not better than paying $150 (5 per cent in a $3,000 purse) to win $1,500 first, $750 second, $450 third and $300 fourth, even if the extra 5 per cent from money winners is not deducted, and if it is you get $1,350 net first at a risk of $150 in the $3,000 purse, as compared with $1,480 net at a risk of $40 in my $2,000 purse. Same thing comparing a $1,000 purse; in the $1,000 purse you win net $450 at a rish of $50 as compared with $444 at a risk of $12. On the same ratio comparing a $10,000 purse under the old 5 per cent to enter and 5 per cent additional from money winners you risk $500 to win $4,000 net first money while in a $6,000 purse in my plan you risk $120 to win $4,320 net, in other words you risk less than one-quarter in cash at my meeting to win more money. Do you think my programme would be attractive enough to get a big list of entries—I guess yes.

Now in consideration of the low rate of entrance fees I would expect each and every "performer" to willingly conform to the rules that I would lay down for the meeting; these rules would govern the wearing of colors, promptness in replying to the call for starting each heat and race, general conduct of all who took part in the events on the track and absolute acceptance of regulations regarding badges and tickets. As to the latter I would make a big effort to overcome the "spectre" that haunts all secretaries, the complimentary list. First of all no owner could get a ticket unless his name (or stable name) appeared on the entry list; if his driver entered the horse in his own name, the driver could pay for the owner's admission ticket for it would be the only way he could get one. My rule would be, one badge for each individual name on the list and no more; one badge for each driver and no more. Diplomatic reasons might influence me to be a little free with complimentaries or "guest" badges for the city officials, etc., but otherwise the "Comps" would be mighty scarce and the "Press" would be the only applicant who would be sure of having his request for a badge favorably received. My own experience would lead me to institute a specialty in the "Press Box." There would be one for the actual "working representatives" who had to sit right down and make copy after each heat or race and another and larger press reservation space for those members of the press who were just visiting and did their writing (if any) afterwards. I would also provide a syndicate reporter myself who would make a correct, concise and attractive report of the day's racing, a copy of which would be furnished to the editor of every daily paper within a radius of twenty-five miles, who desired it rather than sending his own representative. By this means I would at small expense keep my advertisement of the meeting before the public all the week and "in the reading columns, too." Besides this I would do all kinds of advertising, the particulars of which would make a page article in this paper by themselves, so must be omitted now but you can bet your boots I would let people know there was a "good afternoon's amusement" to be enjoyed at my race track at a cost from 25 cents upwards, and in spite of all the ridicule the present day track managers might throw at me for these crazy suggestions of a very low entrance fee for the horsemen and a very small general admission fee for the public I would make my meeting a winner both from an amusement and financial standpoint. The first one I managed might not be so profitable, as it would be necessary to "show the public" that they could get an enjoyable afternoon's fun for their money and it would cost some of our "gate receipts" to circulate this news quickly and effectively, but I would win out and prove what I have always claimed: That the horse owners who supply the race horses to furnish the amusement at the tracks must be paid for their use and this can best be done by making very small entrance fees to the purses; that to make genuine racing, make it worth while to "try to win," the winner to get the big end of the purse; that the drivers are only "hired performers" and are paid by the owners so do not need to be "petted" and "idolized" by the track managers; fair, square, gentlemanly treatment is all they expect or want (if the entrance fees are very small); that the public will come and pay to see the sport if the rate of admission is made to suit all sizes of pocketbooks and the amusement is worth the price asked for it, and that it is necessary for success, to manage the meeting from an amusement standpoint on a strictly business basis and not from a "horseman's point of view." Although this is already a pretty lengthy article it does not contain the particulars of a tenth part of what I have studied over regarding managing a meeting, but it is already too long so I will "close the gates." Just the same, Mr. Track Manager, what I say goes. The solution of a successful race meeting is an attractive programme (very low entrance fees to the purses to attract the horsemen to enter and variety of contests to entertain the public); a good attendance (popular prices thoroughly advertised and a strong support by the local and nearby daily newspapers), and good management; give the gate paying public a good show, well conducted, worth the price of admission and you will get the "box" receipts, and the bigger they are the better and more varied the performance you can "hire" and your amusement business will increase and prosper like any other branch of properly managed commercial transactions.

THE STATUS OF THE FOOT-AND-MOUTH OUTBREAK.

[by Dr. Jacob Traum, Veterinary Division of the University of California.]

It is now over two months since the existence of the foot-and-mouth disease in this country was definitely established, but on account of its extent and the lack of full state co-operation, in some instances progress in controlling the disease has not been as satisfactory as expected.

Michigan and Indiana, where the disease first appeared, are now practically free from it; in such Atlantic Coast states as were affected and in Iowa the disease seems to be under satisfactory control; in Ohio and Illinois the condition is not quite so satisfactory; in Kentucky, where sufficient state funds were not available, the disease is spreading very rapidly. The cases reported near Spokane, Washington, were limited to one shipment, which was put underground, and since no other points of infection have been reported in that state, Washington was not put under quarantine.

Probably the most discouraging news as far as California is concerned is that in Montana, where two countries were under quarantine, ten steers on open range have been found infected. We have been frequently asked why the Federal Bureau of Animal Industry resorts to such heroic measures in combatting the disease when the mortality as a rule is very low. In answer I desire to state that the Bureau of Animal Industry has probably thought it advisable to resort to their methods of control after taking carefully into consideration the experience of European countries.

Referring to the reports made at the International Veterinary Congress held at Baden Baden, Germany, we find that Dammann, of Hanover, Germany, at this Congress said that without an absolute quarantine of the infected farms, preventing even the movement of persons, the control of foot-and-mouth disease is not to be thought of; but this measure, he says, cannot be executed. He further said that the very severe requirements of the sanitary law have not succeeded in eradicating the disease; and notwithstanding the quarantine of the infected stables, reinforced in many states by the quarantine of districts and often of a large zone around these, notwithstanding the very extended prohibition of animal markets and the supervision exercised over the abattoirs, dealers' stables, and railroad cars, the disease continued to prevail.

Dr. Loeffler of Germany at the same Congress said:

"Foot-and-mouth disease is spreading more and more every year; and every year it costs the German Empire enormous sums. Necessary measures have been taken with the greatest care; suspected grounds had been closely quarantined; this measure had been extended to whole communes, and even to entire districts; disinfection had been carefully carried out, and notwithstanding all this the disease kept spreading."

Hess, of Berne, Switzerland, at the Baden Baden Congress, gave as one of his conclusions that the most efficacious and economical measure to adopt against foot-and-mouth disease in most cases consists in the slaughter of all the infected animals. "The diseased animals," he said, "should be destroyed completely, including the hides and hair, and the exposed animals slaughtered under police supervision."

In England slaughter had been resorted to quite frequently in recent years to stamp out the disease when first introduced. Cope, speaking of an outbreak in that country, said, "It was eventually stamped out in the county of Kent, by the purchase, slaughter, and burial of several of the affected flocks."

Again Dr. Cope says:

"The more recent experience in the administration of the foot-and-mouth disease order of the board has gone to prove that under the new system of stopping the movement of stock in widely extended areas, and of slaughtering in every instance where isolation cannot be effectually carried out, a general outbreak of the disease can with certainty be arrested. This view is, I think, established by the fact that although the several centers discovered in 1900-1902 were very widely distributed in England and Wales, the measures adopted were so effectual that not a single case of foot-and-mouth disease found its way into a market, railway pen or truck, or into yards and lairs where animals are so frequently congregated by dealers prior to movement."

One must also bear in mind that while the disease is usually mild it may at times become malignant, as Hofner of Karlsruhe reported at that congress. He said foot-and-mouth disease had prevailed almost continually in Germany for a long series of years, and it had caused losses much greater than all other epizootic diseases combined. It had also been found that the disease, instead of following a benign course, as formerly, had during recent years become very malignant. In fact, in numerous sections hundreds of cattle had suddenly died, and certain estates had lost from a third to a half of their stock.

These are experiences from men that have tried isolation and quarantine and you will realize at once that quarantine is not only very expensive, but such quarantining as is required in foot-and-mouth disease is impracticable for any length of time. Another fact that must be taken into consideration is that in all the outbreaks that have visited this country the affection has spread very rapidly and there is no question but what a great portion of our cloven-footed animals would become affected were it not checked. Even if we leave out of consideration the actual loss by death; the losses occasioned by the temporary loss of flesh, reduction in milk supply and abortion and other complications, we should find that it would be many fold greater than cost of eradication as carried out at present, besides leaving us a disease which is extremely likely to reappear very soon.

SAVE THE BROOD MARES.

A horse in the present European war is said to last less than one month. During the early purchases of our horses, very rigid rules were enforced, requiring horses from 15 to 16 hands, proper conformation, perfectly sound and from 5 to 8 years of age with all solid colors. Practically any kind of a horse will now be taken, weighing 800 pounds or more, serviceably sound, from 4 to 10 years of age and nearly any color except white. Nearly every section of the United States where horses are bred has been visited by foreign buyers.

Near one Missouri town there are now 20,000 horses purchased for the English government, ready for shipment. A great many horses and mules have been purchased in the southern states where farmers have been forced to dispose of them, because cotton could not be sold. Usually at this time of year southern buyers are buying instead of selling. The southern output will necessarily have to be replaced in the very near future. There are many more horses leaving this country than the breeders and farmers know about. Purchases include many artillery horses weighing from 1,000 to 1,500 pounds and a large number of mules, two classes, for which best farm demand makes a good market every spring. This country can spare the geldings and mules, but it cannot afford to dispose of good brood mares. Every stallion and jack owner in the country should pay particular attention to keeping the best brood mares in his community. Too small or inferior mares are not desirable; but every good brood mare should stay here. This is an important time to the agricultural interest in this country. For a long time North America will be required to assist in feeding a large portion of Europe. This can only be done by thoroughly tilling the soil, which requires more horses at home.

The meat supplies of Europe are being devastated, which will mean more grain consumed for food. Everything points to great prosperity among the breeders of live stock in this country; especially horses and mules. A great demand is sure to come for agricultural horses. With nearly all of the light horses and mules leaving, this country will see a strong demand for better individuals to take their places.—American Breeder.

NEW ORLEANS MEETING WELCOME.

Judging from the reports that are coming from New Orleans the prospective race meeting which begins there on January 7 promises to be very successful. Horsemen who can possibly make it will go there in preference to some of the other winter tracks, as it is an ideal winter racing climate, and thoroughbred devotees have a soft spot in their hearts for the Lousiana town.

That Joseph Murphy is giving H. B. Brown of the Cuban-American Jockey Club a run to get horses is gleaned from the fact that Brown sent word from Havana that he would be in Charleston to arrange for the transportation of horses to go to Cuba as soon as the Charleston meeting was over. Brown's presence indicates that he is a bit doubtful as regards the number of horses he will get for his new institution.

Had not New Orleans butted in, as it were, there would have been plenty of horses for Havana. The split-up caused by the revival of the sport in the South will make horses a bit short at both places, and it is probable that Havana will suffer the more, as it is a more expensive trip to take horses to Cuba than to Louisiana.

The feeling of the horsemen regarding New Orleans can be judged by a letter from J. W. May, in which he says: "I heard Judge Murphy explain how New Orleans business men were going to conduct a high class, clean race meeting. There isn't a horseman in the country but isn't keen on seeing the sport restored in New Orleans, for every one loves the Crescent City, and I for one am going to do everything in my power to make the meeting a success."

These sentiments have been voiced all along the line, for with New Orleans reviving the sport it would be the entering wedge for California and other points which have suffered through adverse legislation.

Word comes from Hot Springs, Ark., that it is even betting racing will be resumed there within six months from date. This would mean that if there is to be racing at all it will be within the next three months, as February and March are the two months in the year in which Hot Springs flourishes. According to an authoritative news item from Arkansas a movement is being entertained to hold a meeting at Oaklawn, beginning March 17, to run for thirty days.

Care and Training of Trotters

$1.00 Postpaid

CARE AND TRAINING OF TROTTERS.

Costs only a dollar, postpaid. Order today before you forget, even if you do not wish book delivered till later.

Synopsis.

Chapter I.—The suckling colt—first milk—treatment for diarrhea—in pasture—feeding paddock—mannering the colt.

Chapter II.—The weanling colt—feeding—halter breaking—leading beside pony—booting—bitting—ground breaking—hitching to cart—shoeing.

Chapter III.—Making speed—pulling—how Airdale, 1, 2:15¾, was trained—Peter Volo, 1, 2:19—Hester C., 1, 2:21½—Wilbur Lou, 1, 2:19½—Miss Stokes—Adbell, 2:23—Horlaine, 2:31½—Hinda Rose, 2:36½ — Edna the Great, 2:29¼—Palo Alto system.

Chapter IV.—Shoeing colts—first trip to blacksmith—dressing hind feet—hard frog unnatural—changes in gait—natural dressed foot.

Chapter V.—Preparing for two-year-old futurities—how Murphy trained Peter Volo, 2, 2:04½, and Native Belle, 2, 2:07¾ — Arion, 2, 2:10¾ — Justice Brooke, 2, 2:09½, and his diary—Axtell, 2, 2:23.

Chapter VI.—Three-year-olds — working between races—comparison of shoeing of 63 famous colts—training of Colorado E., 2:04¾—General Watts, 2:06¾—Fantasy, 2:08¾—Sunol, 2:08¼—Axtell, 2:12.

Appendix—How to feed and water a colt—chronic indigestion.

Testimonials.

The Trotting World of London, England, says: "It is just the book we have been waiting for."

The New York Sun says: "The directions seem to be sensible and practical.

The Australian Trotting Record, Melbourne, Australia, says: "It is simply invaluable to any trotting man and its 112 pages cover every detail of the proper handling of a trotter and pacer."

The Pacific Horse Review, Portland, Ore., says: "Shoeing, feeding and other problems of common experience are dealt with helpfully. Ready reference to current turf history illustrates points of moment, and the book is of value to the studious trainer."

Joseph M. McGraw, Washington, Pa., says: "Your book is the most instructive of its kind I have ever seen."

T. C. McBride, Sewickley, Pa., writes: "I see you have the secret of bookmaking. The paper and binding make it a joy forever, as well as a thing of beauty."

First Book in 20 Years.

"Care and Training of Trotters" is the first book on its subject in twenty years. Previous works belong to the high wheel sulky era.

Every detail of the proper handling of a trotter or pacer is covered, from the day of foaling till after its first year's racing. This book was in preparation for over a year by an editorial staff of four working on material furnished by **practically all of the leading living authorities,** including owners, drivers, stock farm superintendents, veterinarians and farriers. All previous books on the subject contained the ideas of only one man.

The book tells how all the great trotters were trained, and will be of equal interest to professional and amateur horsemen. No advertising in book. 112 pages, illustrated, cloth bound.

THE FARM

OBJECT TO INCREASE IN SANDING RATES.

The railroads of California have asked the railroad commission for permission to increase the rates for sanding stock cars to $1 for single-deck and $2 for double-deck cars. Many individuals over the state have written the railroad commission protesting against the increase. The California Protective Cattlemen's Association will no doubt take up the matter. The National Wool Growers' Association has already sent in a vigorous double-barreled protest against the proposition. In the wool growers' letter to the railroad commission they say that the increase would be an imposition on the stockmen of the state. In the rates now in effect the railroads include the cost of sanding the cars, and if they are now to be allowed to make an increased charge for this service, it will be a duplication of the charge. The railroads contend that they have to haul their cars to the sanding-pits to be sanded. The fact is that the cars are frequently loaded without being sanded at all—that is, the old sand in them is used over again. It also happens frequently that cinders, a commodity available along railroads, are used. Also sand is available at almost every shipping point or can be made available if the company so desires.

In a recent hearing before the Interstate Commerce Commission it was shown that the cost of sanding cars was ten cents per deck. The charge for sanding cars at the Fort Worth stockyards is twenty-five cents per car.

The sheepmen of California are already discriminated against by the Southern Pacific Company more than are the sheepmen of any other state.

BARLEY IN ALFALFA.

Many alfalfa raisers are in the habit of planting barley in their alfalfa in the fall and the practice is so good that it is unfortunate that it is not done oftener. It provides green stuff during the winter and makes the land productive at a time when it ordinarily is not producing anything, except perhaps, some foxtail. And not the least valuable feature of the barley is that it keeps down the foxtail.

The several floodings that an alfalfa field gets during the summer plus the packing of the soil by the mower, the horses' hoofs, and the hay making and hauling, or by the stock, if the field has been pastured, compacts the soil in a way that would almost be ruin for an orchard. A stirring up of the soil, when these conditions exist, is almost the same kind of a stimulant to the field that good cultivation and a soil mulch is to an orchard. That is why it is so profitable to use a disc, an alfalfa renovator, or a spring tooth on an alfalfa field.

With the soil torn up a bit it is possible to sow barley and get excellent results. Land on which alfalfa has grown is always rich and contains lots of nitrogen. Although the alfalfa takes up much of the space and the barley naturally cannot do as well as if the land were really plowed instead of being scratched, a good stand can be secured. The amount of seed may vary greatly, being much lighter than would usually be sown on a clean field, in some cases, and in other cases much heavier. The per cent of germination is not as great as where the land is plowed and a good seed bed provided.

It is possible to either pasture the barley or to let it go for hay. In the first case a heavy seeding is usually best, in the second a light seeding so that the alfalfa will have plenty of room when it starts growth in the spring. In either case the land is producing something instead of lying almost idle, or growing only foxtail, and the mixture of barley and alfalfa hay is excellent and a vast improvement over the mixture of alfalfa and foxtail.

Apropos of eggs which are and are not fresh, one has been found in the tomb of an Egyptian child named Sextus Rufus, who lived about 1,800 years ago at Nikopolis.

DISARMING THE BOAR.

The tusks of a boar ought to be kept short. This not only makes him less a menace to other animals but many hog raisers believe him less fierce and self-confident. An inch and a half in length is about the limit to which the lower tusks should be allowed to grow. This means taking them off once every six months. The quickest and one of the commonest ways of disposing of them is to knock them off with a cold chisel and hammer. The trouble with this method is that it is likely to splinter the bone around the socket of the tusk, and I have even known the jaw bone to be broken. A much better way is to break the tusk off with long horse nippers, or with blacksmith's pinchers. Or the tusk can be nicked deeply on both sides with a three cornered file, after which it can be knocked off with greater safety, though it is still better to use pinchers. The stub can be smoothed down with a few strokes of a flat file.

To hold him for this or any other operation on his head, the following method is as good as any: Make a small slip noose at the end of a half-inch rope and get it into his mouth around his upper jaw, that being the hardest part of the whole performance. Do not noose both jaws, and never the lower jaw alone. Take a turn with the rope around a fence post and haul the hog so he is held short. Then push him around sidewise against the fence and have some one hold him braced there while you operate. Some men take pride in handling a hog alone, but it seems a waste of energy when you can get a helper, and you need both hands free to work with.—G. B. Hill in National Stockman and Farmer.

ANIMAL HUSBANDRY.

Animal husbandry will do more for diversification and diversification will do more for animal husbandry than either could possibly do alone. In fact, animal raising and animal feeding make diversified planting almost imperative because animal production will not be profitable without raising a large part of the feeds that animals consume. A large portion of the profits derived from animals is made on the feeds produced on the farm. Where the feeds are converted into beef pork, mutton, milk, etc., the cost of marketing the feeds is saved, the fertility constituents of the soil are conserved and labor and capital used in production utilized to produce finished products.

One reason diversification is not generally practiced without animal husbandry is the uncertainty of the market for hay, grain and other products. The grower who raises these products, unless he has animals on his own farm to consume them, must depend upon some one else to feed these crops and of course the feeder must have considerable profit for the risk.

One should have a definite purpose when he attempts to diversify his planting, and we know of no stronger incentive than to raise and feed livestock. The animals bring responsibility to the manager and this responsibility is the incentive for diversification of crops.

Livestock raising distributes labor and in this way reduces the cost of production. The animals sometimes make it possible to utilize profitably land that would otherwise bring no revenue.

THE SUGAR SITUATION.

It is stated that seventy thousand acres of land were planted to sugar beets this season in Southern California, yielding a total tonnage of 700,000, which netted the growers of that section an average price of $5.40 a ton and a grand total of $3,780,000.

In Ventura county, contracts are already being made for growing beets next season. The contracts are similar to those signed in other seasons, with the added proviso that the company will pay the grower a bonus of fifty cents per ton extra if the average net selling price of beet sugar received by the beet sugar factories of Southern California shall equal or exceed four and one-half cents per pound during the period between July 1, 1915, and May 1, 1916. The payment of this bonus is to be made on or before July 1, 1916.

This proposition is along the line of profit sharing and, as the prospects at the present time are that sugar will bring good prices next season, it is very acceptable to the beet grower.

Some persons are very much worried about our increase of food products being so much less than our increase in population and what we must do about it. The problem is a very simple one. See that the producer gets good pay for his work. That is all that is needed to get him to produce more and to get others started into tilling soil not now cultivated.

SACRAMENTO VALLEY STOCK FARM.

Breeds only the best. Trotters and thoroughbreds always for sale. Weanlings, yearlings, colts, fillies, broodmares and stallions. Trotting bred sires in use: Dillcara (full brother to Walter Dillon and Harold Dillon), son of Sidney Dillon, dam Guycara 2:18¾ (dam of Harold Dillon and Walter Dillon), by Guy Wilkes; second dam Biscara (dam of 11) by Director; third dam Bicara (dam of 6) by Harold; fourth dam Belle (dam of Belmont and McCurdy's Hambletonian) by Mambrino Chief. Also Flosnut, son of Nutwood Wilkes and Florine by Cornelius (son of Nutwood); also outside sires patronized. Thoroughbred sire in use: Marse Abe, son of Yankee by Hanover and Halo by Imp. St. Blaise.

1256 FLOOD BLDG., S. F.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

SAVE-THE-HORSE

(Trade Mark Registered.)

OUR ANSWER GAVE HIM HOPE.

John P. Peterson, San Leandro, Cal., "I waited to be sure of what Save-the-Horse has done. It is surely all you claim. Has actually done wonders for my mare Phoebe. She was foundered so bad that no one else ever thought she would walk again. I was told to kill her for the chickens. I wrote and your answer gave me hope, so I got Save-the-Horse. It cured the founder entirely. I thank you for the promptness and kindness that you awarded me in your dealings."

19 YEARS A SUCCESS.

Every bottle of Save-the-Horse is sold with signed contract bond to return money if remedy fails on ringbone, thoropin, SPAVIN or ANY shoulder, knee, ankle, hoof or tendon disease. No blistering or loss of hair. Horse works as usual, any season.

$5 at druggists', WITH CONTRACT, or we send by Parcel Post or Express paid.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Over 300 Copies of

"Care and Training of Trotters"

Have Been Sold in Europe and Australia.

This is the book for you. It should be in your library. It is the first book on its subject in over 20 years. It was compiled by a competent staff from information furnished by almost all the leading American breeders and trainers of the day. It is a book of 112 pages, illustrated, bound in cloth, and will be sent you postpaid on receipt of $1.

Joseph M. McGraw, Washington, Pa., says: "Your book is the most instructive of its kind I have ever seen. It should have a large sale." If this book is instructive to a professional horseman like Joe McGraw, will it not interest you?

T. C. McBride, Sewickley, Pa., writes: "I wish to say a word of praise for the book. It was more than I expected. I see you have the secret of bookmaking. The paper and binding make it a joy forever, as well as a thing of beauty."

The Trotting World of London, England, says: "It is just the book we have been waiting for."

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

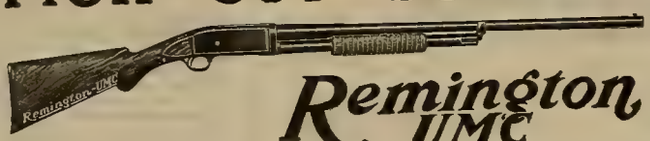
WINCHESTER

Rifles and Shotguns For a Sportsman's Christmas

Stop cudgeling your brain trying to decide upon a suitable Christmas present for your sportsman friend. You can save time and worry and make a hit by giving him one of the latest Winchester rifles or shotguns. Such a gift will surely be acceptable and useful. Few sportsmen have so many guns but that a new Winchester would be a prized addition to their outfit. Look over the various models of Winchester guns at your dealer's and you will find just the one you want. Winchester—the **W** brand—are above all the guns of

Known Quality and Proved Superiority.



Equally Efficient in the Field and at the Traps

THE GUN FOR ALL PURPOSES

The Gun For Duck Hunting

PICK OUT SOME FRIEND OF YOURS

who uses a Remington-UMC Pump Gun. Ask him what HE thinks of it. We know what he'll say—that the

Remington UMC PUMP GUN *"The good old Stand-by"*

is the best all around gun you can buy—just as good in the field as at the traps—just as good at the traps as in the field.

Go to your dealer and ask him to show you this gun—ask about the solid breech; the bottom ejection,—the shells, smoke and gases go down; away from your face; the three safety devices; the simple take-down; the hammerless feature. Any store showing the Red Ball Trade Mark—the sign of Sportsmen's Headquarters—will show you this gun.

VOLUM LXVI. No. 2. SAN FRANCISCO, SATURDAY, JANUARY 9, 1915. Subscription—$3.00 Per Year

CONTENTION B. AND WILL DURFEE

The three-year-old son of Copa de Oro 2:01 and Bonnie Ailsie 2:08½ that paced the Phoenix track in 2:08¼.

Here Are the Features of the *Remington-UMC* Pump Gun

¶ Features that make the superiority of this gun real. The **solid breech** has no openings in the top, sides, or rear of the receiver—a thick wall stands between the chamber and the shooter's face always. No blowing back from powder gases, defective primers, etc., is possible. Loading and **ejection of shells is from the bottom,** away from one's face. The **hammerless** feature affords protection from accidental discharge. The interrupted screw **take-down** system requiring only a quarter turn of the barrel, facilitates carrying, cleaning and the interchange of barrels without tools of any kind. Accidental jamming or bending of the action bar is eliminated. ¶ There are **three safety devices,** in addition to the regular trigger safety.—In other words the trigger cannot be pulled until the gun is properly breeched up, (1) until the breech is locked, (2) until the action bar is in its full forward position, (3) until the sear is unlocked in the cocking notch in the firing pin. The **beauty** of this gun is the joy of a true sportsman. It **handles fast** and **balances perfectly.** Made in eight grades.

WORTHY TRIBUTE.

The holiday number of the American Horse Breeder carries a most interesting feature under the heading "Prominent Men Connected with the Trotting Industry," including pictorial likenesses of the gentlemen in consideration as well as verbal comment. Most of the breeders who are so favored by the Horse Breeder are, quite naturally, residents of the territory which they serve principally, but the publishers make a long arm reach to the Pacific coast and pay the following well deserved tribute to the master of Woodland Stock Farm:

"John W. Considine of Seattle, Wash., is doing more for the trotting interests of his section of the United States than any other man in the far western country. A few years ago, he established Woodland Stock Farm, at Woodland, Cal., and, by purchasing some of the best bred mares, in foal to high-class stallions, to be procured in the eastern markets, he has a foundation on which to build a most successful trotting nursery. At the head of Mr. Considine's farm is the stallion, Prince Ansel, 2, 2:20¼, son of Dexter Prince and Woodflower, dam of two, by Ansel 2:20, while second in command is the young horse, True Kinney 2:12¼, by Kinney Lou 2:08¾, out of My Trueheart 2:19¼, a producing daughter of Nearest 2:22¼, son of Nutwood Wilkes 2:16½. Robert Bingen 2:11¼, by Bingen 2:06¼, was also recently added to the Considine stud. The mares at Woodland are by such sires as Axworthy 2:15½, Directum Spier 2:11¼, Moko, Charles Derby 2:20, Prince Ansel 2:20¼, Mendocino, Lockheart 2:08½, Jay McGregor 2:07¼, Silver Bow 2:16, Joe Patchen 2:01¼, etc.

"Mr. Considine has several young trotters in Kentucky being trained by Hunter C. Moody, of Lexington, most of which are foals of 1914, by Prince Ansel. Trainer Moody also has for the same owner the yearling colt, Suldine 2:24¾, by Worthy McKinney, out of Carrietta 2:18, dam of Silent Brigade 2, 2:10¾, by Directman; Chris the Great, a yearling, by Peter the Great 2:07¼, dam Miss Faribault 2:26¾, by Axworthy, and a weanling son of Peter the Great and Carrietta.

"Mr. Considine, in partnership with the late Senator Timothy D. Sullivan, of New York, made a fortune through theatrical enterprises in western cities, and only recently sold out his interests in the Sullivan & Considine Circuit for a very large sum, reported to have been in the millions."

—o—

"MONEY DIVISION" is one of the topics that comes up regularly for winter discussion, at the time when everybody is home from the races and has leisure and inclination to "air his views." Like in the debate over other proposed changes and improvements the ideas advanced are widely varied, but there seems to be a tendency on the part of the majority who suggest any changes at all toward increasing the reward for the winning horse and limiting the cut to three ways rather than four—a division that would in our estimation be conducive to sharper racing, which means better entertainment for the public and a subsequent increase in attendance. The suggestions in the main are for a change to a basis of either 70-20-10 or 65-25-10 in place of the customary 50-25-15-10, and while horsemen are reluctant to part with the present system of profit sharing, many who are most loath to see the fourth horse "given the go-by" admit that a change to the three way cut would doubtless operate to the best interests of all concerned in the long run. Make winning "worth while" by a proportionate reward and there will be less dodging of records; limit the cut to three ways and there will be keener competition for place and show.

One contributor to the discussion, however, goes to the other extreme with a suggestion to make the division five ways, 35-25-20-10-10, but while we like to see money thoroughly desseminated we would also like to see racing conditions improved rather than made worse than they are. Under our present money division there is too much of a tendency to be satisfied with second money and no record in preference to first money and a record, a condition which the last proposal would merely serve to aggravate. Take for example the ordinary $500 purse of the small meeting and split it as above—$175, $125, $100, $50, $50. A difference of $50 is small incentive to taking a winning record in a case of split heats and ties; a difference of only $25 is less conducive to hair-raising place drives, and an equal reward for fourth and fifth horses removes all occasion for competition behind the third horse save in good-sized fields, and the "race" degenerates into a mere merry-go-round, devoid of feature or interest.

"Reformers" must bear in mind in making suggestions that the success of harness horse racing depends entirely upon the patronage accorded it by the public, and that what Mr. Public pays his dollar for is to see a horse win a horse race. This being the case it is much more logical to increase the reward of the winner than to decrease it, merely that more horsemen may come in for small money for which they have made little or no real contest.

—o—

WITH ITS LAST ISSUE OF 1914 the Pacific Horse Review gave up the battle that it has waged for "divorce and separate maintenance," and beginning with the new year H. C. Browne & Co. will again serve the interests of northwestern horsemen and stockmen as of old, through the one publication of the North Pacific Rural Spirit. The step has not been an unexpected one, for sufficient business has not as yet developed in the northwest to make a straight harness horse publication a paying proposition. For two score years, however, the trotting horse interests of the states of Oregon, Washington, California, Montana, Idaho and the western provinces of Canada were ably covered by the North Pacific Rural Spirit, and the reappearance of that sheet with a lively turf department will be welcomed as an old friend returned after a long journey.

We regret, however, as do the publishers and their public as well, the enforced passing of the Pacific Horse Review. Under the able editorship of John McClintock, and more recently of G. A. Westgate, the paper has been bright and newsy and a welcome visitor to our exchange table and to the homes of a goodly circle of readers, but news and welcome do not, alone, pay salaries and printers' bills. Horsemen's interests will in no way suffer by the present move as they will be served by the Spirit as of old, and the publishers look forward to the day when the northwest will be able to support a straight harness horse publication. In the meantime, peace to the ashes of the departed and a hearty welcome to the new-old North Pacific Rural Spirit.

—o—

THROUGH OUR BUSINESS COLUMNS there are offered for sale, or in two instances for lease to proper parties, three stallions that are worthy of every consideration at this season of the year when brood mare owners are beginning to plan their bookings. Tom Smith 2:13¼ needs little or no introduction to Californians, as he has repeatedly proven his speed siring abilities through the performances of numerous sons and daughters that yearly "bring home the money," and the McKinneys are constantly adding luster to the family name. Chestnut Tom 2:17¼, proven as trotter, sire, and sire of dams, carries a blood inheritance that is in every way most admirable and potent, while the third and youngest of the trio is Prince McKinney, a registered son of the "old original," with that blood backed up by direct maternal crosses to Dexter Prince, Electioneer etc. While California is proportionately better supplied with stallions than with mares, there are any number of localities in the state where any one of these three horses would pay handsome returns for the time and money invested in handling them, and they should not be overlooked by stallion owners who are replenishing their stables in view of the newly given impetus to horse breeding resulting from the great export demand, whose effects are just beginning to be realized.

AN ANNOUNCEMENT that will interest horsemen throughout the entire west is authorized as a result of an interview with William G. Durufee early in the week, when he expressed the intention of offering at private sale a number of the great stable of seasoned campaigners and youngsters that he has gathered at Los Angeles and from whose ranks have come the most successful winners of the coast. The offerings to be made are neither "has-beens" nor "maybes" but are "is-ers" of the first order, ready to take to the races.

The reason for this action on Mr. Durfee's part is a natural result of the limitation of human endeavor—a man can give proper attention to only so many individuals in the way of educating and training for speed production, and a good many months ago Mr. Durfee remarked to us that he was getting together entirely too many horses, and they keep coming on right along. With practically all of his 1914 stable more fit than ever to go to the races, there is a whole new crop of Carlokins, Copa de Oros and others that must receive attention, hence the necessity of reducing the number of already proven ones. In the two stallions mentioned above Will has every confidence that he possesses two of the very best sires in the land, and he wishes to be in position to give their get every chance to go out and get the money. Offerings of those already developed will be made at figures based on earning power proven or substantially indicated by previous repeated performances, every horse will be represented exactly as he is and will be shown in harness to substantiate all statements made as to speed at present at command. The list will include record horses, both trotters and pacers (and in regard to these it may be noted that in several instances Will has two or more horses eligible to the same classes, which curtails their further usefulness in his hands), and youngsters of both ways of going, with and without breeder's record, with speed developed with the intention of starting them in their stake engagements, as all the two and three-year-olds are provided with these valuable accessories to profit.

To those who are in the market for racing material of the very highest order obtainable locally the opportunity for filling their wants is most exceptional, and the list of offerings, which will appear at an early date in this publication, will be awaited with interest.

—o—

CALIFORNIA BREEDERS of pure blooded draft horses should not fail to take advantage of the opportunity presented them for exchanging stallions and procuring high class young horses and mares for the improvement of their breeding stock by the sale to be held at Davis next month under the direction of the California Draft Horse Breeders Association. Such an event should be an annual fixture in this state, for, once the advantages accruing to its patrons are fully realized, the association sale should become a great clearing house and co-operative exchange market that will add thousands of dollars to the revenue of producers of pure bred drafters in California. With the United States facing the era in which it must not only supply its own great market with a large quota of animals of this description, but meet a growing South American demand and eventually furnish animals for the rehabilitating of the foreign breeds in their native homes, the association has hit upon a most opportune time for the inauguration of their sales. Entries for the first event must be in the hands of Secretary J. I. Thompson, Davis, Cal., on or before next Friday, and we bespeak a liberal patronage on the part of both consignors and buyers.

—o—

EVERYBODY'S MAGAZINE for January carries as a most appropriate and attractive feature a dozen or more full pages of pictures of the Panama-Pacific International Exposition, richly printed from plates of wonderful detail, each subject supplemented with a gracefully couched note of verbal description. The eyes of the world are upon California and her expositions, despite the warring of the powers overseas, and Everybody's has set a fashion that is not only welcome to its thousands of readers, but—like all good fashions—one that will be extensively followed by other eastern publications. Witness Everybody's little greeting: "The success of the exposition is of importance, not only to the Pacific coast but to the whole United States. We believe that. We believe in the Pacific coast. We are hoping for the success of the exposition, and we propose to do our share toward making it a success." Good work!

JOE MARKEY'S COMMENT ON GRAND CIRCUIT CHANGES SUGGESTED.

As the Breeder and Sportsman anticipated, the recommendations that the rules committee is to submit to the stewards of the Grand Circuit next Tuesday at Detroit have stirred up a good deal of discussion among horsemen and trotting horse publications, and in the most momentous matters the opinion is that the committee is on the wrong track. Of the many eastern writers who have passed judgment upon the leading proposals, none are more competent to make a statement as to the desirability or undesirability of the changes suggested than is Joe Markey of the Horse Review; Joe is an attendant at the majority of the Grand Circuit meetings and as a consequence knows whereof he speaks from actual observation, not hearsay. No man's views are accorded more respect in knowing company than are Mr. Markey's, no man has a wider acquaintance in all walks and conditions of life in horsedom, and none bear a better reputation for being "a white man" under any and all circumstances, or for expressing his honest convictions regardless of "ax grinding" or ulterior motives. Here, in part, are his views concerning the committee's action:

So far as making a material change in the number of heats raced, the four-heat plan as applied to the Columbus meeting in 1914 would have made very little change. I find that 37 races and 138 heats were contested during the Columbus fall meeting, or an average of 3.73 heats per race.

Recommendation No. 15 will, in my opinion, if endorsed by the stewards in their Detroit session, bring to the Grand Circuit more trouble and a greater "come back" than any racing organization ever brought down upon its own head. Its passage would be equivalent to shelling one's own troops, or getting tar and feathers in order to offer oneself this personal indignity. In a letter sent out by Secretary H. J. Kline of the Grand Circuit, he requests that all elements connected with the business meet with the stewards in Detroit, and give voice to any suggestions they may have in mind for the betterment of the circuit. I may be on hand on that occasion, but will not await the event in order to speak my mind. If that recommendation passes, I can see the slimmest entry lists the big ring early-closers ever received; not only that, but I predict that the American and National Trotting Associations will be served with injunctions and damage suits brought against them because of the A. T. A. rule 49, and its sister rule endorsed by the N. T. A.

Every breeder who marked a horse in fast time in 1914, according to the rule giving him such license, is penalized, likewise every purchaser of these time-record horses, for recommendation No. 15 absolutely disfranchises these horses from eligibility to the G. C. early-closing events. Here it is: "That in early-closing events no horse without a winning race record shall be eligible, or that no horse be eligible whose non-winning race record is faster than the class defined for such early closing events." If you had the misfortune to have marked a horse in 1911 against time, you have no G. C. opportunities, aside from the class races—you cannot enter in any stake events.

Furthermore, the non-winning race-record of your steed is the one that counts, not the winning race record, as you and I were led to believe. For instance, there is Peter Scott 2:07½, for which Tommy Murphy paid $30,000, acting for a patron. He is eligible to the 2:08 class, and since there are few stakes in which he can contest, he is, as a prospective money winner, not as useful as an ordinary hobbled pacer that can step in 2:10. I name Peter Scott merely to show the hardship and injustice which the rule would inflict upon many of the 1914 trotters and pacers, which failed to win races. In Peter's case he was retired early in the campaign, and was not, to my knowledge, in a single race that he could have won. If the G. C. officials take the standpoint that numerous horses were raced with a view to keeping them over and taking advantage of the rule, then they may look back to the many horses that in the past were similarly raced for weeks under their own jurisdiction, and unmarked through the ineffiency of the judges. It may be a bad rule, but since the G. C. was foremost in having it passed and even forcing it upon many objecting members attending the A. T. A. and N. T. A. congresses of 1914, they should abide by their own recommendations. I attended the G. C. stewards meetings held at Grand Rapids, Mich., last season, and from the official report of the proceedings I glean the following resolution.

"We thoroughly approve the following proposed amendment to the rules:

"In determining the eligibility of horses to compete in public races, only the records made by winners of races shall be considered. Records made in performances against time and in public races by non-winners shall not be considered a bar to elgibility to races."

The principal officials of all the Grand Circuit tracks were present during their Grand Rapids session, and I distinctly recall that H. J. Kline and other officials were on hand when the A. T. A. congress met in Chicago last February; also I remember that they stuck for the rule during three hours of heated debate.

I say that the rule may not be a good one (with competent judging I think that it is), but if I were a member of an organization that passed the rule and encouraged everyone to make use of it, I would certainly not turn my coat and attempt to make them the victims of my own folly. But those whom the G. C. propose to penalize for having raced under their rule are not likely to lose much by remaining out of their early-closers. There is California, and big money hung up by the Panama-Pacific Exposition for the June and fall meetings, the Great Western Circuit, and the big state fairs, all of which will abide by the rule.

Since I am required to report the majority of Grand Circuit meetings, I am naturally very much interested in its welfare, but once in a while I think that the gentlemen who control its destinies shoot wide of the mark, as in this instance.

I cannot conceive of any move that the Grand Circuit could make that was better calculated to keep horses out of its stakes than that which it proposes to adopt. I may be very much in error, but I will risk the prophecy that recommendation No. 15, if passed, will create the biggest storm and raise the greatest ruction that has occurred in trotting circles since the sport was first organized, and that, to use a slang term, is a "double-coupled cinch."

To my way of thinking, the one very important thing that would contribute more toward putting the Grand Circuit on a stable basis, would be reform of the present system of judging. The three-judge system, each official vested with equal rights, is a ridiculous farce, and has done more to injure track racing and encourage cheating, collusion and manipulation than any other feature connected with the business. They engage one so-called professional judge, and whether these especially selected officials possess the required qualifications or not, their usefulness and authority is discounted by the presence of two confreres who sit with them, and are equally potent in all decisions made. Granting that the professional judge has ability, character, firmness and the courage of his convictions, he has no more to say, no greater authority, than the pair of gentlemen who are not supposed to be other than honored by the position they are asked to fill. When difficulties arise, and they very often do, there is no one apparently responsible, no one upon whom the blame for bad decisions falls. The presiding judge will tell you in strict confidence, and not for publication, that he saw a heat so-and-so; that he would have taken such action in certain contingencies, but that his brother judges overruled him. Or, perhaps, it's one of the associate judges that make the same observation. Each and every one of them wants to get out from under and provide an alibi when situations arise in which they find themselves severely criticized. I grant every man who occupies the judges' stand the credit of being honest, but very often they are influenced by friends on the outside, and thus unconsciously their verdicts are not what they should be. Give one judge full power and authority over all matters pertaining to the conduct of the races and the application of the rules; make him supreme, and if he proves himself incompetent or lacking in intelligence, dismiss him and secure a more worthy successor. The three-judge system has long been a travesty, and as long as we retain three officials we will continue to have trouble. Our judges' stand today does not inspire sufficient confidence on the part of the public or the horsemen.

I have always said that a competent, high-class judge, vested with authority, could, inside of a couple of weeks, rid the G. C. of every suggestion of unfair racing, clean it up, and by being fair and impartial in his rulings, make even the drivers who are inclined to cheat, respect and admire him. I don't believe that there is a driver on the turf who would not rather race his horses on the square than to do otherwise. But as they will tell you that so long as the judges permit other fellows to "get by" with things, they would be fools if they, too, didn't take advantage of their opportunities. There is at present not nearly so much cheating and collusion as was the case when the plungers infested the circuit, but particularly in the class races, there is a deal of "helping" going on. The stakes are of sufficient value to insure a conscientious effort to win, but in class races, where first money is only $400, and perhaps from $10,000 to $15,000 is wagered, the incentive to cheat is great.

I do not make these remarks in a spirit of criticism, but rather in the hope that they will do some good along the line suggested. It might be well to retain two associate judges, but confine their functions to merely taking account of breaks, calling the presiding judge's attention to things that occur during the progress of races, and assist him in placing the second, third, etc., horses.

THE THREE HEAT RECORD HOLDERS.

H. T. White, American Horse Breeder.

"Mile heats, three in five," always has been the popular and prevailing fashion in harness racing, despite the efforts, frenzied and otherwise, of various "reform," "popularity" and "more equitable" movements that have appeared, peeped coyly at the surroundings a few times, and then disappeared.

Hence the fact that, in 1914, the record for three-heat races, or "three heats in a race," as the distinction generally is referred to, was beaten no less than three times is of considerably greater importance than would appear to be the case were one to judge the matter by the lack of attention accorded it by turf journals.

Until this season, the best three-heat record was that of Hamburg Belle 2:01¼, made in 1908 at [illegible]ford, Conn., when the Axworthy mare won the $10,000 Charter Oak in 2:05, 2:06, 2:04¾. For five campaigns after it went on the books, that record, despite the fact that many brilliant performances by trotters took place each season, stood unbeaten, only to be thrice eclipsed in the next one, and there are features connected with the three trotters—Etawah, Rhythmell and Maymack—that successively held the honor this year, that make something more than a bald chronicle of their work worth putting into print.

Etawah's work—three heats in 2:03½, 2:03½, 2:03¾, at the Lexington meeting, an average of 2:03.58—has been too well written of to need further publicity at this time, save to say that the aggregate time of his three heats is just three and one-third seconds faster than that of his nearest competitor, the California mare, Maymack, four and one-half seconds faster than that of Rhythmell, and five seconds faster than the performance of Hamburg Belle, which stood so long at the top. Etawah, in addition to being a half-mile track performer of note at two and a wonderful three-year-old trotter, is an Electioneer "three ways," as sporting men put the matter, and furthermore gets the foundation strain through a trio of remarkable colt performers, as he runs in the male line to Electioneer through Al Stanley 2:08¼, a half-mile track champion at two, and in the female line has for his dam a mare by Arion 2:07¾, a two-year-old champion; grandam by a son of Bell Boy 2:19¼, another two-year-old champion, both that horse and Arion being by Electioneer. Add to this the fact that Al Stanley was sired by Todd 2:14¾ (who trotted a public trial in 2:21 at two), son of Bingen 2:06¼ (public trial in 2:12¾ as a two-year-old), and we have a combination that commits Etawah irrevocably to the Electioneer family.

When one comes to consider the work of the two mares that, in 1914, beat the championship three-heat record of another mare, Hamburg Belle, it is found that there really is no great difference between the three when the matter is reduced to figures, the average of Maymack's race being 2:04.91, that of Rhythmell 2:05.07, and that of Hamburg Belle 2:05.25. Each race was won handily, and, as to tracks, probably that at Hartford, where Hamburg Belle performed, was the slowest. As to the merits of the respective contests, every man may take his pick after the plain facts are recorded, because it is not my habit to do any very hefty arguing, believing, as I do, that the average reader of turf papers is well equipped to look after that part of the job. A man once wrote to a paper anent something I had written: "I like White's articles because he gives you all the facts and does not try to cram his own ideas down your throat," and that compliment is among my most cherished possessions.

The first important fact regarding these three mares that, at one time and another, have held the three-heat championship is that each runs in the male line to George Wilkes 2:22, a champion trotting stallion and founder of a great family of trotters. Maymack is by Arthur Wilkes, son of Guy Wilkes 2:15¼, he by George Wilkes. Rhythmell is by Rhythmic 2:06¾, son of Oakland Baron 2:09¼, he by Baron Wilkes 2:18, son of George Wilkes. Hamburg Belle is by Axworthy 3, 2:15½, son of Axtell 3, 2:12, grandson of George Wilkes.

In all of which presentment may be seen an important fact, and from that fact a lesson may or may not be deduced, according to the taste and fancy of the reader. But, because it properly belongs there, I will begin presentation of the female lines of these mares with the statement that Hamburg Belle runs to George Wilkes on that side of the house as well as on the male side, her dam, Sally Simmons 2:13¼, being a daughter of Simmons 2:28, son of George Wilkes.

Maymack's female line pedigree is, indeed, peculiar, as it not only includes two crosses to Electioneer, but these crosses come through two sons (Whips and Antevolo) which sired, respectively, the first and the second dams of Maymack, and that were bred in accordance with the one-time prevalent idea that close up thoroughbred blood was a good thing in the pedigree of a trotter. Whips, who sired the dam of Maymack, had for his dam Lizzie Whips, a fine race nag; she by Enquirer, and from a Vandal mare. Lizzie Whips was one of the outstanding mares of what, in her day, was the topnotch American family of thoroughbreds, and was bought by Gov. Stanford, together with several other thoroughbred mares, for the express purpose of mating her with Electioneer. By that sire she produced two trotters—Whips 2:27½, now credited with ten trotters, one pacer, four sires of five trotters and two pacers, and six dams of eight trotters and two pacers—and the brown mare, Linnet 2:29½, foaled in 1888, who took her record at three, and has not produced standard speed.

Volita, second dam of Maymack, is a daughter of Antevolo 2:19½, whose dam was Columbine (dam of four trotters, six sires of 129 trotters and 36 pacers, and of two dams that have produced three trotters), by A. W. Richmond; grandam, Columbia, by the thoroughbred Bonnie Scotland. This Bonnie Scotland, albeit a thoroughbred and the sire of many notable performers on the running turf of long ago, also figures in the trotting archives as the sire of the black gelding, Scotland 2:22½ (record made in 1887). And the dam of this gelding (which was trained by William H. Doble, father of Budd Doble, and driven by both men) was none other than the famous Pilot Jr. mare, Waterwitch, whose son, Mambrino Gift 2:20, once held the record for trotting stallions, whose other sons, Viking, Warder and Water-

were esteemed among the best in their day, and whose daughters produced speed, one of them, mated with Electioneer, being the dam of such sires as Sphinx, Egotist and Electrite. But Joseph Cairn Simpson, who bred Antevolo and some of the other foals of Columbine, first sent his Bonnie Scotland mare, Columbine, to A. W. Richmond, son of Simpson's Blackbird, a running bred stallion, so Columbine practically was a thoroughbred mare as pedigrees went in those days.

This combination of Wilkes blood in the male line and double Electioneer and double thoroughbred crosses in the female line is unique among trotters, and, a few years ago, when there still was a devoted band of adherents to the thoroughbred-blood-in-trotting-pedigrees on earth and willing to argue the matter at any and all times, the performance of Maymack would have been heralded from one end of the land to the other as proof that Gov. Stanford and Joseph Cairn Simpson were right in their breeding practices so far as using thoroughbred mares and a trotting stallion was concerned. But now, such be the degenerate times, nobody raises even a feeble yip of triumph. All hands agree that the George Wilkes and Electioneer crosses are what made Maymack a great trotter, and the mention of the Enquirer and Bonnie Scotland strains evokes only a tolerant smile. Still, it's both interesting and instructive when such reminders of bygone fads and fancies crop up.

Rhythmell, like Maymack, runs in the female line to Electioneer, her dam being ElizabethEads 2:19¼, by Bow Bells 2:19¼ (son of Electioneer and Beautiful Bells); grandam by Vasco; third dam by The King (brother of Gambetta Wilkes), by George Wilkes. The dam of Bow Dean was by Aberdeen; second dam by Red Wilkes, son of George Wilkes.

And now we come to a phase of the matter which to me seems very important as determining the relative status of the two mares whose bloodlines already have been considered, and the third of the trio, Hamburg Belle.

Both Maymack and Rhythmell made their best records in their championship three-heat races, the latter being credited with 2:04¼ and the California mare with 2:04½. A year after her Hartford performance, Hamburg Belle accomplished a greater feat in the line of race trotting than ever has been credited to another horse, defeating Uhlan at the North Randall track in 2:01¼, 2:01¾. Whether or not Uhlan, in his later form, could have equaled or beaten that two-heat record is beside the question, since, on account of the gelding's retirement, it never can be determined, but, in regard to Hamburg Belle and Maymack and Rhythmell, there is a definite basis of comparison from which logical deductions may be made. In her race with Uhlan, Hamburg Belle trotted two consecutive heats that averaged 2:01½, and a third heat that afternoon in 2:11½ would have constituted a performance better than the present three-heat record by a mare.

No horseman will doubt that a third mile well within the 2:11½ mark would that day have been easy for the daughter of Axworthy, especially in view of the fact that, in the second heat of her race, she came home alone from the half-mile post, Uhlan breaking at that point and never again getting within hailing distance of the mare. In fact, a third mile in 2:06 would be a conservative estimate of her capacity. The best two consecutive heats to the credit of Maymack are the first and second miles of her Phoenix race, they being 2:04½, 2:05¼, and average of 2:04.87. Then she came back a third time in 2:05, a truly remarkable performance. Rhythmell's best two heats also figure in her three-heat race, she doing the second and third miles in 2:05¼, 2:04¼. Hence, Maymack and Rhythmell, regarding two-heat work in a race, figure exactly alike, their average being just under 2:05, or three and one-quarter seconds slower than Hamburg Belle's best two consecutive heats in a race.

In these days, when the superiority of the stallion over the mare or the gelding in the ultimate speed achievement of the trotter is preached by men of science (who should know most about such matters), it is rather remarkable that a gelding should hold the trotting record, that a mare should stand at the top for a two-heat race record, and another mare hold the three-heat race record for five years. And, furthermore, as collaterally interesting, it may be told that two of the three mares holding the three-heat record for their sex—Maymack and Rhythmell—were not always in the best of repute as to manners, Maymack, before she was taken in hand by Charles DeRyder, having been distanced in all her starts in 1912, while Rhythmell, after performing creditably in 1912 as a three-year-old, did not win a race in 1913, although she took down a heat in 2:06½, and, in fact, it was not until towards the close of the 1914 season that she was a reliable racing tool. Bert Shank, a monument of patience when it comes to bad horses and a trainer of proven ability, made Rhythmell what she is.

Both Shank and DeRyder are men of large experience and proven ability in the matter of training trotters, and W. J. Andrews, who set the three-heat record with Hamburg Belle and still holds with her the best two-heat performance, is in their class—indeed, in the matter of giving records of 2:05 or better to trotters, my impression is that Andrews stands at the head of his profession in point of numbers.

The stewards of the Grand Circuit meet Tuesday at Detroit, so that we will soon know "who is who and which is what" for the season of 1915.

Wintering at San Jose

The weather man seems to have it in for me whenever I go to San Jose to spend a few hours with the boys and horses that are wintering there; the morning after Christmas day I hustled down and caught a seven o'clock train for the town down the peninsula, but before I arrived the rain was coming down in a manner that caused me to do a right about face and return to the city; last Saturday I tried it again, and though there was no rain there was a first class sample of a good thick tule fog that hung on until well after mid-day. However, the dampness is fine business for everybody at this season of the year in California, and nobody was kicking. It is true that the morning bore such a resemblance to a genuine Puget Sound morning that E. R. Dunn was inclined to be a bit homesick for that good old Seattle, but he bore up fairly well and took his daily work in pretty good shape.

Matt Zahner is one of the familiar figures at San Jose during the winter months, and is giving the prep to four likely ones belonging to W. L. Humphreyville, one of California's old time friends of the trotter, the four all tracing to a daughter of Planet owned years ago by Mr. Humphreyville. H. C., a five-year-old black gelding by Highland C. 2:19¼ (sire of Chiquita 2:08½, etc.), is a nice going, good sized trotter out of Minnie H. trial 2:17 by Iran Alto 2:12¼, second dam Old Nell by Jim Mulvenna 2:27¾ (a son of Nutwood 2:18¾ and the great brood mare Jane McLane), third dam Nelly H. by Planet. In Lady Bon, a three-year-old filly out of the same mare, but by Bon McKinney 2:24½, her owner has one of the truly nice youngsters of San Jose, and refused a good sized offer for her as a two-year-old from Captain McCan. Wm. H., a chestnut gelding by Nutwood Wilkes 2:16½ and out of Old Nell, trotted the San Jose track last year right at 2:10 and looks like one that ought to earn some money in the future. Lady Steinway by Bonnie Steinway 2:06¼ and also out of Old Nell, is just nicely broken but is a natural pacer and moves along very nicely at that gait.

In addition to the above Matt has his old standby, Fred Branch 2:28 by Morris A. 45046 (sire of Choro Prince 2:08¾, etc.), first dam Bessie Vachell by Acrobat 15184, and is keeping him in nice winter shape for a stud season and perhaps a bit of racing later. Last year the boy stood at Hollister and was very well patronized, but Matt is as yet undecided as to where he will locate him this year.

Jack Villar is at his "old stand" with five head that promise to give a pretty fair account of themselves later in the year, mostly youngsters who have yet to face the starter in professional company, the only campaigner in the bunch being the chestnut mare Lady Arabella by Alta Vela 2:11¼, dam Ida Bell by Dawn 2:18¾, sire of the dams of Robert I. 2:08¾, etc. Jack is long on pacers, as the Lady is the only trotter in the string, but the pacers look to be of the right kind. Lynmour, a five-year-old black stallion, has the blocky compactness of the Directs, but is a double-barreled Guy Wilkes, being by Lynwood W. 2:20½ and out of Nellie by Seymour Wilkes 2:08½, both sires represented ranking high among the tried and proven sons of Wm. Corbitt's old premier. The lad worked nicely last year in 2:14, with quarters in :29, and is built to go the route and repeat with the longest stayers he will meet. A four-year-old daughter of Nearest McKinney 2:13¼ repeated last year in 2:15 and has a strong speed inheritance on the maternal side, her dam being by Direct 2:05½ and out of Nelly Bly. There is a prospective fast new one for Demonio 2:11¼ in the three-year-old gelding La Plata that worked as a two-year-old in 2:28, and the Demonio blood is backed up well by the infusion the lad gets from his dam, Twenty-Three Skiddoo by Nutwood Wilkes 2:16½, second dam Twenty-Third (dam of Sterling McKinney 2:06¼, etc.)by Director 2:17. The other member of the stable is the three-year-old filly Rosie O. that Jack bought last fall for Jimmy Ryan of this city. As a two-year-old the lass did yeoman service on the road for a truck grower, and then raced in a matinee in 2:21, so she looks pretty good to Jack—or anybody else. She shows good breeding all over, but aside from the fact that her sire is a son of Director Jack couldn't enlighten me on those lines.

The Cochato branch of the Bingen family has established itself in pretty substantial form in the east, but very few of the family have found their way back to California, which was the birthplace of the progenitor of all the Bingens—May King 2:21¼. However, if the "samples" at San Jose are fair representatives of the family, California can stand a few more of the same, and owner E. R. Dunn of Seattle apparently has a pretty good eye for youngsters, as he picked out his pair at Allendale Farm when they were weanlings. They are now two-year-olds and as nice colts as one can ask to see. The colt is a husky bay fellow out of Fanny Wiggins by Wiggins 2:19½, second dam Cecelia W. by Wilton 2:19¼, and has a mighty handy way of pacing, while the filly trots. The girl carries a maternal cross back to California, being out of Baroness Maid by the futurity sire, Baron Wilkes, second dam Peeress Maid by Dexter Prince, third dam Peko 2:24 by Electioneer, both of the latter mares bred at Palo Alto. She is a finely finished thing with a nice way of going, and the pair promise to demand every respect when they face the starter.

John Quinn with the Borden horse has the largest stable on the grounds at present, as eleven head are coming in for his attention daily, quite a number of them of Mr. Borden's own breeding, the get of Barney Barnato 2:19½. This son of Zombro got his initial performer in 1914 in the three-year-old pacer Alto Barnato 2:12½, winner of second money in the three-year-old pacing division of the Breeders Futurity and a good contestant in other events. Alto Barnato is out of La Belle Altamont by Altamont 2:26¾ (sire of the dams of seven or more 2:10 performers) and has two full sisters in the present training string, two and three years old, respectively, and both promising trotters. Barney Barnato is further represented by the three-year-old pacing gelding Sheldon B., that was a money winner as a two-year-old in the Breeders Futurity, and a two-year-old full brother that operates on the trot. The dam of these youngsters is Ramona by Prince Robert, and they are both good individuals and promising prospects; the elder worked in 2:17 last year. Another two-year-old trotting filly is a racy looking lassie, by Barney and out of Directola by Direct 2:05½.

For the pacing contingent the stable is pinning its faith to two members of the royal families of that gait—Sir Guy Dillon, a full brother to the dead Guy Borden 2:07¼, and Helen Mac, a sister to last season's pacing queen of the coast, Clara Mac 2:04½. The Guy Dillon—Carlotta Wilkes fellow is built "from the ground up" and has plenty of spunk and snap; no great things have as yet been asked of him, but he has easily fulfilled all requests so far. Individually, Helen Mac suits me a bit better than her famous sister, with whom I never found much fault! Here's hoping that she proves as fast.

Another Expressive Mac, this one a trotter, is an equally nice mare, a bit younger, out of Miss Idaho 2:09¼ by Nutwood Wilkes 2:16½, the blood combination being one that ought to produce speed in generous quantity. John thinks very well of her from the way she answers his calls to date. Another trotter that has yet to be heard from in company but who has a breeder's record of 2:19¼ made in 1914, is the bay stallion Major's By Guy, by Major Dillon 2:18½ and out of the great brood mare By Guy by Guy Wilkes 2:15½. This fellow not only has a most pleasing way of going but is excellently put together and has the very best of manners.

Albaloma 2:08¼ and Baby Doll 2:10¼, who are "at the head of the class" which John is educating, need no comment here other than that they could scarcely be in finer winter shape. John will begin setting down on them a bit before many weeks, and they can be relied upon to furnish some of the contests at the June meeting down on the bay.

Ben Walker, recently back from the east and not long out of the hospital, has thrown in with the boys at San Jose and on Saturday was busy leveling stall floors with an adze, or some similar deadly weapon, and spreading straw with an expert twist of the wrist and a pitchfork with the "new" not yet knocked off the handle. Ben and his friends are exuberant over the success of the latest operation, which has removed the last ill effects resulting from the Columbus spill, and he is looking forward to more usefulness in the sulky. At present he has the "meal ticket" Kinneysham 2:13¼, and he expected another one or so this week, with probably an eastern top-notcher or two to come to him for the big trots at the P.-P. I. E. Ben has no hankering for a big stable, but is keeping an eye peeled for a few of the right sort, and will doubtless have them where he wants them when the bell rings.

Just before leaving for the city in the afternoon I ran across T. O. Webber, the new manager of the San Jose Driving Park, to whose efforts are due the present improved appearance of the grounds, and who promises even better future results, as most of his work to date has been confined to cleaning up—which was of itself no small task. The grounds have a "picked up" appearance that has been lacking for some time, stalls have been cleaned out, doors hung, cracks battened, whitewash applied, and more to be applied. The track has come in for the work needed to keep it in fair jogging shape while the other much needed tasks were being attended to, and from now on will be kept right up to the minute for speed making, as the boys will soon be moving up a notch at a time. T. W. Barstow will soon join the colony with some youngsters, and Jim Kirby of Boise, and J. A. Ritchey and S. J. Vaughn of the land of the "Webfoot" in the Willamette Valley have written in regard to stall room and expressed their intention of coming down to the San Jose track. Several other California stables are expected later on, and by the time spring is well advanced the San Jose Driving Park will again present the appearance of a real race track in real use. Mr. Webber deserves every success in repayment for his efforts in making San Jose a fit place to train again, and indications are that "the boys" will support him heartily.—[Neal.]

NOTES and NEWS

Helen Belle (2) 2:22¼.

◈ ◈ ◈

Miss Carlokin (3) p. 2:20.

◈ ◈ ◈

Both new ones for Carlokin 2:07½.

◈ ◈ ◈

And they went in the list December 29, at Los Angeles.

◈ ◈ ◈

Which is fairly well along in the racing season even for southern California.

◈ ◈ ◈

And in Chicago——

◈ ◈ ◈

In Chicago, kind friends, at last writing, it "appeared probable" that Jody Hartford's ice races on Douglas Boulevard would have to be postponed from New Year's day on account of the weather.

◈ ◈ ◈

'S matter, pop?

◈ ◈ ◈

Did "the beautiful" all melt, or was it just naturally too durned cold and streets blocked too badly to risk getting that far away from home?

◈ ◈ ◈

Speaking of Chicago——

◈ ◈ ◈

As we said, speaking of Chicago, here's a bet overlooked by Mr. Bauer when he invoked the silence of California and Florida "gentlemen" while he boosted Chicago's climate:

◈ ◈ ◈

Portland, Oregon, Christmas Day.—The annual swimming race held over the quarter-mile course in the Willamette river under the auspices of the Multnomah Club took place this afternoon, with a very large entry list of aquatic stars.

◈ ◈ ◈

Speaking of Chicago (and we hate to do it, for with all her faults and her stockyards smell that reminds one of something dead as, that is, of something dead, we love her still)——

◈ ◈ ◈

Can you picture this scene transferred to the bosom of Bubbly Creek in that "climatic paradise" on December 25th?

◈ ◈ ◈

You simply kinnot, Genevieve, so don't try, but——

◈ ◈ ◈

In regard to that "climatic paradise" business:

◈ ◈ ◈

Pipe this one that the hobo print immortalized years ago after an inebriate snooze on the bunk in the boss' sanctum——

◈ ◈ ◈

"Last night I slept in an editor's bed,
No editor was there nigh;
And I thought, as I slept in that editor's bed,
'How easily editors lie!'"

◈ ◈ ◈

Wherewith we will proceed to blow out the gas.

Ben Walker will winter at San Jose and fit a small but extra select stable for the 1915 campaign.

◈ ◈ ◈

Dan Mizner, who has his stable of trotters and pacers at the Pleasanton Driving Park, has been "laying up" for several days here in the city, ridding himself of a severe cold. It loosened up enough this week for him to go back to the valley town and "get up behind 'em" again.

◈ ◈ ◈

Walter G. Parmer's bid of $6,000 for the Duke of Ormonde—Gold Lace youngster purchased by Wm. Wallace of Lexington for $900 has been raised to $7,500 by Garrett D. Wilson, but Mr. Wallace has confidence of a ten-thousand dollar nature in the youngster, and states that he is in no hurry to sell even at the five-figure price.

◈ ◈ ◈

H. W. Buckbee of Rockford, Ill., has purchased of G. D. Conner of Detroit the Great Heart stallion Irving Heart. Charley DeRyder drove this boy in a number of Grand Circuit events last season and gave him a mark of 2:09¼ at Columbus, Signal Boy winning the race after six heats had been trotted right in the same notch. He is eligible to the 2:15 class and in that company ought to be a right good horse.

◈ ◈ ◈

Meteor 2:17½, an old time trotting stallion well known in the Northwest, was found dead in his stall at Everett, Wash., last week. The old horse was in good shape up to the time of his death, though in his twenty-sixth year. He was bred in lines of longevity, being a son of Commodore Belmont 4340, by Belmont 64, and a sire of more than passing merit, especially in the female line. Meteor's dam was the Morgan mare Eloise, in the great brood mare list and inheriting maternal greatness through the Black Hawks, the Golddust tribe and the Grey Eagles. Meteor has no representative in the list, though a sire of promising colts. He raced from Butte to Salem and back again through numerous seasons and was a game trotter whose name appears in a respectable place through many race summaries. Meteor was a horse of style and action in his day.

Drink Jackson's Napa Soda.

Will Durfee came up from Los Angeles last week and spent several days in the vicinity of San Francisco and Oakland, visiting his parents and numerous friends and transacting a bit of business "on the side." After a trip to the track and barns at the exposition grounds he was more enthusiastic than ever over the prospect for some great racing at the trotting meetings in June and November, and is of the opinion that when the fast ones hit the dirt on the long stretches they will simply "eat it up." Incidentally, somebody will have to ride some fast miles to keep Will from getting some of the best divvies of the big money.

◈ ◈ ◈

G. W. Lowery paid a visit to the Pleasanton track last week to take a look at the horses that Will DeRyder is handling for him, and returned well pleased with the outlook for their success in 1915. Dicto, the bay son of Dictatus Medium and Letter B. Jr. (dam of Cresto 2:12½) stepped the Stadium track for Will in 2:08½ in a race and after going to Pleasanton went the route there right at the 2:07 mark, so there is good reason for expecting something of him this season. Mr. Lowery is more than pleased with Spriggan, the MacKenzie gelding purchased at the recent sale, and with this lad for the trots and Dicto for the sidewheeler events the stable ought to pull down a fair portion of the money wherever and whenever they start.

◈ ◈ ◈

The crop of foals for the season of 1914 from the Walnut Hall Farm has been consigned to the Fasig-Tipton company's midwinter sale, this course having been decided upon by Mr. Harkness last October as the one he would follow in the future. As Mr. Billings will also sell the products of Curls Neck Farm as yearlings, buyers will have an opportunity to "pick 'em young" from the get of the champion stallions and very great mares, and the success of the selections will be watched with a great deal of interest. There is much merit in the plan, as the youngsters will be merely halter broken and untried in any form, so buyers will have only their own judgment to aid them and will get sound, unhurt babies whose entire education can be given according to their personal ideas.

◈ ◈ ◈

Eastern horsemen, especially those of New York and vicinity, are locating at the old Empire City track at Yonkers in goodly numbers and stables are expected to be pretty well filled before the training season is well advanced. Empire City is a good training ground, as there are both mile and half-mile tracks, with a shorter course in the big barn for jogging during stormy weather.

◈ ◈ ◈

Our early rainfall may have been a bit short, but there has been no lack of moisture for the last few weeks. Tuesday night's downpour here in the city was a genuine spill, and reports from all over the state give evidence of an excellent crop prospect, while grass has already made a pretty fair growth.

◈ ◈ ◈

One of the pleasant little notes that came our way recently was that from Elias Gallup of Hanford, father of "W. W." of Clara Mac fame, and a pioneer breeder in California small livestock. Mr. Gallup, now well along toward the four-score mark, admits to a natural fondness for horses, but makes Poland-China hogs his "main hold." He has bred them since 1877 and registered the first animal of that breed from California, also being a stock holder in the American Poland-China register association. Pedigreed chickens have claimed his attention even longer than have the big black swine, as he has bred Leghorns ever since 1854, having seen the first of the White Leghorns that came to this country from Italy; he is state vice-president of the Brown Leghorn Club and a member of the American Dominique Club. In concluding his pleasant letter Mr. Gallup makes the statement that he is "about played out," but his writing is that of a man with lots of good leather in him, and we hope to be able to number him among our friends for many years to come.

POLO TOURNAMENT AT THE P.-P. I. E.

The long and eagerly expected announcement of the opening of the subscription list for boxes at the Universal Polo Tournament to be held at the exposition polo field in March, continuing until the end of April, was made December 28, by D. O. Lively, Chief of the Department of Live Stock for the Panama-Pacific International Exposition, under whose general supervision the polo activities will be held. The decision to open the box list at this date was made at a meeting of the Executive Committee of which Joseph S. Tobin is chairman, J. Cheever Cowden is vice-chairman and Francis Carolan, George T. Cameron, Edward W. Howard and John B. Miller are members.

Orders for boxes, the price of which has been set at $100 for the period of the tournament at the exposition grounds, have been pouring in ever since the announcement was made of the details of the meet, which will bring out the foremost players of the world. Stall room has been provided for 500 ponies, among them some of the finest in their class. Every indication points to the appearance of the defenders of the cup to take part in the tournament, and a special added feature, consisting of a championship event, the game to be played between picked teams from the East and from the California players, will give to the tournament a class never before equaled in the west. This event has a particular interest in that it is expected to demonstrate the relative [illegible] of California and eastern ponies as well as the prowess of the players.

The polo tournament undoubtedly will be the big society event of the year, especially as the largest contingent of eastern polo enthusiasts and prominent society people ever gathered in California at one time are coming to attend. The appointment recently of Mr. James B. Cooley, Esq., of New York, to co-operate in the management of the tournament has operated largely to identify the poloists at Meadowbrook and Naragansett Pier with the California meet, Mr. Cooley having the management of the Meadowbrook field and being closely associated with the annual tournaments of the Polo Association at Narragansett Pier. His management of the ponies, fields and the crowds at the International matches has given him a world wide reputation, and his position with the Exposition Universal Polo Tournament, under the auspices of the American Polo Association, give promise of a meet unequaled in the annals of the sport.

AMERICAN NATIONAL LIVE STOCK ASSOCIATION CONVENTION, MARCH 24-25-26.

Denver, Colorado, January 1, 1915.

To Members and All Live Stock Associations and Live Stock Producers:

Call is hereby made for the eighteenth annual convention of the American National Live Stock Association to be held in Hall A, first floor of Exposition Memorial Auditorium, San Francisco, California, March 24th, 25th and 26th, 1915; convening at 10 o'clock a. m., on Wednesday, March 24th—morning sessions only.

At our last annual meeting it was decided to hold our 1915 convention in San Francisco during the Panama-Pacific International Exposition, at a date to be fixed by the executive committee. It has been customary to hold our annual meetings in January, but owing to the fact that the Exposition does not open until February 20th, 1915, it became necessary to fix a later date, and the executive committee, after considering the dates of other annual live stock meetings to be held early in the year, selected the above as the most convenient for the majority of our members.

The live stock industry was never confronted with more serious problems. It is passing through a very wide spread attack of foot and mouth disease. Railroads are proposing to largely advance their rates on live stock and its products. Range conditions are yearly becoming more unsatisfactory. Cost of raising and maturing live stock has increased. Importations of meat have affected prices. The war in Europe has seriously disturbed all commercial conditions in the country.

Among the many subjects for consideration at our convention are: Federal control of the semiarid unappropriated public grazing lands; various land bills before congress; administration of forest reserves; railroad rates and service; delays at terminals; cases pending before the Interstate Commerce Commission regarding live stock rates; valuation in live stock contracts; suppression of foot and mouth and other infectious diseases and appropriation by Congress for same; sanitary regulations; meat inspection law; importation of live stock and meats; inspection of imported meats, hides and wool; prohibitive tax on oleomargarine; financing of live stock loans; reports of officers and standing committees.

These and other questions will be discussed by men prominent in the live stock world. An unusually interesting program is being arranged. Officers of the Bureau of Animal Industry, the Forest Service and other federal officials will be present at our convention.

Hon. Woodrow Wilson, President, will probably attend one of our sessions and deliver an address.

Only morning sessions will be held, which will leave the afternoons and evenings for sightseeing.

Very low rates have been granted to the Exposition by the railroads from all points. Tickets on sale from and after March 1st, return limit three months from date of sale. On all tickets the railroads will grant a side trip to San Diego, California, where another Exposition, called the Panama-California Exposition, will be held during the entire year of 1915.

The California Cattlemen's Protective Association will hold its annual meeting at the Exposition Memorial Auditorium on Tuesday, March 23, 1915, the day previous to our convention. That association has made extensive preparations for the entertainment of our members, delegates and their families.

The Exposition officials have designated March 26th as American National Live Stock Association Day at the Exposition grounds, and special entertainment features are being arranged for that day. During our convention there will be a live stock exhibit at the grounds.

This association will maintain an office in San Francisco from January 15, 1915, until after our convention, at room 504 Sharon building, 55 New Montgomery street, opposite the Palace Hotel.

Those desiring hotel reservations should write to Secretary Tomlinson, 504 Sharon building, San Francisco, stating as nearly as possible the kind of accommodation desired.

All stock men are cordially invited to attend our convention.

H. A. JASTRO,
President.

T. W. TOMLINSON,
Secretary.

S. H. COWELL'S PETER THE GREAT YOUNGSTERS.

"Peter the Greats" have been coming into fashion pretty rapidly for several seasons "down east," and with the conclusion of the racing season of 1914 they had "arrived" with an emphasis that admitted no sidestepping. With the performances of Peter Volo (2) 2:04½, (3) 2:03½ and the various campaigns of other members of the family, and the increase of the list of 2:10 performers to the even thirty mark, there can be no argument over the passing of the crown of McKinney as the world's greatest progenitor of 2:10 speed to the son of Pilot Medium and Santos by Grand Sentinel. California has been and always will be loyal to the great house of McKinney, but our breeders have no objections to "painting the lily" or "gilding refined gold" when it comes to improving the blood lines of their horses, and have not been backward in seeking an infusion of the blood of the premier of Patchen Wilkes Farm for mingling with the strains of the recognized "California families."

L. H. Todhunter set the "advance fashion" for Californians a few seasons back when he imported from Kentucky, upon the selection of Colonel Jim Thompson, the colt Peter McKlyo, out of Klyo by Jay McGregor 2:07¼, the youngster making himself plenty of friends and trotting to a three-year-old mark of 2:12½. Several of our brood mare owners have gone to the expense of sending their choicest matrons to the Blue Grass in order to secure Peter the Great youngsters, with much success, and others have followed Mr. Todhunter's original example and "imported" outright, the last to bring youngsters of the Blue Grass aristocracy over the sunset trail being S. H. Cowell, who is the owner of the pair brought back by Ben Walker with the Thompson-Todhunter car, the lad and lassie having been chosen by Mr. Thompson during his recent visit in the east—and Jim can generally be depended upon to "pick 'em right" when it comes to youngsters.

Individually the babies—now yearlings—leave little to be desired, and in blood inheritance they are equally pleasing, coming on the maternal side, in each instance, from a long line of speed producing ancestors. "Pedigreelogically speaking"—getting down to one of the most graphic phrases ever sprung on an unsuspecting public by John Splan—there is little choice between them, though coming from quite different families. Glancing over the tabulations of the two pedigrees the writer had a hard time; first one looked the best, then the other, and back again. Finally a decision was reached by deciding it a draw, though many would doubtless choose the colt on "paper alone." You can look them over and make your own choice.

The dam of the colt is Pretoria Bingen by Bingen 2:06¼, sire of fourteen 2:10 performers, including the champion trotter Uhlan 1:58, and whose daughters have produced a number of 2:10 trotters, young ones at that; second dam Pretoria A. (sister to Nico 2:08¼) by Arion 2:07¾ (through whom is secured a second Electioneer cross), who is the sire of eight trotters in 2:10 and whose daughters have produced half a dozen or more of like nature, including Etawah 2:03¼; the third dam, Maggie Sultan 2:30, by Sultan 2:24, produced Nico 2:08¼ and three other trotters, and the fourth dam, Maggie Prescott, produced one performer, two dams of six, and was a daughter of Jim Monroe 835, sire of the dam of Gracie Kellar 2:09¼, etc. The colt's fifth dam, Laura Logan, was the dam of two trotters, two speed producing daughters and two speed siring sons, and was by American Clay 34, whose name adorns many famous pedigrees and who was himself a progenitor of 2:10 trotting speed through his daughters over a score of years ago, Rosa Clay being the dam of the campaigner David B. 2:09¼. Sixth dam by Crusader (Low's), and seventh a daughter of Tom Hal, if you have a hankering for going "in back of beyond."

However well you may like the backing given to the Peter the Great blood in the above, you cannot refrain from a liking for this one also; perhaps you will like it best, who knows? If it wasn't for differences of opinion, politics, and religion—to say nothing of horse breeding!—would degenerate into mighty tame affairs, so you can take your choice without costing you a cent. Here you are for the filly:

First dam Ione M. 2:21¼ (dam of two) by Gambetta Wilkes 2:19¼, who leads all sons of George Wilkes in number of performers; twenty-three of his get are in the 2:10 list, he is the sire of the dams of seven or more of the same select circle, and his ninety-odd producing daughters have given to the trotting turf over one hundred and fifty performers. The second dam is Nutwood Belle (dam of two trotters, two sires and one producing daughter) by the great sire of brood mares, Nutwood 2:18¾, whose daughters are credited with over a score of 2:10 trotters and pacers; third dam Silly (dam of one trotter, one pacer, one sire, four dams) by Alert 737, a son of Hambletonian 10. Silence, the filly's fourth dam, was a daughter of Abdallah 15, and gave birth to one trotter, one pacer, one sire and four daughters that produced eight performers, while the fifth dam was Woodbine by Woodford, one of the best mares ever owned at Woodburn. Woodbine produced two sterling trotters, the dams of Proctor 2:15¾, Kurburn 2:20 and Borden 2:24¾, and of her four speed siring sons both Wedgewood 2:19 and Woodford Mambrino 2:21½ are well represented in the 2:10 list through the produce of their daughters.

For two widely different pedigrees they run nip and tuck for the writer's favor, and, as remarked above, your own choice costs you nothing.

Mr. Cowell is a gentleman whose love for the trotter is of the genuine kind that puts personal pleasure and satisfaction ahead of monetary gain, and every one will wish him luck and happy days in the future with these aristocratic youngsters.

TWO MORE FOR CARLOKIN 2:07½.

Weather conditions last week at Los Angeles were not conducive to fast racing owing to the rains that caused the repeated postponement of the farewell meeting for the year, and a curtailment of the program from the extensive card originally prepared. Nevertheless a fair crowd turned out Tuesday at Exposition Park to see five events. Scratches owing to existing conditions cut the fields to two starters in each of the competitive events. The special pace arranged in place of the 2:25 class was interrupted after Thelma and Laura Held had each taken a heat, owing to the sudden sickness of the latter. Lady Silverthorn disposed of Tim Whiffler in straight heats, and Charles Blackmar's Maxidan and Dan W. won the team race.

Carlokin 2:07½ got two new performers to add to his honor list of youngsters, which is headed by Esperanza (3) 2:09, the first three-year-old to make a clean sweep of the coast classics for that age. Helen Belle, two-year-old bay filly, started to beat 2:30¼ trotting and made the circuit in 2:22¼, and the three-year-old bay filly Miss Carlokin, starting to beat 2:25¼ pacing, annexed a breeder's record of 2:20. Helen Belle, bred, owned and driven by Will G. Durfee, is out of an eastern bred mare brought to California by Mr. Durfee a few years ago, Carolyn C. by Axtell (3) 2:12; second dam Expedience by Expedition 2:15¾, while Miss Carlokin, bred and owned by C. C. Price and driven by E. W. Mosher, is out of Miss Williams 2:09¼ by Williams 2:20½.

The original program provided for a start by Contention B. against the pacing record for three-year-old geldings, a start by Mabel Van to beat 2:10¼ trotting, and starts against time for standard records by a number of youngsters from Hemet Stock Farm, and the fact that the weather prohibited these events is much regretted by both horsemen and public.

CHARLEY JAMES DRIVES NEW ZEALAND WINNER.

In its review of the spring meeting at Forbury Park which took place late in November the New Zealand Referee makes the following note of the Progressive Handicap, awarded to Charley James, whose friends on the coast are legion: "Flora Tracey, who was driven by her owner, Mr. F. Amor, was made a good first favorite, and quickly established such a big lead that it seemed impossible for her to be beaten. Over the last half-mile Prince Toronto, who had been lying a long way back in the early stages, commenced a strong run. In the straight he was fast overhauling Flora Tracey, who was running out fairly wide, but when Prince Toronto attempted to come through on the rails closed in on him. C. James, who was driving Prince Toronto, then had to check his horse and come round on the outside of Flora Tracey, but even so was only beaten by a little over two lengths. The interference was most pronounced, and the stewards might well have taken up the matter themselves without the owner of the second horse having to enter a protest. It did not take them very long to come to a decision to disqualify Flora Tracey, and award the race to Prince Toronto, placing Dot Robbins second and Honest Mac third. As a contest ,however, the event was solely confined to Flora Tracey and Prince Toronto, for Dot Robbins finished about a hundred yards behind the latter, and Honest Mac was a poor fourth. C. James, who drove Prince Toronto, registered his first win since his return to New Zealand at the beginning of the present year, after many years' residence in the United States, where he was associated with some of the leading men in the sport."

Other sporting publications of the dominion speak warmly of the drive Charley was making with Prince Toronto, and as he was apparently headed for the front when the interference came the crowd was with him all the time and the action of the judges was popular. The distance was a mile and a half and the stake one hundred sovereigns, Prince Toronto starting with a handicap of ten seconds and Flora Tracey twelve seconds.

New Year's Day at Pasadena

ROBERT A. SMITH, Correspondent

A Tournament of Roses without a horse would be like the Coronation Coach of England with a motor. While the florescent parade, with its floats of various designs and myriads of specially nurtured roses, at the annual Pasadena New Year's Day Festival delights the eye and appeals to the artistic sensibilities, as does a painting of one of the great masters, the presentment of the good people of the "Crown City," to their world's guests, would be only about one-third complete without the "sports," held in the afternoon on the conclusion of the parade, at the beautiful half-mile track at Tournament Park, nestled down in the sunny orange groves, with snow-clad Mt. Baldy, reminding the eastern horsemen present of their trotters at home, stabled and blanketed, unable even to jog through the banks of snow. The writer is much gratified to note that while in former years the chariot races have been the paramount attraction, the directors decided, this year, to further entertain the spectators with two harness races, and in view of the fact that the 1915 "gate" was the largest they have ever had, the harness horses must be accredited with much of the gain in attendance, as this is the first time the Tournament has had trotters and pacers on its program, and again establishing the fact that the American people, who are willing to pay admission, must have racing free from the fumes of gasoline. How the 25,000 throats of that Pasadena grandstand and bleachers yelled and echoed back from the mountains at the finish of every heat!

At the conclusion of the parade the gorgeous floats were drawn to the center of the infield, presenting perhaps the most remarkable and memorable scene ever laid on a race track in the world's history. Pasadena is the present home of chariot racing, as was ancient Rome. Four teams were entered by the charioteers, two teams racing a heat, followed by a heat between the remaining teams, the winners of the preliminary heats meeting in the final. E. J. Levengood of Chino, Cal., was the final winner of the $3,000 prize. Some idea of the furious and bloodtingling speed may be obtained by the time by quarters of one of the heats—:28, :56¼, 1:26¼, 1:56—truly remarkable speed for four runners hooked abreast to a heavy, cumbersome, old-styled steel tired chariot (such as is seen at the circus) on a half-mile track.

Sandwiched with the heats of the chariot races was the special pace for named horses, with eight entries and five starters, Alaca, Zola Patch and Sunshine being scratched. On the first score the word was given and Tim Whiffler at the pole was immediately joined in a three-horse race around the turn by Capt. Todd and the Pasadena mare Dolly Zombro. At the half Capt. Todd dropped back a length, with Whiffler still in the lead and Whitney keeping the Zombro mare right at his necktie. On the back stretch Tim made a revolution, but was on a pace in an instant, maintaining his position until entering the stretch in the final brush for home. Murphy, realizing he was beaten, eased up on his horse, Dolly winning by a length in 2:18¼. The Santa Maria entry Wayward Jr. and Miss Carlokin got into a mixup on the turn, an accident being narrowly averted, the only damage resulting was to Wayward Jr.'s knee spreader, McCormick making no further effort to win the heat. They were off on the second score in the next heat, with Dolly and Tim again battling, but at the half the crowd yelled, "See that Wayward Jr. go!" Into the back stretch the second time around Wayward was ten lengths back of the leaders, and with only about three-eighths of a mile to go, skirted the field on the outside, caught and carried Tim Whiffler to a break fifty yards from the wire and brought Mr. Whitney to the crowning effort of his "teaming" career, to stall off this rush, Dolly winning the heat and race by half a length, right back in 2:18¼. Subsequently Mr. Whitney drove the winner an exhibition mile in :35¼, 1:10¾, 1:44, 2:17½.

Four of the five trotters entered scored for the mile dash, Garret B., owned by G. L. Blosser of Santa Maria, being the only one scratched. The second score found the horses off on their journey. Directum Penn, who obtained a record of 2:12¼ in a winning race at Lexington, Ky., half a dozen years ago, raced the green gelding Chauncey by Strathway, and Danube 2:12¼, around the turn, taking the lead down the back stretch, with Danube second and Chauncey right at his wheel; these positions were maintained until at the three-quarter pole, Mr. Hewitt moved his horse up to Danube's head, trotting on the outside around the turn, when Chauncey stepped in a hole made by one of the chariot horses, causing him to break, leaving only the game old Danube to take the fight to Directum Penn. The graduate of the Salisbury stable, as in his palmier days, tried to the limit, the spirit was willing but the flesh was too weak to catch the Atkinson horse, Directum winning in 2:23½. One of the most interested spectators was Alonzo McDonald, of Grand Circuit fame, who has brought his stable to winter in California. Another "back easter" enjoying the day in the official capacity of judge, was Mr. John Sheppard, of Boston.

The summary:

Special pace, for named horses, 2 in 3, hobbles barred. First money $125, second money $75, third money $25, free entrance:

Dolly Zombro, b m by Zombro 2:11 (Whitney)	1 1
Tim Whiffler, b g by Zombro 2:11 (W. R. Murphy)	2 3
Wayward Jr., b s by Wayward (Con McCormick)	4 2
Capt. Todd, br s by Barronteer Todd (Wright)	3 5
Miss Carlokin, br m by Carlokin 2:07½ (Ed Mosher)	5 4

Time—2:18¼, 2:18¼.

Special trot for named horses, one mile dash. First money $100, second money $60, third money $25; free entrance:

Directum Penn 2:12¼, br s by Wm. Penn 2:07¼ (Atkinson)	1
Danube 2:12¼, br g by Directo (Murphy)	2
Chauncey, ch g by Strathway (Hewitt)	3
Caroline, b m by Robin (Ward)	4

Time—2:23½.

THE MARKET FOR PURE BRED DRAFT HORSES IN 1914.

Sales of draft stallions during the season now passing into history were not as numerous nor at as high prices as in 1913. Nowadays the selling season is quite generally accepted as beginning in the fall, say with the opening of the state fairs at Des Moines, but not getting under any great headway until the holding of the International, at which great show a large number of stallions and mares have annually found new owners during the past several seasons. Business transacted prior to the International is chiefly confined to one firm, or perhaps it would be more correct to say that one firm has by its methods succeeded in establishing a fall trade far in excess of any other. High prices have not been a feature of the methods employed to establish this trade, but even so, it stands to reason that the prices must have been satisfactory or they would not have been accepted. In passing, it may be mentioned that this same firm has been even more successful in disposing of its stallions imported this year than it was in the corresponding period of 1913.

As there was no International this year it will be well to consider the entire trade for all of 1914 and the month of December of the year preceding, for the reason that while many sales are made outright at the big show, the foundations are laid for many more. There is little doubt that prices obtained at the last International were better than they have been at any time since. According to published statement, J. Crouch & Son disposed of Idlefonse, the champion Percheron, to W. H. Minor for a consideration that footed to some $12,000, but was not all represented by hard cash. The Burgess Stock Farm reported some very satisfactory sales in the neighborhood of $3,000 and Dunhams sold their two-year-old black Percheron, Londrecitos, to the McLaughlin Percheron Co., Oakland, Cal., at a very long figure. Trumans' Pioneer Stud Farm likewise made some highly satisfactory sales at the International of 1913, and various other owners also announced themselves well pleased with the business they had done.

Right after the show trade in imported stallions began to drop somewhat and it never again became active during the entire season, some firms previously quite prominent making but few sales, all told, and only a few cleaning up in anything like good shape. There were several reasons for this. To begin with, money was mighty scarce among farmers and many would-be purchasers demanded long time, paying nothing down, and sales on these terms have rather gone out of fashion. Then several of the importers had bought their horses on an exceptionally favorable basis abroad and thought they might as well hold them over as let them go on risky paper or sacrifice them in any other way. Those who were willing to accept long time paper sold about their usual quota, but to them it was an expensive season, because of the amount of capital borrowed or otherwise utilized in carrying the notes to first maturities. Importation of stallions is a perfect floodgate for money unless all goes well in it, and unless the turnover is reasonably rapid and certain the expenses are so high that profits are devoured.

Just how much lower prices were in the spring of 1914 than during the season previous is not known, but it is probable that they averaged several hundred dollars per head. In addition, as already stated, only a very few of the importers cleaned up at all thoroughly, the holdover delegation varying in dimensions in the various stables from three or four to ten times that number, perhaps more. Some importers had no hesitation in pronouncing it the worst season they had ever encountered. None called it good.

With the breeders the situation was slightly different. Prices were not high, but the cleanup was the best ever attained. Some government orders absorbed as many as 500 head of pure bred native stallions, and many country stallioners who theretofore had bought imported goods turned to and picked out something less expensive and bred in the United States. Besides this, many farmers, tiring of the trouble encountered in taking their mares to the horse right in the busiest season of the year, supplied themselves with coming two-year-old colts with the intention of working them in the leather, getting their own mares with foal, and so killing several dogs with the same rock. It can hardly be said that this policy can ever make for the improvement of our equine draft stock, but if the farmers themselves are satisfied surely no one else has a right to enter a protest. Before the end of last May practically every owner of a pure bred native stallion coming two or older had a chance to sell him for some sort of a price (the going offers being for three-year-olds from $400@500 and for two-year-olds from $250@400. Naturally this very greatly reduced the number of young stallions in the growers' stables, and it is probable that the crop available for this sale and service this year is smaller than it has been for many seasons.

Prices of mares in 1914 at both public and private treaty did not hold up to the level of 1913, averages at sales being materially lower and more paper offered in settlement for purchases. Dealers and breeders who have made a specialty of handling mares of fair to high class found their wares considerable of a drug, and when at all anxious to crowd stock for sale they had to accept quite heavy reductions. In the east the demand was not at all what had been expected and breeders in Indiana and Ohio seemed to have quit buying almost altogether. Some public sales of mares just missed being failures and only one or two could be called at all satisfactory.

Throughout the early portion of 1914 the West was a rather poor buyer of both stallions and mares, regions where erstwhile demand had been active not sending a single buyer afield. This was to be accounted for doubtless by the failure of crops in sundry districts for two or three seasons in succession. A pleasing feature of the season, however, was the revival of the business in California, the McLaughlin Percheron Company, to which the Dunham-McLaughlin Company is now the successor, selling a fairly large number of Percheron stallions in the Golden state at good figures, and putting the business there on a higher plane than that on which it had at any previous date rested.

Only a very few draft stallions were taken by the South or Southwest, and the eastern farmers displayed no greater desire to breed their own farm teams than they ever did. Most of the best trade hailed from Iowa and Illinois, which two commonwealths have always supplied the best buyers. Minnesota took quite a few moderate priced horses and Nebraska did likewise. There was little, if any, change in the relative demand for the various breeds.

With the declaration of war in Europe a change came over the importing business. Dunhams, Crouch & Son, the Burgess Stock Farm, Taylor & Jones and a few other importers shipped their horses early enough from Europe so as to get clear before the existing embargoes were laid against exportation, and Trumans Pioneer Stud farm and one or two others succeeded in getting British horses out of that country by special permission of the privy council after hostilities had actually begun. This left most of the importers with their selections still in Europe and without hope of being able to get them across the ocean.

As time has worn along since exportation of horses was first prohibited by France and Great Britain, it has become apparent that while the demand of the year to come does not promise to be as great as during some of those that have gone before, great benefit is bound to accrue to the home breeders. Already enough sales have been held to show that the demand for good Percheron mares and stallions is brisk. Prices for stallions, paid at auction, have been better than usual, while those paid for mares, though a trifle disappointing at some vendues, have in the main been quite as high as the class of stock warranted. —Live Stock World.

INSIDE ONE OF THE EXHIBITION BARNS AT THE P.-P. I. E.

PERCHERON BREEDERS OPTIMISTIC.

The Percheron Society of America is the most extensive and powerful of the various record associations whose efforts are devoted to the safeguarding of horse interests in the United States, its membership of over six thousand individuals exceeding that of any record association, save two whose interests are confined to cattle. California, with sixty representatives, leads all far western states in point of membership in the society, and to these, and to all horsebreeders who are in shape to come in for their share of the business that will undoubtedly follow the cessation of hostilities in Europe, the following excerpts from the address of President White at the recent meeting in Chicago will be of pertinent interest:

"In the first place I would remind you that except in our fortunate and most favored land, all the countries in the world which heretofore have been engaged in the breeding of draft horses are now engaged in their destruction. Amongst all the great nations of Europe war rages in all its unbridled license, sparing not human life, neither men, women nor children, the most venerable monuments of antiquity nor the most valuable products of human genius and industry, and it would be the most utter folly to imagine that the pure bred draft horse with all its usefulness in the battle would be spared. Except the Percheron alone, the Belgian is the most popular draft horse in America, and unless I am greatly misinformed, with the exception of those Belgian studs in America, his race is almost eliminated, and he has ceased to be a factor in the business.

"No one can have the slightest doubt that the Clydesdale and the Percheron have been freely used and heavily drafted upon by their respective governments for use in the field with the army. A few weeks ago the New York Herald informed us that France had already prohibited for at least five years the exportation of mares of any breed.

"I want to say that this is newspaper talk and I have tried to get this confirmed. I asked the Ambassador of France about it and I received a letter from him this morning in which he stated that he had not been informed of it and he probably would not be informed of it, if it had been passed, so I don't know whether it is correct or not.

"With such conditions confronting us, I feel that it is time that we were taking stock and considering well whether or not without the aid of France we are in shape to continue the breeding and the advancement of the Percheron horse.

"This Society recorded, under the administration of Mr. Stubblefield, between December, 1902, and August, 1910, approximately 29,000 animals in its books. Since that time we have added 40,271, making in all about 70,000 since 1902, a period of twelve years, thus averaging 5,833 each year. From November 30, 1901, to October 31, 1914, inclusive, we recorded 19,743 American bred stallions and 25,557 American bred mares. It is a safe assumption that during these years as many stallions as mares were foaled. These figures, therefore, seem to show that American breeders are freely using the knife on unworthy animals. This is a procedure greatly to be admired and encouraged, and if we are to become real constructive breeders, improving the worth and character of our stock, this practice must be persisted in and in the future even greater use of the knife, especially in the case of unsound animals, will be most advisable.

"Consideration of these figures shows that we have today in this country not less than 100,000 pure bred Percheron horses worth approximately $50,000,000. By both the importer and American breeder it is conceded that for more than fifteen years we have been bringing to this country the very best that France has produced, whether they be judged as individuals or according to their breeding and blood lines. Add these to the best we have produced in America in the last twenty years and we have indeed a splendid foundation on which to build our future breeding.

"In view of the conditions now existing in Europe, the American breeder is to be congratulated on the possession of such foundation stock. Never before did the future prospect look so bright. Besides having before us the entire American market, it is more than probable that we shall have to supply with breeding stock, Canada and Argentine, countries in which the popularity of the Percheron is increasing by leaps and bounds, and it is more than possible that even the mother country France will invoke our aid when the war is ended in replenishing and reinvigorating her stock."

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

PACIFIC COAST FIELD TRIALS.

The Pacific Coast Field Trials Club's thirty-second annual trials will start near Bakersfield, Monday, January 25. This meeting promises to eclipse the club's best efforts in the past in both the class of dogs entered and the number of starters in the different events.

Recent reports from the training grounds indicate an abundant supply of quail. Natural scent and cover conditions are at present the best in many years. This will insure proper training and conditioning of the canine candidates for field trial honors. While it was expected that the Derby stake would fill with liberal patronage, the unusually large entry for the All-Age stake has occasioned much surprise among the field trial sportsmen. It is regarded as a certainty that the class of competition expected from these seasoned campaigners will border on the sensational.

A number of pointers and English setters owned by northern fanciers have been entered for the coming trials. E. S. Munger of Burlington, Wash., is now located at Button Willow, with a string of dogs belonging to A. D. Opdyke & Co. of Seattle. Prominent in this kennel is the well-known winning English setter, Llewellin Danstone, whose brilliant performances in the past have earned him a high place in the estimation of Coast fanciers.

J. W. Considine of this city and Seattle has six grandly bred English setters in the hands of Wallace Bruce Coutts, the well-known veteran field trial handler. Among the dogs are Melrose Dude, Melrose Jack, Melrose Maxwell and Melrose Chief. The style and work of the last-named setter, shown at the club's trials last January, attracted much attention, and his running in the coming Derby will be watched with interest.

Among the famed veteran dogs in the All-Age event is Joseph A. Chanslor's Old Forester, winner of the 1914 All-Age, and rated as one of the very best performers on the Coast. Old Forester is the sire of S. Christenson's Forestress, placed third in the last Derby, and also other high-class field trial contenders, all of which is regarded as the promise of a producing sire of a strain of field trial winners.

The Stockdale Kennels, which are maintained by Gordon B. Tevis and his brothers, Lloyd and Lansing, have a formidable entry of pointers, which are looked after by T. C. Dodge, and are being trained and exercised regularly on the training grounds near Lakeside. At the head of the list are Sweetheart of Stockdale, placed second in the Derby and third in the All-Age at the club's trials last season, and her sire, Ladas of Stockdale, also a winner of note. The Stockdale Kennels have never failed to show well to the fore since their inception in 1898. The coming trials, it is believed, will be no exception to the past career of Stockdale pointers, a strain that is popular with and much in use by Coast sportsmen for upland sport.

H. S. Russ of Bakersfield has entered in the All-Age, Chicken Ives, winner of the 1914 Derby event. He will go against such classy competitors as Shasta Queen, owned by Joseph E. Terry; Bohemian Prince, Hard- Tack, Kil's Light, Melrose Dude, Llewellyn's Danstone, Ladas of Stockdale, Forestress, Pied Piper, Old Forester, Sweetheart of Stockdale and Reno, a dark horse (?) from the kennels of Charles DeRyder of Pleasanton. Last season Chicken Ives edged Sweetheart of Stockdale out of first place in the Derby by a close margin. No effort will be spared by the latter's dog handlers to place her in front at the meeting this month.

The Members' stake, contrary to the usual schedule, will start the coming trials. This stake is an amateur event, in which the various patrons handle their own dogs in the manner customary in upland shooting. The Members' stake will be a stellar attraction at the trials. It has been claimed in the past that too much attention was being directed to the development of speed and range, to the detriment of the field trial dog's bird-finding ability. The degree of interest manifested in this event is abundant evidence, however, that the followers of field trials sport have the proper idea in mind. The club extends an invitation to all good sportsmen to join its ranks and enter dogs in competition for the splendid and valuable trophies offered. There are over thirty field trial clubs in the United States and three in Canada that ran trials in 1914. The Pacific Coast Field Trial Club ran the initial meeting in 1881 at Walltown Timber, near Folsom. The organization is the third oldest in the country. The Members' stake will be run under the direction of Field Marshal J. Walter Scott, the owner of the phenomenal pointer from the Orient, Manchu Princess. This pointer has been withdrawn from the trials, having sustained a disabling injury while training.

A unique feature of the meeting will be the run after a fox by the Pacific Coast Hunt Club's pack of English fox hounds. For the first time in the annals of the sport on the Coast, the members and followers of the hunt will ride in the flashy colors favored in the East and in England. The mounts have been schooled especially for this sport. The run will be under the direction of Master of the Hunt T. J. A. Tiedemann, of this city. His intimate association with "riding to hounds" in England assures the observance of every formality down to the minutest detail. Prominent among the hard riders of the club are: J. M. Kilgarif, J. W. Considine, E. Courtney Ford, S. Christenson, George B. M. Gray, Joel S. French, Gordon, Lansing and Lloyd Tevis, and by one of the latter riders, it is prophesied, the "brush" will be taken.

Southern California is strongly represented this year by W. W. Sweeney's pointer Queen O' Trumps, a daughter of Champion Deuce II. Queen is being trained by E. S. Munger. The Wilkes and Avery string, consisting of both pointers and setters, are being conditioned by Roy S. Avery personally, on their training grounds near Taft. Avery, formerly well identified with coursing, won the Members' stake last year, with the pointer Hard Tack, which dog bids fair to be placed again.

Among the Derby entries prominently mentioned as likely candidates for honors are: Smiley, belonging to D. B. Townsend, of Caspar, Wyoming; Shasta King, owned by J. M. Kilgarif of this city; Orange Bloom, owned by S. Christenson, Rincon Hill Kennels, Jim Rodney, Wilkes and Avery's Dakota, Frank J. Ruhstaller's setter, Shasta Maid; J. W. Considine's Melrose Chief, Joseph A. Chanslor's Budd. The status of the Stockdale Kennel's entries is not known, but it is certain that several of the pointers possess the quality necessary in winners.

AN ENGLISH PUBLIC-HOUSE SHOW.

It is probable that few, if any, of the readers of The Asian, writes John Brown, have attended a public-house dog-show. Possibly—I don't know—shows of this kind are not very common now; but years ago, more years than I care to remember, the Saturday issue of The Sporting Life used to contain curious advertisements of such events. They were more than curious, they seemed to wear, an out-of-date unchronological aspect, as if they were relics of the time when what Evelyn describes as "rude and dirty pastimes" were in vogue. He was alluding to cock-fighting, dog-fighting, and bull-baiting; "butcherly sports, or rather barbarous cruelties," he called them. The public-house shows were not pastimes of this description, they were dog-shows, and yet in a manner they suggested the old sports patronized by men who, if they were cruel, possessed much of the courage of the game-cocks and bull-dogs whose combats they loved to witness. Wellington called his men in the Peninsular, largely recruited from this class, "the scum of the earth," but they were a kind of scum that made the British flag respected all the wide world over.

At one time, a long time ago, about the time a fox-terrier's puppy of the name of Result was springing like a rocket into fame, I had a dog-dealer friend. I remember that, because in fox-terrier circles Result was a name to conjure with. Indeed, there are people to this day who say that there has never been such another terrier. That is fudge of course, no old-day terrier, not even Result with his ever-victorious record, would have a ghost of a chance with the modern cracks in the ring; and I, who have never been without a terrier at my heels for forty years, ought to know. But to return to the dog-dealer, his name was Joe Parker, at least that was not his name, but it will do as well as any other. Joe was just dog through and through; dogs to him, as to the man in the tall white hat in David Copperfield, were "wittles and drink, lodging, wife and children, reading, writing, and 'rithmetic, snuff, tobacker, and sleep." He was not above hawking toys in the busy thoroughfares of the west, and might be seen in Oxford or Piccadilly Circus with one on a lead, another under his arm, and maybe a third in his pocket. They were Yorkshire terriers or miniature black-and-tans or King Charles or Blenheim Spaniels in those days, none of your Pekingese or Japs or Toy Poms; and Joe sold a good few, he had, as he said, "a way with wimmin." He used to say with Bob Jakin in the Mill on the Floss, "have a dog, Ma'am, he's a better friend nor any Christian," with the unction of a parson announcing a collection after the sermon. In his heart of hearts, however, he loved a real terrier. "Terriers! Demons! Gamest of Game! That's my sort," he used to say; and at his place, a crib that took some finding, he would produce at short notice a varmint, named Tartar maybe, or Wasp, or Vixen, but as good as the best. I bought a few from him, he never sold me a pup, and one, a daughter of old Belgrave, Joe, at least so he said, was out and away the gamest and most genuine terrier, built on the old lines, I have ever owned. She was the sort it is increasingly hard to find nowadays.

One foggy morning in December, I happened to remark, "Ever been to a public-house show, Joe?" He looked at me, as one looks when one says 'bar sells,' and shrugged his shoulders. "Ever bin to a public-house show? Yer might ask if I ever drunk a pot o' beer." "I'd like to go to one, Joe ,that's why I asked." "'Tain't the place fur young gentlemen," he said, "not but what you be safe enough wi' me." So we fixed it up, there was to be a show on Christmas night at the "Pig and Whistle" or some name like that, a pub in the slums on the Surrey side; and on the 25th, sure enough, Joe directing the way to the driver through the trap-door, we were bowling along in a hansom to a rendezvous I saw for the first and last time. The Bar was empty at the time, except for a big fellow who proved to be the publican proprietor. Joe said he had been a bit of a bruiser, and he looked it; but, like bruisers who take to public-houses and good living, he had developed a paunch and his face was red as a pillar-box. He was big enough and strong enough, however, to be his own "chucker-out," and he seemed almost disposed to begin with me, a guest without a wedding garment. But Joe introduced us, "This genleman is a customer o' mine, Bill, 'he's all right." "A friend o' yours, Joe, is welcome," said the publican; and then we had a drink all round at my expense to seal the matter. "You'll 'ave to drink," said Joe, "stand it an' let yerself be stood, it's the w'y of the place," and it was a way I soon found out for myself. "Take the gentleman upstairs, Joe, if he's a mind to have a look," and upstairs we went.

It was a large room, not too well-lighted, there was sawdust on the floor and it was wanted, and the mists of London outside were not so thick as the fog of tobacco smoke within. The room was full of men, men of that class which in an earlier time must have been addicted to "rude and dirty pastimes," men with stomachs as hard as their heads. They were all smoking, and most of them were drinking, and all were talking dog in strong phrases; if the language was somewhat elliptical, it was never obtuse. I offered a merry-looking individual I found myself beside, a drink, and he took "a three of Scotch," tossed it down with a gulp, and became communicative. No, he wasn't showing; his terrier, such a terrier, the best in the world, was run over that morning, stone-dead, that's how it was. "Bad luck," I said. "It's the sort of luck to thank God it's no worse," he remarked; and then I noticed that the chairman was about to open proceedings. He rapped the table with a hammer to demand silence, and made a short speech. I wish I could reproduce it, without relying on my imagination for my memory, for it was full of good things told in a form of slang that tickled the palate with a sharp, pungent joy. Then he gave out the events, and invited entries, which were jotted down on the sort of slate used for drink reckonings. The judging was conducted in a different room, empty of everything except sawdust and the dramatis personæ. There were usually two judges and a referee, and if the class was large the exhibits were judged in pairs. That is to say, the loser was eliminated and the winner came up again in the next heat, and so on to the final. At the close of each class, we repaired to the main room for drinks and discussions, both much in evidence, but though the remarks of the disappointed lacked nothing in vinegar and cayenne pepper, the awards were generally accepted with a fair amount of geniality. There was a class for small bull-terriers, little beauties, about the size of quite a small fox-terrier, but weighing heavier no doubt, they were so robust in muscle. They were the sort of multum in parvo bull-terrier that used to be associated with the name of old Bill George, the sort that Colonel Edward Earle had in the Punjab in the seventies, and the best and gamest little pals in the world. That was the last class of them I ever saw, more's the pity. And there was a class for "business" dogs, the old fighting bull-and-terrier, half-and-half, murderous-looking villains, plunging at opponents in the ring as a bull might do in a Spanish arena. Seeing me interested in the proceedings, owners would ask my opinion on their exhibits, but I had the tip from Joe. "Allers say he's a good un," he whispered, and he was right. "Touts veriti n'est pas bonne a dire," and the attitude of the questioners reminded me of DuMaurier's sketch in Punch, depicting a big man standing over a little one and saying, "If any man tells me that I am not a Titian, I'll knock him down, now I want your candid opinion." So I said "a good un" with a fervour on every occasion, and was voted a good sport. And there were classes for racing whippets and toy-terriers of kinds, and a match of £5 a side between two bull-dogs and goodness knows what besides, for I did not stay till the end. What with "threes" of whisky, and pulls at tankards of half-and-half, every few minutes, and the smoke, and the atmosphere in unventilated premises, I was forced to capitulate.

"Get me out of this, Joe, I'm as drunk as a lord." "And ye had better be going," he said, "there'll be hot doings by and by." He was right; the losers were beginning to lose their tempers, and like the Murderer in Macbeth, felt themselves so spited by the world that their only aim in life was to get a bit of their own back again. The last I remember of the "Pig and Whistle" was a tankard put to my lips, and then Joe and the publican hoisting me into a growler. I must have reached home somehow for here I am; but I remember, as I felt my way up the banisters to my rooms in Duke Street, I chuckled to think of the undergraduate who couldn't recollect whether he was Casenore of Brosenose or Brasenose of Casenore, when he tried to find his way back to his college by way of the library railings. That was the only publi-house dog show of which I have had personal experience.

HUNTING NOTES.

A great many people are under the impression that by the failure of the adoption of amendment No. 18—the non-sale of game law—wild game of all description can be sold. This is not true. The failure to adopt the amendment does not change or affect the present laws in any manner. They remain just as they were. Wild ducks (excepting wood ducks), wild geese, bottontail or brush rabbits and jack rabbits are the only game permitted to be sold, and sportsmen should not be misled to the contrary.

* * *

The recent decision by an Arkansas judge which declared the Federal law pertaining to migratory wild fowl unconstitutional, applies only to the wild game zone over which that court has jurisdiction and not to the whole country. The case has been appealed to the Supreme Court of the United States and will probably be reached some time in the spring. That particular case developed a peculiar coincidence. In a previous case in Arkansas where arrests had been made for shooting ducks during close season the Judge dismissed the defendants and in delivering his decision made the statement that "it was a matter that should be regulated by the Federal authorities." Convictions have been made all over the country for violations of the new Federal regulations. In the North Dakota courts the decisions have been the same as those rendered in this State.

The impression also prevails in some sections, particularly in the southern counties, that the State Fish and Game Commission officials will take no action in the case of hunters who shoot before sunrise or after sunset, which is a provision of the Federal law. The State law, which has been superseded by the United States law, formerly allowed shooting a half hour before sunup and a half hour following sunset. The Commission officials are here quoted as expressing the positive intention of enforcing the provisions of the Federal regulations in this respect. Hunters who bank on early and late shooting as defined by the State statutes will take action accordingly and avoid possible complications.

* * *

The main army of trigger-pullers meanwhile are carrying on a vigorous campaign against the web-footed marsh and bay visitors. Probably the best averaging results recently have been secured by gunners who shoot, here or there, along the bay shores as wind and weather conditions induce the birds to congregate at one sheltered spot or another.

At several of the Suisun shooting preserves poor shooting has recently been the rule. An absence of gunners at adjoining ponds allowed the birds to rest comfortably and in safety. When there is a general bombardment on the marsh, or any duck-shooting district for that matter, the birds are kept moving from one pond to another, which flight gives the men in the blinds opportunity to bag more or less ducks.

R. B. Murdoch shot a limit string, including fifteen canvasback ducks, at the Jacksnipe grounds a week ago. The "cans" were northern birds, which was proven by the presence of "wapato" or Indian potato in their craws. This bulb, which canvasbacks are exceedingly fond of, is not found to any great extent this side of the Oregon line. The fact that the bulbs were intact in the ducks' craws gives an interesting hint as to the speed and distance covered in comparatively short time by these birds. On Saturday for over two hours an immense flight of "cans" and sprig, which a strong glass showed were newcomers from northern grounds, passed over the upper end of the Suisun marsh, high up in the air and bound south. Ed L. Hoag and other members of the Cordelia Gun Club enjoyed fine sport a week ago. The outside clubs, Volante, Montezuma and Joyce Island Gun Club ponds have yielded a plentiful harvest of ducks recently.

Fred W. Kewell, H. G. Hebgren, A. H. Drussick and J. Finch each returned from the weekly shoot at the Chiquita ponds with big strings of both ducks and geese.

Los Banos still holds good for the gunners. Field and Tule Gun Club members continue to shoot Saturday and Sunday limit bags. Other hunters in that section are also in line for limit strings. Wild geese are plentiful now down the valley. Within the past week there has been a large flight of swans. These graceful birds are on the prohibited list of both the Federal and State laws. Swans are also numerous in the Suisun marshes, more so than for many years past. The saving clause is that a swan is entirely too tough to be a desirable table bird, but the young birds, cygnets, are said to be excellent eating.

Fred Willet, Hugh Poston and two other trigger-pullers from this city each shot duck limits in two days' shooting at Gustine. Wild geese and English snipe were also shot. The fact that snipe are numerous in many parts of the lower San Joaquin valley is pleasing news to many hunters.

Near Rio Vista both ducks and geese are now plentiful enough to promise a day or two of good shooting to sportsmen who make the up-river trip. George W. Ellery, Jack Ellery and George Klarman were located on the ark "Sausalito," close by the Rio Vista shooting ground last Sunday.

The riprap dyke that extends a long distance from Mare Island into San Pablo bay has been a refuge for thousands of "cans" and bluebills. Paymaster E. R. Wilson and other officers of the cruiser South Dakota have shot numerous limits from blinds in that part of the bay this season. Paymaster Wilson on the recent voyage to Mexican waters, in shooting bluerocks from the bridge of the war vessel, was a close second to Commander Frederick N. Freeman, who is a noted trap shot.

Petaluma creek gunners have had good, bad or indifferent shooting the past two weeks according to weather conditions. Up that way the pleasant weather has cut down general results. Recently the banks of the creek, for miles, were manned with a skirmish line of shooters. What flight of birds there was kept high in the air. Nothing daunted, the general bombardment of the skyscrapers was terrific. Some shooters emptied the magazines of their pump guns at birds over 100 yards high. Needless to say, but few birds were secured.

Hunters who have visited the lower end of the Alameda marsh, in the vicinity of the "drawbridges"—a favorite wild fowling resort for the past 40 years—have enjoyed fine canvasback shooting. Bluebill ducks have also been fairly plentiful. The men who "scull" in the big sloughs and out along the bay shores have generally shot limit bags. Wm. Carrera's favorite ground is near the mouth of Mowray's creek. Price Brothers, who are familiar with every nook and corner of that region, have also made numerous canvasback limits. Ed E. Quayle's trip, a week ago, was for a 25-bird string.

Spoonbill ducks were in the large majority at the inside shooting ponds recently. Chas. H. Kewell, J. T. Connelly, Chester Potter, Dr. J. C. Sylvester and B. Burns accounted for limits of spooneys, shooting in the big salt pond blinds of the Arden Gun Club down in the Coyote hills. Messrs. Rose and Gimmel were equally successful on the adjoining preserve of the Coyote Gun Club. Ray Chisler's pond near Newark has been a regular limit producer for several weeks past. At numerous "inside" shooting grounds the recent rains heavily flooded the ponds with fresh water, also here and there broke down levees, all of which seriously interfered with shooting, for the ducks scattered and sought more congenial quarters.

Near the "bridges" the big Schilling pond was flooded early in the season, which rather spoiled the sport at that resort since. Phoenix Gun Club members, whose shooting ground adjoins, have had hard luck this season, since the levees have been washed out. These two resorts were favorite loafing places for broadbills. When shooting was going on there the fusillade kept the webfeet moving about. Mt. Eden and Alvarado powder burners have not recently had the chance to very much decrease the local duck supply.

Down about Elkhorn slough Empire Gun Club members have not experienced as good duck shooting as in past seasons. The club quail hunting ground, however, has been abundantly supplied with birds, which situation has been taken advantage of frequently and with fine returns of quail. Billy Hillegass, John H. Meyer and Charles M. Meyer shooting at nearby ponds have enjoyed good canvasback and snipe shooting.

Captain A. W. DuBray, of this city, was the guest recently of John H. Schumacher of Los Angeles, at the Pacific Gun Club duck shooting preserve, where sprig, mallard and widgeon were in limit numbers.

* * *

Black brant are very plentiful around the Tomales bay feeding grounds, more so this year than for many seasons. Harold Ladd and A. Rispaud early last week, shooting near Hamlet, gathered in a mixed bag of brant, canvasbacks and bluebills. James Andrews and James Black have had but little trouble in shooting bluebille round about the oyster bed section of the bay, near Point Reyes. Limantour bay is a spot noted for widgeon shooting. Black brant, English snipe and valley quail can be found also in that vicinity. What the present shooting conditions are will be told on the return of Chas. Pease, Fred Tobelman and Charles F. Zreidenstein from a four days' shoot.

* * *

The Marin hills still hold plenty of quail. Mr. and Mrs. George Newman have had excellent upland shooting on the grounds of the Point Reyes Sportsmen's Club. George Uhl and J. B. Coleman bank on the chances for good quail hunting near Pleasanton, where they journeyed by machine for a mid-week shoot.

FISH LINES.

A liberal interpretation of the law on steelhead trout fishing in tidewaters was that the rodsters might follow the sport on New Year's day. The language of the statute defines the close season as "between the first day of January and the first day of April of the same year."

There is no question but what the "intent" of the statute was to exclude January 1, but it has been contended by the anglers that "between the first day of January" means that the close season begins on January 2, and such is the construction placed on the statute by the Fish and Game Commission through information given out by Secretary Ernest Schaeffle, which inferred that local anglers, so desiring, could enjoy the first day of the year with rod and line in steelhead trout tidewaters.

Russian river, near Duncan's Mills, was crowded with fishing skiffs the last Sunday. The water was fairly clear—in fact, several large fish were taken with spoons. Best results were had, however, with fresh roe, both salmon and steelhead. Advices from the river Tuesday was favorable to good fishing for the last three days of the season. A number of the Sunday delegation stayed over for a day or more. Afterwards these were reinforced by a number of late arrivals.

Billy Foote was high hook Sunday with three trout weighing ten pounds each. Among those present were S. A. Wells, Jack Samish, J. Samish Sr., Hugh Copeland, Harry Leap, J. Lerke, L. Gotthelf, Dr. L. T. Cranz, Dr. Perry, J. Isenbruck, Louis Eaton, Graham Ridley, H. Van Dirk, Ralph la Coste, Joe Springer, Dave Sachs and others.

Among the crowd at Paper Mill creek, near Point Reyes, but few fish were caught. Indications point to improving conditions, which prompted a number to fill in the final days with their tackle, but few fish were taken, however.

As intimated in these columns, Ross creek, near Kentfield, has proved worthy of a visit. Several local anglers caught fair-sized fish last week. W. J. Street landed two large trout Sunday. Report has it that several steelhead were also taken Sunday in San Antone creek.

* * *

The final days of the open season for catching steelhead trout in tide waters, and which season closed Friday, cannot be said to have furnished much in the line of sensational sport. Notwithstanding that there was a fairly large gathering of local rodsters and others at Duncan's Mills, the total catch, as compared to some past seasons, was not a large one. Harry Leap, who spent three days at the Russian river fishing resort, landed three large trout. H. Franenholz's showing for two days was four big steelhead. Other fishermen landed one or two, while the majority drew blanks. During the high water, after the bar at the mouth of the river opened, there was rather a heavy run of fish from the ocean. These schools of trout immediately made for the up-river spawning beds and did not dally long in the pools where the fishermen were waiting for them. Friday, melting snow water from the Mt. Sanhedrin range gave the river a milky tinge and put a decided handicap on the sport. Leap also caught five grilse averaging about three pounds in weight.

* * *

In view of the weather uncertainties during the month of December the steelhead fishing devotees are looking forward most expectantly for legislative action which will leave January of each year open in tide waters for steelhead fishing. Such amendment to the present law is regarded favorably by the Fish and Game Commission, a petition to that effect now being circulated and receiving numerous signatures.

* * *

San Gregorio lagoon proved a pleasing fishing water Tuesday for Professor Sanders of Crickett, who made the trip from Martinez by machine. The lagoon was full of fresh-run ocean steelhead and a creel of 50 trout from 8 to 12 inches in length was the catch. This resort was given an overlook entirely, but a single rod was in action Tuesday at a time when one could have caught any number of trout.

* * *

Striped bass returns for the past week are rather meager. With the exception of a 20-pounder and a couple of smaller fish the San Antone clam-tossers have had but poor luck. Near Napa drawbridge, where a number of large bass were recently caught, about the best that can be mentioned is the 12-pound capture by a Petaluma angler. This fish was taken on a hook baited with duck entrails, a tid-bit that the striped fish seems to be partial to during the shooting season.

The fact that there was a net haul of 1,100 pounds of striped bass in Monterey bay a few days ago indicates that there is a run of the fish on in that section. The Salinas river and its lower waters, Elkhorn slough, have in past seasons yielded numerous large-sized striped bass. Just why the fish are so plentiful now in Monterey bay is a matter of conjecture, for it is a well known fact that the striped bass in our bay and coast waters has the reputation of being an erratic wanderer. Whether the schools of bass here referred to have taken an excursion through the Golden Gate for lower coast waters, or the natural increase of the fish in and about Monterey bay is responsible, is a hard question to answer. From Baker's beach, however, down along the San Mateo shores striped bass have been caught every season by the rock fishermen. The same experience has been noted along the shores to the north as far up as Humboldt bay. Time and again the tidal lagoon just beyond Point Bonita has been well stocked with large and small striped bass. Russian river, up as far as Cloverdale, is also full of the fish. Below Duncan's Mills bass running over forty pounds in weight have been caught.

* * *

The California Anglers' Association kept "open house" at the club rooms Thursday evening and New Years. Wednesday evening was devoted to a special whist tournament.

* * *

In contrast to the recently constructed fish ladder at the Derby dam, on the Truckee river, and which, it is claimed, is entirely inadequate, the fish ladder on the Little Truckee, near Boca, erected two seasons ago, has the reputation of being up to every requirement. This ladder is one of the largest in the State, and was put in by a private corporation operating ice ponds at the mouth of the stream.

Rem-U M C Notes.

E. D. Rambo, of Maquon, Ill., shooting a Remington pump gun was high man, with 177x200, at a shoot of the Oneida (Ill.) Gun Club, on December 22.

Drink Jackson's Napa Soda.

A NIGHT AT THE TRAPS.

Recently the trapshooting fraternity throughout the country "sat up and took notice" at the announcement of the Salem Yacht, Gun and Rod Club of Salem, N. J., that they would hold a tournament and that shooting would start promptly at 6 p. m. An announcement to the effect that the shoot would start at 6 a. m. would not have caused as much comment.

This pioneer "night shoot," the first regularly arranged affair ever held under similar circumstances, will go down in trapshooting history as an unqualified success. Promptly at 6 p. m. the first squad composed of W. M. Hammond, Neaf Apgar, Henry Winchester, John H. Minnick and Wm. C. Corey went up to the traps, and the first gun was fired in one of the most unique shoots ever held.

All told, thirty-eight shooters entered the regular program events, and about 20 more local shooters shot one or more events over the traps, which were kept in operation until nearly midnight. The lighting system which was planned by the Salem club was perfection itself, and Neaf Apgar, who has been gunning at one thing or another throughout the East and Middle West almost as long as the oldest inhabitant can remember, and who represents the Peters Cartridge Company, gave a rare exhibition of skill, getting 47x50, which was high over all for the evening. Neaf ground out his first 25 in perfect style. In his third event, which consisted of 10 birds, he dropped one, and in the last two events he dropped one in each, so that he finished with 47.

It remained for three Wilmingtonians to furnish the "class" of the evening among the amateurs, while a local professional was close up to Mr. Apgar. John H. Minnick, the Wilmington expert who has taken part in many a hard fought battle over the traps, annexed the high amateur averages for the evening, getting 45x50. Now this is an average of 90%, an indicates that Mr. Minnick knows just about where to point his cannon. John brought back to Wilmington with him the solid gold watch fob which was hung up as a prize for high gun, and right well did he deserve to do so.

Two squads of women shooters who are members of the Nemours Trapshooting Club of Wilmington, also attended the shoot and participated in the "women's" event, and Miss Bessie V. Carson outshot them all and annexed the handsome sterling silver spoon which was awarded to the feminine shooter making the best score. Not satisfied with showing her ability in the regular event Miss Carson shot in a squad of men in a 25 target practice event and here demonstrated the fact that she is one of the best women amateur shots in the country. Her score in this event was 18x25, and was exceeded by but two of the four men in the squad. When Miss Carson finished shooting in this event she was roundly applauded by the several hundred visitors who watched her perform from the verandah of the club house.

In the practice events it was left to Walter Tomlinson, who very frequently does some spectacular work with his gun both at the traps and in the field, to turn in the best score of the night. Mr. Tomlinson scored 24x25, and in doing so dropped his second target and ran 23 straight, which was by way of being a nice piece of shooting.

W. S. Colfax, the local "pro," made second high professional score of the evening, getting 46x50, having the misfortune to lose two targets in his last event.

Wm. Francis, who always wins a prize in the merchandise and poultry shoots put on at the DuPont Trapshooting Club, started off like a house afire, getting 9x10 and 8x10 respectively in his first two visits to the traps. His later attempts did not pan out so well, but he finished with a good total.

Among the other women who shot, Miss C. Gentieu, Mrs. E. L. Riley and Mrs. Charles Springer finished second to Miss Carson, with scores of 5x10, while Miss J. Gentieu, Miss H. Gentieu and Miss J. P. Hirst came next with 4x10. All the local visitors to Salem report that the officials of the club in that place outdid themselves in showing them hospitality. Autos were furnished to convey the ladies to the Jersey City, and upon their arrival there they were entertained at a luncheon.

The scores of the evening in detail were:

Targets—	10	10	10	10	10	50
Events—	1	2	3	4	5	
*Neaf Apgar	10	10	9	9	9	47

WALRUS HUNTING IS KEEN SPORT.

Capturing walrus, polar bears, brown bears, Kodiak bears, antelopes and strange birds and studying seals at short range, Captain Frank E. Kleinschmidt and his party of eighteen made their leisurely way far northward through narrow straits and difficult ice floes in a three master schooner fitted with auxiliary power.

The expedition was partly scientific and partly sporting, and was unusually successful in both fields. The sportsmen brought back splendid trophies and several museums are the richer for rare specimens that Captain Kleinschmidt obtained. He is an experienced explorer, indifferent to the dangers of Arctic travel and enthusiastic about its pleasures. With him on this trip were his wife, who was born in Alaska, the daughter of one of the first missionaries sent to that country, and their twin children, six years old.

Of the various kinds of game which men go in search of, Captain Kleinschmidt holds that nothing surpasses the walrus. A member of the party who the year before had been after big game in Africa, where he had shot lions, giraffes, tigers and other animals of the jungle, agreed with him after his taste of the walrus chase on this trip. The element of danger in it is greater than in shooting animals that have to be pursued on land. "There," as Captain Kleinschmidt stated in an interview, "the man can get in his deadly work before the animal has a chance to do any damage. With the walrus it is different. It is a peculiar animal and comparatively little is known about it. You know it is practically extinct on the Atlantic Coast and getting scarcer on the Pacific Coast. Why, one recent summer more than 900 were slaughtered for commercial purposes in the far northern waters by one company. The skin

is valuable for belts and many industrial purposes, and of course the tusks are sought for their ivory.

"The walrus starts north as soon as the warm weather sets in, following the ice. We saw herds of them and pursued them to the ice floe, on which they take refuge. The reason why it is so difficult to capture a walrus is that he is hard to kill and if he is injured he falls into the water and sinks immediately. One famous experience we had was when we started to fight the walrus in the old way. We put two kayaks, skin boats, together—that makes a fine catamaran—and the Eskimos went out in it to spear the walrus, while I followed in another boat with my moving picture apparatus all ready to take a photograph of the fight. Well, we got one. We moved out toward the ice and suddenly I saw a large cow walrus in the water, which is wonderfully clear. I called out to the Eskimos and they prepared to spear her. However, she did not wait for them to act, but dived deep and came up under the boat, ripping it with her tusks and cutting through the sealskin leggings of one of the men, gashing his leg horribly. It was fortunate that there were the two boats, for the one was gone completely and the walrus was still diving and coming up with the evident purpose of doing more damage. She was diverted, however, by my boat and dived under neath it, but luckily came up at one side. As she was about to make an attack I fired straight into her face and killed her. She was an enormous creature.

"You can't get a walrus unless you hit it in the head, but you do not need a heavy gun. Many persons blaze away and fill the beast full of shot. A clean shot lodged at the base of the brain from a .30-calibre automatic is about right.

Captain Kleinschmidt had very good luck with his bear shooting. He made a record by getting five of the rare Kodiak bears, four in one place, and he shot three polar bears standing within twenty feet of the camera. One day, when he was trying to get some good moving pictures of a bear capture, a bear swam right through the water, clambered up on the land and came forward to attack the pursuer. Again, when he tried to capture a cub by throwing a noose over it the mother put up such a splendid fight for it that he let it go. He wanted it, too, as a companion for another cub that he had obtained for a Western zoological park. Several very large brown bears were shot by the sportsmen of the party. Captain Kleinschmidt pursued one, a female, with two cubs, to the mountains to which they are accustomed to retreat in order to protect their young against the males, which are likely to destroy them. Here, five thousand feet above the sea, he found in a few spots bare of snow the egg of an almost unknown bird, and later found the bird itself. It is called the kittlitzi murrelet. Natives tell stories of "the birds that lay their eggs far up in mountains on the snow," but they had not been found heretofore by white men. The ornithological studies were very valuable. Many places almost wholly given over to birds were visited and the character and habits of the birds studied. On some volcanic islands where there is scarcely any vegetation the birds' eggs were so thick that the visitors could hardly step without treading on them.

On this trip Captain Kleinschmidt discovered a new kind of mountain sheep. Heretofore, the farther north that these animals were found the whiter they became, but this one, which lives the farthest north of any known mountain sheep, is dark colored—a saddle back sheep. Captain Kleinschmidt got the skin and horns of one of them. The party had excellent luck in getting antelope, Dr. Elting, of Albany, bringing home a particularly fine head. They also took pictures of the much coveted blue foxes.

Captain Kleinschmidt's experiences with seals were as amusing as they were interesting. "Do you see the master there?" he asked, pointing to a large, bold looking seal in a photograph he had taken. "That row of demure creatures are his thirty wives. Oh, yes, a good bull seal will have anywhere from four to forty wives and he makes it his business to keep them in order. Now, this fellow is on guard against other bulls that come seeking to invade his harem and to lure away one or more of his wives. They have terrific fights over the matter sometimes. The wives, too, are frequently keen on getting divorces and will be only too ready to elope, but their lords and masters usually round them up and bring them back, and punish them well. One day I pretended that I was a seal, got down on my hands and knees and approached. Most of the ladies tumbled off into the water, but the bull came after me aggressively. Of course, I could outrun him and was not in any real danger, but every time I came back he was ready to attack me. You know the seals are protected now and are so little molested that one can approach them quite easily.

"We passed through the straits and cruised along the Siberian coast, but it was up there that we had our worst accident. In a violent storm we lost our rudder and it looked as if we would not be able to make port, but we finally got into a harbor. Here is how we made shift with a beam hanging over like that for a rudder and two men sitting on it part of the time to keep it down." The explorer showed a picture of this feat that he had taken. "This is the first year that I have not come back with wounds or injuries. Some of my men had some smashed members this time, but I escaped." I was reported as dead, though. That always happens.

"Among the most impressive sights in those northern waters are the icebergs. Often as tall as Madison Square tower. While one is looking they will become detached and, tottering, fall into the deep, deep water. There will be a great boiling of the waters and then the sweep of a tidal wave. It is terrific. But the ice and the snow are the only things that most persons think of in reference to the country up there. They will hardly believe me when I say that I found the humming bird in that region. Grass grows sometimes six feet high and there are bushels of wild berries. It is a beautiful and fruitful country. Of course, the season is short, but when you have twenty-four hours of daylight, warm sunshine and all kinds of favoring elements you can grow a great deal in a few months. Violets, forget-me-nots and other flowers grow in profusion. It is a delightful summer resort.

"I went as far north as 72 degrees. I took no chances of getting caught, but as soon as I saw signs of ice accumulating I turned back. Four vessels got caught that fall, one of them, the Polar Star, with Harvard men aboard. They got along all right, though. They had sufficient supplies to last them until the next summer. One boat was lost entirely. I love the north, but I was grateful to get back from those latitudes before it was too late."

Captain Kleinschmidt sent one of the bears he captured in a frozen state to Pittsburg, where it was skinned and is to be mounted. He also shipped frozen walrus flippers, antelope steaks and other delicacies from the north to New York, where they were kept in cold storage for the Canadian dinner.

PETERS CALENDAR.

A staunch point and classy back, is a pleasing episode in upland shooting that thrills the sportsman

Such a subject illustrates Peters Cartridge Com-

Euch a subject illustrates Peters Cartridge Company's calendar for 1915. In coloring, drawing and action depicted the artist has created a most interesting and true to life picture—one that will appeal most strongly to every devotee of the shot gun and fanciers who like a typical English Setter.

It goes without saying, that this calendar will not only be in great demand by all sportsmen but by everybody who has the faintest leaning towards life in the open. It is well worth having and preserving, too.

DAVIS SALE OF DRAFTERS AT OPPORTUNE TIME.

The cessation of imports of the various families of the European draft horse breeds popular in America owing to the conditions existing in their native homes, has added greatly to the importance of breeding stock from these sources already established in this country. The Belgian horse, long highly popular with American breeders, has undoubtedly suffered most of all, and none of the families have escaped "scott-free," as in every instance the European horses in demand here come from the powers at present at war—powers who are making enormous inroads not only upon their own horseflesh, but upon that of peaceful nations as well. The task that America has to undertake, apparently, is not only to supply her own breeding farms with stallions and mares of a high standard of excellence from the pure bred bands already assembled here, but to prepare to export her products in these lines upon the conclusion of hostilities.

As it is to America that these countries have made their largest exports of pure bred stallions and mares in the past, so, naturally, will it be to America that they will look for animals to replenish the decimated ranks of the stock on their farms when they are in shape to resume operations, and it is against the coming of this day that the American breeder must prepare.

Fortunately, the record associations composed of the producers of the individual breeds in this country have kept close guard over their interests, and breeders from now on will realize more fully than ever before the importance of producing animals of "pure bred" qualifications, and of keeping this produce registered with the parent record association, as it is only by such methods that the fullest results may be obtained from their expenditures of money, brains, and labor. The record associations in the past have been of wonderful assistance in aiding in the proper establishing of the various breeds fostered, but the scope of their usefulness and value when their members become exporters has hardly yet been realized.

America, as a whole, is now sufficiently supplied with pure bred animals of the desired types to become an exporting nation, given the co-operation of all breeders in producing, protecting and interchanging their stock. Every state in the union boasts pure bred draft stallions at this day; the main horse producing states possess not only large numbers of both stallions and mares of recorded purity of blood, but have state laws protecting and encouraging the future production of this class, and discouraging the spread of the mongrel.

Both in point of available supply of pure bred animals and in legislation fostering their perpetuation and protecting the brood mare owner from fraud on the part of stallion owners, California ranks well with her sister states. Pure bred stallions of the more popular breeds have long found their way to the Golden State, and are generously distributed throughout her breeding sections. At the time of the last report of the California Stallion Registration Board but two counties in the state, Alpine and Mono, failed to boast the possession of from one to nearly half a hundred sires licensed as pure bred. There were at that time 829 such sires in the state at large, of which total number the accepted "imported drafters" had the following representation: Percheron 345, Belgian 119, Shire 68, French Draft 42, Clydesdale 27, while the lighter foreign stallions numbered 45 German Coach and 19 French Coach, with 4 registered as American Draft. This gives California brood mare owners access to the services of six hundred and sixty-nine stallions of the drafter class of a degree of excellence enabling them to pass the stringent requirements governing the issue of "pure bred" license. Concerning the number of pure bred mares in the state owning allegiance to the same families the writer is not at present able to make an authoritative statement of any degree of accuracy, but there are enough to enable the ranks of pure bred sires to be kept well supplied from our own breeding establishments, by the proper co-operation of the various owners, and at the same time spare our quota of the country's total export offerings.

In the light of these circumstances, the sale which the California Draft Horse Breeders Association plans to hold on Wednesday, February 24th, at the University Farm at Davis, comes at a most opportune time and offers California breeders a most excellent opportunity for the securing of new blood to further their operations. Both young and aged animals of both sexes will be offered without reserve, and every individual going through the ring will undergo the strictest scrutiny as to soundness, aged stallions being further required to be accompanied by certificates as to their breeding qualities. Under these conditions breeders who are in the market either to buy or sell, or both, may patronize the sale with every confidence.

The sale presents an excellent opportunity for the marketing of horses owned for a term of years in minor breeding centers, where their sphere of usefulness is becoming narrowed owing to a preponderance of their own get among the mares of the community. There are many breeders who find themselves deprived of their proper income through these conditions, though their stallion yet remains in the prime of years and potency. A proper exchange of these horses has never been a matter easily accomplished in California, and in this instance, if in no other, the sale will fill a want long felt. The number of cases are legion wherein such an exchange of locally useless sires can be effected with all the benefits that would accrue from the purchase of a younger horse at the customary long "imported price," at an initial saving that will run into goodly figures.

It is not the intention that profit shall accrue to the association from this sale, as all charges of advertising and vendue will be made to the consignor on a cost basis. Entries must be made with Secretary J. I. Thompson, Davis, Cal., on or before next Friday, January 15, and as California heavy horse breeders are pretty well aware of the generally existing conditions, we look for numerous and excellent offerings at this initial breeders' sale.

FAMOUS SHIRE STALLION CHANGES HANDS.

Rampton President, the famous Shire stallion, is now owned in this section. N. S. Boone, whose place is in the extreme west end of the San Ramon valley but who is so thoroughly identified with the interests of the Livermore valley as to be considered one of us, is the new owner of this splendid animal.

Rampton President was brought to Livermore Tuesday by Ted Lovell, groom for Ansel M. Easton of Burlingame, who imported the horse from England. With the assistance of Wm. Watson, the local horseman, Lovell delivered the animal to its new owner the following day.

Rampton President was the sensation of the Livermore Horse Show of 1914. He made a great impression upon several local horsemen besides Mr. Boone but the latter was fortunate enough to secure him.

RAMPTON PRESIDENT 27692

Rampton President (27692) was bred by Chas. E. Ivatt in Cambridge, England. He was foaled in 1908. His sire was Royal President (20864) and his dam was Rampton Gem (39960). He is a light bay with white feet. He is considered as one of the best representatives of the Shire breed ever imported to this country. Mr. Boone is fortunate to secure him and the farmers of the Livermore and San Ramon valleys are fortunate to have such a grand sire available for breeding purposes.—Livermore Herald.

Through extensive initial advertising when first brought here, extensive show ring campaigns and genuine merit of an exceptionally high grade displayed both in his own individuality and in that of his get, Rampton President has become one of the best and most favorably known draft stallions in California, and the Breeder and Sportsman joins with the Herald in extending congratulations to breeders who will have access to his services in his new home.

THE GUERNSEY'S BID FOR FAVOR.

The onward march of the Guernsey has never been more marked than during the year just closing. For some time there has been a vigorous effort to educate the public in the relative value of dairy products. This has brought about a keener appreciation on the part of the consumer for a better grade of milk and cream and they have learned to appreciate more the desirability of the fine flavor and natural color which are so characteristic of the products of the Guernsey cow.

This is not only true of the consumer, but the producers have awakened to the fact that they must not only have quantity of product but that they must product that quality which is demanded by the high-class trade. Only recently a large producer when asked his reason for keeping two classes of cattle said that the time had passed when he could satisfy the trade in his community with a low grade of milk. He further added that he had found the ideal combination by keeping one-fifth of his herd Guernseys. In this connection there are many who have testified that their experience has led them to believe that there is no cow that is producing the class of products demanded at the present time and is doing so more economically than the grade Guernsey.

The work of the herd register for Guernseys has shown a marked gain in the number of entries and transfers during this last year. Membership in the cattle club has also materially increased and the transfers from month to month have recorded a wider scattering of the breed.

Since the Guernsey made her first prominent bow to the public at the World's Fair in 1893 the breed has steadily marched upward in popularity. In 1901 at the Pan-American Exposition at Buffalo there was conducted the only test of the dairy breeds ever held in which all the breeds participated. In that test the Guernseys showed their ability by producing not only butter that scored the highest during the entire six months, but they also produced butterfat and butter with the greatest profit and with the least cost for food consumed.

The Guernsey cow's ability as a producer has been most carefully weighed in the results of the advanced register. Her advocates were the first to recognize the importance of the year's authenticated butterfat records as the truest measure of a cow's capability. The breed not only has to its credit the first advanced register on this basis, but it has twice held the world's champion cow for butter production.

Yeksa Sunbeam was the first cow to produce butterfat equivalent to 1,000 pounds of butter in a year, and now we have the world's champion cow May Rilma, which produced 1,073.41 pounds of butterfat in the year. This latter record is to be credited to the year 1914, and with it she produced the greatest amount of milk for one year from a Guernsey cow—19,673 pounds. The profitableness of May Rilma's work is very interesting. Her product sold with that from the remainder of her stable companions and brought the owner the sum of $1,140 during the year. From this is deducted the cost of her feed, $270.83, and of attendance and labor, which are carefully estimated as $147.35, and that left as the profit of her year's work $711.82, or more than 14 per cent of the price for which she later sold at auction, $5,010.

It is interesting to note that during the year not only has that price been established as the highest for a Guernsey cow at public auction, but there have been other good sales. Not long ago $4,500 was paid for the bull Itchen's May King. At two sales the average has been well around $400.

Even in spite of the unfortunate conditions which have checked the importations of cattle we find that there have been 1,115 Guernseys imported during 1914, which is a larger number than have ever been imported in any previous year.

The percentage of growth in the advanced register has been very encouraging and the results of this work have become a keen index of the capabilities of the breed. Following are the ten highest advanced register records:

HIGHEST MILK RECORDS FOR GUERNSEYS.

May Rilma 22761	19,673.00 pounds milk
Dolly Dimple 19144	18,808.50 pounds milk
Spotswood Daisy Pearl 17696	18,602.80 pounds milk
Dolly Bloom 12770	17,297.51 pounds milk
Dairymaid of Pinehurst 24656	17,285.30 pounds milk
Glenanaar of the Glen 23619	16,813.10 pounds milk
Murne Cowan 19597	16,729.30 pounds milk
Miranda of Mapleton 19606	16,630.70 pounds milk
Azucena's Pride 2d. 24957	16,203.90 pounds milk
Jehanna Chene 30889	16,186.70 pounds milk
Langwater Dorothy 27944	16,099.70 pounds milk

HIGHEST BUTTERFAT RECORDS FOR GUERNSEYS.

May Rilma 22761	1,073.41 pounds butterfat
Spotswood Daisy Pearl 17696	957.38 pounds butterfat
Miranda of Mapleton 19606	927.16 pounds butterfat
Dairymaid of Pinehurst 24656	910.67 pounds butterfat
Dolly Dimple 19144	906.86 pounds butterfat
Imp. Beauty of Park Farm	898.82 pounds butterfat
Imp. Queen Regent 4th 22716	889.57 pounds butterfat
Jehanna Chene 30889	863.36 pounds butterfat
Yeksa Sunbeam 15439	857.15 pounds butterfat
Azucena's Pride 2d. 24957	855.70 pounds butterfat

These average 17,443 pounds of milk and 904.89 pounds of butterfat. Analyzing the records from another standpoint we find twenty-four records exceeding 700 pounds in butterfat that average 15,455.2 pounds of milk and 775.99 pounds butterfat, while in addition to that there are twenty-five cows with records between 600 and 700 pounds.

The future of the breed is certainly bright. That the Guernsey and the Guernsey grades will be the cows for the dairymen to supply products to the highest class trade at the greatest profit is fast being recognized. The greatest sense of pride and satisfaction to those who have been associated with the breed has been that it has won this position by the honest efforts of the Guernsey cow. She advanced by measuring her efforts by the critical test of a dairy cow, records based on butterfat production for extended periods and not what the buttermaker might do with her products for a short period.

Returning the greatest amount for $1 invested in food, making butter at the least cost per pound, giving dairy products of the highest natural color and flavor, giving to the private estate that milk, cream and butter most pleasing in appearance and excelling in usefulness, is the proud record on which the Guernsey cow appeals for public support.—Breeders Gazette.

AN AMEN FROM ONE READER.

Woodland, Cal., Jan. 3, 1915.

Just read the Breeder and I wish to say that Mr. Frederick Watson's article on running a fair or race meeting is the best I ever read. Surely lots of sense in that letter, and in Mr. C. A. Harrison's letter in the Pacific Horse Review on colt stakes for yearlings, short distance and small stake just to show the colt, help pay expenses and get up excitement—and that will help the business.

Yours truly,

H. S. HOGOBOOM.

Testimonials.

The Trotting World of London, England, says: "It is just the book we have been waiting for."

The New York Sun says: "The directions seem to be sensible and practical.

The Australian Trotting Record, Melbourne, Australia, says: "It is simply invaluable to any trotting man and its 112 pages cover every detail of the proper handling of a trotter and pacer."

The Pacific Horse Review, Portland, Ore., says: "Shoeing, feeding and other problems of common experience are dealt with helpfully. Ready reference to current turf history illustrates points of moment, and the book is of value to the studious trainer."

Joseph M. McGraw, Washington, Pa., says: "Your book is the most instructive of its kind I have ever seen."

T. C. McBride, Sewickley, Pa., writes: "I see you have the secret of bookmaking. The paper and binding make it a joy forever, as well as a thing of beauty."

First Book in 20 Years.

"Care and Training of Trotters" is the first book on its subject in twenty years. Previous works belong to the high wheel sulky era.

Every detail of the proper handling of a trotter or pacer is covered, from the day of foaling till after its first year's racing. This book was in preparation for over a year by an editorial staff of four working on material furnished by practically all of the leading living authorities, including owners, drivers, stock farm superintendents, veterinarians and farriers. All previous books on the subject contained the ideas of only one man.

The book tells how all the great trotters were trained, and will be of equal interest to professional and amateur horsemen. No advertising in book. 112 pages, illustrated, cloth bound.

San Francisco, Cal.

THE FARM

OVER-FEEDING SOWS.

It seems almost natural for the purchaser of his first pure bred sow, in his desire to give her extra care, to over-feed her, to keep her away from the other hogs, put her in a close pen, where she is petted and fed regular meal times, and lunch between in some instances, in their anxiety to do the very best for her possible.

This method of treatment is sure to ruin the sow, both in the feeding and in the close confinement, preventing her from taking the necessary exercise, so needful to the proper strengthening and building up on a solid foundation and to harden her in developing her, giving her a good constitution, broadening her and strengthening her with the exercise, which is also imparted to her coming litter.

The parlor sow, with her pettings and care, is nearly always a failure, and the party is wondering why it is. It is the wrong method throughout. It is unnatural and almost certain to result in failure of the sow.

Feeding when properly done, combined with exercise, is the proper idea. Feeding of the right character is essential; it needs to be regular, at uniform times, with plenty of water and lots of exercise, which is the power that is depended upon to develop and improve the breed. The feeder is an important man in the destiny of the hog and should understand the business and act according to reason and the experience that is taught from those who have made a success of it—W. M. Carruthers.

MONEY IN HOGS.

At a recent meeting, one of the prominent packers made the statement that there is more money in hog raising in this country than in any other farm calling that can be followed. The speaker unquestionably knew whereof he was speaking, for there is no class of meat more in demand, that is more prolific, more easily raised or that gives better returns. With all the hogs produced in California, we are still heavy importers of hog products from the east, so that there is room in our own state for a great expansion of this industry, and beside our own state there is a wide market along the whole Pacific coast to Alaska and to the west in the islands of the Orient. Hog raising cannot be overdone and prices, while they may vary, are not likely to get much below present figures.

California should certainly raise more hogs. We have ideal conditions, are not seriously troubled with fatal diseases which make this work exceedingly uncertain in the east, and with our open seasons and abundant natural feeds California should be the home of the hog raiser and we should be exporting, instead of importing hog products.

PURIFYING DRINKING WATER.

A simple method of purifying any water for drinking purposes, by G. G. Nasmith, Ph. D., and R. R. Graham, M. B., published in the British Army Medical Journal:

A stock solution of chlorine may be readily made by rubbing up a teaspoonful of chlorine of lime in a teacup with a little water to a thin mixture free from lumps. This should then be made up to a cupful and diluted with three more cupfuls of water to make the required stock solution. This will keep for a week when tightly corked.

A teaspoonful of this stock solution should be added to each two-gallon pail of drinking water required, thoroughly mixed and allowed to stand for a few minutes. This will give .4 to .5 parts of free chlorine to a million parts of water, and in ten minutes will destroy all typhoid and colon bacilli, or other dysentery producing organisms in the water. Moreover, all traces of chlorine will rapidly disappear.

This method of purification has been tested with water inoculated with millions of bacteria. Every dangerous germ has been destroyed.

SUBSOILING ALFALFA.

Among the different kinds of winter cultivation for alfalfa subsoiling is one of the most interesting and profitable, though little known of or used. Subsoiling is an excellent thing to loosen up the soil, whatever crop is grown, and in alfalfa fields it has the advantage that the soil stirring is accomplished without disturbing the plants, whereas the thorough movement of soil particles given by plowing would mean the end of the stand, and cultivating with discs, renovators, spring tooth harrows and such tools is very shallow though valuable.

The standard of the subsoiler moves through the surface without injuring the crowns, merely pushing them to one side if it does anything, but the shoe, going along about eighteen inches below, pushes the soil aside and cracks it a foot and more in each direction in such fashion as a charge of dynamite would crack soil without shooting it out above the surface.

Most subsoiling for alfalfa has been done in the Imperial Valley on very heavy, compact soil, and that by only a few ranchers, but its benefits would be marked wherever it is done. The growth of alfalfa is determined largely on the way the field takes water, and the opening up of the soil by subsoiling, not only aerates the soil and performs the advantages consequent upon cultivation in general, but it makes the stand take water more readily.

Subsoiling generally is done about every thirty or thirty-six inches, the cracking effects in the soil meeting at this distance. One Imperial farmer, not knowing anything about distance or perhaps merely wanting to try the plan and not having time to do the work thoroughly, subsoiled thirty feet apart last winter, and when summer came his alfalfa grew in waves.—Orchard and Farm.

CLEANLINESS IN DAIRYING.

One of the secrets of successful dairying is conveyed in the one word, cleanliness. This has been an underlying principle from time immemorial and we must never ignore the significant importance attaching to the strictest methods of cleanliness in all departments of the dairy.

Cleanliness is certainly attractive to the general public, and a dairy farm run on hygienic principles will never lack customers, says Farm, Stock and Home. It will meet a ready sale for all its products, and after all it is the market end of farming that provides the profits.

It should be remembered that dirt and foul odors quickly taint dairy products and inoculate them with disease germs. It is for this reason that sterilized and guaranteed milk is so much appreciated and finds such a ready sale. The careful individual will have this class of article at any price, knowing it to be reliable. This by no means shows any excessive degree of fastidiousness on the part of the purchaser. When the ordinary milk and dairy supply is placed on the market in a satisfactory manner and in a clean condition, there will be no need for the specially prepared and therefore necessarily higher priced product.

Clean stables, with plenty of ventilation and light, healthy cows, and ordinary good care in handling the products of the dairy herd can be had on every dairy farm in the country. Such being the case, it should become almost a habit for the dairyman to turn out a product which is as pure and healthy as proper care can make it. The profit in following such a course amply repays one for any extra trouble there may be in inaugurating up-to-date methods.

Holland boasts that that country has a dairy cow for every person living in the rural districts. This is the source of agricultural wealth that any country might be proud to claim. Every country with a dairy cow for every inhabitant is well supplied with human food.

Feeding beef animals in muddy lots is a losing game. Locate the feeding lots on a sandy knoll or hillside, or else rock the corrals well. A steer will lose more weight in a week when standing up to his belly in mud than he can gain back in two weeks.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning. Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.
The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

Price: Paper $1.00, Cloth $1.50. Sent Postpaid

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

VOLUME LXVI. No. 3. SAN FRANCISCO, SATURDAY, JANUARY 16, 1915. Subscription—$3.00 Per Year

MAHOMET WATTS (3) 2:10, (5) 2:08¼

Leased from General C. C. Watts of Virginia for the season of 1915 by Rodney J. MacKenzie

Here Are the Features of the *Remington-UMC* Pump Gun

¶ Features that make the superiority of this gun real. The **solid breech** has no openings in the top, sides, or rear of the receiver—a thick wall stands between the chamber and the shooter's face always. No blowing back from powder gases, defective primers, etc., is possible. Loading and **ejection of shells is from the bottom,** away from one's face. The **hammerless** feature affords protection from accidental discharge. The interrupted screw **take-down** system requiring only a quarter turn of the barrel, facilitates carrying, cleaning and the interchange of barrels without tools of any kind. Accidental jamming or bending of the action bar is eliminated.

¶ There are **three safety devices** in addition to the regular trigger safety.—In other words the trigger cannot be pulled until the gun is properly breeched up, (1) until the breech is locked, (2) until the action bar is in its full forward position, (3) until the sear is unlocked in the cocking notch in the firing pin. The **beauty** of this gun is the joy of a true sportsman. It **handles fast** and **balances perfectly.** Made in eight grades.

EXECUTIVE COMMITTEE P.-P. I. E. RACE MEETINGS HOLDS SESSION.

No great amount of business was transacted Wednesday at the meeting of the executive committee in charge of the harness meetings to be held in connection with the Panama-Pacific International Exposition, but a great many matters of importance were discussed and what action was definitely taken was of considerable interest to horsemen.

A step that will be most widely welcomed is that taken by the committee in delaying for thirty days the date for closing entries to the great array of class races that have been provided to keep the big stakes company. Originally it was planned to close these events on March first, but on the suggestion of various horsemen that an allowance of another thirty days would be most acceptable to very many owners who have two or more horses eligible to the same classes, April first was declared closing day for all events aside from the colt stakes already closed and the twenty-thousand dollar events, on which owners may wait until June 1 to make final entry. Nominators to the two- and three-year-old trot and two- and three-year-old pace that are to be raced at the summer meeting are allowed until June 1 to make declaration as to whether they will race at the trot or at the pace; owners of pacing entries desiring to start in the trots must pay the difference in the entrance fee, and on the other hand, those having paid the trotting entrance fees and finding their entry to be a pacer and wishing to transfer to that event will be refunded the proportionate amount.

As a further inducement to eastern and central western horsemen to come to the coast for these meetings, owners of horses shipped from east of the Rocky Mountains will be paid, at the conclusion of the meeting, $50 for each and every horse starting during the meeting and failing to win money. On car rates this would land a horse back at Lexington, for example, and would go far toward defraying expenses in hard luck cases. All three actions should meet with a great deal of favor on the part of horsemen throughout the country who have entries in the events closed or propose being on hand to participate in the general program.

No action was taken in regard to the selection of presiding judge or starter, though these matters were among those discussed, but two appointments were made that will meet with general approval—that of Mr. Charles A. Durfee as track superintendent and of Dr. Ira B. Dalziel as marshal during the meetings. In the matter of the superintendency there were several applications from a pretty evenly matched field of candidates—the committee having as hard a time in making a choice as the judges at a bush fair—and elsewhere—sometimes have in placing their fields at the wire. The committee's main regret is that all the "good men and true" could not be employed, but their final choice will doubtless be widely welcomed, as there are few nooks and corners of the trotting horse world where Charley Durfee (whose middle initial "A." stands for McKinney) needs any introduction.

It was deemed advisable at this time, also, to make proper classification of the several events previously known merely as driving club or amateur events, and these now assume their full identity. For the summer meeting the purses are $1000, classified as Amateur Free For All Trot, 2:20 Driving Club Trot, 2:15 Driving Club Pace, 2:30 Driving Club Trot, 2:14 Amateur Trot, 2:20 Amateur Pace, and Amateur Free For All Pace, while for the fall meeting the purses are $2000 and are classed as Driving Club Free For All Trot and Driving Club Free For All Pace.

The full membership of the committee was present at Wednesday's meeting: Messrs. D. O. Lively, I. L. Borden, John A. McKerron and E. P. Heald, who succeeds to the vacancy caused by the death of the late Colonel Kirkpatrick, with F. W. Kelley in attendance in his capacity as secretary.

AL WHITNEY GLAD HE CAME.

Some time ago we had the pleasure of printing a most glowing opinion of Phoenix given out by Alonzo McDonald, and we learn from mutual friends who have seen that gentleman of late that Los Angeles and Southern California occupy an equally high place in his estimation. That Alonzo is not alone in his good opinion of our golden west as a wintering ground for harness horses is emphatically attested from the appended excerpts from a pleasant and most welcome letter just received from Al Whitney of Chicago, who arrived at Los Angeles before Christmas with the great pacer Dr. Burns Jr. 2:04¼ and the trotting mare Bessie Custer 2:29¼.

Mr. Whitney made the trip at a very inopportune time, owing to the stringent quarantine regulations of which he ran foul, but from the tone of his letter the delay cost him nothing save a bit of inconvenience. However, judge for yourself:

"Regarding the ship here from the east, horses could not possibly have come through in finer condition than did those I shipped from Chicago to Los Angeles. They were on the car twelve days and nights, the ship being made at the time the quarantine was so strict in many states. My car was held at El Paso, awaiting permit from California state veterinary to enter state. Little inconvenience was caused, however, and when we unloaded the horses here, they seemed to look and feel just as good as when they were loaded at Chicago.

"As to Los Angeles, both as a place of residence and a training ground for horses, I can't say too much. I had sometimes dreamed of such an ideal place to train but never expected to see the reality, until I came to Los Angeles. Since I arrived here there hasn't been more than one or two days at a time that one couldn't go a fast mile if his horses were in training, for the weather has been almost perfect, and the track is kept in good enough condition for a grand circuit meeting all the time."

We are most pleased to add Mr. Whitney's kind words to those of Mr. McDonald, as any of the eastern contingent who are wont to apply generous quantities of salt to a Californian's own opinions of California before accepting them, may be more inclined to accord high esteem to the opinions of their friends and neighbors. At all events both Mr. McDonald and Mr. Whitney are glad they came; Californians also are glad that they among all their kind had the confidence in the P.-P. I. E. meetings to adhere to their original plans of wintering in the Golden State, and when they face the starter on the track down near the Golden Gate they will carry the best wishes of a great many California friends.

For the benefit of any eastern horsemen who might wish to make personal inquiry concerning this section from the aforementioned gentlemen we will state that Mr. McDonald's winter home is at 730 Carondelet Street, while Mr. Whitney's address is 320 West Santa Barbara Avenue.

SOME DISCUSSIONS have arisen concerning the substitution clause in the conditions of the big stakes of the exposition meetings that have the four dates of entry closing, though the language setting forth that condition was carefully drawn: "Nominators entering September 1, 1913, have the right to substitute another horse on or before April 1, 1914, by payment of $100 additional, or on or before June 1, 1915, by payment of $200 additional. Horses entered Sept. 1st, 1913, getting faster records before Jan. 1st, 1915, than the classes in which they were entered, may be transferred to the stakes in which they are eligible, and the amount paid in for entrance fee may be applied to entrance in the stake to which they are transferred, or the nominator may name another horse in place of the one originally entered."

No "strings" are tied to the original nominator insofar as a substitution in his own name is concerned, as he may name another horse on whatever grounds he sees fit, and he does not have to declare his grounds. Death, ineligibility, sale, physical disablement or "no accountness" all look alike insofar as the original nominator of Sept. 1, 1913, is concerned. A horse entered on this date may be sold either with or without engagement insofar as these particular stakes are concerned, but his engagement carries no right of substitution, though a horse sold with engagement and racing out of his class prior to Jan. 1, 1915, would be given advantage of the clause governing transfer to class to which he was eligible. The conditions were drawn to encourage and protect the early nominators, but not to open a field for eventual traffic in substitutions to the detriment of the association.

QUITE A NUMBER of our readers have taken advantage of our offer of the Breeder and Sportsman and the Breeder's Gazette for the single three-dollar paid in advance price of this publication, and we wish to call attention to this offer on the part of those of our subscribers or friends who may have overlooked it. More than ever the Breeder and Sportsman is becoming the home paper for the coast horseman, stockman, farmer and sportsman, and to a very large majority of these the Breeder's Gazette should be most welcome, as it stands without rival among the general livestock papers of the world. This is a day of specialization in farming as in all other businesses, but each passing year makes more and more evident the truth that a proper production of livestock forms the most profitable ground plan for every branch of agriculture. Upon some bit of farm land that would otherwise lie idle some provision may be made for a few animals of some description, who will make profit from a by-product that has previously been waste. Many of our California breeders of the trotter are also producers of draft horses, cattle, hogs, sheep or chickens, and to them the costless Gazette, with its vast and authoritative information upon all matters pertaining to its particular fields, should prove a veritable "lucky strike." If you wish it sent with your Breeder and Sportsman, be sure you mention the same when advance subscription payment is made.

WE ARE ADVISED by Secretary Charles W. Paine of the State Agricultural Society that for a number of prime considerations the Occident Stake for 1917 has not been declared closed, and that the society will shortly re-open the same, incorporating a number of conditions that should prove most acceptable to horsemen, and probably combining, for this instance at least, the Stanford and the Occident, though it is by no means the intention to relinquish the use of these names, or the identity of the individual stakes.

As the program of the state fair has stood for some time, there is a tendency on the part of breeders to feel that the racing of three-year-old trotters is overdone, as within the course of the meeting are held the Stanford and Occident stakes and the State Fair Futurity, and in very many instances, the great majority in fact, the same colts have engagements in all three events. Three starts in eight days is a considerable demand to make of even the very best of three-year-olds and for this reason, at least, the experiment will be made of having but the two events in 1917, both of considerable richness. The effect of this plan upon the entry list, the number of starters and the quality of racing resulting will determine the future course of the society in regard to the number of three-year-old events provided.

WITH THE TRAINING SEASON in California "just on the turn" between winter idleness and spring activity, the offerings of racing material made on our business pages by W. G. Durfee should meet with ready takers among our campaigning horsemen or fun drivers. We have heard people say that "there's no use of me starting against Durfee for I haven't that kind of stuff," a condition which need not exist this season for the opportunity is afforded for getting just exactly "that kind of stuff." The announcement includes horses for all classes at the pace or trot, a goodly number of them well developed futurity prospects, paid up in the coast classics. The Carlokins are hailed as great colt trotters throughout the land, and there are any number of youngsters in the lot by this great son of McKinney and from the best mares.

THE STALLION OWNER rubbed his eyes
And gazed up at the glad spring skies,
While he muttered in tones of some surprise:
"Be gosh, it's time to advertise!"
—With apologies to Tedd Kline.

A January Day at Pleasanton

Some bright soul made in my hearing recently the apparently contradictory but absolutely truthful remark that "it rains awfully hard awfully easy here in this neck of the woods of late," and heedful of the excellent grounds on which this statement was made, and my experience on two Saturdays in succession at San Jose, I was a bit chary of chancing Pleasanton for the last week end. However, I risked it and for once this winter hit it right, as Saturday in the Livermore valley was a day as "rare" as the "rarest day in June" that any sob sister or oozy poet ever threw fits over. (Incidentally, in regard to this "rare day" business, my sympathies have always been with the school kid who, when the teacher started in sonorously on "What is so rare as a day in June," with the proper oratorical pause about at this point, piped up loud and shrill: "Thirty days in February!" I never did think that the wallop he got was coming to him at all.)

On the way up Friday evening the green hills of the coast range, the fields where grain was sprouting, and the generous heads of water carried by Alameda and Alviso creeks bespoke an abundance of recent rainfall, so that the best I looked for was considerable discomfort underfoot. I was "disappointed" pleasantly on this score too, for the valley roads were fairly dry and the track at the Mackenzie plant was not merely in shape for jogging, but good for stepping as fast as any house or trainer has a license to go at this season of the year.

So far the boys have been content for the main with easy jogging, but with the turn of the year comes the inclination to move along a bit for a short distance, and Saturday there would occasionally come down between the barns near the head of the stretch a clatter of flying feet that told that somebody—or bodies—was advancing the spark for an eighth or a quarter. Almost before we know it the railbirds will be talking of miles in 2:15, then about twelve, and ten, or lower, and the June meeting will be within our midst. However, we'll be ready. The stables at Pleasanton are getting newcomers quite often and at present the winter colony is not only a pretty extensive one, but the class of horseflesh represented is exceptionally good. Detailed descriptions of the various strings, to any great extent, are impossible at present, but by looking over the makeup of the various stables as presented herewith you may get a fair line on what the boys have, so that you will know "who is who and what is which" when the fast quarters, halves, miles and repeats begin to break into print later on.

* * *

Lee Barker, who is handling the horses of Mr. S. S. Bailey, has the half dozen in his care in the nicest sort of winter condition. Bon Guy (3) 2:11¾ is as round as any dollar ever milled and looks like a trotter with quite a bit of usefulness under his belt, as his legs are in good shape again and he has always had the needed speed and ambition. Bertie Seattle, a five-year-old daughter of Prince Seattle 2:22¼ and a Zombro mare, has the appearance of a pretty oily pacer and ought to put her sire in the great table this year with a bump, as she worked three times below ten last year, the fastest mile in 2:08¼. The boss of the barn is the Copa de Oro two-year-old, Jim de Oro, out of Esther D. by Diablo 2:09¼, and he is a nicely built youngster with lots of pep and spunk; little save breaking and jogging has ever been done with him, but last year he turned off eighths handily between :15 and :16. The remaining three are young things by Bon Guy—a two-year-old bay gelding out of a Prince Ansel mare, just nicely broken, a yearling bay filly out of a daughter of Tidal Wave 2:06¾, second dam by Zombro, that trotted eighths in :22 as a mere baby, and a yearling chestnut filly also out of a Tidal Wave mare, second dam by Montana Director; this lass is more rugged than the other yearling and has been a pacer right from the start, having breezed the little distance in :20½ before she was six months old.

* * *

Lou Taylor has not yet returned from his vacation visit back to his old stamping grounds around Binghampton, N. Y., where he is enjoying all the delights of an "old-fashioned winter," but John Murphy is giving competent handling to the few horses reserved from the extensive string on hand prior to the December sale. The favorite is the four-year-old filly Luana by Kinney Lou 2:07¾—Benito B. 2:25½ by Stam B. 2:11¼, that trotted as a three-year-old in 2:19 and has the appearance of making a very high class mare. Honey Boy is a pacing gelding of like age by Kinney Lou and out of Carrie B. 2:18 (dam of Lovelock 2:05¼, etc.) by Alexander Button, and there is a nice trotting gelding a year younger out of the same good matron but by Tom Smith 2:13¼. Murphy is just giving the primary lessons to a yearling filly by Yoncalla (son of Bon Voyage 2:08 and Birdie by Jay Bird) and out of Yolanda 2:14¼ by McKinney. This lass carries some mighty strong blood and is, if I am not mistaken, the only foal by Yoncalla, as he was gelded fairly early in life and did very little stud duty.

* * *

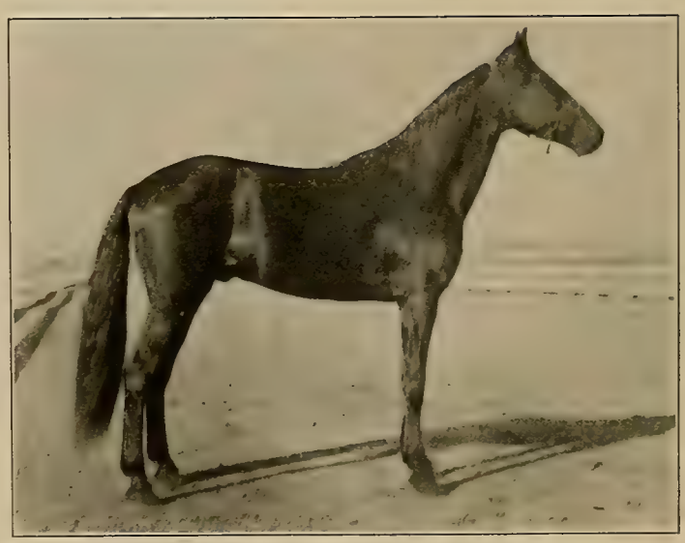
Homer Rutherford is handling but two, but they ought to make a formidable pair from past performance and present indications. Homer's trotter is the black three-year-old colt George N. Patterson by On Voyage 2:25¾—Yu Tu by R. Ambush 2:09¼, and the lad is surely a nice cut of a horse. He worked in 2:13½ as a two-year-old and can yank Homer an eighth at a two-minute gait 'most any time; he is staked in the Stanford and the Breeders Futurity. The pacer is the brown mare Colleen, now five years old, by Charley D. 2:06¼, and out of that "old original" 2:10 pacing mare Cricket (great brood mare), by Steinway 2:25¾. This lass is excellently set up, though not overly large, and showed a sample of her speed in the 2:20 pace at Santa Rosa last year when Clara Mac gave the bunch that initial jolt; she paced the last half of the first heat in a minute to save herself after troubles in the early part of the mile, and came back out, going away in ninth position, and finished fourth in 2:06¼, going the route in about the same notch as the winner.

* * *

Horace Feindel is jogging Johano, the black son of Carlokin 2:07½ and Johanna Treat 2:24¾, and not only likes the fellow better the longer he works him but is confident that he is the best Carlokin—and the best Johanna Treat—to date. The lad has come slow but steadily and has done all asked of him with an ease that bespeaks plenty of reserve capacity on tap for the time when Horace begins to camp on his trail. Feindel recently purchased of Mrs. H. E. Armstrong the yearling filly Susie Aker, by Bodaker 2:13—Domestic by Mechanic, second dam Modesto by Mendocino (3) 2:19½, and is much pleased with the way the little lady is taking her lessons. He is handling three pacers for Mr. Armstrong, all from the double producer of 2:10 speed, Jessie M. by Del Norte 2:08, headed by the gelding Hal J. 2:09½ by Hal B. 2:04½. Jessie Patchen is a three-year-old filly by Joe Patchen II 2:03¼ and the third is a two-year-old gelding by Vernon McKinney 2:01½. Both are big, strong and sound, pace naturally, and promise much in the way of future speed, as their dam has not yet failed to throw that desirable commodity in her foals.

* * *

Ed Parker, who came down from Woodland some weeks ago with his own colt, Tango, has added a couple to his stable, the property of W. E. Detels. The oldest is a three-year-old bay trotting gelding by Palite 45062 and the other a yearling filly, just nicely ground broken, by Graham Bellini (3) 2:11¼, both out of Daphne McKinney, full sister to Yolanda 2:14¼. Ed's own colt is doing nicely and is pretty well liked by "the boys" as an up and coming trotter. I learned a bit more about his breeding than I knew before, as his dam, Paprika, is also the dam of Enchilada 2:18¼, a 1914 new one, second dam Auntie (dam of Ante Dawn (3) 2:19½ and Sable Nut (2) 2:22¼) by Dawn 2:18¼, third dam Netteo by Anteeo, the fourth dam also being a producer.



Charles McCarthy has all he wants to handle for the present in George Hammett (3) 2:15¼, one of the best sons of Nutwood Wilkes 2:16½ and for whom he has a cash offer of $3,000. He doesn't seem especially anxious to dispose of the boy even at an advance on this figure, as the lad has a pretty strong hold on his affections, as School Bell was campaigned over the northwestern tracks by Mr. McCarthy and took a record of 2:16¼ for him at Missoula eleven years ago. George Hammett was a good three-year-old in 1912, and in his two years of easy handling has matured into a very pleasing horse with plenty of speed, as evidenced by his work last fall well on the faster side of 2:10. He is very strongly trotting bred, as School Bell is a daughter of Prodigal, second dam Maria W. by Albert W., third Ma Belle by Echo 462. Mr. McCarthy also has a two-year-old filly out of the same mare to the cover of Bon McKinney 2:24¼, the lass at present being at Joe Twohig's ranch at Warm Springs. As Bon McKinney is himself a sire of pronounced early speed the filly "ought to do" if she lives up to her pedigree to any extent.

* * *

Al McDonald is keeping fairly busy with a stable of six head, which includes one of the best looking and most promising youngsters by The Bondsman that I have struck yet. The lad is Al's own property and is a two-year-old bay colt out of Eva H. by Washington McKinney 2:17½; he has worked in 2:34½, with quarters in :34, and acts just like a trotter that will be a contender in this year's futurities. Al is just breaking a two-year-old Bon Guy filly for W. E. Detels, and is wintering Charley Durfee's Prince Ansel—Directum pacer, pending the time when C. A. gets in the riding notion. His Star Pointer pacer Asa Pointer, that worked in 2:06¼ last year for him, looks good for the green classes this year, and he has two trotters belonging to J. O. Johnston of Oakland, the hard luck horse Rapallo formerly in Peter Hodge's string and now apparently more fit than ever, and a three-year-old bay gelding by Copa de Oro 2:01, and from a Zombro mare. This lad has all the appearance of quality and promise that characterizes the balance of the Copa de Oro youngsters, and worked as a two-year-old in 2:27½.

* * *

Charley Spencer and Mel Keefer arrived at Pleasanton just the day before I was there, and though they were hardly "settled" yet, both were out getting their work with the balance of the boys. They have stable room at the track for six head, and the "overflow" of four are quartered outside, as the boys have a comfortable barn at their winter home. I saw their string some weeks ago at Sacramento just after they had been "let down" for the season and they have fleshed up to prime winter shape. Their entry for the big stake at the P.-P. I. E., Bonnie Ansel, by Prince Ansel and out of Woodland Bonnie Derby by Charles Derby, is a bundle of speed and muscle and gave an idea of her quality last fall when she trotted the Sacramento track in 2:07¼ and repeated in 2:09 for a cooling out mile. Their colt stake entry for the same meeting, The Expense by The Proof, is a handy lass that ought to be up in the money, and Nuristo 2:10¼ never looked better. Arista An-

THE PROOF (2) 2:29¾, by THE EXPONENT 2:11¾.

sel (2) 2:18½, that had the misfortune to run foul of a nail at Sacramento and go on the shelf, is coming out nicely, while Don Vassar continues to look good on a pace. Both Charley and Mel are highly pleased with the improvement in The Proof since Dan O'Keefe got on the right track with his feet, and predict that he will give a good account of himself before the season is over. His colts have made good with their various owners, which is a great bid for popularity for any sire, and before going to the races the son of The Exponent will make a limited stud season. The horses quartered outside include a racy looking pacing stud belonging contingent at Santa Maria while the boys were away continuent at Santa Maria while the boys were away all season and who is now with them at Pleasanton), the big fellow being by Alcona Wilkes and out of a daughter of Gaviotta, a son of Electioneer and Lady Ellis by Mohawk Chief. Mona Ansel, a four-year-old bay horse by Monocrat—Decoratia by Prince Ansel, second dam Majella B. by Nushagak, is owned by W. L. Young of Santa Maria and paced miles over a two-lap track last year in 2:20½. Decoratia is further represented by a two-year-old trotting filly, Katharine T. by The Proof, owned by Mrs. Hannah Treanor of the same city, while the fourth member of the stable belongs to Mrs. Spencer, who raised her from an orphan "bottle baby"—Zomaverne, a nice trotting filly by Jules Verne 57292 and out of Zoma by Zombro.

* * *

Millard Sanders, like several other members of the colony, is pinning his faith to one horse and making that horse a good one, the only member of his stable at present being the C. L. Crellin pacer O. U. C., by C. The Limit 2:03¼ and out of Rosa Woodburn by Guy Wilkes. This lad worked in 2:06 last year with quarters in :28¼ and has the power and punch to carry him as fast as his famous dad and keep on coming back. He has already showed Lou and Millard enough that the price is already somewhere up about four times four figures.

* * *

H. G. Smith has nine head that keep him stepping around a good part of the day, several of whom were in his hands last year—Alton S. 2:15 by Alton B., belonging to A. Sperry, Vacaville; Della H. 2:10 by Hal B. 2:04¼; Star Tilden 2:15¼ by Star Pointer 1:59¼—Jessie Tilden by Roy Wilkes 2:06½, owned by Geo. W. Putnam of Salt Lake, and the trotter John Gwynne 2:11½ by McMyrtle, that H. G. bought at the Kirkpatrick dispersal. This horse at $150 looks and is a mighty cheap buy, and Smith has had several opportunities to turn him at a profit. He has a nice Charley D. filly in Lottie, out of a daughter of Nutwood Wilkes, second dam Cricket 2:10, and is just breaking a husky six-year-old mare by Lee Dillon out of a daughter of Father McKinnon. Smith also has the horses purchased by T. D. Sexton at the DeRyder sale, Future Tramp and Lucretia Bond, the latter a well staked three-year-old filly by The Bondsman—Lucretia 2:13¼, by Nazote. She is not large but Smith claims her to be "all horse" and a handy little trotter. Future Tramp, that was a pickup at $550, is breezing right along in his winter work and looks like a real good representative for Trampfast (2) 2:12¼ to have on the coast. The maternal crosses to Chimes, Alcantara, George Wilkes and Mambrino Chief ought to do something for him in the way of furnishing speed and stamina. Smith still had the Vernon McKinney—Poinsetta yearling, Vernon Pointer, when I was at his stable, but intended bringing him down this week to his new owner, as Mr. Chandler intends looking after him himself until the time for actual speed making rolls around.

* * *

Bud Davis of Caldwell, Idaho, whose son-in-law Jud N. Davis is interested in the horses racing under Bud's colors and is doing the teaming for the stable, was a liberal patron of the DeRyder sale and added three youngsters to his string at that time that he has found no occasion to be dissatisfied with to date, two of them two-year-olds by The Bondsman. The colt, McGregor Bond 60149, is out of Gregan by Steinway 2:25¾ (sire of the dams of four in 2:10), second dam the great brood mare Maggie McGregor by Robert McGregor 2:17½, whose daughters have been most productive of 2:10 speed. The filly is out of Ava J. 2:28 by Zombro 2:11, second dam by Secretary, and both are slick trotters, well staked. The third purchase is the four-year-old filly Belle Demonio by Demonio Wilkes 2:09¼, out of the great brood mare Jessie M., with two in 2:10, by Del Norte 2:08, and this lass looks to be as good as any of her family in a little time. She came into the ring with a bad looking wire cut on her left front foot and was knocked down to Bud for thirty bucks, since which time a little care has put her "on the road to Wellville" and in time she will have a good foot that will make her price look like thirty cents, in comparison. May Davis 2:08¼, the "old mare" of the outfit, hasn't taken on much meat since coming to Pleasanton, but is in good husky shape. Last year she paid a profit with "catch drivers," and if Jud can keep in driving shape himself this year instead of "laying down" on the old gentleman with another busted peg she ought to give a good account of herself in 1915.

* * *

Charley DeRyder, with a crew of good boys to back him up, is giving the winter work to a pretty extensive stable, and is about as busy as anyone really needs to be and have any time left for hunting, autoing, etc. Joe Patchen 2:03¼ and Vernon McKinney 2:01½, the king pin pacers of the stable, both give evidence of being in shape to go to the races this summer and give a good account of themselves in any kind of company. Joe has recovered nicely from the sickness that put him on the shelf last year, and I was surprised quite a bit in Vernon McKinney. Since I saw him last he has filled and widened out considerably and is a much better looking horse. Zomblack has been working on a pace since DeRyder's return from Phoenix, and the big black fellow takes to it just like it suits him from the ground up.

Maymack 2:04½, with two world's records hanging under her name, the fifth heat record of 2:06¼ and the three heat record for mares of 2:04½, 2:05¼, 2:05, enters her tenth year seemingly just coming right, as she was never better than in her last race and shows no ill effects from her hard campaigns of the last two years and her hard luck previous experience. Bertha Carey 2:08¼, rounding into soundness after her crippled period of 1914, should be a formidable mare in her classes, as she trotted in a race at Lexington last year in 2:05¼; she is another of the "short bred" ones that have made good, as her breeding is established only for her first dam (Nell by Bob Mason) on the maternal side. Miss Perfection (3) 2:09¼ has been a favorite of mine since her two-year-old form, and I was pleased to learn that DeRyder thinks so well of the daughter of Gen. Watts and Sue Fletcher by Tregantle 2:09¼ that she is a probable starter in one of the twenty-thousand dollar trots at the P.-P. I. E. She is one of the nicest fillies imaginable, good headed and a steady trotter, and turned the Pleasanton track in 2:07½ after she came home last fall.

I had not seen The Earnest since immediately after his castration, and he looks now after a long let-up to be in shape to come right again. His three-year-old let down from about 2:14 or 2:15 to generously below 2:10 worked against him, but he retains a great brush of speed and may round into the horse that one would expect to find in a son of The Exponent 2:11¾ and the great brood mare Mardella by Delmar. The bay mare Astro Harvester, by The Harvester—Grace Rysdyk by Judge Rysdyk 2:26, trotted nicely in 2:15 with last half in 1:03 and looks good for a great deal more this season.

The lad of the stable that catches everybody's eye, however, is the big two-year-old gelding Anvilite, by Anvil 2:03¾, the great trotter bred by F. G. Jones and raced so successfully by Ed Geers. The lad's dam is Martha Spy, a young matron by The Spy (sire of Evelyn W. 2:00½, Chimes Hal 2:06¼, etc.); second dam Bessie Chaffin by Fred S. Wilkes 2:11¾ (sire of Fred S. Wedgewood 2:05¼, etc.); third dam Aufait (dam of Dr. French (3) 2:23¼) by Auditor, etc., and though not much has been asked of him he can spin a half close to 1:10 on any occasion, and answers every demand so satisfactorily that the regulars all regard him very highly. Mahomet Watts 2:08¼, leased from Gen. C. C. Watts and brought to California when DeRyder came home from Lexington, is another lad that is attracting a good deal of attention, as he is by Gen. Watts (3) 2:06¾ and out of Alla P. 2:21¼, a producing daughter of Palo Alto 2:08¾ and the great old matron Lula Wilkes by George Wilkes, the former mare bred at Palo Alto and the latter owned there in days gone by. This boy was in the 2:10 list as a three-year-old and last year in his five-year-old form trotted in 2:05½ in the M. and M. with W. L. Snow in the sulky, so that there is something to work on for 1915. He will make a limited season of twenty mares before going to the races.

San Felipe 2:09¼, undefeated in 1912 and a hard luck horse last year owing to sickness, has just been taken up recently after running out since his return home in October and seems a good horse again. He is entered in the big stake at the exposition and will carry a world of friendly wishes if he starts, as he has lots of loyal admirers here on the coast. Sis Bodaker goes through the stretches at a whacking trot and looks like a good performer for that old roan hero Bodaker 2:13. She is right on her dam's side, as Sis Meridian is a half sister to Perfection, trial 2:06¼, for whom George Estabrook paid Charley DeRyder ten thousand dollars and whom he lost by death before getting her to the races. A four-year-old colt by Vernon McKinney and out of a daughter of Diablo 2:09¼, second dam the dam of Leata J. 2:03, has gone the route in 2:16 on a pace with a half in 1:04. The babies of the stable are a couple of yearlings by Copa de Oro 2:01 and Vernon McKinney 2:01½, respectively, the former out of Hawthorne by McKinney and the latter out of Merry Widow 2:03¼, which makes a pretty fast combination to start on. Whether the kids live up to their pedigrees remains to be seen, but they will at any rate be given a chance to do so.

* * *

Barney Simpson is not stocked up heavily at present, but has a likely pair of trotting mares that keep him from being idle. One is a five-year-old by The Fleet 2:22—Bonita by Welcome 2:10½, with the succeeding dams by Director 2:17, Chieftain, and "the Mambrino Patchen of the Pacific coast," Williamson's Belmont; she worked last year in 2:26, with quarters in :34. The other is Barney's favorite and is a year older, by Bon Voyage 2:08 and out of a daughter of Don Derby 2:04¼. This lass had only ninety days' handling last year, but came to her speed very convincingly with a late mile in 2:16, half in 1:06, quarter in :31½.

* * *

George Ramage came down from Santa Rosa late in the fall and has a pair of mighty likely green mares, one being the six-year-old Grace Fowler, belonging to S. B. Wright. She is a full sister to Sonoma Girl 2:04¼, and in a life of well fed idleness she has grown into a pretty huskily set up mare. George broke her last year but developed no speed, as her feet were bad from long running in a muddy lot. Now, however, she is pretty well broken and her feet are in much better shape, so that George will begin searching her out occasionally for a few seconds more speed as she goes along. The other girl is the nine-year-old Clara Mills, that "showed something" last fall while the boys were congregated at Santa Rosa waiting for the races there. Earlier in the year, July 5, she was third in 2:23 in a matinee at Petaluma and ten days later at Santa Rosa won a matinee race in two out of three heats, the second and third, in 2:15 and 2:14½. As the track was kept

(Continued on page 8.)

LOE BLOSSOM 2:10½ by LEPIDE 49209.

NOTES and NEWS

Cleveland opens the Grand Circuit July 19.

◈ ◈ ◈

The daily press has recently circulated a story that Clara Mac 2:04½ is for sale, but we have heard nothing of it from headquarters as yet.

◈ ◈ ◈

Who wants to buy a better pacer for pleasure and profit than Don Pronto 2:02¼? It's a shame that he was so crippled up at his last appearance at Phoenix that he could only win six firsts out of six heats and could only go them in 2:05, 2:04½, 2:05¾, 2:05, 2:05¼, 2:05!

◈ ◈ ◈

Col. Jim Thompson and Charley DeRyder were among the suburbanite teamsters who viewed the tall buildings on Market street this week, but both escaped being run over, held up, or the ill effects following blowing out the gas, all of which things sometimes befall the rural visitor.

◈ ◈ ◈

Some days ago a letter arrived in San Francisco addressed to "N. L. Snowden, Panama-Pacific Exposition, Care of Mr. Ch. Durfee, Trotting Races." Inquiry on the part of Mr. Durfee has so far failed to locate the owner, and if any of our readers can supply the address of Mr. Snowden to this office it will no doubt be much appreciated by all parties concerned.

◈ ◈ ◈

According to eastern dispatches, President P. P. Johnston of the National Trotting Association has suspended the recent decision of the board of review expelling Vance Nuckols for his conduct at the fall meeting at Rockport, Ohio, and the case of the Cleveland horseman will be given a rehearing at the board's spring meeting.

◈ ◈ ◈

Keefer & Spencer landed at Pleasanton last Friday with their stable of trotters and pacers, concentrating at that point the two establishments maintained until recently at Sacrameno and Santa Maria. They have some well developed timber for the season's big events and several classy youngsters, noted more fully with the balance of the Pleasanton stables.

◈ ◈ ◈

President Daniel E. Hoffman of the California Driving Club is "on the dicker" with that canny horseman, Doctor Dalziel, for the latter's McKinney stallion, Tom Smith 2:13¼, whom Dan covets as a partner for Jonesie Mac to pole for the cutting of a wide swath at the horse show next month. They were hitched together a few days ago and make a "team as is a team" for stallions.

◈ ◈ ◈

The "business men's meeting" for the runners is on at New Orleans, and though the daily reports do not reach us we learn from other sources that the public have welcomed it with a whoop and a hurrah and that the attendance is running well over expectations—also that the sport is good and that the system of betting is proving acceptable to all concerned. Some day we will see the thoroughbreds racing again in California under an entire new system, and four or five trotting meetings to where we now have one.

◈ ◈ ◈

Charley Snow, who for many years was with Johnny Dickerson and ironed 'em off all down the big lines, and Watt Cleveland of Billy Durfee stable fame, who has also been going down the G. C. for the last few seasons, are fighting the fire at Pleasanton Driving Park and getting all the business they can well handle from the "winter colony" of trainers. So successful have the boys been in meeting the individual requirements of various birds who have to be "just so" that George Ryan threatens to have them iron off Miss Harris, in an effort to enable her to "see where to put 'em." Next!

◈ ◈ ◈

Sheriff Donald McRae of Snohomish county, Washington, has arrived at home at Everett with his new trotter Vallejo Girl 2:10¼ by McKinney 2:11¼, sold by L. B. Taylor at the December sale at Pleasanton, and it is his intention to race her this season on the North Pacific Circuit. Everett will give a spring meeting, and as Mr. McRae, who is an enthusiastic harness horseman, has been made manager of the race meeting and the plant, it looks like Everett would again become a good racing point. Bellingham will also give a spring meeting, and the North Pacific fair and race track managers will meet February 4-5 at Vancouver, Washington, to arrange circuit dates for the season of 1915.

◈ ◈ ◈

Mr. George Wingfield, who is assembling at the Nevada Stock Farm, near Reno, the nucleus of a great plant for the breeding of thoroughbreds, has recently become owner of the great sire formerly owned at Ormondale Stock Farm, Ossary, the son of Ormonde—Countess Langdon, of the renowned Queen Mary family. Ossary has been a private stallion the greater portion of his life, but has sired a great many winners of the American turf, and Ocydrome and Ottery St. Mary have raced in at the head of their fields over the classic courses of England. Ossary should have several years of usefulness in the stud yet before him, and his get from the Nevada Stock Farm band of matrons will doubtless add much to his renown as a speed sire and carry the Wingfield colors to the front in many a hard fought battle.

The first foal of 1915 to be reported to this office is an Arizona lass owned by Dr. A. H. Davidson of Phoenix. The young lady arrived very shortly after prohibition and heavy rains hit the desert hand in hand, having been foaled on January fourth. She is by Directly 2:03¼, who has held the two-year-old record for pacing colts for twenty years, and out of Lillian Zolock 2:22¾ (who has a two-year-old matinee record of 2:17 and is the dam of two in the list) by Zolock 2:05¼, second dam Lillian Welborn, a double producing daughter of St. Vincent, etc. She is a little pickaniny in color, taking that honestly from "the little black rascal" who is her sire, and will doubtless be heard from some day in fast company.

◈ ◈ ◈

H. E. Armstrong, formerly a familiar figure on the circuits and at Pleasanton, where he at one time controlled the destinies of the driving park, has been back home at the Livermore valley town since before Christmas and is getting a deal of pleasure out of riding behind the youngsters that Horace Feindel has been handling for him. For the last several months Mr. Armstrong has been operating in the big timber country down the Columbia from Portland, and has a good project well established. He plans to return to the north woods in the course of a few weeks and get in shape for a good run of business in 1915.

◈ ◈ ◈

J. N. Colomb, who is the resident commissioner for the Louisiana exhibit at the Panama-Pacific International Exposition, and who brought with him to California the Jay McGregor youngster Onward McGregor (3) 2:23¼ and the great race and show mare Mary Gordon 2:09¾, will breed Yolanda 2:14¼ to Onward McGregor early in the season and ship her to Kentucky to join other matrons in which he is interested. Mr. Colomb received a draft in excess of $1800 for his interest in the sister to Peter Volo, sold to Cleveland parties, and at present owns a quarter interest in a half sister to Peter Volo, a yearling by Axworthy out of Nervolo Belle, a two-year-old gelding by Peter O'Donna 2:08 out of the dam of Petress Burton (3) 2:12, and a two-year-old filly by Peter the Great out of Emma Cecil by Gambetta Wilkes, certainly a class of youngsters of whom he has every right to be proud.

◈ ◈ ◈

Among the interested visitors at Pleasanton last Saturday were Mr. and Mrs. A. W. Longley of Chicago, whose extensive ranch holdings near Bishop cause them to devote a great deal of their time to California, and who are spending the winter at the Hotel Oakland. Mr Longley has two promising pacing prospects in the hands of Bert Webster, by the great sires Baron Direct and Star Pointer, and was much entertained by their work Saturday and that of the numerous other good ones assembled at Pleasanton, while Mrs. Longley seemed to enjoy herself most when making the intimate acquaintance of a number of the babies of the stables, evidencing a special attraction to the spunky, husky little chap by Frank Perry and out of the blind daughter of Sidney Dillon, Miss Harris. Saturday was one of "those kind of days," and we imagine that during the sunny hours at the track and the auto rides through the Dublin Canyon and the greening foothills, California suffered nothing in their esteem as they drew mental pictures of their country home at Wheaton, where the winter has been exceptionally severe.

◈ ◈ ◈

L. H. Todhunter of Sacramento, long one of California's successful speed breeders, was in San Jose early in the week looking over the ground there to get a first hand idea of the stabling, pasturing and shipping facilities, as he is considering that city as a place to locate his great youngster Peter McKlyo (3) 2:12½ during the breeding season. He was pretty well pleased with the situation, as the local accommodations for that business are very good, and San Jose is very easily reached from several localities where brood mare owners patronize stallions that suit them with slight regard to cost. Peter McKlyo is not only a fast and remarkably pleasing young stallion from other important viewpoints, but he is the only son of Peter the Great standing for service in California, the Pilot Medium blood being sturdily backed by successive maternal crosses to Jay McGregor 2:07¼, Lakewood 2:17 (a progenitor of three-year-old 2:10 speed through his daughters), Happy Medium 400 and Countersign 885, and his services will doubtless become popular here on the coast where lone members of great eastern families have in days gone by built up families of their own of equal or surpassing splendor.

NORTH PACIFIC FAIR ASSOCIATION.

The annual meeting of the North Pacific Fair Association will be held at Vancouver, Washington, on February 4-5, 1915.

Thirty fairs in the Northwest and Canada have membership in this association, while this year there will be a large attendance of stockmen who are seriously interested in enlarging the shipping circuit for livestock exhibitors and making a continuous trip without loss of time at a minimum of expense.

Among the other matters to be settled are the dates of the various fairs of the Northwest, the racing classes, and other important phases of the business.

The officers are Robert H. Cosgrove of Spokane, president, and Jno. W. Pace, of Seattle, secretary and treasurer.

THE OCCIDENT STAKE FOR 1915 AND 1916.

One of the long established events for three-year-old trotters on the Pacific Coast is the Occident Stake, which has furnished some of the best racing of the season year in and year out, and which is eagerly fooked forward to with a great deal of interest on the part of both horsemen and public. The event carries not only added money, but the winner is awarded the highly prized Occident Cup, and that the racing of the next two numbers of the series will be equal to or surpass the quality displayed in those gone by is evidenced by the number of nominators who have made second and third payments.

With other local classics, the Occident stake for 1915 has been incorporated in the program for the fall meeting at the exposition, and is scheduled to be raced on Saturday, October 30th, the same day that witnesses the contesting of the great twenty-thousand-dollar stake for 2:10 trotters. As in previous years, the starters will be the pick of the west, as almost every establishment from which the recent winners or contending horses have come is represented by from one to half a dozen paid up entries. Those who have made payments to date in the two events, with number of entries owned by each, are as follows:

List of Names of Those Who Have Made Third Payments in Occident Stake, 1915.

Name and Address.	No. Entries.
Angevine, H. G., 67 So. 2nd St., San Jose	1

DeRyder, C. L., Pleasanton	1
MacKenzie, R. J., Pleasanton	1
Total paid	35

A. W. MORRISON PASSES AWAY.

Alexander Wylie Morrison, pioneer hotel man of California and owner of a half interest in the Western Hotel in Sacramento, died last Saturday in this city as a result of paralysis; Mr. Morrison had been in poor health for some months, and he and his wife had been making their home here since October in the hope that the change of climate would be beneficial, but without results.

"Alex" Morrison, as he was most familiarly known to a wide circle of friends and acquaintances, was born near Boyd's Bridge, Mountain township, Canada, December 15, 1846. Most of his youth was spent on a farm near Ontario. He received a diploma from a business college in Toronto, Canada, September 7, 1867, and in January the following year sailed for San Francisco, where he became clerk in the old American Exchange hotel. He went to Canada on a visit and on his return to California became head clerk of the Sacramento hostelry in which he afterwards became half owner. He is survived by two sisters whose home is in Canada, and Mrs. Morrison, who was Miss Mattie Martha Jones, daughter of a famous old time sea captain.

Mr. Morrison was a great friend of the light harness horse, a patron of breeding and colt raising in a modest way, and kept his favorites near at hand to the hotel where he could have the pleasure of handling them without detriment to his business.

Montreal is a newcomer to the Grand Circuit for 1915, with two meetings of three days each.

ENTRIES FOR THE BIG STAKES.

January second was the third date of closing for entries to the big twenty-thousand dollar stakes for the spring and summer meetings at the Panama-Pacific International Exposition, and a number of owners took advantage of the opportunity to pay in on the three per cent basis that allows them to face the starter for the rich money for only $600. Letters received from various sources bespeak a much greater entry June first on the thousand dollar basis, as quite a number of prominent stables have two or more horses that they are "sampling" that are eligible to the events, and they prefer waiting until the last minute in order to be sure of entering their best candidate in preference to making a cash saving of $400 and running the risk of entering the wrong horse and thereby losing a much greater amount.

For the convenience of our readers we publish herewith the complete list of entries to each of the four events as they stand at this time. Nominators who made entry on September 1, 1913, have unconditional rights of substitution on or before June 1, 1915, by the payment of $200 additional—that is, they personally may name another starter for their own benefit on any grounds whatsoever, death, ineligibility, sale of entry without engagement, or failure of original entry to live up to expectations, etc. Or, in case their entry may have raced to a record making him ineligible to the class on Jan. 1, 1915, and they have no horse they desire to substitute and start in the big stake, they may transfer entry to the class to which the horse is eligible and the $200 will be credited toward the starting fee for that class. Entries made April 1, 1914, and Jan. 2, 1915, are not open to substitution or transfer to class races.

In the following list, instances will be noted in the early entries where horses are ineligible by record, or are dead or known from other sources not to be probable starters, but as owners have not yet made declaration of transfer or substitution, as the case may call for, they appear as originally made:

SUMMER MEETING.

NO. 17—2:10 CLASS TROTTING, $20,000.

Entries Made Sept. 1, 1913.

F. E. Emlay and S. H. Norris, Santa Rosa, Cal., bl s Washington McKinney Jr. by Washington McKinney, dam Hazel Turk by Silas Skinner.
W. G. Durfee, Los Angeles, Cal., b f Esperanza by Carlokin, dam My Irene S. by Petigru.
R. J. MacKenzie, Pleasanton, Cal., b g The Earnest by The Exponent, dam Mardella by Del Mar.
W. T. Sesnon, San Francisco, Cal., b g San Felipe by Zombro, dam Ella J. by Bob Mason.

THE GRAND CIRCUIT FOR 1915.

That the Grand Circuit will provide its customary amount of racing in 1915 is evident from the dates allotted Tuesday at the meeting of the stewards at Detroit, racing being scheduled to begin at Cleveland on July 19th and close at Lexington October 16th. As was expected, Buffalo (Fort Erie) and Pittsburg claimed no dates this season, and Montreal has been admitted to the circuit to fill the vacancy, the Canadian city being granted two meetings of three days each in consecutive weeks, the provincial restrictions allowing only that amount of racing per week.

The dates on which the meetings commence and the places composing the circuit for the season are as follows: July 19th, Cleveland; July 26th, Detroit; August 2d, Kalamazoo; August 9th, Grand Rapids, Mich.; August 16th (three days), Montreal; August 23d (three days), Montreal; August 30th, Yonkers, N. Y.; September 6th, Hartford, Conn.; September 13th, Syracuse; September 20th, Columbus; September 27th, Columbus; October 4th, Lexington; October 11th, Lexington.

Press dispatches so far received convey only meager information concerning the session, and we are yet unaware of action taken on the proposed changes in the conduct of racing throughout the circuit, but that information will doubtless reach us for our next issue.

SAN FRANCISCO DRIVING CLUB MEETS.

On Tuesday evening of this week at Mission Hall a goodly quota of the membership of the San Francisco Driving Club assembled to "talk things over" and make up the slate for officers for the coming year. "Jimmie" J. Ryan, a two-termer as the head of the organization, flatly refused to Roosevelt himself and stand for election a third time, and on motion of Adolph Ottinger, George Giannini was chosen to fill Mr. Ryan's place. George has not as yet given official sanction to his candidacy, and in case of his request not to be forced to serve, Mr. Ottinger will be installed as chief director of the club's destinies. The balance of the ticket chosen is as follows: Jack Welsh, first vice-president; W. J. Kenney, second vice-president; James McGrath, third vice-president; Fred Lauterwasser Jr., secretary; Fred Lauterwasser, Sr., treasurer; William Malough, sergeant-at-arms; R. Consani, J. Tassi, Fred Clotere, Henry Campodonico and Harold Cohn, board of stewards.

The next meeting of the club will be held next Tuesday evening at the same place, when the formal election proceedings will take place. As there is no other ticket in the field the election will be merely a ratification of the work of the nominating meeting, and the event will be the official start of the club for the season of 1915, with the brightest prospects they have ever had.

At the same time the six trophies for the six leaders among the horses raced last year in the club's matinees will be awarded, and a general good time is anticipated, so members are urged to arrange their personal matters so that they may be on hand and share in the evening's enjoyment.

DEPLETED CONDITION OF FEEDLOTS.

Under normal conditions a deficiency in beef and mutton was unavoidable during the first half of the new year, but enforced cessation of the stock and feeder movement has created certainty of a series of bare spots, for which the only possible alleviation in the case of cattle is extensive feeding in the southwest, and in sheep supply from well filled feedlots in northern Colorado. During January buyers will have comparatively easy picking, as the infected area east of the Missouri river is still liquidating and in the case of cattle will not be contented until the present set has been disposed of. Just when it will be possible to install another is an insoluble problem.

No statistics concerning prospective supply of beef are available. In the case of live muttons the trade has a more lucid idea of what is in preparation, as the stocker movement is through well defined channels. Owing to the drouth in a large section of the cattle feeding area in 1914 winter operations would have been light in any case east of the Mississippi, roughage being scarce and corn high. It so happens that nature was lavish during 1914 where it displayed parsimony the previous year, consequently the southwest, especially Kansas, went into the winter full of feed and hungry for cattle. The year 1914 was a lean one in Kansas City territory, but 1915 promises adequate recompense. Every beef production section south of the Dakotas and west of the Missouri river will probably market more fat cattle during the first six months of 1915 than last year, but the main increase will be in Kansas and Oklahoma. Nebraska has been a free purchaser of stockers recently and Texas will do its usual volume of cake-feeding. The Texas beef output is largely controlled by range conditions, which are excellent.

But the major part of the beef supply of the first half of the year is produced in the corn-growing states east of the Missouri river, Iowa, Illinois and Missouri being the principal contributors. Since the appearance of foot-and-mouth disease only a handful of thin cattle has gone into Iowa and Missouri, and practically none has been moved east of the Mississippi. Had conditions been normal December receipts would have been meager.

In territory east of Chicago winter beefmaking has been all but suspended. In the Lancaster section of Pennsylvania there will be few cattle for the butcher during the coming season, western Pennsylvania has been ravaged and slaughterers in that quarter will not have access to many local cattle until Virginia's crop is ready, and that depends on the vernal season. Already numerous small eastern slaughtering plants have been free purchasers at Chicago, making a relatively high market for $7@8 steers, while better grades have had to beg bids.

Such states as Ohio, Indiana, Michigan and Kentucky are factors of no mean importance in the beef supply of the first half of the year and, like Illinois, all these have been cashing cattle recently, while none has been going in. Normally during November and December the whole region east of the Missouri river absorbs large numbers of stockers, but outside Missouri and western Iowa this traffic has been entirely suspended. For two months the major part of the beefmaking area of the United States has been liquidating while the replenishing process has been suspended.

In the case of sheep and lambs the prospect is little better. All last summer and fall, when the cornbelt states usually put in western stock, little was available and since November not enough feeders have been put in to supply the public with mutton for a week. Only in northern Colorado is winter feeding of normal volume and supply from that source will doubtless disappear early and imperceptibly.

How drastic is the pending clean-up of cattle within the infected area may be inferred from the fact that local butchers at interior points who, to insure a supply of beef, laid in cheap steers early in the season, have been returning these to market, as they can now buy cows at home. The proportion of cow stuff in the quarantine division at Chicago has been much larger than in the clean area, emphasizing the intention to dispose of everything for cash in preference to the possibility of buying it. That the replenishing process will be rapid when opportunity arrives needs no argument ,especially if the fat cattle market is equal to a good performance during the next 90 days. Meanwhile, great buying activity exists in the southwest, much of the trade in Texas stock cattle usually transacted in March having already been recorded at phenomenally high prices. Graziers realize that the task of filling pastures is to be both costly and difficult, and are taking time by the forelock.

The problem of the present is how the inevitable bare spot is to be bridged.—Breeders' Gazette.

Agents of the French government have been active buyers of army horses during the last several days in California, operating through E. Stewart & Co. of this city and other prominent dealers who are always closely in connection with the supply of marketable animals of the class desired. Prices ranging from $75 to $140 are reported as ruling the takings of the foreigners, who are drawing the color and age line and taking only serviceably sound horses. Several localities have been drawn upon for their quota of the number desired, and the various bands purchased are being assembled at the Miller & Lux ranch at Los Banos, whence shipment will be made to New York. The inspection has been under the supervision of Mr. Stewart, Dr. Preese of New York and the following agents of the French government: R. Parant, L. Moore and L. Lawregain

A JANUARY DAY AT PLEASANTON.

(Continued from page 5.)

up only enough for comfortable jogging nothing more was done with her until the boys began flocking in, when her tail got sat on a bit harder from work to work, miles coming her way in 2:13¼, 2:11¼, and her last work in 2:09½, when Ramage let up on her for the season, well satisfied with what he had. Incidentally she had stepped the last half of a 2:15½ mile in 1:03½. She is as clean as they make 'em, and George is not afraid to get on the back side of the track for fear of having to walk in, as she pulled him and another good stout hombre over 104 miles of Sonoma county roads in one day as a five-year-old. She is a daughter of Lecco 2:09¾ and out of a mare by Sidney Dillon.

The other member of the string is a dark chestnut filly, two years old, by Bon McKinney 2:24¼—Clara Mills, just nicely broken but able to show a forty gait at the trot. She is a well bodied baby and I got a jolt when George remarked that no filly had ever reminded him so much of his old pupil, Lou Dillon 1:58½, at the same age. As this lass had proportionately much greater bodily substance than had Lou Dillon in maturity I was a bit surprised until George told me that the first two-minute trotter was not characterized by the "waspiness" with which the majority of us are most familiar until after severe illness in her three- and four-year-old form. Thus do we learn.

* * *

The Mizner youngsters and Will DeRyder's horses I didn't get to see, but better luck next time. I though I had Mr. Mizner, Jr., cornered Sunday, but when I looked for him he was cut from me, but the neighbors "passed me the office" that he and his father have some pretty good youngsters. The only way I will ever catch Will DeRyder will be to go 'way 'round and come in the grounds from the back side and see him first of all, as I have no luck "starting from the front" and trying to get to him; I tried it not once but two or three times but I would always manage to get hung up en route. He has among others, I know, the last year's Stadium pacers Mabel Dillon and Dicto, both of whom worked well before being let down for midwinter, and the trotting gelding purchased by George Lowery at the December sale, Spriggan by Baron McKinney 2:10¼, out of Helen Simmons 2:11¼ by Simmons 2:28, tracing on back through daughters of Sultan and Hambrino to grand old Alma Mater. Spriggan is a most attractive lad with a good bit of speed, a half in 1:04½ on the end of a 2:15 mile having been credited him prior to his sale.

* * *

Two of the busiest people on the grounds are Frank and Marvin Childs, who are assembling a formidable bunch of speedy ones for the season's campaigns. I say "campaigns" instead of "campaign," as I have an idea that along toward racing time they will split the present string and each take a different route—and each of them can be depended on to bring home goodly slices of the money. Frank spent most of 1914 down the big lines east of the deserts, while Marvin was rolling up a record for winnings over the northwestern circuits.

The nucleus of the present stable was brought to Pleasanton early in the fall when Marvin wound up a campaign that had lasted from late in May, and included Hal Boy 2:06¼, Imbro 2:12¼, Jim Hill 2:09, Major By By 2:19¼, Tom Smith 2:11¼, Lizzie Dillon 2:15½, Sirius Pointer 2:15, and Valeen M. (2) 2:26. Hal Boy, whose winnings in excess of ten thousand dollars rank him fifth among the season's winning pacers and exerted in excess of a third of the influence needed to put his sire in second position in that individual compilation, won sixteen races out of eighteen starts in 1914, and is a remarkable horse. He is not a big lad, but he is "all horse" and looks fit as a fiddle and shows small sign of the battles he has waged. He is entered in the big stakes at both meetings at the P.-P. I. E. and it is my guess that he will be "there or thereabout" when the summaries are cast up, barring untoward accident, while the other members of the bunch that get starts in the class races promise to be just as hard to beat, as they have every one shown epeed considerably in excess of their present eligibility records. Sirius Pointer is owned by H. H. Boomer of Spokane, Lizzie Dillon by Charles Bowman of Walla Walla, Imbro and Jim Hill by Daniel Anderson of Portland, and Hal Boy, Major By By and Tom Smith by Ed Peterson of Omaha.

The next important addition to the stable was made on Frank's arrival from Phoenix, where he had purchased for the account of Mr. Peterson the chestnut mare Loe Blossom 2:10½ by Lepide—Lillian W. by Harry Hontas. The mare is well behaved in company, in excellent condition, and before purchase worked the Phoenix track in six and a fraction. She is pointed for the big trots, so Mr. Peterson and the Childs family will be well represented at the exposition meeting. Since I saw the mare at Phoenix she has added flesh and her color is richer, lending a good deal to her appearance.

The later additions are Bluefinch by Spokane 2:15¾, a product of Brook Nook Ranch owned by W. J. Cooney of Butte, and R. H. C. 2:18½ by Fal, owned by Wm. Holbrook of Helena. These lads have as yet had only easy jogging and Frank and Marvin have no first-hand information as to their capacities, but speak well of their apparent natural inclinations. Some time this week or in the immediate future the other great Hal B. pacer Haltamont 2:05¼ is expected to join the stable, as owner Frank Anderson had sent out word to "look out below," so there will be no lack of speed in the Childs stable for 1915.

* * *

Messrs. James Sutherland and Fred Chadbourn, as father- and son-in-law make a mighty harmonious pair, as you generally see 'em both if one is around, or at any rate that is my experience with them. At any rate they deliver the goods jointly when it comes to speed merchandising, and at their stables in the rear of the Rose Hotel they have gotten together a dozen head of the kind that bring in something besides excuses when the season is over in the fall. Zoetrix and Zorene, both by Zolock 2:05¼ (recently exported to Russia) and out of the great mares Trix by Nutwood Wilkes 2:16½ and My Irene S. 2:28¾ by Petigru 2:10½ not only have a great inheritance but possess the speed itself. Zoetrix worked in 2:06½ in 1914 and stood third in the summary of Clara Mac's Santa Rosa race in 2:05¼, 2:06¼, 2:06½, finishing 7-3-2, so that she evidently had the "stickability," while Zorene won a world of favor by her performance, her fastest winning heat being in 2:10¼. Harold C. 2:11½ by Bon Voyage 2:08, dam by Silver Bow, and Bon Cres (3) 2:10¼ by Bon Voyage, dam Kate Kopje by Cresceus 2:02¼, are a pair that will do to tie to for the trots, as will the black horse Vallejo King 2:10¼ by General John B. Frisbie—Reinette by Dexter Prince. Bon Cres was a slow grower but growth and speed came together in his case and he will make a horse of very nice size. He is owned by J. J. Campbell of Pasadena and there are two more in the stable closely related to him, the three-year-old filly Mabel Bond and the two-year-old colt Great Bond, both trotters, both by The Bondsman, and both out of Kate Kopje, who is yet a young mare with an apparently great future. Red Patch, a three-year-old colt by Joe Patchen II, trialed on the pace in 2:20 last year, and is out of Trix McAdrian 2:23¼ (who is herself a member of the present training string and a slick going pacer at that) by McAdrian, while the other great sidewheeler of the MacKenzie stable, Vernon McKinney 2:01½, is represented by the two-year-old pacer Verna McKinney, out of Ramona by Demonio, a nick that ought to be productive. Another pacer with good previous work to his credit is A. B. C. by Humboldt Dillon, dam by Dudley, that worked in 2:09¼ in 1914, and the even dozen is rounded out by a dandy weanling, or rather yearling, colt named Flicker, by The Proof and out of Rose Trix by Corbitt's Rose, second dam Trix by Nutwood Wilkes. This is a nice lot of things to work on, and Pa Jim and Son Fred will get some good ones from the bunch—just leave that to them, without bothering your head a bit.

* * *

Bert Webster is on deck with his customary stable of good youngsters, headed by the Jay McGregor stallion Onward McGregor (3) 2:23¼, owned by J. N. Colomb of San Francisco and Louisiana. This lad trotted quarters as a yearling but was tangled up in a jam caused by a flying switch en route to San Francisco on his trip west, and both he and his dam were considerably bunged up, the latter badly so. Last year he had gotten far enough along the road to recovery to mark in 2:23¼ and this year he will be prepared for a campaign following a limited stud season. Through Mary Gordon 2:09¾ he traces back to Shadow, grandam of J. Malcolm Forbes 2:08 and Peter the Great 2:07¼, so he is bred right to possess and sire both speed and individuality.

A likely pair of pacers in the string are Pedlar Direct and Starrina, owned by Mr. A. W. Longley of Chicago, whose California ranch holdings near Bishop, Inyo county, are extensive. Pedlar Direct is a four-year-old brown horse by Baron Direct (sire of the great pacer Braden Direct 2:01½, etc.), and out of a daughter of Pedlar 2:18½, a son of Electioneer bred at Palo Alto, while Starrina is a six-year-old son of Star Pointer 1:59¼ and Friskerina 2:13¼ by Sable Wilkes 2:18. Frank Perry (1) 2:15, the champion yearling pacer, has had a hard luck career in the past but looks like a cheap horse at the price he cost his new owners and will probably win them some money, while a youngster that recalls a good one of days gone by is Fresno Bond, a two-year-old colt by The Bondsman from Fresno Girl 2:10¼. The stable also includes three youngsters bred by Bert and George Ryan, the produce of Miss Harris by Sidney Dillon to the cover of Joe Patchen II 2:03¼, The Bondsman and Frank Perry (1) 2:15, the resultant foal of the last mating being one of the most attractive yearlings at the track. Miss Harris is a blind mare, but that handicap in no way seems to interfere with her qualities as a matron, or with her chances for becoming the head of a fast family of race goers. [Neal.]

STATE QUARANTINE AGAINST HOOF AND MOUTH DISEASE.

A sweeping quarantine order prohibiting the importation into California from all but sixteen states of cattle, swine and sheep, was issued on Monday by Governor Hiram Johnson.

The states excepted are: Washington, Oregon, Idaho, Utah, Arizona, Colorado, New Mexico, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Minnesota, Arkansas and Louisiana.

The proclamation is a modification of the original "blanket" quarantine, and was issued following representations made to the Governor by State Veterinarian Charles Keene, that importation of live stock from uninfected states would not endanger California stock.

In the meantime, the fight against the disease in the areas where it first appeared is going steadily onward, and it is the belief of those in charge of quarantine and eradication proceedings that the outbreak has been effectually checked and that the costly malady will be wiped out entirely. The method of checking its spread by putting infected herds under ground has been drastic and expensive not only to individual owners but to state and federal governments as well, but no matter what the present cost of extermination of the disease may be, it is insignificant when compared to the future saving made to the nation at large, and the only sane view to take of the situation is this, that the hoof and mouth disease in America not merely can be, but must be stamped out. The inconvenience and loss to California stockmen and the public through the temporary quarantine is absolutely nothing alongside the damage that would accrue from the introduction of a single infected animal onto one of our ranches or ranges or into a beef corral, and the quarantine proclaimed by Governor Johnson is emphatically in the interest of all Californians in the long run.

Commenting on the situation in the central west the Breeders Gazette says, in part, that very few new outbreaks occurred last week. Trouble from milk from a creamery in Kane county is the most serious event in northern Illinois. The chief complaint now is that delay occurs in slaughter and especially in disinfecting farms. The ground has been so deeply frozen that dynamite was required in excavating some trenches. The demand from farmers for more expeditious work in disinfection will likely bring results. In some sections they are offering to do the work under direction of a Federal inspector, and in other sections they have demanded such exorbitant wages for such work that the Federal inspectors have declined to employ them.

The Federal inspector in charge of the trouble in Kane county and the three or four adjoining counties in Illinois believes that no further outbreaks will occur in that section. He states that but for the co-operation of prominent men in Aurora and vicinity the epidemic would have been more severe. He had much difficulty in securing day-laborers because they were not inclined to wait sixty or ninety days for their pay. He conferred with William George, John Alexander, H. J. Cooper, D. W. Simpson and E. S. Todd, and they told him to employ all the men needed and they would provide the necessary funds and await reimbursement from the Government. In this manner the outbreaks at Oswego, in Kendall county, and Kaneville, Elburn and Batavia in Kane county, were handled with reasonable promptness. This same inspector advises us that in his twenty years in the Department of Agriculture work he never labored in a section where the farmers gave him such efficient co-operation as in the Sugar Grove section in Kane county. If a similar spirit had been manifested by bankers, business men and farmers in every affected community we should have seen the end of the disease ere this.

In the last several lines just preceding there is sounded a note that gets right next to the hide of a great many growers of livestock. For so many years there have been so many breeders and farmers who have gone on in the same old rut of "feed 'em and water 'em and they'll do the rest," that a jolt like the country has just received will have a most salutary effect upon the future conduct of the livestock business in general, as much more attention will be paid to herd health. Fortunately these remarks apply to a minority of stockmen of today, as the most of them have learned that hog cholera, scab, fever ticks, tuberculosis, blackleg and other costly animal ills are not mere "dispensations of providence" to be faced resignedly and with much reviling of "their luck," but are merely natural ailments to which flesh is heir and for which there are remedies and preventatives. In this day and age it is not the boss beef or pork or mutton feeder that makes the stockman his real profits, but the man who eliminates the loss and needless waste from the ravages of disease and winter poverty.

If the foot and mouth outbreak can bring this right home to every stockman in America its coming will not have been an unalleviated hardship, and the meat famine bugaboo will in future years stalk less starkly about the land.

WASHINGTON STATE FAIR ON SOUND BASIS.

Olympia, Wash., Dec. 30.—The advisory board of the state department of agriculture received today the report of Commissioner H. T. Graves on the state fair held last September at North Yakima, showing that the fair this season was able to strike a balance for the first time.

The report shows that the receipts of the fair, including $3,454 that was left of the biennial appropriation made by the 1913 legislature, totaled $25,171, while the expenditures totaled $25,872.

The apparent deficit of $701 was wiped out by small bank balances carried over from the previous year. The report shows that there are outstanding obligations at this time of $538, with bills payable and cash on hand totaling $658, which apparently leaves a small balance.

The many friends of Mr. S. S. Bailey will be pleased to learn that he is recovering steadily after his long siege with cold and pneumonia, and that he hopes soon to be able to leave his confining quarters in Portland and come to Pleasanton to superintend the fitting of his horses for the campaign of 1915.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. De WITT

BUILDING A CABIN IN THE WOODS.

Different people have different ideas of an outing, but for my part I find the greatest pleasure in an outing in the very heart of the wilderness, in the midst of the woods, with wild game about me, and fish abounding in the brook that runs along the ravine below my cabin.

Anyone, with similar tastes, can find the spot he desires, for there are plenty of such retreats in the mountains of Washington, Oregon and California, where wild land, unsuitable for agriculture, may be purchased for a trifling sum.

From the moment I made up my mind to acquire such a retreat for my annual outings, I experienced immense joy in the planning and the execution of the plans, as well as in the actual possession of a cosy cabin in my nook, where I can enjoy the simple life, close to nature.

Having found a forty-acre tract of woodland, accessible only over a rough mountain trail, about ten miles from the nearest railroad and six from the nearest county road, the next thing to do was to build my cabin.

All that I wanted was a snug hut, of two rooms, with a big open fireplace, close to the living spring that was on the place, pouring forth delicious, clear, cold water the year round.

Most of the materials were right at hand. There were fir trees of every size, and in the brook, as well as in various spots elsewhere, were plenty of rocks for fireplace and other purposes. Hardware, kindows, doors and some boards for the floors were all that I had to buy.

The cabin consists of two rooms, each 12 by 14 feet, with a door at the end of one and at the side of the other. It is built of logs, the roof being made of shakes, cut from neighboring fir trees.

The first thing to be done was to mark, after careful measurement, the corners of the cabin, seeing that the sides were at right angles to each other. Next, heavy rocks were placed securely in the ground at each corner, care being taken that the rocks should rest steadily, without shaking or slipping under the heaviest weights.

Next the underpinning, consisting of long, stout timbers, were placed upon the rocks, forming the floor sills. These latter were then notched to receive the floor timbers, which were placed two feet apart, and smoothed on the upper side, to receive the floor planks that were purchased from a sawmill ten miles away, and, with the doors, windows and hardware, packed in on a sled, over the trail.

Next, at each corner a temporary post was erected, carefully plumbed, as a guide in laying the logs for the walls.

This latter operation was not so simple as might appear, for each log had to be carefully sized and fitted to its neighbors, and doors and windows had to be allowed for in the construction, as well as the chimney.

The walls were made 7 feet high from floor to eaves, with a roof placed at such an angle that rain would quickly run off, and snow slide off as soon as it began to melt; the latter being an important consideration, for the weight of snow is great and it subjects the whole structure to a heavy strain.

The shakes were made easily from a carefully selected fir tree, and the roof, when completed, was watertight everywhere. The walls were calked, between the logs, with the moss which is plentiful in the mountains, and the rooms were quite tight.

Building the chimney was the hardest job of the whole thing. The rocks had to be of a certain kind, the kind that would not crack at the first big heat. Many rocks looked fine, but they were brittle and split up even when a light bonfire was build upon them. For the bottom of the fireplace and the hearth,, largs rocks were used, but for the chimney itself, medium sized or small rocks were selected, on the principle that if a rock cracked, it had better be a small one, that would not materially affect the rest of the chimney by its breaking, instead of a large one, that might cause the whole structure to collapse. Two flat iron bars were bent and used for the arch of the fireplace. A rod of iron was extended across the fireplace, from which kettles could be suspended for heating water and cooking.

Instead of cement or mortar, I used the sticky blue mud that was found near the spring. It was excellent, being very adhesive, and when dry was as hard as rock. In fact, I was sorry afterwards that I did not build the whole chimney of this mud.

When completed, the cabin was as cosy as one would want. Skins of animals lay upon the floor or were hung upon the walls. At the end of one room was a frieze of squirrel, skunk and rabbit skins. Foxes, deer and raccoons, and a wildcat, gave their skins to the cabin's embellishment and warmth. Deer antlers were placed over the fireplace and around the eaves. The big logs blazing on the fireplace, and the rough rafters overhead combined with the firearms, the skins and other trophies of the hunt to give the place a suitable atmosphere. The furniture was all rustic, made of the small trees on the place, the tables being topped with boards left over from the floors and doors. Empty boxes, in which groceries had arrived, were utilized for cupboards and shelves, twigs being nailed to them outside, to harmonize with the general rustic effect.

An extra sleeping room, for summer use, as an outdoor sleeping apartment, was made by driving two posts into the ground, putting saplings across them and also from them to the cabin, and then covering this frame with branches of fir trees.

The total cost of material bought for this cabin, including hardware, doors, window, planks for floors, and all, was less than $30.

The tools needed were an axe, hammer, hatchet, broad axe, chisel, plane, spirit-level, plumb, and a frow for making shakes. A crowbar is often useful and so is a wheelbarrow, for wheeling up the rocks, but for the latter purpose I used a small sled made on the spot.

Attention should be paid to having everything square and level. Uprights must be perpendicular and horizontals true. In estimating for the number of boards needed, it must be remembered that a number must be placed across the rafters to support the shakes.

There are manifold details in building a log cabin which must be learned by experience. Too much care cannot be taken in making measurements. Do not trust to the eye. Use a tape measure. Some amateurs, building their first cabin, neglect to peel the logs, with the result that as the logs dry the bark splits and falls off, making dirt and giving a slovenly effect. Besides, the bark, if left on, is a breeding place for insects.

If a piece of piping can be had, it is not necessary to build a rock chimney all the way up. Simply build the fireplace of rocks, and then put the chimney pipe on top of this.

If the spring is at a distance from the house, and above its level, the water can be easily brought to the cabin through a small flume. It may be brought right to the door by this means.

If the cabin is to be occupied during the winter or rainy season, a woodshed should be built, in order that dry firewood, enough at least for starting fires, may be constantly on hand.

In such a haven of rest as that described, genuine recreation may be had. From the early morning to the last flicker of the fire or candles at night, there is unalloyed pleasure for those who love the freedom of the forest, the life-giving atmosphere of the pines, and the liberation from the noise, cares and other annoyances of urban existence.

INDIAN DOGS.

Who that has ever visited an encampment on an Indian reservation has not been struck with the number of half-starving, snarling, growling curs that slink in and out among the tepees and lodges? There was a reason for their existence once, but their use to the Red Man is now purely imaginary, excepting in the Far North, where they are used for transporting supplies to outposts and police stations and hauling furs into the forts and trading posts.

The Indian dog in the early days was a cross between the wolf and the Eskimo dog. Today, in the north, this type stands out prominently; but in the warmer regions, where horses are used by the red men, every breed of dog is to be found. They have an emaciated, hungry, half-starved appearance, and are a pest to travelers and settlers. Calves, lambs, barn-fowl, and even small children have often fallen prey to these marauders that prowl about at all hours of the day, or night. One settler records that one of his first ranching reverses was the loss of half of his range calves by depredations on them by these savage brutes. In the long ago dogs were the only beasts of burden the Indian had. Students of Indian life tell us that the horse is a comparatively recent importation. Butler, in "The Great Lone Land," says that as late as 1776 the Indians of our western prairies remembered that their horses had been procured from white people who lived to the southward. These were likely Spanish colonists in New Mexico and Texas. It is evident from the Indian language that the red men did not always possess the horse as a beast of burden. A comparison of the words for horse used by the Indians will make this plain. In Cree a horse is Mis-ta-Tim (the big dog); in Assinaboine, Sho-a-thin-ga (a great dog); in Blackfoot, Po-no-ka-mi-taa (the red deer dog). The Sarcees' term for horse is Chistle (seven dogs), while the Gros Ventres call him It-shou-ma-shun-gu (red dog). It is manifest, therefore, that the wild men of the Northwest looked upon the horse as a newcomer, and their reference to him in the dog language of their tribe would indicate that the animal used as a beast of burden before the Indians became equestrian in their habits was the dog.

Transportation of baggage, even after horses became numerous, was performed by dogs. Horses were kept for hunting buffalo. In winter dogs were harnessed with bands of buffalo hide and hitched to sleds and toboggans which carried the loads. In summer, and in winter when there was little or no snow, the dogs were tackled to two straight poles about 15 feet long, fastened together at one end, at the other spread about 8 feet apart. Where the poles are lashed together at the ends several folds of dressed buffalo skins, which answer for a saddle, are fastened and laid directly on the dog's shoulders. A strip of leather attached to this is brought round the dog's neck and made fast again at the meeting of the poles. Then a hoop is laid across the poles a little behind the dog's rump and interwoven closely with leather thongs, and upon this the burden is laid. The contrivance is called a travois. Often horses are tackled in the same manner, the poles being as long as 25 feet.

In the North Country, where all the transportation of supplies and mail is by dog train, the animals are generally of the wolf breed, and are said to be vigorous and long-winded. "Huskies" is the name usually applied to them. A hundred miles a day is a common journey for them. The endurance of the little creatures is something remarkable. A story is told of a clerk driving out 25 miles from a trading post with a dog team, who was immediately sent back to the post. Hurriedly preparing a packet, he dispatched an Indian driver with the same dogs back to the party he had left on the trail, and the outfit arrived before his friends were up in the morning. The dogs had thus run 75 miles in a good deal under the 24 hours. When the half-breeds settled in the northern part of the Great West they put out poison for wolves and foxes, and the Indian dogs in large numbers were killed by it. Thus a very important mode of winter transportation was lost to the red men. This practice was stopped, however, and the dogs soon multiplied to their former number.

In bygone days the emulation among Indians for dogs as runners was so great that all their hard earnings were spent on them and the tawdry paraphernalia required to ornament a first-rate train was as expensive as it was foolish. The squaw might go without her blanket, but the buck must have his dogs and the dogs their scarlet ribbons and their bells. The Royal Northwest Mounted Police in the Far North are using Indian dogs on their patrols. These are not bred in the posts of the police, but are purchased from the natives when young for a mere trifle, and trained by the Indian scouts and drivers of the force. The price for an ordinary husky in the Land of the Midnight Sun is about twenty-five dollars, and a recent police report tells that three dogs were sold for fifty dollars each. The police are using over 100 of these Indian dogs in their work in the North. The cost of keeping a team of four dogs is from $300 to $400 a year, and in some cases more than this. If it were not for Indian dogs in the Northland there would be little need of the police. Nearly all rows, we are told, are over dogs. Thompson, in his tales of his travels, tells of starting out on one occasion with Indians and dogs, when the snow was so deep that the huskies had to fairly swim and haul the heavy sleigh. One of the Indian drivers became vexed with the conduct of his lead dog and beat him to death. The incident delayed the expedition, and was almost the cause of bloodshed in the camp. The Indian was ordered out for mutinous behavior and handed over to the police. Many cases could be cited where shooting has followed scraps over the "huskie" dog.

The dogs of the red man were a source of great annoyance to travelers, and are yet. Palliser, a noted traveler, tells that one morning, starting from camp, his party saw an Indian dog that was a notorious thief actually poke his nose into a kettle as it was boiling on the fire and take out a piece of meat. The pests could not be kept out of the pallisades at the forts and trading posts, where the nuisance of their presence was almost beyond endurance. They were the terror of every woman and child after dark. One could hardly step from one door to another without being interrupted by them, and, worst of all, they made a kennel of the place and in wet weather the stench was unbearable. Henry, an old explorer, in an interesting account of how buffalo were captured in pounds, relates that here and there, among the branches and interwoven twigs of the buffalo fall, the Indians left openings large enough for dogs to pass through ,that they might feed on the carcasses of the bulls. He remarks that what appeared to him an extraordinary thing was that, when the signal of the approach of the buffalo was given, the dogs would skulk away to hiding till the herd was safely impounded. It was a feast time for the curs, and they had the good sense to stay away till the feast was ready.

It is roughly estimated that today there are from three to five dogs to every Indian family on Western reservations. They are in the main useless, but the Indian is not satisfied if he has not a half-dozen following him to the trading post where he does his buying and selling. Dog fights on the streets of the town are common. It has been found impossible to exclude them, and to shoot them is a costly undertaking for any municipality. And so the pest of the Indian dog is inflicted upon white neighbors of the reservations, and probably will be as long as there are Indians and Indian dogs.—Rev. W. McD. Tait, in "Sports Afield."

Drink Jackson's Napa Soda.

THE AMERICAN PIT BULL TERRIER.

Some truths have become established and generally recognized. One is that while money will buy the best automobile, it requires brains to breed and develop the best looking dog. In city parks or along fashionable boulevards a tip top dog nowadays attracts more attention than the most expensive automobile, and man or woman, whether on foot or in a car, has the satisfaction of knowing and feeling that in all the world there is not another dog just like his. It is this pride in possession, that exclusiveness, that has in the past made men want to own a good Bull Terrier, and until human nature changes there will be a demand for this kind of dog. Men who go away from home to their business and leave loved ones at home, can go with a light heart for they have something in the house that will lay down its life for them. Sundays we go out in the country to get a breath of good air and on the road we see a cosy, shady place. Whether we have a team or a car, we don't want to leave it for fear we would find everything gone. But if we have a good Pit Bull Terrier we can have a good time, for he will be on the job.

You need have no fear of losing your best robe and a lot of merchandise when out shopping if you have a good dog in your car. A Pit Bull Terrier is a thing worth his keep, and a good safe playmate for the little folks. He is your friend and your pocketbook is another. Don't forget it.

The following suggestion is by R. G. Shute in the Pacific Kennel Gazetteer:

"Owing to the increasing popularity of the Pit Bull Terrier for show purposes and as companions, beg to offer the following for the fanciers and general public, trusting to enlighten those who wish to know a noble dog. For some years they have been breeding to an accepted standard, and the specimens they are showing are as near to that standard as the majority of winners in other breeds, and more particularly so than some of the breeds of later origin. We claim a breed that will reproduce as to kind, and this fact is materially helped by some of them being able to register on their own breeding, i. e., the three necessary generations have been bred by them. The dogs being shown by them are easily recognized and can be fairly judged from the standard adopted and which reads as follows:

Head—Of medium length, skull flat, widest at ears. Prominent cheeks and forehead free from wrinkles.

Stop—Well defined. Indenture not too deep.

Muzzle—Square and wide as viewed from the front, presenting a round appearance as viewed from above. Underjaw strong and well defined.

Lips—To meet closely and evenly all around, not running too far back, with an entire absence of any lippiness.

Teeth—Strong, clean, sound, meeting evenly.

Nose—Black nostrils, wide and open.

Neck—Slightly arched, tapering from shoulders to head, free from any looseness of skin.

Shoulders—Strong, muscular, shoulder blades wide and sloping back.

Back—Short, strong and muscular, higher at withers than hips, slightly arched at loin, which should be well developed and slightly tucked.

Ribs—Well sprung, close together.

Chest—Deep from withers to brisket. Wide from front to back ribs. Not too broad as viewed facing the dog.

Tail—Of medium length in comparison to size, set in low, wide where it joins the body and tapering. Not to be carried over the back.

Legs—To have large round bone, and strong, straight (upward) upright pasterns, reasonably straight without semblance of bow.

Thighs — Long, muscle well developed. Hock straight, well let down, turning neither in nor out as viewed from behind.

Feet—Of moderate size, toes of medium length, well arched and close together. Pad strong and nails short.

Gait—Springy and active, without roll or pace.

Coat—Short, close, stiff to the touch and with fine gloss.

Color—Uniform, any color permissible, markings not objectionable.

Weight—Not important, preferably between 24 and 56 pounds.

Eyes—Round, black or hazel color. As seen from the front they should be situated low down in the skull, as far from the ears as possible, with corners in a line at right angles with stop, as wide apart as possible, to be within line of cheek as viewed from the front.

Ears—To be cropped (cropping not essential in puppies in show, as the texture of ear may not be right for cropping). Straight, of moderate length, held erect.

Some judges have tried to dope the breeding of this breed. At one show in the north the judge took them on the lines of an English Bull Terrier. The unfairness of this can be easily seen from the above standard. From a canvass of western fanciers of other breeds the large majority of them are in favor of recognition of this breed, as the breeders of the Pit Bull have stood their ground for a number of years and continued to breed and import with no encouragement from the majority of the Kennel Clubs. The Ladies' Kennel Association of Southern California, the Pasadena Kennel Club and the Bayside Kennel Club of Venice have given this breed their endorsement and hearty support for which the breeders of the Pit Bull are truly grateful, and trust the fancy will support their matches by making as large entries as possible. It is not denied that you see a vast difference of type in this breed at our shows, but no more so than in some other breeds, which is especially true of the English Bulldog, some of which you would scarcely recognize as belonging to that breed.

With the adoption of a recognized standard and consistent breeding we will soon have as distinct a type as any breed now shown.

A BIG TRAP SHOOT COMING OFF.

The proposed "Twentieth Anniversary Celebration" in honor of Mr. Fred Gilbert has proved one of the most popular moves ever advanced in trapshooting circles. From all sections of the country the DuPont Powder Company officials, who originated the idea and have it in charge, are receiving congratulations from individual shooters and gun clubs in a manner that is most gratifying to themselves, and to Mr. Gilbert.

Mr. Tom A. Marshall, captain of the famous team which back in 1901 invaded the British Isles and swept everything before them, returning to this country undefeated, writes that he is heartily in accord with this idea to thus honor his old team mate, and one of the men who was a mainstay on the invading team.

Mr. James C. Ludlum, president of the Baltimore Shooting Association, Baltimore, Md., where Mr. Gilbert made his initial bow to the shooting world, writes that he thinks his club, if any in the country, is entitled to hold a "Fred Gilbert Anniversary Shoot," and he makes application for one of the Fred Gilbert cups. Of course, it will be sent them. It will be remembered that the famous Capt. James R. Malone is connected with this organization, and the captain was one of Mr. Gilbert's competitors for premier honors twenty years ago. It is also worthy of note that the Baltimore Shooting Association is one of the oldest, if not the oldest, shooting organization in the country, having been organized in 1879, under the name of the Baltimore Gun Club, and in 1903 changed its name to the Baltimore Shooting Association. [The California Wing Club was organized in 1871.—Ed.]

Mr. Geo. F. Shea, manager, Billings Rod and Gun Club, Billings, Mont., on behalf of his club, makes application for the privilege of holding a "Fred Gilbert Anniversary Shoot."

Mr. J. E. Webster of St. Joseph, Mo., who started in the shooting game with Mr. Gilbert and has known him for a quarter of a century, is enthusiastic over the proposed manner of honoring his old friend, and says St. Louis will pull off a big "Fred Gilbert Shoot."

Mr. Louis Lautenslager, of the Herron Hill Gun Club, Pittsburgh, Pa., another club famous in trapshooting history, having been chartered in 1888, is anxious for information regarding the "Fred Gilbert Anniversary Shoots," as his club would like to assist in honoring Mr. Gilbert.

From Kansas City several prominent trapshooters have sent word through Mr. D. D. Cross that they consider this method of showing Mr. Gilbert his company's appreciation of his services and at the same time arranging matters so that Mr. Gilbert's friends throughout the country have an opportunity of taking part in the celebration is one of the most sportsmanlike demonstrations that could be furnished.

Many prominent sportsmen in North Dakota asked the DuPont representative in that State, Mr. J. E. Dickey, to convey to his company their best wishes for both the company and Mr. Gilbert, and to say that the move was entirely in keeping with the past record of both, and would not be forgotten by the sportsmen of America for many years.

From Clarksdale, Mass., Mr. J. H. Hooks, secretary of the Clarksdale Gun Club, writes that they are most anxious to assist in making the "Fred Gilbert Anniversary Shoot" a grand testimonial in honor of Iowa's foremost citizen.

Space does not permit of the publishing of but a few of the enthusiastic and appreciative responses that have been received, but judging by the number and character of the unsolicited communications in the hands of the DuPont Powder Company, the affair is crystallizing into one grand national celebration in honor of the most popular and best known figures the trapshooting game has ever known, Fred Gilbert, "The Wizard of Spirit Lake."

This great trapshooting event will be known as the "Fred Gilbert Twentieth Anniversary Celebration."

Some time during the month of March Mr. Gilbert will be entertained in Wilmington, Delaware, by the DuPont Powder Company. On the date appointed there will be a 100 target trapshooting event at the DuPont Trapshooting Club, to which will be invited every trapshooter desirous of attending. In the evening of this date a banquet will be arranged in honor of Mr. Gilbert who will be the guest of honor, and to which local trapshooters, members and officials of The Interstate Association and others will be invited.

It is not the intention to confine participation in the "Fred Gilbert Twentieth Anniversary Shoot" solely to those who find it convenient to visit Wilmington, Delaware, on the date the event is staged there. Every club throughout the country, especially those which Mr. Gilbert has visited and shot at during the last twenty years, are extended a special invitation to assist in making this the greatest celebration ever given in honor of a trapshooter, and in fact, ever known in the history of trapshooting.

In honor of the occasion the DuPont Powder Company has arranged with a prominent jewelry concern to manufacture a special trophy cup, one side of which portrays in relief Mr. Gilbert in shooting position, while the reverse is engraved "Fred Gilbert DuPont Twentieth Anniversary Shoot, 1895-1915," and these cups will be sent to all gun clubs applying for same and which will hold a "Fred Gilbert Shoot" during the week of March 13 to 20, both dates inclusive. Clubs applying for these cups must agree to hold a 100 target event on one day during this period, at which 10 or more shooters will compete, and the cup will be awarded on any plan agreeable to the club. The cup will be finally awarded at this shoot. Fully 500 clubs are expected to hold "Fred Gilbert Anniversary Shoots" and figuring on the most conservative basis of an average of 15 shooters at each club, it will mean that 7,500 shooters throughout the country will assist in doing honor to a man long known and loved by thousands as "The Wizard of Spirit Lake." A record of each shoot and all contestants will be kept, and it is hoped that some future historian when writing the story of Mr. Gilbert's connection with the trapshooting game which he has so long graced will find space to give a full account of the affair.

That trapshooters and gun clubs in general will approve of this move to render fitting tribute to one of the greatest figures in the trapshooting game goes without saying, and no doubt much keen and friendly rivalry will be developed by the contests for the anniversary cups.

Aside from the fact that this affair will give the DuPont Powder Company an opportunity of publicly expressing their appreciation of the long and faithful services of the dean of their shooting representatives, and his many, many friends throughout the country one more opportunity of shooting with him "in spirit if not in person," the "Fred Gilbert Twentieth Anniversary Shoot" should, from a publicity standpoint, do much for the grand old game of trapshooting, and secure for it from the daily press the recognition it has so long and so richly deserved.

TRAPSHOOTING AVERAGES FOR 1914.

Pittsburg, Pa., January 2, 1915.—Herewith is The Interstate Association's list of amateur and professional trapshooting averages for 1914, with names of contestants, total number of targets scored and percentages.

The averages for both amateurs and professionals are based on a minimum of 2,000 targets, as per The Interstate Association's ruling to that effect. The scores made at the tournament given at Fulton, Ky., August 7, are not included in the list, as the club holding said tournament failed to live up to its agreement covering registration.

The averages for double targets are computed on The Interstate Association tournaments only, and they are based on taking part in two tournaments as a minimum, as per The Interstate Association's ruling to that effect.

THE INTERSTATE ASSOCIATION,
E. REED SHANER, Secy.

PROPOSED FISH AND GAME LAW CHANGES.

The attention of the sportsmen of this State will soon be focused upon a varied and interesting assortment of measures affecting the present game laws. That is, provided the numerous proposed changes, amendments and new bills that are now incubating are hatched.

Among the mentioned changes to be submitted by the Fish and Game Commission will be the following: Instead of six game and fish districts in this State, there shall be only three, No. 1 embracing the Sierra and northern counties, No. 2 consisting of the coast counties from Mendocino down to San Luis Obispo, inclusive, and taking in also all of Kern county; No. 3 the southern counties now included in district 6. Taking into consideration the past complications arising over the difference in open and close seasons alone, the change seems to be an acceptable one.

The deer law changes advocated will be that shooting spike bucks be prohibited. Bucks with forked horns or more points only are to be legal quarry for the hunter. A spike buck or towhead at fifty or more yards distant cannot be distinguished from a doe by the sharpest pair of eyes. The protection of spike bucks may reduce the venison crop the first season the law would be operative, but there would naturally be a larger number of matured bucks and forked horns the following season.

The California State Fish, Game and Forest Protective League is out for the prohibition of any and all dogs in running deer during the open season. One dog only can be used by deer hunters under the present deer law. This latter change will be fought hard on both sides.

A reduced open season of from six weeks to two months will be urged—from August 15 to October 1 or 15 in district one, from August 1 to September 15 in district two or August only. For district three one month's open season is prescribed. For that matter, there is a strong sentiment in the lower part of the State to have a closed deer season for five years.

State game refuges will be advocated in another bill. Wild and remote sections throughout the State are to be selected where hunting will not be allowed. This will give furred and feathered wild game a chance to increase and replenish surrounding territory, it is claimed. Hunting of predatory animals in the game refuges will be allowed when permits are secured from the Fish and Game Commission. In Trinity county, for instance, there is a wintering ground for, it is estimated, 1000 deer.

A reduction of the daily quail limit of 140 birds a week to thirty or forty birds, and from twenty a day to fifteen, and only thirty quail to the individual hunter per week, also a reduction in the open season of four months to two months.

Duck hunters will fight proposed reductions of the daily twenty-five-bag limit and fifty a week allowance to fifteen or twenty birds per day and thirty or forty per week.

An effort will also be made for the protection of wild geese—twenty-five birds per day and fifty per week will be the bag limit suggestion.

It is intimated that a bill will be introduced which, if passed, will protect doves by placing a perpetual closed season on the birds. The claim is made that doves are of more economic value to the farmer and orchardist than as a means of sport for the hunter. The foregoing hints embrace the principal proposed game law changes that will be introduced.

Along with game law amendments the State statutes pertaining to fish and fishing will receive a combing over, through the medium of bills submitted for the purpose of changing and refurbishing the present laws.

A plan, fathered by the Fish and Game Commission, is to divide the coast tidal waters, the interior river and lake waters into numerous fishing districts. This proposed change concerns the net and market fishermen more than the rod and reel enthusiasts. The purpose of one proposed change will be to regulate the salmon river fishing industry by conforming the close and open seasons to the periodical run upstream of the fish in different coast streams.

For other fishing grounds, Humboldt, San Francisco, Monterey and San Diego bays, Catalina island, etc., there will be measures introduced to modify or relieve present claimed unsatisfactory conditions.

It will be a surprise to many to know that Salton sea will be made one of the proposed fish districts—if the bill goes through. Salton sea, it is asserted, will assay 20 per cent carp. Carp running from five to fifteen pounds are there by the ton.

Klamath and Eel rivers are figured on as separate fish districts, so are the Sacramento and San Joaquin rivers. The latter stream is in nearly all of the valley counties, closed to the operations of the net fishermen by ordinances of the county Boards of Supervisors.

The same may be said of the Salinas river and Elkhorn slough, into which the river empties.

The petition signed by the steelhead anglers, who desire the month of January kept open for hook and line operations in tide waters, it is intimated, has a good chance for passing. This will be acceptable news to the rodsters. The trout season in Coast streams opens at present April 1. There probably will be an amendment introduced putting back the opening day until April 15. The reason for this shift is that runs of big breeding steelhead generally continue until that date in our coast streams.

GOSSIP FOR SPORTSMEN.

The duck hunters who shoot in the salt marshes around the bay shores experienced somewhat of a slump during Sunday's devotion to the sport. A heavy rainstorm during the morning hours sent the birds scurrying away and made a stay in the shooting blinds uncomfortable. The same conditions somewhat applied when the mid-week contingent were out Wednesday. The wind and rain Tuesday night and Wednesday morning did not improve matters for the mid-week shooters.

Suisun duck hunting has not been of limit quality for a fortnight. At some of the resorts where ducks were numerous several weeks ago, but two or not more than half a dozen ducks was the tally this week. R. B. Murdoch shot a mixed bag at the Jacksnipe ponds. Tule Belle and Teal Club members out had only fair sport. At the Volante Club Sunday, eight ducks was the crop for that day. Too much water on the marsh and plenty of rain has caused the flocks of ducks to go to other resorts—down the San Joaquin valley probably. The Suisun club shooters on last Sunday were about half the usual number of visitors.

Captain A. W. Du Bray returned from a trip to Newman with a limit bunch of splendid plumaged and fat teal. Down farther at Gustine, West Side, Los Banos and thereabouts limit bags still hold good. The ducks, geese and snipe are there in big flocks. Nat Boas and other members of the Field and Tule Club were on the limit list last week.

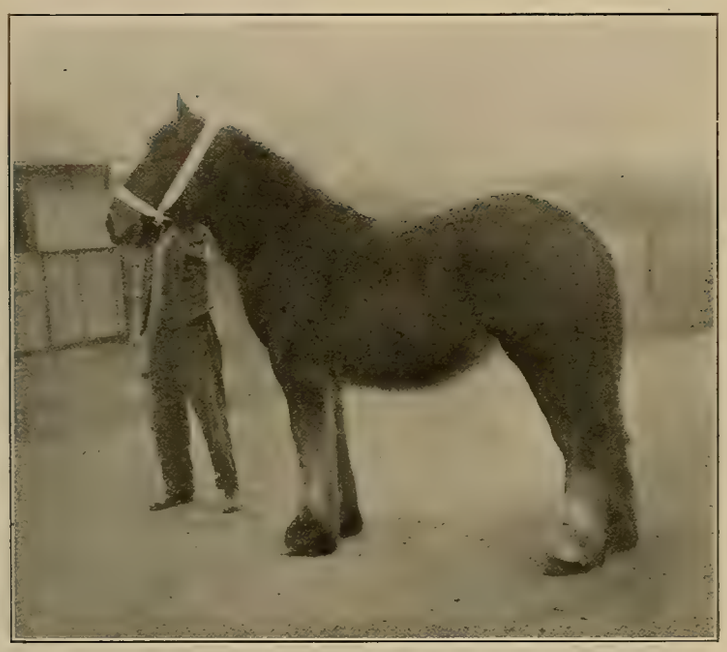
Canvasback and bluebill shooting at Pinole, San Pablo and along the east shores of San Pablo bay has been under the ban of the weather recently. W. W. Perry, Bert Underwood, Ole Olsen, W. Burns, Joe La Vezi, Dennis Landrigan and Eddie Smith returned from San Pablo a week ago with a very good showing of bluebille and canvasbacks.

Now and then, during recent days, good canvasback shooting could be enjoyed near Reclamation, on the Sonoma branch. Dr. Claude Angonnet and S. Largomarsino each bagged canvasback limits in that section a week ago. Near Black Point, Dr. Ogle and other gunners have had poor luck. Last Sunday ducks were few and far between, for the hunters out on the Petaluma marsh.

Fairly good bags have been shot by hunters who shot near Mt. Eden and Alvarado recently. In many parts of the Alameda marsh the ponds are too much flooded to afford good shooting now.

Down near Alviso, John Ferguson has found acceptable duck shooting. Canvasbacks have been very plentiful for several weeks past. Near the "drawbridges" the Sunday shoots brought out many gunners, shooting in the nearby sloughs and along the bay shore. A number of guns were bombarding the ducks that gathered on the Schilling pond and at the Eureka Club ponds. This kept birds moving from one place to another—many of the ducks stopped suddenly among the wooden decoys they were investigating.

J. T. Connelly, R. C. Haas, Chas. H. Kewell, Paul Burns, Chester Potter and Dr. Earl Pomeroy shot at the Arden Gun Club's preserve Wednesday. Spoonbills and a few sprig comprised the combined bag. Leigh Larzalere, Dr. J. C. Sylvester, Connelly, Kewell, Burns, Potter, J. Scott and Tony Korbell composed the shooting party at the club house last Sunday. The morning shoot was only fair and for a short time in the afternoon excellent. Coyote Gun Club members, shooting on the adjoining pond also bagged quite a number of spoonbills. The Swezig brothers shot out along the bay shore levees and sloughs and came in with 45 spooneys.



Scull boat operators off the Redwood shores have had all kinds of luck with the big flocks of canvasbacks that loaf in the southern end of the bay.

Near Elkhorn station, on private ponds, Chas. H. Meyer, W. F. Hillegass and John H. Meyer have for several weeks past killed many canvasbacks. Quite a number of English snipe were shot also on a nearby marsh patch.

FITTING DRAFT COLTS FOR SHOWS.

A correspondent writes that he has eight pure-bred Percheron weanlings, all of which, he thinks, are good enough to fit for the futurity shows of this season. He describes them as having been well fed on grain ever since they would eat—four stallions and four fillies, all foaled in May but one, and that one came June 5th. He ran them all together until about two weeks ago when he separated them by sexes, putting the four colts together in one lot and the four fillies in a much smaller lot. One gray youngster he describes as continually harassing the other three colts, jumping them and generally keeping them on the run perpetually so that he has got the others afraid of him. He wants to know how he shall proceed to get the best results and especially what he shall do with the rampageous rapscallion that gives the others no peace.

Here we have an instance of the victory which follows the employment of common sense in caring for pure-bred stock. While this statement is hardly germane to the question asked it is in order to state that our correspondent owns but ten pure-bred mares all told, one of them over 20 years of age, and yet he has eight weanlings to show for his foal crop of 1914. All of these mares but "Old Granny" work every day on the farm that there is work to do and it is seldom, save when enjoying the thirty days' holiday they get at foaling, that there is not some sort of labor for them to perform—hauling manure three abreast on the spreader, bringing stuff from town, getting posts and firewood out of the timber and so forth when there is no plowing or other tillage work on hand. They get a most liberal ration of oats and corn half and half while working, the amount being gauged according to the severity of the labor asked of them, and when there comes a spell when any of them must be idle they are turned into a lot and their grain cut down 75 per cent.

TYPE OF CALIFORNIA-BRED PURE BLOODED DRAFT COLT.

During hard work they get alfalfa and timothy hay half and half and when idle one good feed of alfalfa daily with all the fresh corn fodder they care to pick over until the blades are gone. Likewise their shed is always well bedded with fresh oat straw, of which they eat quite a bit when it is first scattered. Used in this fashion these mares come strong and hearty to their work in early spring, hold their flesh through that part of the season and are worked up to within about a week of the book dates on which they are due to foal, when they are relegated to the seclusion of the foaling lot and very little trouble is ever experienced with them at time of parturition. However, that is all by the way.

Starting with the stallions, the first thing to be done with these futurity prospects is to corral the crazy one by himself and so eliminate him as a source of possible danger. Being domineering by disposition he will keep on, if allowed to run with the others, becoming more and more of a nuisance until finally he does some real damage, and as long as he is left with the others he will be treading down and hurting their heels, besides bossing them around and bothering them too much. Take him up by himself, give him a good big lot to run in and plenty of shed room where he can see and play with the others through some sort of a strong though not tight fence. He will not lack for company then, but the chance for him to injure will be taken from him.

The first thing, when this has been attended to, is to put these youngsters on the barn floor and investigate their feet. With mallet and chisel and blacksmith's rasp put the feet in proper shape, removing any rags or projections, keeping the toes short and the ground contacting surface level. Attend to this every month, rounding off the edges of the wall so that the hoofs may not be splintered on the hard ground. This will be found a most important bit of work if the colts have not in their earlier youth been taught to submit to having their feet picked up one by one and examined. If they have not been taught to permit this without fussing, go at them regularly until each and every one will give up his feet as readily as any old horse. That will form a splendid foundation for the business of training for the show yard later on. In any case every colt should be taught to give up his feet without fuss or fury, so that it would be easy to dress the wound without terrifying the poor beast half to death in the struggle to get him where he might be handled with comfort. One never knows when a bad accident may happen to a colt and if he has been taught to stand quietly when his legs and feet are handled it will be a great blessing.

If the intention is to make these youngsters up for show, then each should have a feed box by itself and each should be tied up when feeding. Keep neatly fitting halters on their heads and at each box have a tie rope with a snap attached. When feeding time comes and the young things rush eagerly to their several places, let the feeder snap the tie ropes into the halter rings. Then each one will have to stay in its place until all the rest are through eating, and each one can have just exactly the amount and the kind of food that is best for it. It takes time and steps and bother to snap the weanlings to their places three times a day and more to go and turn them loose, but like everything else worth having there is work connected with it and that can't be helped. Give both bunches a well bedded, clean, dry, tight shelter in which to rest.

This owner has an abundant supply of the soundest, though not the heaviest oats and grand white corn, plenty of alfalfa and timothy hay and well cured corn stover, which is rather rank and strong. To begin with I would grind the grain for the weanlings. They have been getting about all the whole oats they would clean up so far, but I would gradually switch this feed, for awhile at least, change the ration of whole oats and corn, about a fifth of corn to start on. The corn must be added very gradually, but after a time it may be increased until in a couple of months they are eating about one-third corn and two-thirds oats, all ground. This with a generous ration of alfalfa and timothy hay half and half and some corn fodder will get out of them all the growth that is in them. The fodder should be placed before them daily in the forenoon and in the afternoon taken away to be worked over by the cattle.

All this is supposing the weanlings are healthy and eating well, not infested by worms and generally in proper shape. If any one of them is not right in health, find out what ails it and then go at it to fix it up. Avoid stock foods—that is, the proprietary articles that are advertised to do such wonders. If a horse young or old needs treatment, no shotgun prescription will cure all his ailments. If he is in perfect health he needs no dope of any kind. Carrots and sugar beets are splendid for all young horses, especially the former. If I were trying to fit such weanlings for the futurities of next season I would certainly try to get hold of some carrots, so that I might give each weanling a couple or three pounds each daily. There is something about the carrot that is especially grateful to the young equine system, keeping it cool and the digestive tract in the best of condition. I like a little linseed cake, pea-size, for young colts, but its use can be so easily overdone that I often hesitate to recommend it. Improvement in condition always follows the addition of linseed cake to the grain ration and sometimes the feeder, thinking that if a little is good more must be better, has gone ahead and put the kibosh on the whole game by feeding so much as to start the colts scouring and so putting them clean out of condition. If linseed cake is fed let it be the pea-size and give only a single handful with each ration.

How much grain, is the next question. That, no man can answer properly without living with the colts for a time and trying out their various capacities. Virtually they should at this stage of the game, have just about what they will clean up nicely without monkeying over it and come charging hungry to their boxes for the next feed. Regularity is a great aid in the conditioning of all animals for the show ring. I would give these colts their first feed at 6 o'clock in the morning as regularly as the clock struck, the second about 11:30 and the third about half past five in the evening. Let them have some of their hay in the morning, the corn stover in the forenoon and the remainder of the hay at night. Watch them carefully and see they don't waste the roughage. Weanlings are notional little rascals and will nose over a lot of fodder to get a particularly choice morsel. Feed them small quantities and often rather than a big lot at one time to be tossed about and trampled under foot.

Watch out for signs of worms. Keep salt in some well sheltered spot where they can reach it, but not rock salt. Only the man who does, or supervises, the feeding can tell when the ration is just right as to quantity. Eternal vigilance is the price of success. In these easy times on the farm this is none too early to begin giving these colts intended for the show ring their first lessons in deportment. Teach them anyway to walk and trot promptly and as proudly as may be right up alongside the leader. For this purpose take off the leather tie halter and substitute a white cotton rope halter such as is in general use in the arena. If it is gone at right, it will not be long before the young things get to enjoy doing a stunt at the trot right up alongside the leader and about as fast as they can go. Be careful, however, not to encourage too much effort at the start. This will make a fine beginning and later in the season the subject of getting these weanlings ready for the shows will be resumed.—J. H. S. Johnstone in Live Stock World.

THE COUNTY AGENT AND PROFITABLE AGRICULTURE.

The county agent is a part of a great agricultural movement. This movement has for its ultimate purpose the building up of a country life that shall be wholesome, attractive, cultured, efficient, and profitable. There are many sections of our country today that have one or more of these conditions, but the sections where all are found in happy unison are comparatively few. The desire of those who are thinking on rural problems is that rural communities everywhere shall be wholesome, attractive and cultured, and that each individual shall receive a fair reward for the labor done and the capital invested. The county agent has one dominant part in this program. While he may take other parts, his primary function is to help make agriculture efficient and profitable. In proportion as agriculture is made profitable will the community become attractive, cultured, and a place wholesome and desirable to live in.

Just what is meant by a profitable agriculture? Simply this: There shall be a reasonable return on the capital invested in farming and a reasonable return for the farmer's labor and managerial ability. A farmer, like any other man in any other business, is entitled to just what he earns and no more; but what he earns should be sufficient to give him and his family some of the more essential conveniences of modern life, time for study, some recreation, and opportunity for education for his children. With some money in his pocket the farmer will support the church, place conveniences in his house, magazines and literature on the sitting-room table, and send his children to the best schools with very little outside prompting.

YOLO HORSES MAKE GOOD IN NEW MEXICO.

Word was received in this city recently by Dr. D. F. Herspring of the phenomenal showing of two young horses, John J. Oliver and Don Rosine Jr., sired by Dr. Herspring's stallion, Don Rosine. These two horses are two-year-olds and were sold to C. W. Bowers of Davis by Dr. Herspring. Bowers took the horses to New Mexico and entered them in the several horse shows there.

Out of seven starts they took seven firsts and seven seconds, which is a world's record for two horses of the same age by the same sire. The New Mexico press lauded the horses and even went so far as to state that they were the finest pair of horses ever brought into the state.

The horses were sold by Mr. Bowers before he left the state for $1500 and $1000. Dr. Herspring feels proud of the horses as they are a product of his stables and have made a wonderful showing.—Mail of Woodland.

Jud Smith of Caldwell, Idaho, who had the hard luck to break a leg last fall and who landed at Pleasanton some time ago on crutches, has gotten along to where he can make out with only one peg for ordinary maneuvering, and is able to put in his appearance in the sulky for the daily work of May Davis and the youngsters of the stable.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects

READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

DON PRONTO 2:02¼,

eight years old, pacer, no straps, needs no boots; sound, not a blemish or a puff. Any amateur can drive him as well as a professional; has been in 2:02 with a 230 pound amateur up. This is a matter of record. Don Pronto is the cleverest all-round high class pacer in the country. Has held a world's record and is from the dam of Manrico (3) 2:07¼, a world's record holder. Is bred to be a great sire, being by THE DIRECTOR GENERAL (sire also of Wy-Drad 2:04¾, William O. 2:04¼, Mainsheet 2:05, Deuchester 2:07, etc., 8 in 2:10), and out of SILURIAN, that wonderful producing daughter of Wilton. Don Pronto was the biggest money winning free-for-all pacer in the west both in 1913 and 1914. Can surely beat his record. Is very beautiful, pleasant and a great favorite. **Price $1750.00.**

ALARICH 2:11¼ (Breeder's mark 2:09),

trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. **Price, $650.00.**

HELEN BELLE, 2 yr. old record 2:22½,

bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; obtained her record with very limited training, is being worked at present and improving right along. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Panama-Pacific $5,000 stake for three-year-olds; the Occident and Stanford stakes, the State Fair, P. C. T. H. B. A., Pleasanton and Oregon Futurities for 1915. **The best buy in California at $1750.00.**

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. **Price $1000.00.**

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. She has been up from pasture about six weeks and trialed this week in 2:53 very easily, last eighth in :20¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. **Take her at one-third her value, $500.00.**

OMAR,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). **A present at $350.00.**

CARLSCHEN (2) 2:23,

brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. **Price $800.00.**

BROWN COLT, (unnamed),

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. **Price $1500.00.**

JOHNNY DUGAN,
3-yr.-old record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. **A great buy at $350.00.**

WHITTIER,

bay gelding, trotter, five years old, trialed last year in May in 2:11, last half 1:04. Sired by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc.

Whittier is sound, good gaited, an exceptionally good headed trotter, and should beat 2:08 this year. He stands A-1 with the railbirds around Los Angeles—what more could be said when "That Bunch" all praise him? He is ready to begin fast work, having been jogged about six weeks. **Price $1000.00.**

CARINA,

bay filly, trotter, two years old, by CARLOKIN, dam ATHERINE (dam of Copa de Oro 1:59, Rags 2:09¼ and Nicola B. (2) 2:23¼, tr. 2:17, winner of the Oregon Futurity and second in the P. C. T. H. B. A. stakes for two-year-old trotters). Carina is entered and paid up in the same stakes as Carleta. She is a grand looking, well developed filly, showed a :40 gait at eleven months old. Is good gaited and good headed, is in training and promises to make a high class trotter. **Price $600.00.**

In addition to the ones mentioned I will offer to intending buyers RAGS 2:09¼, NICOLA B. 2:23¼, JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), a YEARLING BROTHER TO ESPERANZA 2:09, engaged in all of the Stakes, the phenomenal two-year-old pacer SANDY McNABB (staked), MISS QUEALY (full sister to Manrico), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

THE FARM

HEREFORD PRIZES AT SAN FRANCISCO.

Secretary R. J. Kinzer of the American Hereford Cattle Breeders' Association, Kansas City, Mo., announces that opportunity will be offered for Hereford exhibitors at the Panama-Pacific Exposition to win approximately $15,000 in cash prizes, in addition to medals, diplomas and commendations. Of this amount the exposition management offers $4,965, the American Hereford Cattle Breeders' Association$5,530, and the remainder will be paid by the various states in which the exhibitors live. The association offers $4,750 on breeding classes, $400 on purebred steers and heifers and $380 on grade steers and heifers. A unique feature of the apportionment of the Hereford association money is that the same amount will be awarded on each of the individual classes, and the same amount in the herd, produce and get-of-sire classes. In each of the twelve individual classes there will be ten prizes of $25 each. In each of the five herd and group classes there will be seven prizes of $50 each. Gold medals valued at $100 each will be awarded on all the championships in the breeding section. In the purebred and grade fat steer and heifer classes there will be four moneys of $15 each in each class, $25 on the champion purebred steer or heifer and three prizes of $25 each on purebred steer herds. The champion grade will win $20, and there will be three prizes offered by the exposition management on Herefords, $3,985 is offered on breeding classes, $450 on purebred steers and heifers, and $530 on grade steers and heifers. A number of the states from which the leading Hereford exhibits are expected have arranged to pay the freight on exhibits out of state funds. The cattle show at San Francisco opens on Oct. 18. The American Royal Live Stock Show at Kansas City will be held Oct. 4-9. It is expected that a large part of the exhibit of cattle of the beef breeds will be assembled at the American Royal, and at its close will go forward to San Francisco on special trains which have already been arranged for.

GRINDING GRAIN.

Where the farmer raises corn, as many of them are now doing on the Pacific coast, it is not considered an advantage to them to have their feed ground, when the extra cost of grinding is taken into consideration. Experimentation has shown that a gain of almost 6 per cent is in favor of grinding. This grain, however, is lost when the cost of grinding is taken into account. Experiments at the Iowa station have shown that in no case was there anything to be gained by grinding corn. In general, it was shown that corn needs no preparation, except possibly soaking shelled corn.

A saving of about 12 per cent can be made by grinding peas, wheat, rye, oats and barley. The general conclusion then is that it pays to grind small grain always, but not corn, except where it is desired to fatten pigs quickly on ground corn without regard to the expense of fattening. A hog grinder—that is, a machine for grinding grain or corn, where the motive power is supplied by the hog himself, is often recommended. One advantage it has is that of giving the hog excellent exercise.—Henry's Feeds and Feeding; bulletin No. 136, South Dakota state college of agriculture, and mechanic art, Brookings, South Dakota; bulletin No. 150, Maryland agricultural experiment station, College Park, Maryland.

For further information, address the University of California at Berkeley, or Western Meat Company at San Francisco.

A new use for the almost universal spineless cactus has been discovered in Los Angeles, where a poultryman has found it superior for chicken feed. Fowls are as fond of it as they are of green alfalfa and he states that it is much better for them.

THE HOME PASTEURIZATION OF MILK.

The anxiety manifested respecting danger to the human from the foot-and mouth disease is somewhat exaggerated. While the disease is very rarely serious in the human, it is considered of sufficient importance to warrant the U. S. Department of Agriculture issuing a special bulletin, advising the pasteurization of milk in districts where the disease is known to exist.

Because of this disease, and for other reasons, it is often advisable to pasteurize milk, and this may conveniently be done at home. The following directions will be found easy, requiring very little time, and will be effective:

Place a pie tin, with a few holes punched in it, bottom side up, in a pail, and on this set the bottle of milk. Punch a hole through the cap of the bottle and insert a thermometer which has the scale etched on the glass. Place the pail on the gas flame or stove and heat it until the thermometer registers 150 F. It shoud not be heated to more than 155 F. to avoid undesirable changes in the milk constituents.

The bottle is now removed from the water and after being covered with a cloth, is allowed to stand for 30 minutes. The milk should now be cooled as rapidly as possible by setting the bottle in cold water. After being cooled the milk should be kept at a low temperature until used. Milk will keep longer after it has been pasteurized, but the cream will not raise so quickly. Pasteurization does not kill all of the bacteria in milk and it should not be kept longer than other milk before using.—Geo. H. Glover, Colorado Agricultural College.

The American Beet Sugar Company is signing up contracts with growers at Chino for the coming season's crop, and it is stated that a very much larger acreage than ever will be planted this coming year. Beets are paid for on a graduated scale, according to their sugar contest, from $3.50 per ton for those going 11 per cent. and under, up to $7.50 for those going 25 per cent. If sugar sells at 4½ cents a pound in May, then a bonus of 50 cents per ton will be added.

Fresno is entering into keen competition with Spain in the preservation of grapes for winter use. The Algerian grapes packed in barrels have long been in favor, but it has been discovered that Emperors, packed in redwood sawdust, keep equally well and are far more attractive. The volume of these grapes so packed this season is far in excess of that of last year, the success of the past having given a strong impetus to the present.

HORSE OWNERS! USE

On Three-year-old Trotters and Pacers
Entered in

Pacific Breeders Futurity Stake No. 12—$7,250

—Given By The—

Pacific Coast Trotting Horse Breeders Association

For Foals of 1912 *TO TROT OR PACE AT TWO AND THREE-YEAR-OLD* **To Race 1915**

$4150 for Trotting Foals. $2900 for Pacing Foals. $600 to nominators of dams of winners and $400 to owners of stallions

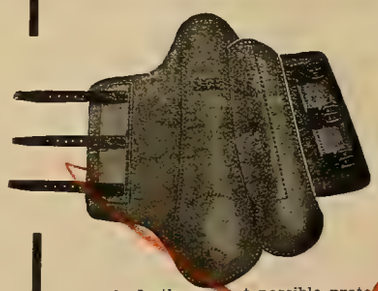
MONEY DIVIDED AS FOLLOWS:

$2500 for Three-Year-Old Trotters.
200 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Trot.
1250 for Two-Year-Old Trotters.
100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1500 for Three-Year-Old Pacers.
200 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.
1000 for Two-Year-Old Pacers.
100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$200 in Special Prizes was paid to Stallion Owners in December, 1911.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1911, when name, color, description of mare and stallion bred to must be given; $5 May 1, 1912; $5 October 1, 1912; $10 on Yearlings May 1, 1913; $10 on Two-Year-Olds February 1, 1914; $10 on Three-Year-Olds February 1, 1915.



STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

Over 300 Copies of

"Care and Training of Trotters"

Have Been Sold in Europe and Australia.

This is the book for you. It should be in your library. It is the first book on its subject in over 20 years. It was compiled by a competent staff from information furnished by almost all the leading American breeders and trainers of the day. It is a book of 112 pages, illustrated, bound in cloth, and will be sent you postpaid on receipt of $1.

Joseph M. McGraw, Washington, Pa., says: "Your book is the most instructive of its kind I have ever seen. It should have a large sale." If this book is instructive to a professional horseman like Joe McGraw, will it not interest you?

T. C. McBride, Sewickley, Pa., writes: "I wish to say a word of praise for the book. It was more than I expected. I see you have the secret of bookmaking. The paper and binding make it a joy forever, as well as a thing of beauty."

The Trotting World of London, England, says: "It is just the book we have been waiting for."

PARKER GUN VICTORIES 1914

Look, Read, Remember!!!

Following is a list of some of the most important victories won by contestants shooting the old Reliable

PARAMOUNT PARKER GUN

Modesto, Cal., May 6.—The California-Nevada Handicap. MR. TONY PRIOR.
Portland, Ore., July 22.—The Pacific Coast Handicap. MR. ED. O'BRIEN.
Dayton, Ohio, Sept. 8 to 11.—The National Championship of America at Singles; the National Championship of America at Doubles, and

THE GRAND AMERICAN HANDICAP,

by MR. WOOLFOLK HENDERSON, with greatest scores ever made in these events.
Dayton, Ohio, Sept. 8-11.—The Consolation Handicap, by MR. TONY PRIOR.
San Diego, Cal., May 12 to 14—MR. E. L. MITCHELL made highest professional average, 467x500.
Los Angeles, Cal., May 15-17.—Same man, same gun, highest over all 590x630.
Salt Lake City, Utah, May 28-30—MR. S. A. HUNTLEY with phenomenal score, 521x525, highest average; and at
Dayton, Ohio, Sept. 8-11—Mr. Huntley was high over all, scoring 565x600 at all distances.
At Phoenix, Ariz., MR. E. L. MITCHELL made highest average of tournament, scoring 509x520.

The Highest YEARLY AVERAGE Was Made By

MR. WOOLFOLK HENDERSON, scoring 1981x2050 targets—96.63%; and second by MR. SAM A. HUNTLEY, scoring 7548x7820 targets—96.52%.

Follow the pace set by the champions and winners, and for either single or double target shooting fall in line with the leaders, who use 34-inch barrel Long Toms.

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America.

Instructive booklet on small bore guns sent free on request.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

EQUIPMENT AND APPARATUS FOR EVERY NEED. PHOTOGRAPHIC SUPPLIES

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

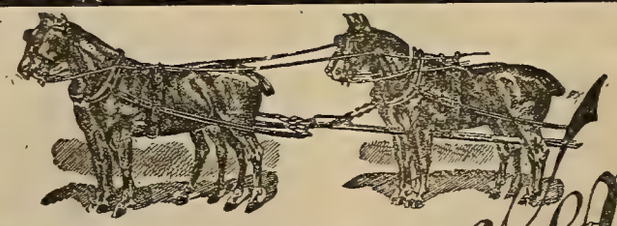
MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.



THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Price: Paper $1.00. Cloth $1.50. Sent Postpaid

THE DISTRICT FAIR BILL.

There is most urgent need and a constantly growing demand in California for the re-establishment of district fairs, and there has been a most generally expressed hope of favorable action on the part of the present legislative bodies and Governor Johnson in this matter. However, from former experience, we are not inclined to the belief that district fairs will come to us through Bill Number Thirty-four introduced by Assemblyman Judson. For the benefit of Mr. Judson and all friends of the bill we wish to state that our opinion is based not upon any objection we find to the bill itself, but upon conditions known to exist that allow little hope for its passing.

Two years ago, upon advice from "headquarters" that a bill providing for not more than seven or eight fairs would meet with approval at the hands of the Governor, a measure providing for seven fairs was drawn and submitted for his inspection. Our chief executive expressed himself as more than pleased with the proposed legislation, and the matter was duly introduced into the proper channels of legislative procedure. Therein it became the target for amendment after amendment, until when it once more appeared at the executive desk it provided for so many districts that the Governor refused to give it consideration. We learn from interested persons "close to the Governor" in social and political circles that he fosters the same ideas in regard to the re-establishment of fairs that were so distinctly manifested in 1913, and that, even should the present bill pass both branches of the legislature, there is practically no chance that he will append the signature that is necessary for it to become operative.

For this reason we say that Assembly Bill Number Thirty-four leads to the inspiration of no hope for the relief we are looking for and which is so urgently needed.

The bill, as it stands, is a measure that would work a great good in California. The districts are well balanced and the appropriations, while not excessive, are of a sum sufficient to enable the giving of fairs where they are now not possible. State aid to the aggregate extent of $70,000 is proposed, divided evenly for the years of 1915 and 1916, and the districts as submitted and the sums in each case allotted, and also some of the more salient provisions of the bill, are as follows:

District No. 1.—Counties of San Francisco, Napa, Solano, Marin, Sonoma, Lake, Mendocino, $4000.

District No. 2.—Counties of Humboldt, Trinity and Del Norte, $1500.

District No. 3.—Counties of Siskiyou, Shasta, Tehama, Glenn, Butte, Yuba, Sutter, Colusa, Yolo, Nevada, Placer, El Dodaro, $3000.

District No. 4.—Counties of Alameda, Contra Costa, Santa Clara, San Mateo, $4000.

District No. 5.—Counties of Amador, Calaveras, San Joaquin, Tuolumne, Sacramento and Stanislaus, $4000.

District No. 6.—County of Los Angeles (no appropriation requested).

District No. 7.—Counties of Monterey, San Benito, Santa Cruz, San Luis Obispo, Santa Barbara, Ventura, $3000.

District No. 8.—Counties of Kern, Tulare, Kings, $3000.

Distrist No. 9.—Counties of Fresno, Madera, Merced, Mariposa, $4000.

District No. 10.—Counties of San Bernardino, Riverside, Orange, $4000.

District No. 11.—County of San Diego, $2000.

District No. 12.—County of Imperial, $1000.

District No. 13.—Counties of Mono, Inyo and Alpine, $750.

District No. 14.—Counties of Modoc, Lassen, Plumas and Sierra, $750.

Sec. 2. For the purpose of holding fairs, expositions or exhibitions of all of the industries and industrial enterprises, resources and products of every kind or nature of the district for which they are appointed, or of the state, with a view of improving, exploiting, encouraging and stimulating the same, there shall be a board of directors for each of such agricultural districts, consisting of one member from each county within the district, to be appointed by the governor of the State of California, but no district shall contain less than eight directors. In such districts as are composed of less than eight counties, one director at least shall be chosen from each county constituting the district. No person shall be appointed to the office of such director unless he is a citizen of the State of California and is actively engaged in agricultural, mining, manufacturing or stock raising pursuits within the district from which he may be appointed.

Sec. 5. .. .. .. They must provide for an annual fair, exposition or exhibition by the association of all industries and products in the district or state at such time as they by majority vote may determine upon, and at the place in each of their districts, respectively, which may be selected, chosen or designated as hereinafter provided; provided, that the state shall in no event be liable for any premiums offered or awards made or on account of any contract made by any district board of agriculture or agricultural association; provided, further, that any such agricultural association having a speedway or race course upon any lands owned or leased by it under its control, shall maintain the same for the purpose of holding speed contests and training and speeding horses thereon. All moneys received or collected by said board for admission fees, or by way of gifts or donations shall be under the sole control and possession of said board and shall be expended under its direction.

Sec. 6. The legislature shall, at each session hereafter provide in the general appropriation bill, or otherwise, for the maintenance and support of the agricultural districts created by this act.

Sec. 8. No sum appropriated by the state for aid to the district agricultural associations herein provided for and created or for any of them, shall be used for the payment of purses or premiums for speed contests, but shall be used exclusively for the payment of premiums upon bona fide exhibits of agricultural, horticultural, or mining or forestry products, and for the payment of premiums upon exhibits of domestic live stock, except as hereinafter provided in section thirteen of this act.

Sec. 11. It is further provided that no sum appropriated by the state in aid of the district agricultural associations herein provided for, or for any of them, shall be available or can be obtained or collected by any such association in any case where betting or gambling of any kind is allowed upon the grounds or premises controlled or used by said association, nor shall any intoxicating malt, vinous or spirituous liquors be permitted to be sold upon any grounds used by or occupied or under the control of any district agricultural association created hereby and receiving aid or support from the State of California.

Sec. 13. Each board of directors herein provided for, together with the members hereof, shall serve without pay, but each board shall be allowed its reasonable expenses, including the traveling expenses of the members thereof; and for advertising, printing, salaries and general office expenses of the board of directors, secretary and treasurer; provided, that the total of such allowance for all purposes does not exceed twenty per cent of the annual appropriation to any one such board.

In the light of former experience, and of recent conversation with persons competent to speak authoritatively on this matter, we would suggest that the real friends of the district fair bill amend it to provide for seven fairs in the years of 1915 and 1916, or that such a bill be drawn and introduced in place of the present one. We know that this is a difficult matter owing to the fact that every senator and assemblyman is hell-bent on a district fair for his home town or county, which is a manifest impossibility for the approximate future.

District fairs, under existing conditions, are not to be re-established with a whoop and a hurrah on a widespread scale. They must come back in moderate original numbers, and these events must be made in each and every case an unqualified success—every governing board must work in harmony and honesty with but one end in view, the perpetuation of a state-aided fair in that district. A successful seven means a future spread until the day will eventually come to hand when every community that can and will support a fair will have its own.

The time is most propitious in 1915 for the successful re-establishment of these local expositions. Attendance will be swelled from the ranks of countless pleasure seeking visitors. We have the natural resources for wonderful exhibits in agricultural and industrial departments, and the horses for the speed contests which draw the crowds to the grandstand for the greater portion of each day. The opportunity presented is too good to be allowed to pass profitlessly owing to individual selfishness, and we urge every stockman, farmer, and horseman to get in touch with his assemblyman and senator and request support for a measure that will mean ultimately the most good for the most people—which means a measure providing for not more than seven or eight fairs.

We would like to have the fourteen, don't mistake us on that point, but the stand we take is that it is better to take what we can get than to want what we cannot get, and so do without, utterly. Think it over—and act on our suggestion.

—o—

WITH EASTERN AND NORTHWESTERN CIRCUITS already organized, in many instances, numerous meetings of circuit secretaries scheduled for the immediate future and very many individual dates claimed, it behooves California folks to get together and make up their minds as to what they are going to do in 1915, the year of our continuous "one big time." The stables at our winter training grounds are already pretty well filled, and newcomers at the various tracks are being announced pretty regularly, so there is no shortage of horses to fill classes straight through a good circuit. Moreover, we are in receipt of several inquiries from eastern horsemen who plan to come out for the exposition races, as to what other events of a similar nature California expects to stage between the big meetings, inquiries that imply that, given some other racing opportunities, some of these visitors would remain here during the entire season. Should the present legislature and the Governor provide district fairs the situation would be greatly simplified, as each one of these would rely on harness racing for the attraction of a goodly portion of their attendance, but as this matter is purely conjectural it will be well for the various independent associations that have been giving fairs and race meetings on their own responsibility to go ahead with their usual plans. The exposition cannot entertain all our people all the year, or provide all the entertainment sought by our visitors, as the great majority of them will pay their visit not merely to San Francisco, but to the state at large. We urge that this matter be given prompt and careful consideration and that we be advised of all action as soon as it is taken, "for or against," so that we may be able to give inquirers some definite information.

—o—

LAST MINUTE NEWS reached us, just as our last forms were almost ready for the press, of the death on January 18, at Fullerton, of the old trotter and speed sire George W. McKinney 2:14½, whose get include a very recent world's champion and many other good ones. The old fellow got down in his stall at the establishment of his owner, Dr. B. C. McKlintock, and was so far gone when found in the morning that he was shot in order to end his suffering. Time and space forbid more than this mere mention of his passing, but more fitting attention will be paid his memory in our following issue.

—o—

THE EARLY BIRD is generally accredited with the advantage of being able to "pick his pickings" from a wider range of choice tidbits than are presented to the late comer to the feast, and the application of the adage, in other but similar wording, stands good in many other lines. With stallion owners already reporting bookings to their horses for the breeding season of 1915, the realization is borne home to us that that time of the year is perilously near at hand, and that the time for stallion announcements is already with us.

—o—

DO NOT FORGET

That Will Durfee offers the pick of his stable for sale at earning power prices;

That other patrons of our business pages will sell speed siring stallions, race prospects, trusty campaigners, the boss matinee pacer of the coast, and other good ones;

That you should see or write your assemblyman, senator and Governor Johnson in regard to district fairs;

That a ten dollar payment is due February first on three-year-old trotters and pacers entered in Breeders Futurity No. Twelve, for foals of 1912 to race this year;

That stallion advertising time has rolled around;

That California is going to have a "big year" this year, and

That a jitney bus will get you if you don't watch out!

San Francisco Driving Club

Tuesday evening's meeting of the San Francisco Driving Club at the rooms of the Mission Promotion Association was well attended and proved a very enjoyable affair. Three new members were admitted, as a good way for starting proceedings, and it was decided that for the future a board of directors, composed of five members, have charge of the general affairs of the organization.

The choosing of officers for the coming year was the principal event of the evening, the entries at the date of closing a week previously having been of a sufficiently generous nature for the secretary to declare all classes filled, and after a bit of warming up a pretty fair field of free-legged ones faced Starter Jimmie Ryan for the word. Troubles unexpectedly developed about this time, as W. J. Kenney, entered in the second vice-presidency stakes, declared his inability to make the race, and the judges allowed the stable to name a substitute, Adolph Ottinger being chosen to carry the wise money in that class. With "Ot" on his good behavior the bunch got away fast on the first score, and every entry won hands down. Nobody seemed inclined to take advantage of the no-record rule, and Clerk of the Course Jimmy McGrath "bracketed" the following winners: George Giannini, president; Jack Welch, first vice-president; Adolph Ottinger, second vice-president; James McGrath, third vice-president; Fred Lauterwasser, Jr., secretary; Fred Lauterwasser, Sr., treasurer; William Malough, sergeant-at-arms; R. Consani, J. Tassi, Fred Clotere, Henry Campodonico and Harold Cohn, board of stewards.

Nominations for the directors handicap were next in order, and the class was declared filled with five entries, most of them with win-race records in previous events held by the club, which made classification easy and guaranteed a well balanced field. They came into the stretch well bunched and couldn't be separated at the wire, so the judges clapped a directorate record on each one of the following: J. J. Ryan, A. Ottinger, John Newland, Will Kenney and J. Holland.

The club had for some time been in possession of the six cups pictured herewith, and awards were made of the same to the six leading horses of the season of 1914. For every race started in during the twelve meetings of the summer a horse received one point; for every win, three additional points; for every second, two points, and for every third, one point. The cup committee had carefully drawn up the season's summary on this system, and the following horses, with their owners, were awarded the cups: Happy Dentist (J. J. Ryan) 24½, Delilah (Jack Welch) 22½, Birdeye (A. Combatalade) 21½, Emma M. (W. Malough) 21½, Ishmael (Fred Lauterwasser) 21, Silver Hunter (Tom Ryan) 21. The awards were popular and the trophies were appropriate and handsome, and are highly valued as gifts of the following friends of the club: Mr. A. B. Spreckels, the Fairmount Hotel, the Palace Hotel, the Hamburg-American Line, Shreve, Treat & Eachret, and the Pacific Navigation Company. Happy Dentist, whose performances won for his owner the first choice of cups, is an ideal matinee horse and holds the coast matinee record of 2:06¼, 2:06¾, made at Sacramento. A number of whips, the gift of the Indoor Yacht Club and unawarded at a previous occasion, were also distributed among their winners.

The club's appreciation of the publicity accorded its affairs by the local press was shown by the bestowal of honorary membership upon the sporting editors of the Chronicle, Examiner, and this publication, and a vote of thanks was tendered the outgoing officers, who have labored long and tirelessly for the advancement of the club's welfare. At this point Mr. Ottinger again claimed the floor, and in a few warm and friendly phrases, generously backed by those in attendance, presented to Mr. Ryan on behalf of the club an appropriate remembrance in the shape of a diamond horseshoe scarf pin. "Ot" brought down the house by reference early in his remarks to "the gentleman we call Mr. Ryan, but whom I call Chimmie." Three cheers and a tiger greeted Jimmy as he rose to make a neat little speech of acceptance ,and the newly elected president, George Giannini, was accorded an equally hearty welcome. Impromptu talks were made by several of those present, welcome refreshments were served, and when the meeting broke up well along towards midnight, there was a most prevalent impression that the San Francisco Driving Club had entered upon the most enjoyable and successful year of its history. Already the boys are strengthening their stables, and when the bell rings at the Stadium on the first good Sunday in May they will be prepared to put up even an improvement on the kind of racing that has made the Golden Gate park track one of San Francisco's most popular Sunday afternoon gathering places.

The event of the winter in local circles of horse lovers will be the charity horse show, which is to be held the middle of next month at the Riding and Driving School at the Park.

TROPHIES AWARDED THE SIX LEADING WINNERS OF 1914

WATERING OF HORSES.

[By Ira Barker Dalziel, D. V.D.]

One of the greatest wrongs which we are committing on the animal world today is, I believe, the shameful manner in which horses, not only in San Francisco, but all over this country, are deprived, through negligence and lack of knowledge, of the amount of water which their nature demands and which is necessary to their good health.

Few of us have experienced the terrible agony of thirst, but we have heard of the fearful suffering endured by travelers in the desert when deprived of water, and we know that without it man can live but a few hours. So horrible is this form of suffering that man has taken ample precautions against it by providing himself with an abundant supply of water wherever he makes his abode.

Water is just as important to the horse as to man. Perhaps more so, for the horse has a smaller stomach in comparison to his size than any other animal. He is fed principally hay and grain—food with a very low percentage of moisture—and his anatomy is so constructed that he perspires freely and over a large area of his body. By reason of the work which is required of the horse, the average animal is constantly in a sweaty condition, even if the moisture is not visible on his coat. The amount of moisture consumed and thrown off in a day by a horse when working would seem incredible to the average person.

Unquestionably the horse is a noble animal and man's best friend, for whom he works faithfully, untiringly—in exchange for—what?

What he should get is plenty of pure water, good feed, a dry, comfortable stable, and his coat nicely cleaned daily. If so treated, his owner will be well paid, for he will do his work with much more ease and greater willingness and do more of it, with the result that the driver, as well as the horse, will be better contented and better off in every way.

The writer believes that very few horses receive the amount of water which they require. Water is just as important to a horse as feed. The oftener a horse is watered, the better it is for him. If he is given water often, he will never drink to excess. A horse not working, and standing in the stable, should be given water at least three times a day; when working, the rule should be: small quanaities and often.

The writer contends if a horse is properly watered, he will carry 100 to 150 pounds additional weight with the same amount of feed. He will be in better condition to perform his work, will live longer and be less likely to have indigestion and stomach trouble.

When a horse is working, I would say to water him, first in the morning before feeding. Then offer him water one or two hours after feeding, and again before his noon meal. Allow him an opportunity to drink occasionally during the afternoon and give him a small quantity of water when he reaches the stable at night, after which give him his feed of hay and grain. Two or three hours after he has finished his evening meal, probably between ten and eleven o'clock, give the animal all the water he cares to drink.

The last watering at night and the first in the morning, I consider the most important of all, and yet it is the time that the least number of horses are watered.

The conditions I observe in hundred of stables are that the horses come into the stable at 5:00 or 5:30 in the evening wet with perspiration and tired. They are hungry and anxious to get to their stalls to eat. The result is when they are sent to the trough to drink they take a few hurried swallows of water and pass on to their stalls, where hay is waiting. After eating their dry feed their system reasserts its demand for water and they are compelled to endure the agony of thirst throughout the night. In the morning they are fed again before they leave their stalls, and cannot enjoy their food on account of their great thirst. When they are finally allowed water they gulp down such a great quantity of it that their digestive organs become bloated, their food is not properly assimilated, and they cannot work at their best.

Good authorities state that animal tissue is composed of 75 per cent water, and water therefore is one of the most important elements necessary in the upkeep of the body. Anyone who will stop to think of the great amount of evaporation constantly going on in the body of a healthy horse will readily see the necessity of giving him plenty of water.

While the fact that the horse has a small stomach which soon empties, shows the necessity of watering him often, I think the humane societies could well take for their slogan: "Water your horse often," and if they succeeded only in remedying the great evil of insufficient watering, they would have accomplished a great good.

Anyone who doubts the correctness of these statements needs only to offer his horse water after feeding at night to see him drink and relish it. I will guarantee that any horse owner who will try the plan I have outlined for one month will see a marked improvement in the condition of his horses.

L. V. HARKNESS DIES IN CALIFORNIA

Lamon Vernon Harkness, third vice-president of the Standard Oil Company and second largest stockholder in that concern, extensive western land holder and as owner of the Walnut Hall Farm foremost among breeders of the American trotter, died Sunday morning about five o'clock at Paicines Rancho in San Benito county, the California home of his daughter, Mrs. A. King Macomber. Death was caused by diabetes and cirrhosis of the liver whose ravages have extended over a considerable period, and was not unexpected. Mr. Harkness had been in California this trip about six weeks, having made the visit on the advice of his physicians, who thought that life perhaps might be prolonged in this climate. Mr. and Mrs. A. King Macomber were with him at the end, and his other surviving children, Mrs. O. M. Edwards of Pittsburg and Harry Harkness of New York, made the trip across the continent to accompany the body on its journey to its last resting place in the family mausoleum in New York city.

Mr. Harkness was an associate of John D. Rockefeller in the organization of the Standard Oil Company and was said to be one of the largest individual taxpayers in the west. His ranch and realty holdings were of great extent, and though possessed of a magnificent home on Fifth avenue in New York, the greater portion of the time of both himself and his family was spent either in Kentucky or farther west. He was a member of the New York Yacht Club and an ardent lover of that sport, but it is as a breeder of trotters that his name has been carried highest in public esteem.

Always an admirer of the American light harness horse, and enriched to a fabulous figure by the golden flood that followed the firm establishment of the Standard Oil Company, Mr. Harkness, well along in the '90's and already owner of a goodly number of high class horses, set about the establishment of the greatest contemporary speed nursery in America, Walnut Hall Farm. Located some six or seven miles

om Lexington on the Newtown Pike, its six thou-
nd acres of farm land and rolling blue grass pas-
ures presented unrivaled natural facilities for the
reeding of horses, and no artificial improvement
hat would add to the beauty and efficiency of the
lant was left unmade. It seems almost futile to
omment upon the success attending the venture, as
or over fifteen years the farm has not for an instant
een out of the limelight that follows great achieve-
ients.

Many patrons of the various sales of recent years
o which the farm has been a consignor of youngsters
hat have commented on the chances taken in "pick-
ng 'em" among the babies, fail to recall the facts
hat in his selection of foundation stock Mr. Hark-
ess "went 'em one better." In the case of both
Moko and Walnut Hall (foaled in 1893 and 1898 re-
pectively) the subsequent great sires were bred by
ther parties but foaled the property of Mr. Hark-
ess. That these two individuals should have
chieved such a great success makes the significance
f the incidents more pronounced.

Moko obtained his first performer in 1899, when
is two-year-old daughter Fereno won the trotting
ivision of the Kentucky Futurity for her age, and
o son of Baron Wilkes has done so much to estab-
ish the nickname of the house so generally applied—
the futurity family." The get of no other one horse
ave figured more prominently in the great colt
lassics of the trotting turf. Nearly a hundred and
wenty-five of his get have achieved standard rec-
rds; his list of performers includes Brenda Yorke
3) 2:08¾, (5) 2:04¼, Fereno (2) 2:17, (2) 2:10¾,
5) 2:05½, Tenara 2:05¾, Native Belle (2) 2:07¾,
3) 2:06½, Manrico (3) 2:07¼, Virginia Barnette (3)
:08¼, Silver Silk (4) 2:08½, Brighton 2:08¾, Susie
. (3) 2:09¼, Adbell M. (3) 2:09¾, Gomoko 2:10,
obel (3) 2:10¼, Siliko (3) 2:11¼, Leftwich (3)
:12, Chesko (3) 2:19¼, etc., etc., and his daughters
ave produced in addition to the world's champion
rotting stallion The Harvester 2:01, the great four-
ear-olds Martha Tipton 2:09¼ and Vito 2:09½, and
nany others.

Walnut Hall, foaled a year later than Fereno,
aved the way for a great future in the stud by a
rilliant performance as a race horse. As a two-
ear-old he followed in the footsteps of Fereno by
inning the two-year-old trotting division of the Ken-
ucky Futurity, though in considerably slower time,
nd as a three-year-old took second money in that
ivision of the same classic. As a four-year-old
e broke into the charmed circle with a bit to spare,
nd in his five-year-old form (his last year as a cam-
aigner) he raced to his present record of 2:08¼
n a winning performance at Memphis. In 1905 ap-
eared his first performer, Noma (2) 2:19, who proved
er sire's ability to transmit his characteristics by
inning the two-year-old division of the American
Horse Breeder Futurity.

It was Mr. Harkness' belief that the Moko-Walnut
Hall cross could scarcely fail to produce speed of a
ost convincing nature, carrying, as it would, direct
rosses to fountain heads of trotting speed through
Baron Wilkes, Mambrino Patchen, Strathmore,
Volunteer, Electioneer, Mohawk Chief, Red Wilkes,
Almont, etc. Pursuant to this conviction, Walnut
Hall, in the year following his permanent retirement
o the stud, was allowed to serve, among others, the
hen five-year-old daughter of Moko, Notelet, whose
dam was Tablet by Cuyler. The result of this union
vas more than convincing evidence of the soundness
f Mr. Harkness' theory, for the brown baby that
oddled about the blue grass pastures at the flank of
he young matron was The Harvester, sold as a
ialter broken yearling for $9,000 at public auction,
vinner as a three-year-old of the Kentucky, Horse
Review and Stock Farm Futurities and present hold-
r of the trotting stallion crown and other world's
ecords. Other daughters of Moko to the cover of
Walnut Hall have produced O'Neill 2:07¼, Martha
Tipton 2:09¼ and others.

Ozono, foaled in 1902, by Moko and out of Ozama
(dam of the Transylvania winner Ozanna 2:07, etc.)
by Director, was kept in service at the farm for a
ime as a probable successor to his sire, but though
he sired among others the good three-year-old pacer
Tilly Tipton 2:09¼, (4) 2:06¼ (1914) and the trotter
Homestake 2:08½ (both records taken after he had
passed from the ownership of Mr. Harkness) he
failed to come up to the required standard and was
sold to J. M. Kilbourn, El Reno, Okla.

California's interest in the great establishment
founded by Mr. Harkness was heightened in 1910,
when San Francisco was chosen as the stud mate for
Moko and Walnut Hall, as the most promising horse
of the country with whom to mate daughters of the
Farm's premiers. San Francisco, who was bred by
Peter W. Hodges and is a son of Zombro 2:11 and
Oniska by Nutwood Wilkes 2:16½, first attracted
public attention in the summer of 1908 at Readville,
when he finished third in his maiden race, the fam-
ous $50,000 American Derby, second money being
generally conceded to have been wrested from him
by the wizardry of Myron McHenry as a driver rather
than the superiority of Prince C. as a trotter. Later
in the same year he raced to a record of 2:07¾ in a
winning race at Columbus. The following season he
forced Uhlan to trot in 2:03¾ to beat him at Cleve-
land in the 2:07 class, being separately timed in
2:04½, and later in the same week, far from being
tuned up for such an effort, he pulled Ed Geers a
mile in :33¼, 1:04, 1:35, 2:04¾, starting against
hope to beat the stallion record of 2:02¼ then held
by Cresceus. Now the sire of fifteen two- and three-
year-old performers, only one a pacer, San Francisco
occupies a commanding position as a speed progen-
itor and at the two most recent sales to which the
farm was a consignor, his get have outsold those of
either of his stud companions.

By the purchase of Manrico (3) 2:07¼ in the fall
of 1912 as the most worthy youngster in the land to
succeed his sire, Moko, when the latter's day of use-
fulness should have passed, the bond between the
Blue Grass and the Golden State was further cement-
ed, as the laddie was bred by a Californian, Mr. E. T.
Barnette of Los Angeles, and trained and driven by
our native son wizard of the reins, William G. Dur-
fee. Moreover, the race which led to Manrico's pur-
chase stands alone among the notable summaries of
the various events of the series of the Kentucky clas-
sics in some important features. Most notable of
these, perhaps, is that the winner trotted the fastest
mile of the race in the last time out, wherein he
secured his present record and established a new
mark for a sixth heat in a race by a trotter, 2:07¼,
a record which stands today. That Manrico will
achieve the success expected of him as a sire is a
most prevalent belief, as he has everything in his
favor, both "within" and "without."

As Walnut Hall Farm had established itself as the
model of its kind of the world and one of the great
show places of the Blue Grass, so is the younger
project on the Golden Slope, Paicines Rancho, rapidly
forging to the occupancy of a unique position among
its kind. Established but a few years, the thousands
of acres of fertile valley and rugged mountain had
won themselves high place in the heart of Mr. Hark-
ness and his family, who in the three years just
gone by have spent much time within their boun-
daries. A great irrigation system has been put in
operation, landscape gardening indulged in, orchards
developed, and feed raised and pasturage provided
for the bands of horses and cattle that find it home,
while the hacienda, an echo of the old days of the
Spanish occupation, was completed but a year ago
and is of an extent and luxury of furnishing un-
dreamed of by the vanished Dons. The trotter has
never been extensively developed at Paicines, which
is under the active management of Dr. H. J. Ma-
comber, though the standard stallion Dictatus Me-
dium is in service there, but the French Draft horse
and registered cattle, of both beef and dairy breeds,
are present in abundance and the highest degree of
excellence.

Walnut Hall has been long "in the making," and
its fame has spread throughout the world; under the
able management of Superintendent Burgoyne the
work may go on with success and profit even though
the master be gone forever and a day, and that it
may be inestimably longer "in the breaking" is the
fervent wish of every lover of the trotter.

LIVE STOCK ON NATIONAL FORESTS.

Authorization has been secured from the Secretary
of Agriculture to graze on the National Forests of
California for the season of 1915, 212,280 cattle and
horses, 505,750 sheep and goats, and 7,950 swine.
Compared with the grazing season of 1914, these
numbers constitute a net increase of 3,530 cattle and
horses, 460 sheep and goats, and 325 swine. During
the year approximately 835,000 acres, which support-
ed 5,000 cattle and horses, 18,300 sheep and goats, and
1,000 swine under National Forest permits, were
eliminated from the forests. This, considered in
connection with the above authorization for 1915,
makes a favorable showing in carrying capacity,
since it means an increase of 11,230 cattle and horses,
18,760 sheep and goats, and 1,325 swine on the areas
retained.

The National Forests are accommodating more live
stock each year as better methods of handling are
brought about and new and unutilized areas are
brought into use through trail construction, water
development, and other means.

Alonzo McDonald's Stable

ROBERT A. SMITH, Correspondent

California's charm as well as its golden metal has
been the incentive, since the days of the forty-
niners, of many of its invasions by the wide-awake
easterners. Since the official announcement, in the
early part of 1913, of the programs of harness races
to be given in connection with the Panama-Pacific
Exposition, on its specially constructed mile track at
San Francisco the coming season, at which a quarter
of a million dollars will be distributed to the horse-
men, California horsedom has been on the "qui vive."
As the periods of the various "payments" in the big
stakes elapsed, the lists were eagerly scanned for the
names of sensational grand circuit performers, some
of which are already in our midst in the stable of
"Lon" McDonald of Indianapolis, Ind., who has been
a "headliner" in the Grand Circuit for many years.
At the conclusion of the Grand Circuit last fall, at
Lexington, Lon earned winter oats and shipping ex-
penses at Dallas and Phoenix, subsequently shipping
to Exposition Park, Los Angeles, where he is now
"hibernating" with eleven head. These he will pre-
pare for their engagements at the 'Frisco meeting,
in June. The McDonald stable would, of course, be
lonely and incomplete without "Ed" Avery, who has
been its very efficient, conscientious and courteous
assistant trainer for over ten years.

In the trotting division is the seven year old brown
gelding McCloskey 2:06¼ by Theodosius, dam by
Odd Socks. This fellow was a contender in the
M. and M. last year, won a heat in 2:06¼ at Kalama-
zoo, Mich., and in ten starts in the Grand Circuit
won upward of $10,000. As he has no win-race rec-
ord he is eligible to the green classes and will be
entered in a couple of races at the "Fair."

Star Winter 2:05 is a bay gelding by Ed Winter
2:12¾, dam Elsie B. E. by Conquest Star, son of
Nelson 2:09. Star Winter is an "income bearer," as
after winning over $20,000 in 1913 he declared a
similar annual dividend in 1914, earnings obtained by
annexing seven stakes, winning his first five stakes
in the Grand Circuit without suffering the loss of a
single heat, listed himself in the 2:05 class, in the
third heat at Cleveland, when he defeated the top-
heavy favorite Lulu Lumine 2:09¼, and later forced
the sensational Etawah to go in 2:03½ to outbid him
on the Lexington Exchange. He will be entered in
the free-for-all trot at the Exposition and is owned
by Mr. W. M. G. Snell of New Bedford, Mass.

The Duchess 2:07¼ is a roan mare by Allerteen,
son of Allerton 2:09¼. This mare won in the begin-
ning of the season at Cleveland in 2:08¾, raced well
"along the line," and wound up the year by defeating
a good field at Phoenix, Ariz., where she was tagged
with a win-race record of 2:07¼. She will be en-
tered in the $5,000 stake for the 2:08 class trotters
at the Panama-Pacific June meeting.

Laramie Lad, record 2:20 (half-mile track), mat-
inee record 2:12 to wagon, and breeder's record
2:09¾, is a bay gelding by Master Bo, by Oronteo, a
son of Electioneer, dam by Oronteo. This "lad" was
shipped to "Lon" at Indianapolis April 1st last year
by the enthusiastic Colorado horseman, Geo. N.
Black of Denver. During the season of 1913 this
gelding raced to a half-mile track record of 2:20, and
drew a wagon a mile in 2:12 at one of the matinees
of the Denver Driving Club. While in "Lon's" prep-
aration of the horse, he was purchased by Mr.
"Stote" Fletcher, the wealthy banker of Indianapolis,
Ind., who was also the owner of the lamented Squan-
tum (3) 2:11¼, and has been carried along, educa-
tionally. At the Kalamazoo meeting "Lon" worked
him a comfortable mile in 2:06. After a careful
"prep" he also will probably be raced in a couple of
stakes at the bay city.

Hallmark 2:11¼ is a five-year-old bay stallion by
Walnut Hall 2:08¼, dam Hallie Simmons by Sim-
mons. As a three-year-old, in the Western Horseman
Futurity, Hallmark beat Etawah 2:03½ a heat in
2:11¼, winning second money, while later at Lexing-
ton he trotted a heat in 2:08¾ in the stallion stake.
Last year as a four-year-old he was worked only
moderately, with the intention of staking him in his
maturer form. This is the entry of the McDonald
stable in the $20,000 trot in June at the "Big Show."

Adbell M. (3) 2:11¼, breeder's record 2:09¾, is
a brown horse, sired by Moko, dam Miss Adbell
2:09¾. This young horse topped the summary in
the $2,000 stake for three-year-old trotters at Pitts-
burg, beating a good field and getting a record of
2:11¼. It is a rather peculiar coincidence that by
acquiring a breeder's record of 2:09¾, he tied the
record of his illustrious mother who, it will be re-
called, won the Kentucky Futurity by defeating the
sensational filly Susie N., in 1905. Mr. W. B. Wil-
liams of Boston, Mass., a patron of Mr. McDonald
for many years, is the owner of this splendid colt.

Baron Todd 2:11¼ is a brown horse by Todd
2:14¾, dam Baroness Rosalind by Baron Wilkes.
This horse has been raced a little, has a record of
2:11¼ and looks like better than a 2:10 trotter. He
is also owned by Mr. Snell of New Bedford, Mass.

The pacers of the stable include Margot Hal
2:04¼, bay mare by Argot Hal 2:07¼, dam Mary C.
(dam of Kruger 2:04) by Tennessee Wilkes. Margot
Hal won six races in the Grand Circuit in 1913, but
"got off" early in the season of last year, and was
laid over for the "big doings" at San Francisco.

Hedgewood Patchen, chestnut gelding by Hedge-
wood Boy 2:01, dam by Patchen Boy 2:10½, who is
already well known on the coast as he was brought
out by Dick Wilson, is a pacer of much promise; has
not been hurried in his training, has a mile in 2:07½
to his credit and is owned by Mr. Fletcher of Indian-
apolis.

Miss Harris M. is a bay filly, three years old, by
Peter the Great 2:07¼, dam Mary Allen Stout by
Ondale. This filly has been raised in the McDonald
kindergarten, since a weanling, and will be gotten
ready to race this year in five Futurities in the
Grand Circuit.

His Nibs is a bay horse by Cochato, dam Ade Lar-
abie by Larabie 2:12. His Nibs was bred and is
owned by the well known lumberman, Mr. Alexander
Maclaren of Buckingham, P. Q., who owned Larabie.
This young horse has had very little schooling but
is a sure-enough trotter.

NOTES and NEWS

A number of mares have already been booked to Robert Bingen 2:11¼ and Prince Ansel (2) 2:20½.

◈ ◈ ◈

The Horse Review Racing Guide for 1914 is out and is well worth every cent asked for it, and a little bit more, for the occasional use of the average horseman.

◈ ◈ ◈

Al Schwartz will probably move his string of horses either to San Jose or Pleasanton about February 15th, as he has too many to handle conveniently at his present location.

◈ ◈ ◈

Fred Haight is teaming T. W. Barstow's old top pacer Highfly 2:04¼, now thirteen years old, in the ice races across the border and getting his share of the money. The old boy reeled off one half-mile at Winnipeg in 1:02¼.

◈ ◈ ◈

Jim Creck has sent to Trainer Matt Zahner at the San Jose track the three-year-old filly by Guy Carlton 2:30, out of the full sister to the trotter Our Jack 2:13¼, by Steinway, dam Inex by Sweepstakes.

◈ ◈ ◈

A. W. Morris of Woodland, whose fame as a successful Holstein-Friesian breeder is practically world wide, is in the east on a visit to his former home and various of the great dairy and Holstein-Friesian farms.

◈ ◈ ◈

At a meeting of the K. T. H. B. A. at Lexington Tuesday the renewal of the Kentucky Futurity was announced. The estimated value of the event is $21,000, apportioned between two- and three-year-old trotters and three-year-old pacers.

◈ ◈ ◈

A number of California horsemen are at Bakersfield for the big events in coast dogdom, the field trials. John W. Considine, Frank Ruhstaller, Charley DeRyder and C. Christenson all had entries in the major events, and nary one of 'em wore hobbles.

◈ ◈ ◈

W. F. Whittier is spending several days down in the Hemet Valley country, combining business with pleasure—the former consists of looking after some of the improvements under way in connection with the irrigation project, and the latter in visiting with the horses at Hemet Stock Farm.

◈ ◈ ◈

Jimmy Ryan, who received a diamond horseshoe pin from the San Francisco Driving Club members Tuesday evening, now has enough trinkets of this particular description to shoe a pony sized pacer all around. He still has a "flat wheel" from his spill of last summer, but that will not interfere with his riding some fast miles when the fun season starts.

◈ ◈ ◈

William Cecil, the colored driver who was for years head trainer at the establishment of the late Martin Carter, is located at the San Jose track with a couple of stake prospects owned by H. G. Angevine of San Jose. One is the three-year-old filly Loma Logan by Prince McKinney (2) 2:29¼, out of Berta Logan by Bert Logan 2:16, and the other is the two-year-old colt Jake Logan, out of the same mare to the cover of Nearest McKinney 2:13¼.

◈ ◈ ◈

Peter Volo (3) 2:03¼, now at Poughkeepsie in Tommy Murphy's hands, will be allowed a limited number of mares this season at a fee of five hundred dollars, and will then be fitted for a try for the stallion record, now held by The Harvester 2:01. From his past performances it would be no great surprise to see him break into the list of two-minute trotters, which would then have a representation from all three classifications—mare, gelding, and stallion.

◈ ◈ ◈

Mr. and Mrs. A. B. Coxe of Paoli, Pennsylvania, arrived here early in the week for another winter visit in California, their objective point being Coronado. They made the trip over the northern routes, visiting International 1:55 Farm at Savage, and stopping at Spokane and Portland. San Francisco claimed their time for a few days, and a visit to Pleasanton was made before the journey south was resumed. Hard luck to Peter Thompson (3) 2:07½ puts Mr. Coxe where he has no candidate for the exposition stakes and classes, as everything in training at the farm at home this winter belongs to the youngster class.

◈ ◈ ◈

Two visitors to San Francisco during the week were Secretary C. W. Paine of the State Agricultural Society and Henry Helman of Salinas. Rumor has it that the genial secretary returned home minus three pounds of excess flesh, lost in the activities pursuant to the successful dodging of the endless chain of jitney busses on Market street, a strenuous exercise for which he was less fitted than his lengthy friend from down country. Henry has been dispensing with caretaker service lately and doing his own cooling out, etc., so that he is hard as nails. Moreover he has another advantage over the Sacramentan, as he can edge in between two passing cars in about the same space required for a lamp post or a telephone pole, while the leeway required for safe clearance in Charley's case is—well, a little more. Just a little, and then some!

Ben Walker, who is wintering at the San Jose track, has three good sidewheelers in his stable at present: Kinneysham 2:13¼, by Stanford McKinney and out of the great matron Cora Wickersham by Junio 2:22; Mountain Dee (3) 2:24½, by Charley D. 2:06¼—Mountain Maiden (dam of Tom Carneal 2:08¼, etc.) by Cresco, and the green pacer Inyo Boy by Oseto 2:13½, son of McKinney 2:11¼. The latter pair are newcomers to Ben's stable and at present are scheduled for jogging only, but both have shown well in former work and Ben will get all out of 'em that is in 'em.

◈ ◈ ◈

The special carrying the remains of the late L. V. Harkness started on the eastward journey for New York Wednesday afternoon at four o'clock and is scheduled to reach its destination Sunday at noon. The equipment consisted of a private coach, a sleeper, diner, and funeral car, and the members of the party on board include Mr. and Mrs. A. King Macomber of Paicines Rancho, Mrs. O. E. Edwards of Pittsburg, and Harry S. Harkness of New York.

◈ ◈ ◈

Rumors that Clara Mac was for sale led us to seek information at headquarters, and Mr. Considine confirms the report that the daughter of Expressive Mac is on the market providing anyone wants her at what she is worth. She was purchased with the express intention of pointing her for the big 2:06 pace at the exposition, and had such keen competition been expected at Sacramento she would never have been a starter in the race that retired her from that class. She has demonstrated Grand Circuit calibre, and as Mr. Considine does not believe that the opportunities offered for racing her in 1915 in California exclusively are sufficiently extensive, and he does not care to maintain two campaigning stables at this time, therefore he has come to the conclusion that some "big line" owner will find her much more profitable than will he himself.

◈ ◈ ◈

John W. Considine of Seattle, San Francisco, New York and a number of other places handy to hail from has just been at Woodland, watching the way the youngsters are coming along. Incidentally there will be a lot more youngsters around the place pretty pronto, as Superintendent Dowling reports that present indications are for at least an eighty per cent foal crop and that the incubator is "settin' " on a batch of four hundred eggs. This also indicates something else—that a certain turf scribe whose name need not be mentioned will have important business to transact at Woodland Stock Farm about the time fryers are ripe, very important business. Harry reports all the horses on the place in excellent shape, and Clara Mac is getting her winter exercise in a way she is well accustomed to—to pole, with Lottie Ansel for her mate. They take the road all the way, and the boss claims the greatest pair of pole pacers in the state in the shape of a couple of Prince Ansel mares. What the latter are he failed to say, but we have a hunch that they are the full sisters Josie Ansel and Princess Josie, as those two would certainly make a great team.

◈ ◈ ◈

A friend at the front breaks it to us gently that the neutrality of the winter training grounds at the Woodland Stock Farm has been "Belgiumed" clear off the map and that the "armed camp" appearance of Europe is rapidly stamping itself upon the environs of the Yolo county speed nursery. The way of the opening of hostilities was thusly: On the evening of Monday of this week General Hi Hogoboom drew up his cavalry just inside the gate to the historic battlefield where so many good race horses have fit an' bled an' died for their country (and a share of the money), and announced in tones that all might hear that he had almost spent the entire first money in this year's three-year-old pacing division of the Breeders' Futurity, having the same already won with Little Express, who headed the summary of the two-year-old division at Salinas, stating further that the only reason he hadn't spent all the money was because (evidently the confounded censors found something here that the rules of civilized warfare prohibit passing through the lines, as the reason has been eliminated. Anyway, any married man knows that "because" is a good and valid reason for a whole raft of important things, and we let it go at that.) At this moment Admiral Elmo Montgomery, occupying the bridge of a land going record destroyer of the improved Effie Logan type, returned from a patrol of the adjacent highways and loosed a broadside to the effect that he was now right "on the inside" with the torpedo boat Bondalean, which was almost retired from the engagement at Salinas on account of damage to the port propeller from a stray shot, but which harassed the enemy considerably at a not-too-distant range. A second charge was loosed upon the surprised adherents of Her Equine Majesty Little Express by the proclamation by Admiral Jay Eee that all her rights, titles, vested interests, etc., in the three-year-old division money were abrogated, forfeited, etc., by the past performance of his princeling. When our correspondent sought refuge in flight the conflict was growing faster and faster and title to much more than the mere stake money hung in jeopardy, much more. The belligerents are each determined to strip the other to the hide, and the spoils of the victor promise to include several acres of Yolo land, an automobile, a short horn bull, a "pole an' chiny" sow about to pig, numerous colts and fillies and three settin's of eggs. What a holocaust, my countrymen — especially if the old sow should happen to farrow in the midst of "them eggs"!

A letter from Hunter Moody at Lexington speaks glowingly of the Woodland youngsters, all the get of Prince Ansel, that arrived safely at his quarters early this month. They are of an extremely uniform type, and Moody believes from their actions in harness that they are the making of a great bunch of trotters. Johnny Ray's horses went in the same shipment, which was in charge of George Dumage, and the farm sent two of its choice matrons at the same time to be bred to Suldine (1) 2:24¾, Mr. Considine's great young son of Worthy McKinney and Carrietta, which Dumage reports to be a fine type of a trotter and a show horse as well. Oniska, dam of San Francisco 2:07¾, was one of the pair, and the other was Rosemint, dam of Arista Ansel (2) 2:18¼, etc.

HOMER MACK SETS ICE RECORD.

California horses do not get much experience racing over the ice in their native haunts, but several have gone to the colder countries and delivered the goods in pretty fair shape over the routes where the sharp calks are necessary if the wigglers would refrain from "doing the split" that used to be so popular on the variety stage. The latest one to achieve high success is Homer Mac, who has been a pretty regular winner across the line on the midwinter circuit, and whose three heats over the half-mile track at Toronto in 2:14¼, 2:14¼ and 2:14 constitute the world's record for that kind of going. In another race on the same course he approached within a quarter second of the heat record with a mile in 2:13½, so neither event was a false alarm.

Homer Mac, now seven years old and apparently never better, was bred by Dr. C. Edgar Smith of Los Angeles and is by Petigru 2:10½, out of Eagletta 2:11½ by Ketchum 2:16¼, second dam Lady Mac by McKinney 2:11¼. He began his racing career as a four-year-old and obtained his present record that season at Phoenix after a campaign over the tracks of the northwest and western Canada, having been a profitable horse over the Dominion tracks ever since. He passed as a youngster to the ownership of J. W. McClain of Monarch, Alberta, and has been raced by Jim Stewart, who is still doing the teaming.

HENRY HELMAN'S WINTER STABLE.

Henry Helman, who winters at home at the Salinas track and campaigns in the northwest, is jogging four head of "go getters" at present and breaking some youngsters, so that he manages to keep fairly busy most of the days except Sunday, when he only puts in double time. Mack Fitzsimmons2:13½ heads the trotters and is a good one at that way of going for Bob Fizsimmons, whose get include the fast northwestern pacer Ovieda 2:05 that was a good winner last season. Mack is owned by B. F. Jagger of Portland and carries two developed dam direct traces, his dam being Jennie Mack 2:18¼ by High Noon, second dam Little M. 2:22 by Wildbrino. Boniola (2) 2:25¼, owned by George W. Newbill of Ballston, Ore., took her mark over the half-mile track at Eugene, and Henry thinks her the best yet of the Bonadays, the blood of the son of Bon Voyage being backed by successive maternal crosses to McKinney, Direct and Steinway, with more good sound blood behind that.

The other trotter of the quartet is the two-year-old Ben Bond by The Bondsman, whose dam is Silver Haw (dam of Helen Stiles 2:06¼, a world's record holder, etc.) by Silver Bow, sire also of the dam of Hymettus 2:07, etc. This lad, who is the property of Shreves & Jagger of Portland, is a likely looking trotter and is staked both here on the coast and in the eastern classics, and while Henry hasn't found out much about him yet he is being put in shape to "answer the question" well in advance of his engagements.

The Senator has a right good pacer in the five-year-old black horse Prince Zolock, whose record of 2:16¼ was taken as a three-year-old in the stake for that age and gait at the Oregon State Fair at Salem. He was bred and is still owned by H. A. Gardner of Walla Walla, and is a son of Zolock 2:05¼ (the famous race horse and speed siring son of McKinney recently exported to Europe) and out of Princess Direct by Teddy A., a son of Diablo 2:09¼, second dam Lady Mack by Direct 2:05½. This lad stayed in the money consistently last year, and gave indication of what may reasonably be expected of him in the future in the mixed class at North Yakima in which Dean Swift 2:08 took his record, his standing in that event being 2-2-2 and the time 2:08¼, 2:08, 2:09¼.

In addition to these Henry is breaking three youngsters by his own stallion Alconda Jay, by Jay Bird, two of them out of McKinney mares and the other out of Ivoneer 2:27 (dam of North Star 2:11¼) by Eugeneer, second dam Salinas Belle (dam of Dictatress 2:09¾, etc.) by Vermont; all of them have license by breeding to develop into profitable campaigners.

The barns at Salinas are in nice shape and excellent repair, the track is well kept, and a number of local horsemen are coming out from town for easy winter jogging, while a bit later a few of them will probably locate at the grounds and begin manufacturing a bit of speed. The rains have put a good season in the ground, and farmers—including the lengthy trainer—are awaiting the let-up to do quite a bit of farming.

THE THIRTY-SIXTH AVENUE STABLES.

The fun track at the Stadium where the weekly matinees of the driving clubs are staged during the season, does not become deserted even in mid-winter, as there are a number of horses being jogged over it daily and kept in shape for the opening of the matinee season and the coming of the professional events later on. Both the McKinney Stables and the Prak Amateur Stables are fairly convenoval, and the boys are beginning jogging a little stiffer or longer and will soon be making some real speed.

Al Schwartz, at the McKinney Stables, has the largest bunch of any of the boys at this season, and his patrons plan for indulging in both classes of the sport—for fun and for keeps. J. J. Ryan has two in Al's hands, the old reliable king pin matinee pacer of the coast, Happy Dentist, looking good for countless more scraps in harness, and the trotter St. Patrick 2:11½, purchased at the DeRyder sale. This lad is stout and husky, has a good set of legs under him, and ought to be good in his class in either end of the game. Figuring that the Irish trotter and the green pacer he has in Jack Villar's stable at San Jose will be about all he needs for this season to get cash and cups with, Jimmy has put Happy on the market, and somobody will pick up a mighty fine fun horse in this son of Nutwood Wilkes.

For F. Gommet, Schwartz is handling the five-year-old Baby Gommet and her sire Prince McKinney. The Baby is a good going thing out of Arawanna B. by Dexter Prince and worked last year in 2:12, so she looks to be a good new one for her sire. Incidentally Prince McKinney got a pretty fair starter for his list last season in the pacing mare Sweet Princess 2:13¼, and his representation for 1915 ought to get a pretty good boost.

Adolph Ottinger's horses, Zulu Belle 2:06¼, Dick W. 2:06¼, Copper the Ore 2:10¼, all of whom are

HAPPY DENTIST OUTFOOTING SENATOR H. AND TEDDY BEAR AT THE STADIUM

too familiar to race goers and matinee attendants here on the coast to need any introduction, are all wintering nicely and looking good for the beginning of their work. The Belle holds the Stadium race record and in his new trotter Agnes Carter (2) 2:20 (a daughter of Nutwood Wilkes and Excella by Monbells 2:23½, second dam the great brood mare Expressive 2:12½) Mr. Ottinger is confident that he has one of the best mares he has ever owned. She was rough haired and fresh from pasture when he purchased her but her quality "showed through" very distinctly, and now that she is clipped she appears to much better advantage. She is most excellent as an individual and has previously shown her trotting qualities.

Hamburg Belle 2:12¼, J. Ginocchio's speedy sidewheeler that was a big card in the faster pacing classes at the Stadium last year, is as fit as a fiddle and has all her speed right on tap. She is getting quite a bit of winter exercise to pole with William Tell, and the pair make a great fun team, good mannered, fearless, and ready to brush at a two-ten clip whenever you ask it. The auto drivers turn to look as this team goes by.

Al has several of his own that look good and have been carefully carried along with the intention of racing this year. The four-year-old chestnut stallion Ray Alto by Iran Alto—Lorenzo Girl by Monterey is a fine cut of a trotter, with lots of compactly assembled power and fine finish; that he has the speed there is is attested by three-year-old workouts in 2:25. Soreta, the daughter of San Francisco 2:07¾ and out of Burnside (sister to Bodaker's dam, etc.) by Jay Bird, has trotted in 2:14 and got some racing experience last year in the matinees. Jerry D. by Sidney Howard, dam by McKinney, has paced in 2:10, and at the right of the entrance to the establishment are the quarters of the stable favorite, William Tell. This lad is only a four-year-old, and worked last season in 2:11; he has the manners of an old campaigner and his friends are looking for things from him. His sire is Welcome Wilkes and his dam a daughter of Nutwood Wilkes 2:16½.

With this many horses to handle, Al finds the distance between stable and track a bit inconvenient, and plans to take his string either to Pleasanton or San Jose some time in the fore part of February.

* * *

Joe Vermet has stable room here for the youngster that raced in a few matinees last season under the name of Cookie. He is now but a three-year-old, with two-year-old work in 2:26 to his credit, and is a racy looking lad from whom Joe is deriving a good deal of daily pleasure. He is a full brother to Maurice S. 2:06, the King S. pacer with which Dick Wilson made such a good campaign a few seasons back, and looks at this time to be the making of an equally good one.

* * *

Hugh Boyle has a likely pair of pacers in the same stable, one of which he hails as the fastest thing in the house and then goes on to prove it. This lass is a six-year-old chestnut mare named Edith Light by Searchlight 2:03¼, out of Edith 2:10 by Dexter Prince, and before Hugh got her she had paced in 2:11, with a half in 1:00 and a quarter in :28½. She had a physical peculiarity that interfered with her successful handling for speed, but she has been bred once, produced a foal, and the detrimental characteristic has disappeared. She is a nice turned thing, good headed and well behaved, and she goes to the races this year. Hugh's other sidewheeler is Zorankin, with a standard record as a trotter as a two-year-old, and this little gentleman is delivering a big money's worth in pleasure for the hundred dollar bill invested in him. Mrs. Boyle drives Zo in as fast company as she meets with on the road, then rides him for a change. Hugh could have cashed this fellow not long after his purchase, but the "better half" of the firm has declared "no price" on Zorankin. Mel Keefer claimed him to be a perfect fun horse, and to date the Boyles are in full accord with that claim.

* * *

Up at the barn on the hill from the park Hans Frellson is wintering a couple of the Stadium king pins, the pacer Pointer Belle 2:17½ by Star Pointer 1:59¼, belonging to Kidd & Luce, and the Ahlers trotter Matawan 2:13¼, who was a bit too much for most of the fun trotters. Both ought to be as good or better than ever for 1915, and S. Christenson's gelding Brutus is again giving all the promise of becoming a great horse. The most recent addition to Hans' string is the four-year-old colt Silkworthy, by Morgan Axworthy 2:17, out of Clear Silk 2:20¼ by Prodigal 2:16, purchased at the DeRyder sale by Mr. Christenson for the account of Dr. Wilson Anderson of this city. He is one of the handsomest little fellows imaginable, richly colored and most symmetrically put together, and has a very nice way of going, all that was being asked of him in the past being a half in 1:11 and a quarter in :34.

* * *

F. E. Burton is wintering quite a bunch of the "regulars" and a number of new comers, topped by Harold Cohn's good pacer Vera Hal 2:05, "fat as fat," newly ironed off and just beginning her jogging for the spring "prep." It was originally the intention to breed her to Jim Logan 2:01¾ this year, and the resultant foal ought to go some by all theories of breeding, but the owner can't make up his mind to say good-by to her racing days, as she is as sweet a matinee pacer as they make 'em, and is not outclassed on professional tracks. She is a daughter of Expressive Mac, sire of Clara Mac 2:04½, etc., but is bred quite differently on her dam's side from the Considine star. Muggins, the trotter that Harold likes to drive from way behind and beat 'em at the wire, looks pretty fit, as does also Ben Cohn's mare Ateka 2:19¾, whose matinee mark is several seconds faster.

Kinney Lou Jr., by Kinney Lou, dam by Boodle, showed lots of speed in his colt form and Burton was banking on him for this season, but some hard luck from bumping in the stall has put him on the shelf for the immediate future. Farewell, the five-year-old son of Bon Voyage owned by Jno. Hecker, matineed at the trot last year in 2:20 and looks better for 1915, and another one of last year's performers at the Stadium that ought to do better than repeat this season is Peaches by Aptos Wilkes, out of a Dexter Prince mare, that paced in 2:18 as a four-year-old for Billy Clough. Frank also has the trotting mare Liberty H. by Guy McKinney, out of a daughter of Nutwood Wilkes, that has shown fair trotting speed, and he is especially pleased with the youngster knocked down to Ben Cohn at DeRyder's sale, Bonquin by Quintell 2:12¼, out of Lily Young by McKinney. He showed a mile in 2:27 before being turned out as a two-year-old, and though coming to Frank a bit thin he is doing well and acts like a youngster with trotting ambitions.

President Dan Hoffman of the California Driving Club has his 1915 hopefuls in Burton's care, Monica McKinney 2:11¼ and Jonesie Mac. Monica, whom her friends will insist on hailing as "Yellow Mary," is a right good lady in her class, and the other member of the pair is bred and built to be a better one. He is by Carlokin 2:07½, one of the best sires in the west, and out of Walda by Waldstein, second dam Rosa by Guy Wilkes, etc. He is a very pleasing individual, though not large, with quite a little reminder of his sire in his general makeup. He is O. K. as to racing qualifications from both blood and physical standpoints, and Dan is very hopeful concerning his future. He worked the Pleasanton track as a three-year-old in 2:20, so he has the Carlokin characteristics, all right.

A CLASH OF MASTER MINDS.

[Written for the Breeder and Sportsman.]

A year or two after the late L. V. Harkness had gone extensively into breeding, or, to be exact, in the spring of 1898, he visited the splendidly equipped farm near Wayne, Illinois, owned by Mark W. Dunham. The man of many millions, for he was rated at twenty times the six figures, even at that time, brought along his secretary and his check book, as some one—the gossips say it was the only Splan—had advised him to select a French stallion of the trotteur type, and cross him with standard American mares of high nerve force.

Arriving at beautiful Oak Lawn Farm on a bright sunny morning, Mr. Harkness introduced himself to its erudite founder, and asked to see some of the sires. Perfection, the champion of many shows including the one at the world's fair in Chicago, five years before, was the first to be paraded. While the almost faultness lines of this noted horse could not fail to attract Mr. Harkness he knew that the head of this model stud was not on the market. Then, too, he was a carrosier, or carriage horse in plain English, with only about four minute speed. His son Patrician, then two years old, was out of a mare by Indre, a pure bred French trotter, and besides being quite as good looking as his sire, had a better use of his legs.

Here was just what he wanted, was the quick decision of the owner of Walnut Hall Farm, and in his brusque way he asked: "What do you want for the colt?"

"He is not for sale," replied Mr. Dunham.

"But surely you will take $10,000 for him," said the oil magnate.

"Patrician measures up to my highest ideal of a horse," was the answer, "and I do not care to part with him."

"But I want him!" urged the visitor, "and will pay $20,000."

"My decision is final," came from Mr. Dunham, in a tone of dignity that put a quietus on his autocratic customer, who had evidently thought, up to this time, that he could buy anything he wanted in horseflesh.

Strange to relate, this rebuff did not drive Mr. Harkness away, for he looked over Indre, then about twelve years old and hog fat. He was the gold medal stallion of the Paris exposition as a three-year-old, had never had a harness on his back, and for some time prior to his inspection by Mr. Harkness had not even been exercised to saddle. But even in this condition he could roll off through the dusty road that ran along the farm entrance at a 2:30 gait, and since he could not get the stars of the Dunham collection, the New York fancier carried off Indre and a few mares, one of the German Oldenburg strain.

It was the writer's privilege to be visiting at Oak Lawn Farm for a week end, and he greatly enjoyed this clash between two successful men of affairs and he triumph of one masterful mind over another that was evidently accustomed to having its own way. Regarding the experiment in breeding, it could not have been a success though it is said that several daughters of Robert McGregor were mated with the big coarse looking French stallion that year. Nor did it deserve to be, for we have advanced beyond the time when outside infusions are necessary to help our own well fixed light harness type. Mr. Harkness must have learned his lesson early, for he wasted no more time or money on fads, as the records of Walnut Hall Farm have attested so frequently in recent years.

The Charity Horse Show

With the Red Cross Horse Show in New York City, a strictly "made in America" affair, achieving a popular success seldom accorded to any previous similar event at the Garden, coast horse lovers, and especially those in the territory adjacent to this city, have looked forward with a great deal of interest to the exhibition planned to be held some time during the winter at the Riding and Driving School. The arrangements for the same have been completed, and the dates claimed for Thursday, Friday and Saturday, February 11, 12 and 13, the program being arranged to afford entertainment both afternoons and evenings.

As with its more pretentious kindred event, the Red Cross Show, a worthy charity has been chosen as the recipient of the profits of the exhibition. In the heart of the Italian quarter of San Francisco, between Mason and Powell at 555 Chestnut street, is the non-sectarian social center known as the People's Place, where a band of earnest workers have long lived in complete accord with their neighbors and labored for the social and civic betterment of the district. Here is maintained a dispensary, with a district nurse in attendance, a day school for the little tots and clubs and classes for the older youngsters—or their mothers. In the evenings the gymnasium and club rooms offer pleasant relaxation for the elders whose daylight hours are hours of toil, and not infrequently the Settlement has been the scene of weddings, christenings, and the like.

Now, under the adverse conditions that have tightened purse strings throughout the world, the center must either have assistance or curtail its work, and that the latter may not become necessary the horse show committee have extended the helping hand, so you may feel that all support you accord the event will bring a double pleasure. Messrs. James J. Gethin and S. E. Kramer will officiate as manager and secretary, respectively, and the following committee of ladies who represent the most steadfast devotees of the horse are in charge of the arrangements for the event: Miss Jean Wheeler, Mrs. H. H. Beers, Mrs. Henry P. Umbsen, Miss Gertrude Thomas, Miss Marion Crocker, Miss Marguerite Morbio, Miss Helen Ashton, Miss Elysse Osborne, Miss Helen Bertheau, Miss Genevieve Bothin, Miss Gertrude O'Brien, Miss Elizabeth Oyster, Mrs. Robert Hayes Smith, Miss Anna Peters, Miss Ernestine McNear, Miss Elsa Ames, Miss Dorothy Rathjen, Miss Rhoda Pickering, Miss Fannie Deutsch, Mrs. Ada Kennedy, Miss Marion Adams, Miss Alice McChesney, Miss Marion Fitzhugh, Miss Mary Louise Harrington, Miss Alma Carlisle, Mrs. Capt. Humphrey, Mrs. Louis Cummings, Mrs. L. M. Rayward.

The program is so comprehensive that almost every horse lover may find the proper class for the exhibition of his or her especial favorites, and will appeal directly to all friends of "man's best friend." Entries close with Secretary Kramer at the Riding and Driving School at 701 Seventh Avenue on Thursday, January 28th, and intending exhibitors will be furnished entry blanks and all information for the asking. Believing that the big program will be of general interest to our readers, the same is appended:

ROADSTERS.

Class 1.

Trotters, mares or geldings, over 15 hands. To be judged by their conformation, quality and manners. Must be practically sound, and shown to an appropriate four wheeled vehicle. Excessive speed not required.

First prize.....Silver Trophy.

Class 2.

Pair of Trotters, mares or geldings over 15 hands. To be judged by their conformation, quality and manners, be practically sound and shown to an appropriate vehicle.

First prize.....Silver Trophy.

Class 3.

Trotters, mares or geldings, 15 hands or over. To be judged by their conformation, quality and manners, to be practically sound. Horses 60% and appointments 40%.

First prize.....Silver Trophy.

Class 4.

Pair of Trotters, mares or geldings, 15 hands or over. To be judged by their conformation, quality and manners, to be practically sound. Horses 60% and appointments 40%.

First prize.....Silver Trophy.

Class 5.

Pacers, 15 hands and over. To be judged by their conformation, quality, manners and gait, to be practically sound. Horses 85% and appointments 15%.

First prize.....Silver Trophy.

Class 6.

Mares or geldings over 14.3 and not exceeding 15.2. Conformation and quality to count 50%, manners and style of going 50%. Must be practically sound, and shown to an appropriate two or four wheeled vehicle.

First prize.....Silver Trophy.

Class 7.

Mares or geldings over 15.2. Conformation and quality to count 50%, manners and style of going 50%. Must be practically sound, and shown to an appropriate two or four wheeled vehicle.

First prize.....Silver Trophy.

TANDEM HARNESS CLASS.

Class 8.

Mares or geldings, any height. To be judged by their manners, conformation and quality, and to be practically sound. Different owners may combine.

First prize.....Silver Trophy.

BUSINESS BUGGIES.

Class 9.

Mare or gelding over 15 hands, four years old or over. To be judged by conformation and style of going. To be show to a business buggy as used for commercial purposes in San Francisco. Horse 75%, buggy, harness, etc., 25%.

First prize $25
Second prize 15
Third prize 10

CITY DELIVERY HORSES.

Class 10.

Mares or geldings, 3 years old and over, under 1300 pounds, as used for city delivery, to be shown in single harness to a four wheeled vehicle. Horse 70%, appointments 30%.

First prize $25
Second prize 15
Third prize 10

Class 11.

Pairs of mares or geldings, 3 years old and over, under 2600 pounds, to be shown to a four wheeled vehicle. Horses 70%, appointments 30%.

First prize $25
Second prize 15
Third prize 10

RUNABOUT CLASS.

Class 12.

Mares or geldings, 3 years old and over, 14.2 and not exceeding 15.2. To be shown to runabout. Horse to count 60%, appointments 40%; horse must be practically sound, have good manners and back well.

First prize.....Silver Trophy.

LADIES' PHAETON CLASS.

Class 13.

Mares or geldings, 14.2 and not exceeding 15.3. To be shown to lady's phaeton, lady amateurs to drive.

First prize.....Silver Trophy.

COMBINATION HORSES.

Class 14.

Mares or geldings, 14.2 and not exceeding 15.2. To be shown to an appropriate vehicle, and judged as a horse for harness purposes. The horse to be unharnessed in the ring, and shown under saddle. The horse best suited for both purposes to win the prize. Same person to drive and ride.

First prize.....Silver Trophy.

Class 15.

Mares or geldings, exceeding 15.2, to be shown to an appropriate vehicle, and judged as a horse for harness purposes. The horse to be unharnessed in the ring and shown under saddle; the horse best suited for both purposes to win the prize. Same person to drive and ride.

First prize.....Silver Trophy.

Class 16.

Pairs of horses in harness, mares or geldings, 3 years old and over, over 14.2, to be judged for their conformation, quality, manners and style of going. Must be practically sound, and shown to an appropriate vehicle.

First prize.....Silver Trophy.

SADDLE HORSES.

Class 17.

Mares or geldings exceeding 15.2, 3 years old and over, conformation and quality to count 50%, paces and manners 50%, paces required to be shown will be walk, trot and canter. Amateurs to ride.

First prize.....Silver Trophy.

Class 19.

Open class, mares or geldings exceeding 14.2 and not exceeding 15.2, 3 years old and over, conformation and quality to count 50%, paces and manners 50%. Paces required to be shown will be walk, trot and canter. Man to ride.

First prize.....Silver Trophy.

Class 20.

Open class, mares or geldings, exceeding 15.2, 3 years old and over, conformation and quality to count 50%, paces and manners 50%. The paces required to be shown to be walk, trot and canter. Man to ride.

First prize.....Silver Trophy.

Class 21.

Open class, mares or geldings, exceeding 15 hands, 3 years old and over, up to carrying 200 pounds. Conformation and quality to count 50%, paces and manners 50%. The paces required to be shown will be walk, trot and canter.

LADY'S SADDLE HORSE.

(Amateurs to ride.)

Class 22.

Mares or geldings 14.2, not exceeding 15.2, 3 years old and over, conformation and quality to count 50%, paces and manners 50%; manners essential. The paces required to be shown will be walk, trot and canter. Lady to ride.

First prize.....Silver Trophy.

Class 23.

Mares or geldings exceeding 15.2, 3 years old and over, conformation and quality to count 50%, paces and manners 50%; manners essential. Paces required to be shown will be walk, trot and canter.

First prize.....Silver Trophy.

THOROUGHBRED SADDLE HORSES.

Class 24.

Stallions, mares or geldings, 3 years old and over, exceeding 14.2. Tail may be banged but not docked. Conformation and quality to count 50%, paces and manners 50%. The paces required to be shown will be walk, trot and canter.

First prize.....Silver Trophy.

SADDLE TANDEMS.

Class 25.

Mares or geldings exceeding 14.2. Conformation and quality to count 70%; manners and reinsmanship 30%. This class for long tailed horses only.

First prize.....Silver Trophy.

Class 26.

Mares or geldings exceeding 14.2. Conformation and quality to count 70%; manners and reinsmanship 30%. This class for short tailed horses only.

First prize.....Silver Trophy.

FIVE GAITED SADDLE HORSES.

All horses must show five distinct gaits; a free, open walk, fox trot or running walk, square trot, easy canter, and single foot or rack. Conformation and quality to count 50%, manners and performance 50%. Horses entered in the Five Gaited Classes cannot be entered in any other class.

Class 27.

Mares or geldings 14.2 and not exceeding 15.2. Amateurs to ride.

First prize.....Silver Trophy.

Class 28.

Mares or geldings exceeding 15.2. Amateurs to ride.

First prize.....Silver Trophy.

CHAMPIONSHIP FIVE GAITED CLASS.

(Note—Only mares or geldings having won a first or a second prize in Classes 27-28 will be eligible in Class 29.)

Class 29.

Stallions, mares or geldings, any height. Must show five distinct gaits; a free, open walk, fox trot or running walk, square trot, easy canter, and single foot or rack. Conformation and quality to count 50%, manners and performance 50%.

First prize.....Silver Trophy.

PARK HACK SADDLE HORSES.

Class 30.

Mares or geldings, exceeding 14.2, to be ridden by owner or an amateur acceptable to the Committee. To be judged by walk, trot and canter. Style, action and paces to count 50%, conformation and quality 50%; manners essential.

First prize.....Silver Trophy.

STOCK HORSES.

Class 31.

Horses to be shown under stock saddle, and to be judged both on general conformation and on ability to perform the work required of a stock horse.

First prize $25
Second prize 15
Third prize 10

Or the equivalent in trophies.

HUNTERS OR JUMPERS.

To be shown over four consecutive jumps, two at 3 feet 6 inches and two at 4 feet for both classes. To be judged for their performance, conformation, quality, manners and ability to carry the prescribed weight over hurdles.

Class 32.

Mares or geldings 15.1 and over, up to carrying 190 pounds.

First prize.....Silver Trophy.

Class 33.

Mares or geldings over 14.3 up to carrying 150 pounds.

First prize.....Silver Trophy.

Horses entered in Class 32 cannot be entered in Class 33 and vice versa.

LADY'S JUMPING CLASS.

Class 34.

Best performance over four consecutive jumps, two at 3 feet and two at 3 feet six. To be ridden by ladies.

First prize.....Silver Trophy.

HIGH JUMP.

Class 35.

The trial for high jumping will commence at 4 feet, and the bars will be raised at the discretion of the Judges. Horses will be allowed three trials at different heights, if necessary.

First prize.....Silver Trophy.

POLO PONIES.

Class 36.

Polo Ponies, Champion Class, 14.2 and not exceeding 15.1 hands. To be polo sound, and judged for their conformation, manners and handiness. To be shown with mallet and through obstacles.

First prize.....Silver Trophy.

Class 37.

Polo Ponies, Novice. Ponies suitable to become polo ponies, over 14.2 and not exceeding 15.1. To be sound, have good conformation, quality and manners. Walk, trot and gallop.

First prize .....Silver Trophy

Class 38.

Weight Carrying Polo Class. Polo ponies over 14.2 and not exceeding 15.1. To be polo sound and judged for their conformation, manners and handiness. Must be up to 200 pounds, to be shown with mallet and through obstacles.

First prize .....Silver Trophy

Class 39.

Lightweight Polo Class. Polo ponies over 14.2 and not exceeding 15.1. To be polo sound and judged for their conformation, manners and handiness. Must be up to 150 pounds, to be shown with mallet and through obstacles.

First prize .....Silver Trophy

Horses entered in Class 37 cannot be entered in Classes 38 or 39.

CHILDREN'S PONIES.

Class 40.

Ponies 12.2 and under.

First prize .....Silver Trophy

Class 41.

Ponies 12.2 and over and not exceeding 13.2.

First prize .....Silver Trophy

Class 42.

Ponies 13.2 and not exceeding 14.2.

First prize .....Silver Trophy

In all Children's Pony Classes, ponies must be ridden by children under 16 years of age.

HORSES SUITABLE FOR OFFICERS' MOUNTS.

Class 43.

Horses 15.1 and over, four years old and over. Should be sound, of good color, well broken, gentle under saddle, free from vice, with free and prompt action at the walk, trot and gallop. To be shown by officers in uniform.

First prize .....Silver Trophy

HORSES SUITABLE FOR SAVALRY.

Class 44.

Mares or geldings four years old and over, 15.1 and over. Good conformation, sound, well broken, free from vice and gentle under saddle. Must show prompt action at the walk, trot and gallop. Horses entered in Class 43 can not be entered in Class 44 and vice versa.

First prize .....Silver Trophy

HIGH SCHOOL AND TRICK HORSES.

Class 45.

Stallion, mare or gelding, exceeding 14.2. Performance only to count.

MOUNTED POLICE.

Class 46.

Police horses to be ridden by men of the force in uniform. Horses to count 50%; equestrianism 50%.

First prize $25
Second prize 15
Third prize 10

CHAMPIONSHIP CLASSES.

In all Championship Classes, first and second prize winners must show their horses, or forfeit any money or plate to which they may be entitled at this Show.

For the best Heavy Harness Horse, any size, of the Show.

For the best Polo Pony of the Show.

For the best Saddle Horse, under 15.2 of the Show.

For the best Saddle Horse, over 15.2 of the Show.

POLO GAMES.

There will be three polo games, one each evening, when three 5 minute periods shall be played during each game by contesting clubs. A cup to be awarded to the club or team winning two games out of the three.

MARATHON RACES.

Trotters under saddle. Starting from the Riding School to the Cliff House and return, for the Cliff House Trophy. Horses to be ridden by gentlemen amateurs. This event to be governed by the rules of the American Trotting Association.

First prize .....Cup

THOROUGHBREDS.

For registered or horses eligible to registry. To leave the Riding School at a time appointed by the Horse Show Committee, and go a distance not to exceed fifteen miles, destination and route to be selected by a race committee. This event to be governed by the rules of the American Jockey Club, horses not to carry less than 165 pounds.

SPECIAL CLASSES.

(A) Percheron Stallion .....Silver Trophy
(B) Belgian Stallion .....Silver Trophy
(C) Shire Stallion .....Silver Trophy
(D) Best trained saddle horse, performance alone to be considered.
(E) For the best type of saddle horse to be shown in hand.
(F) Pony in harness under 14.1 to be shown by children under 16 years to an appropriate vehicle—
.....Silver Trophy

Note.—There will be a Silver Trophy given to winner of each championship class.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

ANGLERS' ANNUAL MEETING.

The California Anglers' Association clubrooms were filled to overflowing Monday evening at the annual meeting and smoker, one of the most enthusiastic gatherings the organization has held in years. Fish and game topics were discussed. The work of the Fish and Game Commission for the past few years was outlined by officials of the commission. Among the speakers during the evening were Dr. L. T. Cranz and George A. Wentworth. Fish and Game Commissioner Carl Westerfeld recounted the work of the Commission for the past few years, and hinted at future good work for the protection and propagation of the fish and game of this State.

Secretary Ernest Schaeffle's remarks were statistical and replete with interesting data. Deputy Joe Hunter put the assembly in touch with some of the police work being carried out. Deputy Andy Ferguson, of Fresno, gave a vivid and appreciated talk depicting the restocking of Sierra streams and lakes in his district. His account of the beautiful golden trout and its gameness "brought down the house." Deputy C. Culver described the work accomplished in having the fish screen law observed by ditch owners. Commission Attorney Bob Duke gave the assembly an idea of the difficulties incurred in securing convictions of fish and game law violators at times. Police Judge Morris Oppenheim's remarks were short but to the point—he is the friend of the angler and sportsman.

The officers elected for the ensuing year were: President, L. T. Cranz; first vice-president, V. C. Howe; second vice-president, Paul W. Shattuck; treasurer, Herman Cohn; secretary, George A. Wentworth; directors, C. F. Ensinger, Joe Springer and Charles Gibbs.

The rooms of the organization will be the headquarters of visiting anglers and other sportsmen during the Exposition. The association is now on record for co-operation with the Fish and Game officials.

NATIONAL FLY-CASTING TOURNAMENT.

The San Francisco Flycasting Club has received notice from the National Association of Scientific Angling Clubs that San Francisco has been awarded he national tournament for 1915. For two years the local organization has been looking forward to handling the classic fly-casting event and the following telegram forwarded by F. J. Cooper, president of the San Francisco Flycasting Club, was received with much delight:

"San Francisco has been awarded this year's casting tournament. I am sure it will be a grand success. A. BAUER,
President National Association of Scientific Angling Clubs."

The tournament will likely be held on the San Francisco Club's ground at Stow Lake. It was to have been international in character but owing to the strife in Europe will be confined to the United States.

GOSSIP FOR SPORTSMEN.

The recent rains created conditions for the past two weeks that have caused a general exodus of ducks from many of the upper bay salt marsh shooting resorts. A change of diet was offered at innumerable fresh-water ponds, where tender green forage was sprouting and where a variety of seeds have been washed into the ponds.

Market shipments of ducks have been cut down 50 per cent recently, possibly owing to the vigilance of the Fish and Game Commission's deputies, who have seized numerous limit bag consignments. These shipments of wild ducks have been addressed to different individuals, all located within easy distance of the game dealers and commission houses. Orders for wild ducks can readily be filled as they come in, and under this system the daily limit of wild ducks, in possession, is not apparently exceeded. About one-half of the ducks sent in are canvasbacks, shipped from various bay counties points.

Local gunners who have hunted in the lower bay stretches and along the Alameda bay shores recently have had great sport with both canvasback and bluebill ducks. One Sunday afternoon, off the Redwood shores, the birds lay out in the bay in mile-long flocks. The scull boat hunters nearly all shot limit strings in the morning. Al Johnson, Paul Mabie, Charles McKittron and Roy Joachim were posted in blinds on the Redwood shore, where they enjoyed good shooting. The shooters out later in the day bagged many ducks, one operator being reported to have knocked down twelve ducks in one shot. The afternoon was fair, the bay calm, and big flocks of spoonbills joined the deepwater ducks out on the bay.

Excellent shooting conditions in the vicinity of Alviso prompted the presence of a large crowd of hunters in shore blinds and out on the sloughs in boats. Results generally were good, the men who could point their guns right getting many ducks.

Many of the inland sections between Alvarado and Mowry's have been flooded, the ducks consequently, mostly spoonbills, keep pretty well away from the shooting ponds and take matters easy in safer quarters, slipping into the baited ponds at night for their feed.

At the big salt pond preserve of the Dumbarton Land Company, Arden Gun Club members—Jack Connelly, Dr. J. C. Sylvester, Fred Kewell, Rube Haas and others have not tallied big strings of spooneys, nor have the adjoining Coyote Gun Club fusiliers until a week ago. On adjacent California salt pond shooting stations Dr. W. O. Ogle and George Franzen were in line for a pleasing smokeless powder reception of many spoonbills Sunday.

Empire Gun Club members have had an off season so far at the Elkhorn slough preserve. Col. J. W. Dorsey, W. H. Sanborn and several other gunners have, however, returned with good bags after several visits. The two hunters mentioned, however, had limit shoots near Los Banos. A mile or more below the club's ground Watsonville Gun Club shooters have enjoyed remarkably good shooting, birds having been plentiful there nearly all of the season.

"Cap" A. W. Simonton, formerly of this city, now located in Wilmington, Del., in charge of the Du Pont Powder Company traffic department, was here on a flying trip for about two weeks and departed for Portland Thursday. He was a leading shot at Golden Gate Gun Club and California Wing Shooting Club trapshooters, and also a member of the Wheeler Island Gun Club, where the mallard shooting was phenomenal several seasons ago.

It will be remembered by our readers that a photo of the genial "Cap" appeared in the Christmas edition of the Breeder and Sportsman. We stated that he no doubt would like to be back and enjoy another duck shoot. "They all come back."—Well, he did have a fine shoot last Sunday with Ed Schultz and Pete McRae at the Hog Island Gun Club preserve on Petaluma creek. "Cap" came back to the city with twenty-two fat canvasbacks, which is not a bad shoot for anybody.

The Los Banos country, down the San Joaquin valley, has offered the best average duck shooting, comparatively, since the season opened. Field and Tule Gun Club members, J. B. Coleman, Nat Boas, Jack Wirtner, Joe Harlan and others have tallied two limits a week since the season opened. At Billy Sears' preserve Sunday a party of Sacramento gunners all shot limits.

Reports from the Gustine district are similar—ducks galore in the ponds. George Wright and party were on the limit end of a shoot a week ago. Herbert Rose bagged a mixed limit while shooting on the Newman Gun Club ground.

For last week shooting conditions had improved a bit on some parts of the Sunsun marsh. W. W. Richards, Harlow Bancroft, Dave Hearfield and George Emmons have found the "overflow" at Green Lodge fairly well stocked with large and small ducks. Ed L. Hoag and other gunners at the Cordelia Club ponds have gathered in many canvasback ducks recently.

Ducks and geese have recently been plentiful on the old Black Jack preserve and adjacent overflows above Collinsville. When the shooters from that section are out in force and keep the birds moving from place to place good bags are shot. Near Rio Vista wild geese are very numerous. The honkers are best for table use, however. The white geese are thin and poor from grass feeding.

Sacramento sportsmen have been getting fine mallard shooting near Gridley recently. Late reports are that birds are plentiful.

The Petaluma and Napa creek marshes were invaded by flocks of thousands of canvasback ducks for three days the latter part of last week, while a week and more before the birds had apparently deserted those marshes and creeks. Blind bay, a famous canvasback shooting resort in past years, is now leased by a gun club. Other Petaluma creek and navigable waters are open to the hunters, however.

Imperial Valley, according to W. H. Cameron of this city, is a paradise for the duck hunter just now. The sport is better than for years past. The sprig is the predominant variety. Countless thousands of these ducks are fattening on the seed of the native wild maize. Cameron, Fred Rayner and James Stinnett each bagged a limit last Sunday morning before 9 o'clock, shooting on Vic Sterling's ranch, eight miles from Calipatria and near the Salton sea. Although there is good shooting at almost any point in the valley, the best hunting is said to be across the Mexican border.

Near San Pablo canvasbacks and bluebills were plentiful recently in the bay off shore. George Legler's shoot in that vicinity Thursday was well rewarded. W. W. Perry, Bert Underwood, Ole Oleson, W. Burns, Joe La Vezi, Dennis Landrigan, Eddie Smith and other gunners have also enjoyed good "can" shooting.

Chas. Pease, Chas. F. Breidenstein and Fred Tobelman hunted three days near Limantour bay, on the Point Reyes shore. Canvasback ducks worked into the decoys and limits were easy to shoot. Black sea brant were also plentiful, Jack Briones succeeded in dropping 20 of the sea brant Sunday while shooting at Limantour bay.

Duck hunting at different Tomales bay points has been only fair. Both Jim Black and Jim Andrews, who shoot near Point Reyes, came in a week ago with about twelve birds apiece.

* * *

Quail hunters will find conditions for upland shooting tomorrow much improved over the recent situation, when the ground was well soaked and soggy. Shooters then found the going hard and tiresome, birds that were located proving to be shrewd sprinters and keeping well out of the danger zone.

Among the quail hunters out recently were George Uhl, who picked up a limit string in the Pleasanton hills. Near Nicasio John Barr and Sam Maza shot limits on the Maza ranch. Near Ignacio a Monday trip was productive of a good bag for Baldo Ivancovich. Clarence Nauman, one day this week, shot over fine quail ground near Raymond in Madera county. Harold Ladd and G. Freye tried the hills back of Half Moon bay last week. One agreeable feature for quail hunters tomorrow and this afternoon, the road will be in better shape for machine trips.

* * *

Fred W. Diehl of Oakland was arrested by Fish and Game Commission deputies this week for violating the game law. A search revealed 36 quail in cold storage and in his possession. He was released on $100 bail, pending trial of the case. A game peddler, J. J. Ryan, was also arrested this week at Fourth and Market streets by deputy commissioners. He was in possession of 26 quail. He was released by Judge Oppenheimer after putting up $25 bail.

* * *

Lake Tahoe is by nature fitted to be a fisherman's paradise. Its area, the number of natural spawning beds for trout and other fishes, the abundance of natural feed, all render this picturesque Sierra lake capable of supporting more fish, of greater size, than any other like body of water on the Coast. Furthermore its accessibility, the facilities for camping and the variety of the resort accommodations, combine to make fishing attractions there available to a large number of citizens and tourist visitors. Nevertheless, at the present time, despite a plentiful annual restocking with different varieties of trout, the fishing has been steadily declining. Ten years ago limit catches could be easily taken almost anywhere along the shores of the lake and in most of its tributaries. Five years ago any resident along shore could catch all the trout needed within a few yards of his own water front. Fair sport is still to be had in favored localities. This valuable asset of the late, it is claimed, is in danger of dwindling to nothing, a possibility that will impair the recreation of thousands of annual visitors to the lake. The growing scarcity of lake trout is due, it is alleged, to the market fishermen, who from May 1 until October 1, five months, send out daily shipments of trout by express. From the express office at Tahoe Tavern alone, an average of 600 pounds has been shipped — 90,000 pounds of trout in a season. This statement does not take into account any other outlets than the express office mentioned. Truckee,, for instance, is another big shipping point. The market fishermen who are credited with getting the limit catch by 9 o'clock in the morning in past seasons now fish all day and into the evening. This does not argue the continued abundance of trout.

* * *

The Lake Tahoe Protective Association was organized for the purpose of obtaining necessary legislative action to protect the spawning beds and preserve the propagation of the lake trout, the black spotted variety in particular. A petition to that effect received hundreds of signatures and has been filed with the State Fish and Game Commission. Senator E. C. Voorhies, W. S. Bliss, C. T. Bliss, Judge Chas. Nelson and other prominent Lake Tahoe property owners were in consultation with the Commission officials, in the offices in the Mills building last week. It is intimated a bill covering the remedial features presented will be submitted to the Legislature.

* * *

Another matter taken up by the Fish and Game Commission officials, fishing firms and packers was the question of open and close season on salmon, incidentally including striped bass and shad. It has been found that it is impracticable to allow net fishing for bass or shad during close season for salmon and vice versa. The net fishermen can not discriminate in their catches, for while fishing for one kind of fish in the up-river waters it is impossible to exclude the closed season fish, which when taken in the nets are invariably killed and lost. Among those present at the meeting were F. E. Booth, of the Monterey Packing Company and Sacramento Packing Company, W. H. Hunt, of the Tahoe Hatchery, Andy Ferguson, of Fresno, W. H. Shebley, superintendent of the Sissons Hatchery, H. I. Pritchard, of Los Angeles, George V. Neale of Sacramento, Jos. Hunter, B. H. Nidever and others. It is probable that an effort will be made to close the spring spawning season, a month possibly, from the middle of March to the middle of April; during this time there is usually a big run of salmon to the Sacramento and San Joaquin rivers spawning grounds.

A heavy run of large steelhead trout, the largest in years, is reported from Point Reyes, and took place Thursday. The schools of fresh run ocean trout slammed up-stream over the riffles for several hours. Odd bunches of fish have been going up the creek from Tomales bay since. This means good fishing later on and is an argument in favor of opening the month of January for the rod and line fishermen for steelhead in tide waters.

* * *

The Salinas river and Elkhorn slough waters are teeming with striped bass, a recent haul of the nets gave one fishing boat 800 pounds. Watsonville, Salinas and other points have intimated through influential citizens and sportsmen that it is desirable to close those waters to the operations of net fishermen. The lower San Joaquin valley counties have already put the ban on net operations for striped bass, black bass and shad. The belief is that the fish are worth more to that section as a rod and line attraction and asset than as a depleted commercial commodity.

* * *

Striped bass rodsters have had to contend with rather stormy weather conditions recently. In most of the fishing resorts the water has been too roily. Indications for tomorrow, however, are more favorable. The San Antone visitors last Sunday had another poor luck day, a six-pounder landed by Jack Conlon was about the only visible result for that section. Louis Gotthelf again tried the creek near the Napa railroad drawbridge and landed a ten-pound bass.

* * *

Walter Welch, for many years past fish and game warden for Santa Cruz county, has been deprived of his badge by the board of supervisors, which body last week declared the position of county fish, game and fire warden vacant. The reasons given for such action were that State fish and game deputies were operating in the county, and that the office of a county warden was, under the circumstances, unnecessary.

COAST FIELD TRIALS START TODAY.

The Pacific Coast Club's thirty-second annual field trials at Bakersfield have been moved forward to open today, Saturday, January 23, instead of Monday next as originally announced, a change in dates having been made to accommodate a large number of sportsmen who have only time for a week-end to enjoy high class competition of field dogs. Reports from near Bakersfield are that conditions are favorable for the annual classic.

An unusually heavy entry has been made for the Derby and All-Age stakes, the two feature events of the trials. The Members' stake, starters for which are accepted up to the evening before the trials, also promises to attract a large entry. This season the Members' stake, which will be handled by bona fide members only, will be run first.

A large party left in special cars on the train to Bakersfield from this city yesterday. S. Christenson of the Palace Hotel has charge of the trip for the club and secured reservations for more than fifty sportsmen.

Among those who were aboard the special train are: J. M. Kilgarif, J. W. Considine, George Wingfield, J. W. Flynn, Lloyd Tevis, Lansing Tevis, Bert Nixon, Roy S. Avery, H. C. Katz, Charles DeRyder, Joseph A. Chanslor, George Gray, Rome Jacks, Will Jacks, Horatio Ananasagasti, Commissioner General to the Exposition from the Argentine Republic; T. J. A. Tiedemann, J. S. French, Laurence McCreery, Edwin A. Hammer, Phillip M. Wand, J. B. Coryell, James P. Sweeney, S. P. Eastman, A. W. Willhelm, J. Walter Scott, E. Courtney Ford, William Dohrmann, Alexander Hamilton, Percy Moore and Stanley Sproule of Chico.

The entries for the Derby and the All-Age stakes follow:

Derby Entries.

Jim Rodney, white, black and tan English setter dog, owned by Rincon Hill Kennels.

Carrol, orange and white English setter dog, owned by J. W. Flynn.

Wheastone, white and orange English setter bitch, owned by Wilkes & Avery.

Sensation, white and black pointer dog, owned by Wilkes & Avery.

Queen O' Trumps, white and liver pointer bitch, owned by W. W. Sweeney.

Terry, white and black English setter dog, owned by J. M. Kilgarif.

Shasta King, white and orange English setter dog, owned by J. M. Kilgarif.

Smiley, white and black English setter dog, owned by B. D. Townsend.

Bud, white, black and tan English setter, owned by Jos. A. Chanslor.

Jeff Forester, white, black and tan English setter dog, owned by Jos. A. Chanslor.

Orange Blossom, white and orange English setter bitch, owned by S. Christenson.

Shasta Girl, white, black and tan English setter bitch, owned by S. Christenson.

Imp, white and black English setter dog, owned by Stanley Sproule.

Melrose Chief, white, black and tan English setter dog, owned by John W. Considine.

Melrose Rod, white, black and tan English setter dog, owned by John W. Considine.

Lady of Stockdale, white and liver pointer bitch, owned by Gordon B. Tevis.

Rox of Stockdale, white and liver pointer dog, owned by Gordon B. Tevis.

Nellie of Stockdale, white and black pointer bitch, owned by Gordon B. Tevis.

Saddle of Stockdale, white and black pointer dog, owned by Gordon B. Tevis.

Blaze of Stockdale, white, black and tan pointer dog, owned by Gordon B. Tevis.

Tango of Stockdale, white and black pointer dog, owned by Gordon B. Tevis.

Bender, white and Liver pointer dog, owned by W. B. Coutts.

Shasta Maid, white and black English setter bitch, owned by F. J. Ruhstaller.

Chestnut Belle, white and liver English setter bitch, owned by F. J. Ruhstaller.

All-Age Stake Entries.

Pied Piper, white and liver pointer dog, owned by Bert Nixon.

Marie Danstone, white, black and tan English setter bitch, owned by A. D. Opdike & Co.

Dixie Chace, white, black and tan English setter bitch, owned by J. S. French.

Llewellin Danstone, white, black and tan English setter dog, owned by Opdike & Co.

Reno, white and black English setter dog, owned by Chas. DeRyder.

Old Forester, white and black English setter dog, owned by Jos. A. Chanslor.

Melrose Maxwell, white, black and tan English setter dog, owned by John W. Considine.

Melrose Jack, whie, black and tan English setter dog, owned by John W. Considine.

Melrose Dude, whie, black and tan English setter dog, owned by John W. Considine.

Young Forester, white, black and tan English setter dog, owned by S. P. Eastman.

Forestress, white, black and tan English setter bitch, owned by S. Christenson.

Sheridan of Stockdale, white and black pointer dog, owned by Gordon B. Tevis.

Lorena of Stockdale, white and black pointer bitch, owned by Gordon B. Tevis.

Jack of Stockdale, white and black pointer dog, owned by Gordon B. Tevis.

Elvira of Stockdale, white and black pointer bitch, owned by Gordon B. Tevis.

Sweetheart of Stockdale, white and black pointer bitch, owned by Gordon B. Tevis.

Tom Thumb, white and black pointer dog, owned by Gordon B. Tevis.

Ladas of Stockdale, black and white pointer dog, owned by Lansing Tevis.

Kil's Light, black, white and tan English setter dog, owned by F. J. Ruhstaller.

Bohemian Prince, white, black and tan English setter dog, owned by Shasta Kennels.

Shasta Queen, white and orange English setter bitch, owned by Shasta Kennels.

Hard Tack, white and liver pointer dog, owned by Wilkes & Avery.

Chicken Ives, white and black English setter dog, owned by H. S. Russ.

HERE'S A WORD FOR BRUIN.

The bills recently introduced in the Legislature to save Bruin from extermination are really responsive to a widely expressed public opinion in the northern sections of the State. Indeed, throughout the high latitudes of California, embracing the important communities of Siskiyou, Trinity, Shasta, Modoc, East Humboldt, Del Norte and Northern Mendocino, the tariff, canal tolls, neutrality and the Mexican problem yield in interest to the burning question, the preservation of the bear, writes James H. Wilkins in The Bulletin.

Concerning this animal much misinformation is current. He is not an outlaw, marauder and miscreant. On the contrary his normal life is moral and peaceful. He is by nature a vegetarian, his diet consisting of grass, berries, fruits, nuts and roots. Rarely there are regrettable individual lapses when a roguish old bear acquires a suckling pig appetite or perhaps a fondness for mutton. These instances are negligible and are quickly adjusted by capital punishment of the offender.

Barring these rare exceptions, the brown or black bear, which are identical, for you will often see a she-bear with two cubs, one black, one brown, is an animal of real economic value, the wanton destruction of which we would have only too good reason to lament. For at the time of his greatest value, during early December—just before he "holes up" for the winter—a bear in good condition is worth in hard cash from $60 to $75.

To understand this statement we must read a chapter from the bear's life history. He retires to winter quarters, hibernates, or "holes up," shortly before Christmas. He emerges in the early spring, after the long sleep, lean and haggard. The earth offers him no sustenance save young grass, which is a very thinning food. He grows still leaner, his fur bleaches, becomes ragged and scrawney. In the springtime the bear is the most disreputable, trampish looking animal that roams the mountains.

Then comes the transformation. In the late summer and fall, kindly nature spreads a generous banquet. The forest is filled with acorns, chincapins, hazel nuts, manzanita berries, blackberries and what not, all prime luxuries from the ursine standpoint. Straightway the skeleton bear takes on fat in the most amazing fashion. In four months his weight trebles or more. Not only that, but his ragged doormat of fur sloughs off and in its place appears a gorgeous dress-parade coat of black or brown. Then the erstwhile scandal of the woods, the regenerate bear, looks as slick and prosperous as a bank president. That's when the mountaineer seeks his scalp.

Now, as to values, all of which are free of overhead charges and cost of production. A winter bear-hide is worth from $15 to $25. The average is about $20. Eastern furriers take all that can be produced. An average bear yields 100 pounds of lard, which can be sold in San Francisco wholesale for 30 cents a pound. Bear lard is the lightest and most digestible of fats. Stomachs that rebel at any other, readily assimilate bear lard used in cooking. Hence it is in brisk demand among dyspeptics who can pay the price. Also, jerked bear hams command a fabulous price, in a small but steady market. Finally, the gall is worth $5 to the Chinese doctors.

Let us see, then, how a bear stacks up from the purely financial viewpoint: Fur, $20; lard, $30; jerked meat, $20; gall, $5—total, $75.

These are actual figures given to me and verified by dwellers in the northern mountain country. Not only that, but there remains for the hunter a quantity of meat, superior to the finest beef. This is most acceptable at a time when stupid game laws prevent inhabitants of remote sections from laying in a stock of venison against winter, but leaving ever increasing packs of coyotes undisturbed to work destruction among snow-bound deer.

You can see at once how the capture of three or four bear a year will add immensely to the comfort of the settler's family. As a purely natural product, the bear has a value pre-eminent among the wild life of California. He might be much further exploited. Looking at the plain facts, I see no reason why bear-growing might not be as important an industry as stock-growing.

For years the bear enjoyed an unwritten protection, stronger than any law. All through the mountains it was deemed a wanton crime to destroy an animal useless for food, with a valueless fur, leaving it to rot, which a few months later would be worth $75. Most strongly did this hold in the case of she-bears, which in the early season were not only run down, but burdened with the cares of maternity. So, for a long time, the race of bears suffered no appreciable diminution.

Then came the dude sportsmen from the big cities, frankly after anything that sported fur or feathers. They have penetrated all the remote fastnesses of the North in recent years. With high-power guns, soft-nose bullets, packs of hounds, guides, packers, cooks and valets, all the paraphernalia of destruction and luxury, they have wrought havoc in those seemingly inexhaustible game preserves. The grand, thrilling experience is a bear hunt. As a rule, Bruin is a bit of a coward. He is desperately afraid of man, which does credit to his common sense. But the she-bear with cubs has all the courage of a Spartan mother, facing dogs, howling men, guns, wounds, agony and death just to gain time for her frightened progeny to gain shelter. The gentleman quietly walks up and pots her. Some call it sport. To my warped mind, it is little short of murder. The worthless carcass is left to rot, but presently the small cubs creep from their hiding place, lick the dumb wounds of the dead mother and fill the air with their lamentations. In due season of course they perish from hunger. All this so that a carpet hunter may swell his chest and say with pride to admiring friends, "I killed a bear."

There is no doubt about the facts. They were not gathered second-hand, but from personal experience. In some sections the bears have been exterminated. Everywhere they are going fast. Without some decent protection in the breeding season they will soon be extinct. The animals are in no sense enemies of man. They are entitled to the same slight mercy that we freely extend to deer, quail and ducks. That's what the people of the north insist.

REGISTERED TOURNAMENTS.

The Interstate Association at the annual meeting last month made changes in the conditions governing 1915 registered tournaments which are given in a booklet recently issued. Other important information for gun clubs who intend to hold registered shoots is also given in the pamphlet. The following paragraphs cover the most important clauses in the booklet, a copy of which can be had by mailing request to Secretary E. Reed Shaner, 218 Coltart Avenue, Pittsburg, Pa.

"Like every radical move made by the Association in the twenty-two years of its existence, doubt was cast upon the decision, made at its annual meeting in 1913, to favor that class of sportsmen who indulge in trap shooting for the sport's sake only by making its contributions to registered tournaments part in trophies, instead of all in cash. It is worthy of note that the change met with popular favor, and that the results fully justify the wisdom of the departure. The records show that 881 trophies were well distributed among 626 contestants—479 different contestants winning one trophy, 889 winning two, 34 winning three, 11 winning four, 8 winning five, 2 winning six and 4 winning seven.

The scheme whereby the several State amateur champions were brought together at the 1914 Grand American Handicap tournament to compete for the National Amateur Championship also received the stamp of approval from the trap-shooting world. Thirty-five of the thirty-six States that held Registered State Tournaments previous to the Grand American Handicap had a representative present to compete for the honor. The contest attracted much attention throughout the entire trap shooting season,

and it was a feature event of the G. A. H. Tournament. This departure was so eminently successful that it has been continued without change for 1915.

Trophy Plan for 1915—While the trophy plan of 1914 was very satisfactory, it is the intention this year to inaugurate an entirely new idea in the distribution of trophies.

Arrangements have been made with one of the foremost jewelers and silversmiths in the country which will permit each trophy winner to select from a choice list of merchandise the particular article which appeals personally to the successful contestant, this article to be suitably engraved and forwarded, charges paid, to any point.

The trophies will be illustrated and described in a four-page folder, which will be sent in advance of tournaments to club secretaries and others interested. The club secretaries will also be furnished with forms to be filled in with names and addresses of the winners, trophies desired and other data.

The buying power of the Association is such that most attractive trophies are assured. Among the trophies The Interstate Association is to feature sterling silver table ware, giving contestants an opportunity to eventually win complete sets of that useful merchandise. While The Interstate Association trophies will be more or less special in design, arrangements have been made with the manufacturers to handle any orders at their regular retail prices which may be sent them. This will enable prize winners to complete sets of silverware or secure duplicates of any trophy won.

New Ruling For 1915—The principal change made for 1915 was the fixing of a time limit for the filing of applications carrying requests for contributions. In 1914 the Association was obligated for the entire amount of its Registered Tournament Fund by March 15, and many applications for contributions were received after the fund had been exhausted. Failure to secure contributions caused more or less ill feeling among the clubs that were too late in applying. To obviate this in 1915, February 15 has been fixed as the date on or before which applications carrying requests for contributions must be filed to be considered, and no application will be passed upon before said date has expired. This applies to all applications carrying requests for contributions, with the exception of applications for State tournaments. Inasmuch as all State tournaments are provided for alike in respect to contributions, such applications may be filed at any time.

Apportionment of Fund—In the apportionment of the registered fund for 1915, approximately $9,000 will be contributed to State tournaments and approximately $11,000 will be contributed to tournaments other than State tournaments.

Approximately $8,000 of the total Registered Tournament Fund will be contributed in trophies. Purchasing trophies in such large quantities means additional value for the fortunate winners.

To each approved State tournament The Interstate Association will contribute $225, part of which will be in trophies, irrespective of the population of the State in which the tournament is held.

The $225 contributed to a registered State tournament will be made up as follows: $100 in cash, which shall be awarded as the club holding the tournament wishes; $75 in seven (7) trophies, which shall be awarded to the winners of the first seven places (high guns) in "The Interstate Association's State Amateur Championship" event, and $50 in cash, which shall be awarded to the winner of the State Championship (or to the runner-up, in case the winner cannot attend the Grand American Handicap tournament), conditional on said winner, or runner-up, making entry and competing in the National Amateur Championship at the Grand American Handicap tournament.

A club holding a registered State tournament to which a contribution is made shall schedule an event to be known as "The Interstate Association's State Amateur Championship," said event to be at 100 single targets, open only to bona fide residents of the State in which the tournament is held, and any amateur contestant shooting for "targets only" shall be eligible to win said State Championship and any of the trophies contributed by The Interstate Association.

The foregoing applies to registered State tournaments to which contributions are made by The Interstate Association.

The following applies to registered tournaments other than tournaments given by Leagues of Gun Clubs and special organizations:

To each approved tournament, irrespective as to whether it will be a one day, two days, three days or more tournament, The Interstate Association will contribute $50, part of which, or all, will be in trophies.

It is optional with the club holding the tournament as to whether The Interstate Association's contribution shall be made one-half in cash and one-half in trophies, or whether it shall be made all in trophies, but it shall not be made all in cash.

Any amateur contestant shooting for "Targets only" at a registered tournament shall be eligible to win any of the trophies contributed by The Interstate Association.

A club holding a registered tournament shall give, on the information sheet furnished by The Interstate Association, the names of the winners of the trophies contributed by The Interstate Association.

When the registered tournament fund of approximately $20,000 is exhausted tournaments will be registered, but without any contribution by The Interstate Association.

Information in General—The Interstate Association's primary object in registering tournaments is to encourage State Associations and Leagues of Gun Clubs; therefore, it is the Association's present intention to do all in its power to urge and foster the formation of State Associations and Leagues of Gun Clubs in those States where none no wexist.

A State Association or a League of Gun Clubs, to secure recognition from The Interstate Association, must have a membership of five or more bona fide clubs located in five or more different cities or towns.

The Interstate Association, at its discretion, may exact proof of the proper organization of any State Association, or League of Gun Clubs, which applies for a registered tournament.

Any club a member in good standing of a State Association or of a League of Gun Clubs in a State that has no State Association may apply for regis-

WOOLFOLK HENDERSON

tration. Applications from clubs not members of a State Association or of a League of Gun Clubs will not be considered.

When a club applies for a two or more days tournament, the granting of such application will depend on the attendance at and success of previous registered tournaments of said club, if any were held. The determination of whether it shall be a one day or two days tournament is at the discretion of The Interstate Association.

Clubs located in States where there are no State Associations or Leagues of Gun Clubs may register their tournaments under The Interstate Association's old policy. The Interstate Association makes no contribution to tournaments registered under its old policy, but the scores made at such tournaments become a part of the official averages for the year.

Management—The management of The Interstate Association concedes to the management of any reg-

LESTER H. REID

istered tournament The Interstate Association powers as set forth in Rule 1, Sections Nos. 1 and 2, of the Trap Shooting Rules, as revised in 1909, in respect to said registered tournament.

The management of the Interstate Association has the authority and power to inquire into and deal with any matter relating to fraud in connection with any registered tournament, and to bar any person or persons concerned in any fraudulent practices.

A club holding a registered tournament must pay all moneys and prizes announced therewith. Failing therein, any club so offending will be disbarred till the default is cleared.

The Interstate Association's cash contribution will not be paid to any club until such time as such club, holding a registered tournament, shall have sent in the requisite report of the tournament to The Interstate Association.

The Interstate Association's cash contribution of $50 to the winner, or to the runner-up, of "The Interstate Association's State Amateur Championship" at a State tournament, will not be paid until such time as the Grand American Handicap tournament is held, and then only on condition that said winner or the runner-up makes entry and competes in the "National Amateur Championship" event at the Grand American Handicap tournament.

A club making application to hold a registered tournament shall not include "Practice day" in the dates registered, as the scores made on said day shall not be counted in the yearly average.

A club holding a registered tournament shall send a printed program of the tournament to the secretary of The Interstate Association at least fifteen days before the opening date of the tournament.

A club holding a registered tournament shall use The Interstate Association's Trap Shooting Rules, as revised in 1909, and shall conduct the tournament strictly in accordance therewith. It, therefore, must not change or modify the rule relating to shooting at a broken target.

A club which has been duly authorized to hold a registered tournament shall give one page of its program, of which the copy will be furnished by The Interstate Association, for purpose of announcing the amount of The Interstate Association's contribution and for purpose of publicity.

The Interstate Association respectfully suggests that the regular program for a registered tournament consists of not less than 150 targets nor more than 200 targets per day.

If a club holding a registered tournament defaults on its agreement in any particular, permission for further registered tournaments will not be granted.

Yearly Averages.—The yearly averages in 1915, for both amateurs and professionals, shall be computed on 2,000 or more single targets shot from the standard distance fixed by The Interstate Association (the distance being 16 yards), and this only at registered tournaments and the tournaments directly given by The Interstate Association.

It shall at a registered tournament not be obligatory for a contestant to shoot in all events to have his score count in the average, but the records made in every event in which he participates at said tournament shall count in his yearly average. If a contestant voluntarily withdraws from an event after starting in it and does not shoot at the total number of targets called for by said event, such unshot targets shall be scored as "lost targets."

Scores made by contestants, whether amateurs or professionals, who stand at the 16-yard mark in handicap events shall not be counted in the yearly averages.

(To be concluded next week.)

HIGH TRAPSHOOTING AVERAGES FOR 1914.

Woolfolk Henderson, of Lexington, Kentucky, heads the amateurs in the Interstate Association official list of high trapshooting averages for 1914. He broke 1,981 out of a total of 2,050 singles—.9663 per cent. S. A. Huntley, who has been out on the Coast for several years, follows with .9652 per cent. Huntley shot at 7,820 singles and broke 7,548. Frank M. Troeh, of Vancouver, Wash., winner of the State championship last year, shot at 2430 singles and killed 2278—.9374 per cent. J. F. Couts, of San Diego, broke 6976 out of 7370 singles—.9348 per cent. Pete O'Brien, of Portland, Ore., broke 2037 out of 2205, making .9238 per cent. Henry F. Wihlon, of Gresham, Ore., scored .9100 per cent by breaking 2548 out of 2800 singles. J. F. Dodds of San Diego shot at 4400 singles and scored 3946 breaks for ..8968 per cent. Harry Ogilvie, of Lindsay, Cal., shows an ..8846 per cent average on 2415 out of 2730 singles. The Seattle trigger puller C. E. McKelvey broke 1978 out of 2325—..8507 per cent. Ted Riley, of this city, broke 1736 out of 2150 singles.

Henderson shot a Parker gun, Schultze powder and Peters shells. Huntley also shot a Parker gun.

Huntley and Couts shot more than double the number of targets shot at by 108 other shooters listed, excepting W. S. Hoon, of Jewell, Ia., 4950, broke 4738—.9563 per cent; J. G. Martin, Harrisburg, Pa., 4995, broke 4615—..9239 per cent; H. Kennicott, Evanston, Ill., 4400, broke 4131, ..9388 per cent.

Lester H. Reid, of Seattle, Wash., the northwest Coast representative of the Peters Cartridge Company, led the professional averages. He broke 2146 out of 2225 singles, making ..9644 per cent. Other Coast "pro" averages were: Frank C. Riehl, of Tacoma, 3428 x 3625—..9456%; E. J. Morgan, Salt Lake City, 3689 x 3935—..9374%; A. W. Woodworth, Spokane, 2491 x 2660—..9364%; H. E. Poston, San Francisco, 4149 x 4445 singles—..9334%; O. N. Ford, San Jose, Cal., 2219 x 2380—..9323%; R. C. Reed, San Francisco, 2484 x 2680—..9268%; P. J. Holohan, Portland, Ore., 3596 x 3880—..9268%; Guy E. Holohan, Los Angeles, 3620 x 4025—..899%; E. B. Morris, Portland, Ore., 2298 x 2675—..8590%; C. A. Haight, San Francisco, 3043 x 3550—..8571%; C. H. Knight, San Francisco, 2216 x 2610—..8490%.

H. F. Wihlon is fifth in the list of high averages for doubles, he broke 118 out of 150—..7866%. Pete O'Brien scored ..7533%, 113 x 150. F. S. Wright of New South Wales, N. Y., led on amateur doubles with 127 x 150—..8466%.

George Maxwell, the one-armed shotgun wizard, led the professional double averages with 134 x 150—..8933%. Lester German and Tom Marshall followed with ..86%, shooting at 100 doubles.

THAT NUCKOLS CASE.

The December issue of The Breeders' Journal, the monthly publication of the American Association of Trotting Horse Breeders, carries under the heading of "Timely Topics," by H. K. Devereux, a criticism of the action of Robert S. Strader in the Vance Nuckols case that might be comic coming from some sources, but at this distance from the scene appears rather poorly timed and undeserved from a man of Mr. Devereux' standing in the business. The impression on the coast, especially after the trotting tribunal backed the judges' action by its expulsion of Mr. Nuckols, has been that the latter "had it coming." Mr. Devereux' comments, which have been given wide publicity, are as follows:

There has been so much said of the recent decision of the board of review of the National Trotting Association, in expelling Driver Vance Nuckols for what might be considered a mild breach of the rules, and so much has been said that hardly accords with fact, it seems but fair to review these facts dispassionately and in doing this one must consider always that the man proved himself honest.

While there was a breach in the rules, it would seem that conditions warranted nothing more than a small fine to uphold the dignity of the parent association, its members and it rules and the limit of the penalty allowable—expulsion—can be considered almost persecution in the light of facts.

With no desire to whitewash Driver Nuckols and with entire confidence in the honesty and well meaning of Presiding Judge Strader, a little reasoning on the subject will hurt no one. Had a little reasoning been indulged in by the judges' stand before first sentence was passed upon Nuckols, no penalty would have been forthcoming. The action was hasty—unduly so—taken in heat of anger and suspicion—more than once expressed by Judge Strader against this man and expressed publicly.

Mr. Strader was the presiding judge, a position not authorized by the rules. As presiding judge, he assumed practically all the duties of the three judges and I have it from his two associates that he consulted them little and in this case not at all, not even permitting them time to protest his decision before it was made. It is unwise at least for any man making it his business to enter the stand regularly on a salary, to come outside of it and publicly express his opinions of any driver's integrity. Mr. Strader had done this and Mr. Nuckols knew of it and had been advised by some of his friends not to attempt to drive at this meeting. This was common talk about the half-mile tracks in this section all season. I personally witnessed two incidents in which Mr. Nuckols was most unfairly if not outrageously treated by other drivers in races and on inquiry by me, as to why he did not protest to the stand, his reply was that he could not get justice and was afraid he would stir up further feeling. In other words, the stand was prejudiced against him.

Nothing in the Andral-James W. race indicated that anything was wrong. Two heats were trotted, both won by Nuckols with Andral. The third heat was the fastest of the three and up to the time into the stretch, a real battle. At this point Nuckols stopped driving and it was plain to all that his horse was beaten and all in. In the meantime somebody had told the judges that there was a job and Andral was to lose. There was no indication of this in the betting and without giving Nuckols a chance to show what he might do in the fourth heat, which could not be the last unless Andral won, and with no explanation or request for one, Mr. Strader summarily ordered Nuckols down and to surrender his horse to Fathburn. Nuckols' refusal to give up his horse was a breach of rule but under the circumstances a very natural action. He did not lose his temper, did not talk loud and said nothing a gentleman should not have said. He simply retired from the scene and had no hand in the row that started. This was simply a spontaneous outburst of feeling on the part of men who were familiar with all the angles of the game and did not intend to see injustice done.

Our solons of the turf are often too prone to look upon all drivers as crooks and to prejudice them as such. To my mind such an attitude is even more dangerous than to be too lenient and overlook crookedness. We are all human and all of us at times may err but I am firmly of the opinion that a large majority of our drivers are more generally honest than their owners and, often, their judges—and that they are smart enough to realize that honesty and straight effort means success, while crookedness means ultimate oblivion. Temptations for wrongdoing are numerous and unfortunately many times some of these temptations come from the judges' stand or the track proprietor. It would seem well if we were to more closely observe the advice of our great Lincoln in that we practice "with charity to all and malice toward none."

One of the earliest of the weekly horse journals to give publicity to the above was The Horseman, and in using the same they suggested that space for a reply would gladly be accorded Mr. Strader in case he cared to make use of it, and that gentleman was prompt in his acceptance, as witness the following from The Horseman's current number:

Lexington, Ky., Jan. 8, 1915.

In a recent issue of your paper you published a letter written by Mr. H. K. Devereux relative to the October race meeting at Rockport—the Andral race in particular.

Since Mr. Devereux did not see the race in question, it seems strange that he would feel competent to write such an article, knowing only one side of the question, and that only by "hearsay." It would seem natural that Mr. Devereux should have written to me to verify his statements before they were printed as facts. He might have talked with some unprejudiced person at least.

The article is untrue from start to finish and knowing Mr. Devereux to be a gentleman, I am sure he will wish to make a correction of his statements in every paper in which his article appeared.

I am surprised that a man in his position would desire to uphold the cheating and crookedness that is killing the horse interests.

It is absurd and absolutely untrue to say I have threatened Mr. Nuckols. (Why did he get in trouble the year before with Mr. King?) I did tell Mr. Nuckols, in the presence of other drivers and the judges, that he was the crookedest driver on the track and was lucky to be able to race. Any driver will say the same. At least many have so expressed themselves to me.

It is ridiculous to say my action in the stand was "hasty and done in the heat of anger and suspicion." Mr. Nuckols is a Kentuckian whom I have known for many years and with whom I have always been on friendly terms, but when I go in the stand, all drivers are alike to me, friendship ends there; neither do I go in the stand prejudiced. I was satisfied that Mr. Nuckols "pulled" Andral at Lexington and so stated to the other judges. It was common talk here that Mr. McCabe openly said that Nuckols pulled the horse and they "got the money."

Mr. Nuckols was treated the same at Rockport as several other drivers that were taken out. They surrendered their horses without protest and in most cases the drivers substituted went on and won. Had Mr. Nuckols surrendered his horse, as he was asked to do (I knew what I was doing) the trouble would have been averted. He did not do this because he knew his horse would win with Rathburn. He acknowledged this to one of his friends after his trial in New York. At least the information came to me "first hand."

He was in trouble in Rockport in 1913. Instead of being fouled, as Mr. Devereux states, he drove a deliberate foul, as I have been informed by Starter Upton and other reputable men who saw the race and know. He was also in trouble at the spring meeting, the August meeting, and again in October.

Andral is a faster horse, better gaited and gamer than James W. and can beat him easily. Andral won the sixth heat at Lexington in 2:09¾.

Mr. Devereux says the other judges were not consulted. One of the judges, I was told, was a former employe of Mr. Nuckols. He said he had driven Andral and that Andral could easily beat James W. This was before Andral had lost the third heat. I told Mr. Counter, the third judge, that I was going to take Mr. Nuckols out, and he said, "Anything you do will be all right with me." I did not consult the second judge, as I did not want Mr. Nuckols informed of our intentions. Such information had been given out before to the drivers from the stand.

Mr. Devereux makes a point of saying the other judges had no time to protest. When I called Mr. Nuckols to the stand and told him that Mr. Rathburn would drive his horse, he said, "I will drive the horse or I will take him to the barn." He also asked me why he was being taken out, and I replied that he did not try to win the third heat. Then he repeated his words about not giving up his horse. I then asked him if he realized what his refusal would mean to him and he still refused to surrender Andral. The other judges had plenty of opportunity and time to make any comment they wished. Had Mr. Nuckols said he was doing his best and would drive to win if he were allowed to drive another heat or even said: "Here is my horse, I would be glad to have some one try with him," it would have helped the case. But he did nothing of the kind. On the contrary, he openly defied the judges. There was nothing to do other than what was done.

There is a presiding judge at the meetings in Cleveland and each association has their presiding judge, and yet Mr. Devereux says the position is not authorized by the rules. Strange, to wait until this opportunity to publish that statement.

As president of the Grand Circuit and of the Cleveland Driving Park, if Mr. Devereux had on two occasions witnessed races in which Mr. Nuckols had been most unfairly and outrageously dealt with by other drivers, why did he not intercede in Mr. Nuckols' behalf?

One thing, after all, in Mr. Devereux's article is true, and that is that I go in the stand as a paid judge. I do, and for that reason do my best to protect the public and be perfectly fair to the drivers. If the public is not protected there is trouble and if the drivers are punished for wrong doing there is more trouble.

The jobbing, pulling and foul driving has put the harness horse on the wane and has driven many honorable men out of the business and yet Mr. Devereux upholds an act like that of Mr. Nuckols' at Rockport. It shows that he knows nothing of the case.

Mr. Nuckols had a horse that could win easily and he so evidently pulled him that his followers expected trouble and were ready at once to run out on the track. Mr. Nuckols won the first two heats easily. The third heat the two horses raced on about even terms for five-eights of a mile, then Mr. Nuckols simply took Andral back or stopped driving, and James W. passed him, Nuckols trailing along in the slowest part of the track. If he anticipated unfair treatment, as Mr. Devereux states, why did he not drive to win? Why did he start at all in a three hundred dollar race, the last meeting of the year? Does Mr. Devereux suppose for one minute that Mr. Nuckols would have won the fourth heat, if the bets had not been declared off? No! But Mr. Devereux was not at Rockport that day so how should he know. When Mr. Nuckols went on and won the fourth heat, he proved then that he could have won the third heat had he so desired. He had far the better horse.

I have no desire for notoriety nor have I time to bother to answer newspaper articles. The general public and the fair-minded men interested in the horse business know that I am absolutely right. However, Mr. Devereux has blazoned me forth in false colors and I feel I owe it to myself to state facts as they are.

Mr. Devereux's article shows how little he knows of the horse game and how willing he is to listen to the guilty parties and be influenced to stand for wrong doing. I am sure since he knows the true facts, he will be glad to retract his statements.

I have been for many years in a position to know the tricks of the game and have tried to the best of my ability to uplift the horse interests.

I consented to let Mr. Nuckols drive the fourth heat, not because I thought it was fair, far from it. I did it because Mr. Ernest feared a riot and had no police protection. Had there been police protection, Mr. Nuckols would have surrendered his horse or his horse would have been taken from him and his followers would have been put off the track.

The time has come when the public will no longer stand for unfair racing. As it is now, a man cannot bet on the best horse but he must bet on whether or not the driver will try to win.

Mr. Nuckols has my sympathy. No one has more charity than I for an offender, but these things should not be allowed to go unpunished. Mr. Nuckols should know and did know, that he could not place himself in the position he did and go free.

As to the meeting being declared off, Mr. Ernest told me he did so because he had been insulted and humiliated by the drivers and by their uncivil treatment of him. I believe a county official had nothing to do with declaring off the meeting.

I have heard from different sources that Mr. Nuckols has the reformers behind him and that he is going to make trouble if he is not reinstated.

If this is true, Mr. Devereux had better spend his time getting laws passed to protect the betting in his state and uphold clean, honest racing than to spend it in upholding the crookedness that he should know is pulled off every day at race meetings. Every other follower of the game knows this.

It has been proved that the harness horse racing can live without betting, and if betting entails such outrageous acts as the Andral race, then betting had better be eliminated.

Honest racing will materially help the breeder. Instead of breeding a colt that sells for seventy-five dollars at weaning time, the breeder could as well receive two hundred, and a thousand dollar colt should bring five thousand. Isn't it worth while?

ROBERT S. STRADER.

SOME STRETCH — AND SOME SHRINK!

Up spoke Uncle Zack McGee at Archer's grocery store,
"The big rain spoiled," he said, says he, "my buckskin harness—shore.
A bran new buckskin harness spiled in that plague-take-it rain,
Plum ruined, that's the word for it, if I must state it plain.

"My woman was a-needin' wood—she punched me up to go
And take my axe and heave some whacks and lay a 'monarch' low;
I hitched my cattle to the log and hollered out, 'Git-app!'
The rain was comin' down in sheets, enough to drown a chap.
I climb upon my off ox Duke and drove 'em at a trot,
And never once looked back till we was in the choppin' lot.

"'Twas there I meant to jist onhook, but soon as I got down,
I saw there wasn't nary log a-lyin' on the ground;
But back there in the clearin' where we started from so gay
I looked and saw the log, and it was where it used to lay.
That buckskin harness wet with rain had simply stretched a mile,
And hadn't budged my log o' wood no nearer to the pile.
So I onhitched old Jeff and Duke; my heart was in the dumps.
I took their collars off and threw 'em on a pair o' stumps.
I told my woman, 'Go to bed, we'll have no fire tonight.'
Then I turned in, all gone to staves, and mad enough to bite.

"The mornin' sun came out and dried that buckskin harness hard;
It shrunk and drew that distant log right up into the yard.
The reason I'm in town today, I'll tell you grinnin' chumps—
To buy some dynamite to blast that harness off them stumps!"

—"Evening Mail," Rider and Driver.

J. D. Kellar of Detroit, Mich., vice-president of the Sell Horse Goods Company, has been on the coast recently on his customary occasional western trip in the interests of the big concern of "boss hoss haberdashers" and was given the glad hand — and his share of business—by many old acquaintances. From San Francisco he took the north trail for the Willamette and Puget Sound.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects
READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

DON PRONTO 2:02¼,

eight years old, pacer, no straps, needs no boots; sound, not a blemish or a puff. Any amateur can drive him as well as a professional; has been in 2:02 with a 230 pound amateur up. This is a matter of record. Don Pronto is the cleverest all-round high class pacer in the country. Has held a world's record and is from the dam of Manrico (3) 2:07¼, a world's record holder. Is bred to be a great sire, being by THE DIRECTOR GENERAL (sire also of Wy-Drad 2:04¼, William O. 2:04¼, Mainsheet 2:05, Deuchester 2:07, etc., 8 in 2:10), and out of SILURIAN, that wonderful producing daughter of Wilton. Don Pronto was the biggest money winning free-for-all pacer in the west both in 1913 and 1914. Can surely beat his record. Is very beautiful, pleasant and a great favorite. **Price $1750.00.**

ALARICH 2:11¼ (Breeder's mark 2:09),

trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. **Price, $650.00.**

HELEN BELLE, 2 yr. old record 2:22½,

bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; obtained her record with very limited training, is being worked at present and improving right along. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Panama-Pacific $5,000 stake for three-year-olds; the Occident and Stanford stakes, the State Fair, P. C. T. H. B. A., Pleasanton and Oregon Futurities for 1915. **The best buy in California at $1750.00.**

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. **Price $1000.00.**

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. She has been up from pasture about six weeks and trialed this week in 2:53 very easily, last eighth in :20¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. **Take her at one-third her value, $500.00.**

OMAR,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). **A present at $350.00.**

CARLSCHEN (2) 2:23,

brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. **Price $800.00.**

BROWN COLT, (unnamed),

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. **Price $1500.00.**

JOHNNY DUGAN,
3-yr.-old record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert L. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. **A great buy at $350.00.**

WHITTIER,

bay gelding, trotter, five years old, trialed last year in May in 2:11, last half 1:04. Sired by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc.

Whittier is sound, good gaited, an exceptionally good headed trotter, and should beat 2:08 this year. He stands A-1 with the railbirds around Los Angeles—what more could be said when "That Bunch" all praise him? He is ready to begin fast work, having been jogged about six weeks. **Price $1000.00.**

CARINA,

bay filly, trotter, two years old, by CARLOKIN, dam ATHERINE (dam of Copa de Oro 1:59, Rags 2:09¼ and Nicola B. (2) 2:23¼, tr. 2:17, winner of the Oregon Futurity and second in the P. C. T. H. B. A. stakes for two-year-old trotters). Carina is entered and paid up in the same stakes as Carleta. She is a grand looking, well developed filly, showed a :40 gait at eleven months old. Is good gaited and good headed, is in training and promises to make a high class trotter. **Price $600.00.**

In addition to the ones mentioned I will offer to intending buyers RAGS 2:09¼, NICOLA B. 2:23¼, JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), a YEARLING BROTHER TO ESPERANZA 2:09, engaged in all of the Stakes, the phenomenal two-year-old pacer SANDY McNABB (staked), MISS QUEALY (full sister to Manrico), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

The Best Buy in California

for the Horseman, Sportsman, Stockman and Farmer.—The Breeder and Sportsman and The Breeder's Gazette for one year

For Only Three Dollars

THE FARM

RAISING COLTS ON THE FARM.

The high prices of horses has led many farmers to raising colts as a side-line. And there is no other thing that fits into average farm conditions as well. During the winter and early spring little farm work is performed and the horses might as well raise a few colts.

On the most farms it is best to have the mares foal in the spring so that by the time the spring work starts the horses are ready for the harness. Colts should be weaned at six months in some cases. A great number of colts stop growing after being weaned. This is due to the owner in almost every case. The colt should be eating grain before weaning and good pasture provided. In this way no setbacks will occur in the colt's growth.

Many farmers make the mistake of keeping their colts in the barn too much. A good warm stall is a fine thing on stormy days and at night, but let them out during the day, even if it is a little cold.

For the last few years there has been a steady increase in the price of good horses. There never will be a time when horses will pay better than at the present. The farmer who has money in the bank or who is looking for a good paying investment should consider raising colts. Suppose you have a team of mares worth five hundred dollars. If you had that amount in the bank you would not get over ten dollars interest, but if you raise two colts you would get over a hundred dollars. Is there any other thing that will pay as well? If there is, I and a lot of other farmers would be pleased to know what it is.

Of course there is an element of risk to it as well as to any other business, but where common-sense methods are used, raising colts is no harder than raising a crop of wheat; and there is a lot more money in it.—Bernard E. Coffin in The Farmer, St. Paul.

FEED FOR HARD-SHELL EGGS.

The feeding of hens for the production of hard-shelled eggs, not easily breakable in handling, is possible and demands attention. Shells vary greatly in strength. A strong, heavy shell is not nearly so likely to be broken by the jars, jolts and rough handling incident to ordinary shipment as a weak one.

Chemical analysis shows that the shell of an egg is largely carbonate of lime, but that it also contains carbonate of magnesia, mineral phosphate and some organic matter. If strong shells are to be produced, the mineral elements must not be lacking. Grains that are ordinarily fed do not contain these mineral elements in sufficient proportions, and an additional and separate supply is necessary. Fortunately, these mineral elements are available in much cheaper forms than in grains. Lime is the principal ingredient of oyster shells, which may be procured for about $12 a ton. Iron, magnesia and often phosphorus in many kinds of grit, may be procured for about the same price, while these elements in grain would cost at least double these figures.

Bone meal contains phosphorus in appreciable amounts, besides lime, magnesia, etc., and while expensive, it is effective in giving the shell an evenness and fineness of texture which adds much to its strength. It is, therefore, often used as an ingredient for dry mashes for laying flocks, usually in amount varying from 3 to 5 per cent.

Eggs that won't break give the poultryman greater profits than eggs that will. Make your hens lay the non-breakable kind.

THE OLD-FASHIONED FARMER.

The man of the soil is a well-equipped personage in spite of all his seeming deficiencies. He can't stop to theorize when things want doing. He must plod along and get work out of the way. Sometimes a couple of hours means the saving of a big field of hay or corn. The man on the job has to know how and has to act on the hour. A hurry-up call to get in five or six loads of hay before the rain falls or to finish planting a field of grain means quick work and hard sweating hustle. The practical farmer meets all such problems as a matter of course. Usually he does not brag about what he accomplished. That is one trouble—he does not know how to put up a bluff and a lot of people think he does not know anything. I want to say that it is really marvelous what the old-fashioned farmer knows and does.

In a feeding test made near El Centro, Imperial county, recently, M. C. Moody found a large increase of milk flow and butterfat content while feeding alfalfa hay and spineless cactus over that received while feeding alfalfa hay and cotton seed.

THE LAWRENCE-WILLIAMS CO., Cleveland, O.

FOR SALE.

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great producer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

FRED W. KELLEY,

366 Pacific Bldg. San Francisco.

J. J. Ryan, San Francisco, offers for sale the pacing gelding

Happy Dentist 2:05 3-4, MATINEE RECORD 2:06 1-4

useful in his class in professional company, unexcelled as a matinee horse. Holds coast matinee record, 2:06¼ and 2:06¾, and was best winning horse in San Francisco Driving Club matinees in 1914, by actual figures. Right in every way physically, perfect in gait and manners, fearless on road, and can be driven in any company by a lady. Offered for sale only because I have too many horses for my use. None better bred—by Nutwood Wilkes 2:16½ and out of the great brood mare Azrose (dam of 3) by Azmoor 2:20½, son of Electioneer 125. See him at the McKinney Stables or address for particulars

J. J. Ryan or Al Schwartz

McKinney Stables, 36th Ave. and Fulton St. San Francisco, California

SAVE-THE-HORSE TRADE MARK REG'T.

¶ No "Blue sky" advertising, nor whirlwind up-to-date and down-to-morrow, career marks Save-The-Horse. Its sale is greater today than ever because throughout the whole world, against all comers, it has **stood up and "made good"** under every test.

¶ That is why the druggists say: "They come again for Save-The-Horse."

BEATS OUT the HUMANE SOCIETY

Youngstown, Ohio, May 4, 1914.

I used Save-The-Horse for splint when the veterinary said I must let her up and blister her—however, I sent for Save-The-Horse, used it as directed and never let her up. I would take her out to jog when she was so dead lame that the "Humane Society" would have had me arrested had they seen her. But she was worked right through it, and won five races, one after the other a week apart, and no one ever saw her take a lame step.

Very respectfully yours,
C. O. BROWN

HIS FEARS GROUNDLESS

Newton Falls, O., Oct. 25, 1914.

I have followed the horse business all my life and I never saw anything that took effect so soon.

I broke my middle finger a year ago—and it has bothered me ever since, and when I commenced to use the medicine on my horse, I also rubbed the brush on my finger twice and I could see the biggest difference, but I am afraid it might be too powerful and would like to know if it would hurt the human body. If not, you should recommend it for broken bones.

Yours respectfully, C. M. HOOVER

"Care and Training of Trotters"

Have Been Sold in Europe and Australia.

This is the book for you. It should be in your library. It is the first book on its subject in over 20 years. It was compiled by a competent staff from information furnished by almost all the leading American breeders and trainers of the day. It is a book of 112 pages, illustrated, bound in cloth, and will be sent you postpaid on receipt of $1.

Joseph M. McGraw, Washington, Pa., says: "Your book is the most instructive of its kind I have ever seen. It should have a large sale." If this book is instructive to a professional horseman like Joe McGraw, will it not interest you?

T. C. McBride, Sewickley, Pa., writes: "I wish to say a word of praise for the book. It was more than I expected. I see you have the secret of bookmaking. The paper and binding make it a joy forever, as well as a thing of beauty."

The Trotting World of London, England, says: "It is just the book we have been waiting for."

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

Price: Paper $1.00. Cloth $1.50. Sent Postpaid

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

.22 CALIBER SPOTLIGHT CARTRIDGES

The bullets with which these cartridges are loaded emit a bright flash of light when they strike the target, which shows the location of the shot. The ability to tell instantly and without the aid of a glass where the shot hits adds lots of fun to target shooting. Try some of these Spotlight cartridges. They are novel and sport-making. They are loaded in .22 Short with either smokeless or "Lesmok" powder, and in .22 Automatic with smokeless powder.

THE LIGHT SHOWS YOUR SHOT.

Don't Use An Ordinary Gun Oil

IMPROVED guns and high pressure smokeless powders have brought about a demand for a better oil than has been available for the sportsmen's use. Rem Oil, "The Perfect Gun Oil," combines all advantages of a perfect lubricating oil, a powerful solvent and a durable rust preventive in a single mixture. Questionably this is the most highly perfected oil which has ever been produced for use on firearms. ¶ Rem Oil is put up in glass bottles, at 25 cents each. Equally effective for use on Typewriters, Sewing Machines, etc. For Sale at most Dealers.

AS TO SUNDAY MATINEEING.

With January on the wane and but a comparatively w weeks intervening before the time when racing n generally be commenced on the coast with safety the horse and comfort to the driver and specta- r, members of the local driving clubs are laying ans for the inauguration of a series of matinee ograms that will surpass in the quality of racing en those given during the season of 1914, which as the banner year for the fun drivers in San rancisco. The early Saturday matinees proved good awing cards, and when the change was made to nday the crowds that flocked to the weekly events the Stadium ran well into the thousands, establshing beyond controversy the hold which the sport as upon the local public. The interest increased eadily throughout the season, which is the healthiest evidence possible to introduce in favor of the opularity of any sport, and attendance was never reater than at the last matinee, when Zulu Belle stablished a new mark for a competitive affair over ne three-quarter-mile track in Golden Gate Park.

While the Stadium speedway has proven most ceptable in the past as a location for the holding matinees, there is a movement on foot at present mong both clubs' members to transfer the scene activities for 1915 to the big track at the grounds the Panama-Pacific International Exposition, and here is much that might be said in favor of such a lan that is too self-evident to need reviewing here. he mutual benefits that would accrue to horsemen, xposition managers and public as a result of weekly acing at the P.-P. I. E. track are, patently, varied nd extensive.

The only evident hitch in the proceedings is an nclination on the part of some "powers" of the xposition people to frown upon Sunday racing, hough it is probable that this objection will be overome. The matinees held by the driving clubs are ot money making affairs or mediums for betting, ut serve merely as opportunities for thousands of eople to derive the pure enjoyment that comes to a over of the horse from watching a clean speed conest—a case of "sport for sport's sake." Last year here was a bit of the same feeling in evidence when he change of dates from Saturday to Sunday was nade at the Stadium, but subsequent events and he so-generously attested public approval of that ourse spoke eloquently of its wisdom. The Sunday acing in no way contributed to the delinquency of ublic morals, and it brought inestimable added leasure to the one joy-day of the seven for thouands of San Francisco's sport loving public whose usiness interests or hours of employment would rohibit their attendance at a harness matinee on ny other day of the week.

There are rich men in the ranks of the driving lubs, just as there are rich men whose faces will e found in the crowds attending the races, perched igh in the grand stand or ensconced comfortably in heir autos in the parking space around the west urn, but the rank and file of both contestants and pectators is drawn from the great army of workers f all classes, from day laborers to bankers, whose ime for six days of the week is fully claimed by usiness pursuits. For these and, in many cases, heir families, there is but the one day when relaxtion is possible, and that day is Sunday. Should ot the benefit of the many have the right of way n preference to the personal prejudice of the few? Also, if the joy zone is to operate on Sunday, what reasonable objection can be raised against Sunday racing of an amateur nature?

No matter what the course taken by the exposition authorities may be, matinee racing in San Francisco will go ahead for the season in the same old way—only "more so." The Stadium speedway is one of the best fun tracks in the country, the location is good, and the class of racing afforded is the equal of much generally put on by professionals on some minor circuits, better in fact, than a good deal of it. We have the drivers and the horses to compete with driving clubs in any city, and the sport has the hold upon the public that guarantees a good attendance when the season opens in May, be that opening held either at the Stadium or the grounds of the P.-P. I. E.

THAT RACING MEASURE.

News was circulated about town early in the week that the legislature had a "racing bill" due for its consideration, but if the talk had for its foundation the measure known as Assembly Bill No. 720, introduced at the Tuesday morning session by Assemblyman Joseph E. Marron of this city, we fail to find grounds for the development of any enthusiasm over the situation that would be created by its enactment. A copy of the bill has not yet reached us, though application has been made for the same, and from the review of the bill appearing in Sacramento and San Francisco dailies we have been able to find neither "rhyme nor reason" for its introduction.

So far as we are at present aware, the bill concerns running races only, and on the face of it makes no provision for the laying of wagers in any way, shape or form. Briefly, the main provisions of the measure are as follows:

Any corporation formed in California for the purpose of racing and breeding horses can conduct one or more running race meetings within each year.

Purses, prizes, premiums and stakes may be offered in these races, provided that only owners of horses entered in the races shall have an interest in these purses.

Only one race meeting can be held in the same county in one year, and no single meeting shall last more than thirty days.

For the purpose of regulating such racing, the bill provides for the creation of a state racing commission of three members, to serve four years, and to be appointed by the governor within twenty days after the bill goes into effect. This commission must make a biennial report to the sate legislature in regard to racing conditions in the state.

The commission shall prescribe rules governing running race meets, and issue licenses to racing corporations. No running races can be conducted save by corporations duly licensed by the commission. Such licenses shall be renewed yearly, and shall be subject to revocation by the commission, with the proviso that any holder of such license shall be entitled to submit such revocation to the courts of the state for reviewing and decision as to whether it is just and merited.

Five per cent of the total gate receipts of all race meetings held in the state under the provisions of this bill are to be payable into the general fund of the state treasury.

The bill provides a penalty for "illegitimate" racing, to consist of a fine of from $500 to $1000 a day for every day such an illegitimate race meeting is conducted. The bill was referred by Speaker Young to the committee on public morals.

It has been proven in the past that thoroughbred racing will not pay in California without betting save in connection with fairs, and there are at present no obstacles in the path of promoters of races. Any association that so desires may easily arrange a running meeting without betting or without per centage payment to anyone whatsoever, so the measure falls absolutely flat in its avowed purpose, the re-establishment of thoroughbred racing in California. Racing under its provisions could pay only through the illegitimate operation throughout the towns and cities of the state of a chain of hand books and shady pool rooms in whose profits the racing associations share—a condition absolutely untenable and one whose creation would result merely in another "black eye" to the sport.

In any case of the establishment of racing under a commission or for limited periods in a county, proper provision must be made for the holding of harness races, and protection provided for the fair associations who give a few running races in connection with their regular programs. However, the bill as a whole is such a weak sister that there seems small chance of the legislative bodies paying it serious consideration, so that it is not probable that it will ever become operative.

THE HORSE REVIEW RACING GUIDE.

Too late for the proper expression of our appreciation in our preceding number, Volume Three of the Horse Review Racing Guide found its way westward last week to join its brothers in the place of honor on our work bench—which means the spot on the desk where they can be reached most handily, for of all works of reference useful in this business, none is in so constant use as the Guide. For a great deal of extremely valuable information, its statistical tables have the Year Book fighting the flag, and accuracy, the keynote of all statistical work if it is to be successful, is strictly observed. Indeed, in the few instances where there may be a slight discrepancy between the figures and fractions appearing in both publications, the first inclination on the part of many horsemen is to accept the Guide's figures as the proper ones.

In addition to the great array of summaries of the races of the season of 1914—in which, praise be, the names of the drivers are given whenever obtainable—the big features of the Guide are the complete 2:10 list, the 2:30 list for 1914, championship tables of almost every conceivable description, the largest winning campaigners, the dams of ten or more standard or two or more 2:10 performers, a comprehensive breeder's directory, and much attendant information of both interest and value. It is undoubtedly the one best bet for the library of the everyday horseman and worth many times over the modest sum its publishers ask for it.

The publishers of the Horse Review may show poor judgment in describing Chicago as a "climatic paradise," but they are certainly entitled to the winning brackets around their names whenever a new Guide appears.

PACIFIC COAST BREEDERS who have foals of 1912 nominated in Pacific Breeders Stake No. 12, the three-year-old divisions of which will be raced at the fall meeting of the P.-P. I. E., are reminded that a payment of ten dollars is due on each nomination on Monday, February first—NEXT MONDAY. Under the provisions of the stake, $2500 will be raced for by the three-year-old trotters, while $1500 is provided for the sidewheelers of the same age, with the following "side money" awards: $200 to the nominator of the dam on whose original entry is named the winner of the trot, and a similar sum to the original nominator of the pacing winner; also $100 each to the owners of the sires of the winners at the time the dam was bred. California's futurities in times past have been as hotly contested as the classics of the east, and indications point to some great colt racing here this season, as there are very many staked youngsters of much promise in training.

STALLION OWNERS are in many instances preparing for the opening of the breeding season by laying in supplies of stallion cards and other matter setting forth the various good qualities of the horses whose services they offer to brood mare owners, and by giving orders for their announcements in the business columns of this publication. The cards of three prominent sires appear in this issue, and others are scheduled to start with the first issue in February. so that our pages will soon afford breeders a good deal of "food for thought" in considering the merits of the various horses to whose services they have access. No other medium serves the needs of the horseman as does the Breeder and Sportsman, and stallion owners who are alive to the situation will see to it that their sires are represented in the select company which is presented through this medium.

THE TROTTER AND PACER, doubtless meaning to be complimentary to the highest degree, makes the statement in a recent number that "Will Durfee of Los Angeles is the Tom Murphy of California," and for some reason the comparison doesn't "rest easy" on our mind. Not disparaging the achievements of Mr. Murphy in the least, for there is no gainsaying the premier reinsmanship of the wizard of Pughkeepsie, it is pretty hard to convince a Californian that as an all-round horseman—breeder, stallion owner, trainer and race driver—Tommy Murphy is even the Billy Durfee of the Atlantic seaboard!

A Week-end at Woodland

After being notified last week by Harry Dowling that the incubator at Woodland Stock Farm was accommodating a setting of some four hundred eggs I planned to make my next visit to that speed nursery about "frying time," but one of the certainties of this world is its uncertainty, and last Saturday found me again in Yolo and again a visitor at the farm, taking especially good care to be on deck about the time H. S. started for lunch. Nor did I miss the chicken from the lunch menu, for the other member of the Dowling firm takes lessons from no one when it comes to providing the kind of meals that the boys look back to with longing when they are out on the circuit—and which a restaurant fed "city cuss" cherishes long in memory. Generally it is hazy or drizzling when I hit Woodland, but Saturday was a different kind of a day, pleasant and sunny, with but little wind, and everything "broke right" to make the trip enjoyable—the weather, the visit with the boys and horses, the hospitality extended at the house, and the auto ride in mid-afternoon across the heart of the valley to Davis.

* * *

Elmo Montgomery is back at the Woodland track with a larger stable than he generally trains, as the Logan family keeps increasing, and he has some outside horses as well. His horses are in the string of stalls just inside the grounds from the main entrance, and with Jim Logan and his mates in the old familiar place, Woodland Stock Farm seemed more natural than it did when I was there on my last trip.

TRUE KINNEY 2:12¼

Jim was getting his morning jog when I arrived at the grounds, with Tenessee Bill Morrison up behind him and the lines dangling about his hocks—if Bill had slid out of the cart I believe I would have risked a small bet that the old scout would have jogged on until he decided that he had had enough and then leisurely hunted the barn. For a horse that has been on the go since he was two years old (which wasn't yesterday or last season by any means, as he was foaled in 1906) he is in remarkably good shape and his racing days are not yet over, as Elmo is pointing him for the June meeting of the P.-P. I. E., along with some of the younger members of the stable.

That Jim Logan (who was with Klatawah joint holder of the three-year-old pacing record of 2:05½ in former years) transmits his qualities to his get is proven without going outside the Montgomery stable, which includes two four-year-old mares by him. One of these is Maxine (3) 2:15, the first and only three-year-old of the family to be trained, and winner of the three-year-old pace of the Breeders Futurity at Salinas last summer, over a track whose record of 2:06¾ was set by her dad. Her dam is Trilby Maid by Black Ralph Jr., and Elmo is confident that she has a great future, so satisfactory has been her response to all demands made of her to date. The other four-year-old, now just broken, belongs to H. J. Kinkead of Fallon, Nevada, and is out of Katie Steinway, the full sister to Klatawah, etc. Just what sort of an animal for speed and stamina this instance of inbreeding will produce is yet a problem, but individually she is a very nice mare.

Next in attraction, of course, are the other Effie Logans of which there are three in the stable, at least two of them looking to be the real goods. The third and youngest has all the natural qualities of the others, but is bunged up from mishaps as a suckling so that he hasn't a fair show with the other two. The oldest of the trio is the brown scamp Lock Logan, whose sire, Zolock, set forth some weeks since on a trip to Europe for the good of the business in that country. This laddie Elmo wished to save for a stallion and persisted in that determination until last fall, when he came to the conclusion that he was following a "bum steer," whereupon the vet was called in and the young gentleman was emasculated. This took place shortly before the Arizona State Fair, and at this time Lock Logan is not only in prime shape again but he is a much improved horse in every way as a race prospect. He has a good turn of speed and as a four-year-old worked in 2:12¾, 1:03¼ and :30¼.

It was to the cover of Diablo 2:09¼ that Effie Logan threw the youngster that first brought her into prominence as a brood mare—Sir Albert S. 2:03¾, the speedy sidewheeler bred by the late Wm. G. Layng—and it is back to a similar nick that her owner went in search of more speed, the two youngsters Rush Logan and John E. Logan in the Montgomery stable being by Demonio 2:11¼, full brother to Diablo. As progenitors of extreme speed these brothers are running a pretty evenly matched race and the development of the Demonio-Effie Logan pair will be of added interest on this account. At the close of 1914, Diablo was credited with eight 2:10 performers, the fastest of which was Sir Albert S. 2:03¾, while brother Demonio had seven, headed by Mona Wilkes 2:03¼. Daughters of Diablo have three in 2:10, while those of Demonio have but one, Del Rey 2:03¾, but in the future it is probable that the representation of Demonio, in both branches, will see the most numerous additions. Rush Logan is a husky lad, three years old, with apparent present right to develop into a fast horse, but the other boy is the hard-luck youngster previously alluded to. He was trampled while a baby and has a knee that may or may not bother him as age comes on, and he seems inclined to gather in most of the other ills to which a colt is heir. At that, he may turn out a regular go getter, as such things have more than once come to pass in the case of hard luck colts—Cresceus 2:02¼, for a notable example.

Another member of the stable that carries the "family blood" of the Montgomery establishment is the two-year-old filly Carolyn M., the one and only living foal of Lock Logan, and out of the dam of Maxine. She is staked in the pacing events for two- and three-year-olds and has a chance to be right up with the bunch at the wire, as she is showing nicely and is a racy trick all around, with especially pleasing underpinning. For the three-year-old paces Elmo has Bondalean (2) 2:20½, that took second money in the two-year-old pacing division of the Breeders Futurity at Salinas and later won the Pleasanton event for that age and gait, obtaining his record in the latter. This lad was bred by the late W. J. Miller of Chico and is at present the property of the estate, which was devised intact to Mrs. Miller. He is by The Bondsman and out of that former futurity winner at the trot, Katalina 2:11¼ by Tom Smith, and made a host of friends by his performance in the Breeders Futurity, when he gamely "stuck it out" in spite of lameness. Troubled as he was by his feet he worked in 2:15 as a two-year-old, and now that he is squared away with a good set of hoofs under him he looks to be pretty formidable in his class.

Booze 2:07¼, the Sacramento pacer belonging to Jack Lauffer and formerly in Col. Jim Thompson's hands, is Elmo's class pacer if he lives up to Sacramento claims, and is taking his early work nicely. His racing career is confined to the one start at Santa Rosa in which he won the second heat from Guy Borden in 2:07¼ and was second in the other two heats to the son of Guy Dillon in 2:07¼ and 2:07½, but in his work he has shown considerably more speed than that. However, whether he is "hundred proof goods" or merely a "bar whisky" composed mostly of cheap spirits, burnt sugar and fusel oil will be developed from the samples that Elmo will indulge in a bit later on.

From the foregoing paragraphs one might get the idea that the Montgomery stable is purely a sidewheeler affair, but there is one trotting miss who is a candidate for the three-year-old stakes. This is Winnie Bond (2) 2:27½, by The Bondsman—Miss Winn by Demonio 2:11¼, bred by Rush & Haile of the Suisun Stock Farm. From a discouraging prospect as a two-year-old, as she was apparently hopelessly tangled in her gait, Elmo has brought her along to the point where he thinks she will trot close to the coast record for her age this year and amply repay the time spent in straightening her out.

* * *

While standing at the drawgate talking to some of the boys, I heard a mid-summer clatter of hoofs behind me and turned just in time to see Hi Hogoboom come down the stretch with a bay youngster with a mighty honest way of going, and when I trailed Hi to his quarters across the road from the Considine establishment I found out that he was honest in more ways than one, as his name is Honest Boy. He is a four-year-old Palo King, out of Miss Ione by Iran Alto 2:12¼, second dam Ione by McKinney, third dam Gyp (dam of two), etc., and he is working mighty nicely at the trot—has a big reach and a straight-ahead way of going that ought to declare some dividends later on. Hi also has a yearling full sister to him that is a pleasing little lady, merely ground broken, entered in the Breeders Futurity.

Little Tim is another Palo King two-year-old trotter of promise, first, second and third dams by Kinney Rose, Stam B. and Silver Bow, respectively, and Woodland King by Palo King, out of Beautiful Bird by Nutwood Wilkes, second dam the great broodmare Expressive 2:12½ by Electioneer, is the stable's entry for the Occident and Oregon stakes this year. This is a fine looking lad and a trotter of quality, as you are likely to learn for yourselves later on. Hi is just breaking a four-year-old mare by his premier and out of a daughter of Falrose for Mr. Chalmers of Woodland, and while no speed has been made with her she has the general build and inclination that marks her family and will no doubt pay a good profit for her handling.

One of the nicest members of the string is Beautiful Girl, the four-year-old sister to Alto Express 2:22¼ (by Iran Alto 2:12¼—Beautiful Bird, etc.). She differs from the Palo Kings in color, being a rich chestnut while they are pretty uniformly bays, but she has all their quality and finish and had standard trotting speed as a two-year-old. Similar in color but different in gait and breeding is the lad in the adjoining stall, Enchilada, by Palite, dam Paprika by Oro Belmont, etc. Hi had him up in Oregon last season and gave him a record of 2:18¼ over the half-mile track at Eugene, while in his work he has taken a rap at the 2:10 figure.

The boss of the outfit I found taking things easy at a haystack behind the barn—Little Express (2) 2:20, winner of the two-year-old pacing division of the Breeders Futurity at Salinas last year. She is the first of the get of Alto Express to go in the list and is the right kind for a horse to start in with, as she has race not only in her physical makeup but in her head as well. She is one of the best prospects for the three-year-old classes this year, and is bred in speed producing lines on the maternal side, being out of Diawalda (dam of The Bulletin 2:28½) by Diablo 2:09¼, etc., and a bit of a story goes with her in this respect that will be told at some future day. Palo King himself is in fine winter shape, and incidentally 1915 looks like a good year for youngsters by him.

* * *

Dr. D. F. Herspring is "taking his" on the road in a buggy at present, but will start speeding up a bit before long and move to the track with three head. Little Lucille (3) 2:09, that repeatedly proved her quality in her three-year-old form in 1911 by pacing in or around 2:10 on various occasions, will be raced by the Doctor this year under lease from her owner, John Clark. She is the fastest of the Palo Kings, from a Diablo mare, and the legs that previously gave her some trouble are in nice shape at present, and her present trainer has had pretty good success in keeping doubtful underpinning bolstered up. The other aged member of the stable is also a Palo King—Don Rosine, six years old, out of Fidelity by Falrose 2:19, second dam Mischief 2:22¼ (dam of Primrose 2:13) by Brown Jug, etc. He has worked at the trot in 2:29½, 1:08½ and :33¼ and is a most attractive individual, one of the showy kind. C. A. Harrison calls him "the Woodland dude," and Herspring is laying plans to force Clinton A. to take off his hat to him for more than mere appearance.

The lad that the Doctor hails as the real goods as a trotter, however, is his three-year-old colt Richmond Rankin, and if breeding makes 'em this lad is there with all four feet. He is by Zorankin (2) 2:29¾ (a son of Zombro 2:11 and Dimontes by Diablo 2:09¼) and out of Edna Richmond by Richmond Chief 2:11, second dam Edna R. 2:11¾ by Sidney 2:19¾ (sire of the dams of eleven in 2:10), third dam Stella C. 2:26, a producing daughter of Director 2:17, fourth and fifth dams by Speculation and Gaviotta, respectively.

* * *

The Woodland Stock Farm string was given a pretty thorough going over in print at the time of my last visit, and few if any changes have been

made in the personnel of the training stable, and everything is working to the entire satisfaction of Superintendent Dowling and Walter Maben. The string of yearlings and Johnny Ray's horses that were sent to Lexington lightened things up a bit on the daily program of jogging so that the boys are able to devote more time to bringing along the ones that are pointed for the races this year. Clara Mac 2:04½, last year's pacing queen, and Lottie Ansel (2) 2:14¼, the best two-year-old trotting filly of 1912, are taking a good deal of their exercise to pole and like it. The black mare has been taken up and clipped since I saw her last and is as "slick as a whistle," while Lottie Ansel is maturing into an exceedingly handsome mare and promises to go on with her speed as well as she started with it. The youngsters of the stable are coming along nicely, with not much asked of them to date, but there is ample time for speed making before any of their engagements roll around. Josie Ansel rises in Harry's estimation with every ride he takes behind her, and defi's are issued to any and all green pacers on the coast for a genuine horse race whenever the bell rings this season, as she is regarded at the farm as the "1915 Clara Mac."

Quarrie Denmark and Gayristo, the high school saddle horses, were sold recently to R. J. MacKenzie for the use of himself and "Mrs. Mack" and they will probably figure pretty prominently in the horse show here in San Francisco next month. Harry has a hankering for the pigskin seat, however, and in between chores like putting in a crop, re-roofing the training stables, shoeing a few horses, clipping others, jogging still more, etc., he finds time to give a bit of attention to Prince Arista (brother to Arista Ansel (2) 2:18¼) whom he is educating as a saddler, and who is taking kindly to that system.

The colt crop promises to be a good one and the mares are looking especially good for this season—in good flesh and healthy and hearty. The first foals are due shortly and are awaited with much interest, as a big band of baby trotters are just about as fascinating as a good field of aged horses on the track. Prince Ansel is taking daily work and thriving wonderfully well under it, and a number of outside matrons are already booked to him and his stud companions, Robert Bingen 2:11¼ and True Kinney 2:12¼.

———o———

Two "somebodies" in Chicago evidently figure that first money in the big exposition stake and other events of the season is already as good as won by Dr. Burns, Jr., the great pacer now at Los Angeles in the stable of Al Whitney. Ten thousand dollars was offered for him recently in the Windy City, which is the Horse Review idea of a "climatic paradise," and gently but positively refused.

———o———

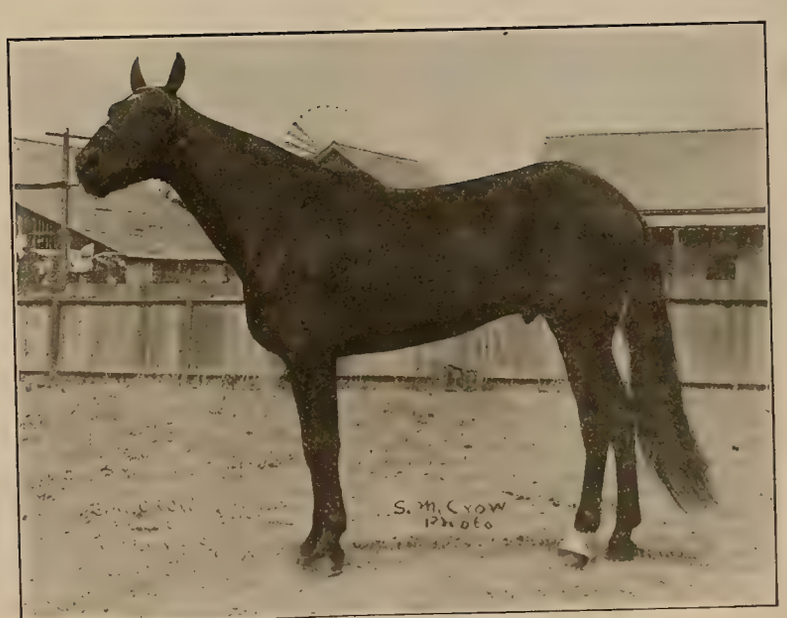
GEO. W. McKINNEY 2:14½.

As noted briefly in the last issue of the Breeder and Sportsman, the good trotter and speed sire George W. McKinney was killed Monday, January 18, at the establishment of Dr. B. C. McKlintock at Fullerton. Two years ago the old horse was purchased from Hemet Stock Farm by John Davis, but had failed rapidly of late from advancing years and had been bought by his last owner in the hope of expert treatment building him up. The effort came too late, however, and when he was found down in his stall last week he was put out of his suffering by a bullet.

George W. McKinney was bred by the late Colonel E. L. Mayberry of Alhambra and was one of the early sons of McKinney 2:11¼, having been foaled in 1893, the year following the birth of Zombro 2:11, foremost among the sons of the Durfee premier as a progenitor of extreme speed. The dam of the bay fellow was also bred by Col. Mayberry and was a rugged old time trotter herself—Lady Washington 2:35. Foaled in 1874 (a daughter of Whipple 8977 and Lady Mayberry by Chieftain 721), she did yeoman road and pleasure service, won a number of races for her owner over the old track at Los Angeles early in the 'eighties, and then gave excellent account of herself as a brood mare. In 1890, to the cover of Alcazar 2:20½, she produced the trotter El Molino 2:20, and when mated to McKinney gave birth to George W. McKinney 2:14½ (1893) and Washington McKinney 2:17½ (1896). Both raced to their records trotting and both achieved fame in the stud, though neither enjoyed the best of opportunities. George W. McKinney, in fact, had practically no chance at all to prove his merits as a sire for very many years—until his purchase not many seasons back by Mr. W. F. Whittier, who had always contended that he was really a great horse. Though well along toward the two-score mark in years before this transaction, he justified Mr. Whittier's faith by begetting a world's champion from among the first band of really choice mares mated to him.

Lady Mayberry's maternal pedigree is unestablished, but it must have been of a fair quality, as she is grandam also of Dubec 2:17 and the two-year-old trotter Mista 2:29. Chieftain was a son of Hiatoga and appears in numerous tabulations through his daughters, one of whom produced Goshen Jim 2:08¼, another becoming the dam of Mount Vernon 2:15¼, sire of the dams of Vernon McKinney 2:01½, Leata J. 2:03, etc.

In the hands of Peter Hodges, Geo. W. McKinney made his initial bow to the public in 1897, starting in seven events in California and being but once behind the money—his first race. At Chico he was second in a fourth heat in 2:18½, and the next year was deemed good enough for a trip across the mountains, making his first start June second at Colorado Springs and winning with little effort. At Denver's big two-week meeting he achieved the distinction of winning three firsts and one second, acquiring his record of 2:14½ in the third heat of a five-time-out affair in which he trounced John Nolan and a number of other high class trotters. These performances caused him to be hailed as one of the best green trotters ever taken across the divide, and also inspired forebodings as to his future on the part of local wiseacres, as he was short of work when taken east. Subsequent events proved their fears evidently well grounded, as the horse was never again so good and finished behind the money in three out of the four starts that completed his season. In 1899 he was started but three times, failing to stand better than third in the summary in any event, and was then retired to the stud.



GEORGE W. McKINNEY 2:14½

Being "retired to the stud" in his case meant being practically retired from everything, as he had access to almost no mares in his home locality, and it was not until, 1906 that his name appeared in the table of sires, his initial performer being the trotting mare Nealy W. 2:27½ (dam of Nealy Stanley 2:24¾) bred by Col. Mayberry and at present a member of the band of matrons assembled at Hemet Stock Farm.

In 1908 he gained his first 2:10 performer in Silver Dick 2:09¼, who won a number of races in California, taking his fastest record at Santa Rosa. About this time, or a bit before, he was purchased by Mr. Whittier and mated to a few good mares with gratifying results. In 1912 his three-year-old son Hemet (out of Lady Zombro 2:24½, by Zombro 2:11) won the pacing divisions of the State Fair and Breeders Futurity, establishing in the second heat of the latter event the world's record of 2:08¼ for three-year-old pacing geldings, a record that has never been equaled in a race. Contention B. tied it in an exhibition at Phoenix and Bud Elliot clipped the quarter second from it in a similar event at Memphis last season, but a racing pacer of the age and sex has never turned the trick.

The following season another good youngster by George W. appeared in prominent positions in the summary of two of the coast's cherished classics, the three-year-old filly Miss Gailey, full sister to the pacing champion of the previous season. Piloted by the wily veteran, Budd Doble, she won the first two heats of the Stanford before giving way to the better behaved Durfee entry, Rags, achieving a record of 2:12½. The pair also annexed first and second money in the Occident stake, with Rags again having the best of the argument.

The season just passed witnessed several additions to his list of performers, and a newcomer to his 2:10 circle, San Jacinto reducing his record to 2:05¼ in the last heat of a winning race at Sedalia in which the time was 2:06¼, 2:05½, and 2:05¼. Handicapped by the sickness of his regular trainer and driven usually by catch drivers, San Jacinto nevertheless gave a fair account of himself, and wound up his performance for the year by setting the pacing record for the new half-mile track at Riverside at 2:09½ on Dec. 26. That Geo. W. McKinney's posthumous honor will exceed that accorded him in life is probable, as Hemet Stock Farm, and other parties, have numerous promising youngsters by him. That his daughters will breed on is evidenced by the performances of Nealy Stanley 2:24¾, Alhambra 2:27, and Will Durfee's good trotter Alarich 2:09.

HEMET (3) 2:08¼, BY GEO. W. McKINNEY 2:14½
Holder of the three-year-old race record for pacing geldings.

NOTES and NEWS

Sunday will be a good day to write that stallion ad.

◈ ◈ ◈

Also to write to your senator or representative about that district fair bill, if you have not already done so.

◈ ◈ ◈

Don't forget that a ten dollar payment on three-year-olds in Pacific Breeders Stake Number Twelve, for trotters and pacers to race this year, is due on Monday, February first.

◈ ◈ ◈

San Jose Driving Park is getting a pretty good share of the winter training strings, and the ranks of both trainers and horses are being augmented steadily.

◈ ◈ ◈

R. J. MacKenzie is the latest coast horseman to adopt the Peter the Great habit, having recently purchased from Bert Shank two yearlings by the premier of Patchen Wilkes Farm, one a filly out of Mapletta by Onward 2:25¼ and the other a colt from Bessie McKinney (2) 2:27¼ by McKinney 2:11¼.

◈ ◈ ◈

Only three weeks until the exposition opens! It hardly seems possible but it is true, just the same. The auto races later in January will give the new track a good "initiating" and it will be a great piece of footing before the bell calls 'em out for the 2:30 trot on June 5th.

◈ ◈ ◈

J. J. Campbell of Pasadena had a bit of hard luck recently when Kate Kopje lost her stud foal by Robert Bingen at Woodland Stock Farm. Kate Kopje is a daughter of the one-time champion Cresceus 2:02¼ and is the dam of that good youngster in the Sutherland & Chadbourn stable, Bon Cres (3) 2:10¼.

◈ ◈ ◈

H. E. Middleton of Oakdale, California, wishes to obtain the present address of Harry Lewis, who offered a number of horses for sale some time back. Should Mr. Lewis see this, or should anyone seeing it know his whereabouts, communication with Mr. Middleton, Box 453, Oakdale, will be appreciated.

◈ ◈ ◈

The only way you can lose money through an investment in the last number of the Horse Review Racing Guide is by fire or theft. The latter is the much greater risk, as to see a copy is to want it regardless of mere matters of morality in the way of getting it.

◈ ◈ ◈

Plans are well under way for the construction of a mile track at the Kings County Fair Grounds at Hanford, where successful fairs have been given for nearly twenty years by the county association. Hanford is a good town in a good country, and horsemen will learn of the proposed improvement with a great deal of pleasure.

◈ ◈ ◈

A. B. Spooner of Pecho Ranch near San Luis Obispo, where the speed sire Morris A. (sire of Choro Prince 2:08¾, etc.) is maintained for private use, has at the ranch an eight-months-old filly foal by that horse and out of San Luis Bell, dam of the pacer Bay Jeff, trial 2:21½, owned by Clarence J. Berry, which he reports to be not only a beautiful bit of horseflesh, but a natural pacer as well.

◈ ◈ ◈

Lou Taylor is due home next week from his holiday visit at his old home "down east" made famous in the horse world by "Save the Horse" and "Mack's" veterinary remedies, and will open a public stable at Pleasanton. Lou is a competent trainer with plenty of friends among horse owners, and will probably get all that he wants to handle in the way of staked youngsters or aged campaigners.

◈ ◈ ◈

One of our eastern contemporaries, commenting on the sale of Frank Perry (1) 2:15 for only $355, stated that he "was altogether out of condition when led into the sale ring." Frank Perry has been a hard luck horse but he is far from a wreck such as one would expect him to be after reading the above, and if Frank Malcolm didn't get a great big money's worth when he bought the Toddington lad we miss our guess.

◈ ◈ ◈

Elmo Montgomery has purchased of James W. Marshall of Dixon the yearling bay colt Marshall Logan by Jim Logan 2:01¾, dam Leota 2:23 by Diablo 2:09¼, second dam Trix Marshall (dam of seven) by Nutwood Wilkes 2:16½. The little fellow is at the Montgomery home ranch at Davis and is just halter broken, but a good profit on the purchase price wouldn't get him, as he carries on both sides the blood of coast pacing champions of the genuine kind.

◈ ◈ ◈

"Phoenix Pholks" will hold a matinee on February twenty-second as a fitting way of celebrating the birthday of George Washington — not the George Washington that sired the dam of Star Hal 2:04¾ or any of the others of that name who figure in trotting pedigrees, but the George Washington who was sired by such a noble sire and damned by every loyal subject of King George the Third. George couldn't tell a lie, and if he could appear in person at the Phoenix matinee he couldn't take a drink either—not if prohibition prohibits.

The Morristown Driving Park, which has been in existence since before the civil war and in the sixties was the scene of a number of historic contests between the champions of that day, has been leased by Judge W. H. and Paul Moore of New York City and will be used by them as a breeding and training farm. The old bell that rang in the ears of Dexter, Ethan Allen, Lady Thorn, Goldsmith Maid and others of lesser fame is still doing duty at the wire.

◈ ◈ ◈

And now come eastern dispatches stating that the executive committee of the Connecticut Fair Association has voted to withdraw the Charter Oak track from the Grand Circuit, of which it has been a member for forty years. Hartford was assigned the date of September 6-11 at the recent meeting of the powers of the big line at Detroit, and this action on the part of the fair people comes as a bit of a surprise at this time. It also means a possible shakeup in eastern dates.

◈ ◈ ◈

Hemet Stock Farm reports the recent sale to R. D. Morrison of two good youngsters, one of them the now four-year-old Frank Holloway (3) 2:22½ that took his record last fall over the half-mile track at Riverside and is a full brother to the three-year-old champion pacing gelding Hemet (3) 2:08¼, being a son of the dead George W. McKinney 2:14½ and Lady Zombro 2:24¼. The other one is the two-year-old filly Selma Paley by Wilbur Lou (3) 2:10¼, dam Stambia by Stam B. 2:11¼, second dam Mora Mac by McKinney 2:11¼. This lass, who is in all the coast stakes and the Kentucky futurity, worked a half as a yearling in 1:13¼, and the farm reports that they have plenty more of the same kind.

◈ ◈ ◈

In pursuance of a long cherished plan to make Santa Anita Rancho as famous for the production of the heavier class of general utility horses as her late father made it as a speed nursery for "racin' cattle," as our English cousins sometimes call them, Mrs. Anita M. Baldwin purchased last week of the Dunham & McLaughlin Company the Percheron stallions Jusque and Margio and a band of twenty Percheron mares, which will form the basis for the new venture. The horses will engage in the various show classes at the exposition before being established at the home of their new owner.

◈ ◈ ◈

V. L. Shuler of Indianapolis writes, under date of January 18, that he expected to "load out" for California on the 28th from the Indiana State Fair Grounds with a car of horses pointed for the big stakes and class races at the P.-P. I. E., including Peter McCormick 2:08¼, Fleeta Dillon 2:08¾, Twinkling Dan 2:06¼, Little Prince 2:06½, Billy M. 2:03¼, and others less famous. The shipment will probably come to Pleasanton, and will form an interesting addition to the winter colony. Mr. Shuler is a well known figure on eastern circuits, over which he has campaigned since the eighties or early nineties, and will be recalled here on the coast as the man who "made" Sterling McKinney 2:06¼ and cashed him for a round twenty-five thousand dollars.

◈ ◈ ◈

A number of changes have been made this week in the sale announcement of W. G. Durfee, particularly in the matter of trials by some of the youngsters, as practically all the horses on which sale prices have been set are in training and the younger members are coming stronger every week. Rags, well known to coast horsemen as the winner of the Breeders and Oregon Futurities and the Stanford, Occident, and Governor's Stakes has been added to the number formerly described, and is one of the most useful trotters on the coast. He is the kind that should win himself out at the races and then make one of the greatest matinee trotters in the country. Incidentally, there are few if any better ones entered to date in the big trotting stakes at the P.-P. I. E.

◈ ◈ ◈

Foreign horse buyers have been operating in our horse markets of late, securing animals for army service, and doubtless the California horses will give good service in the big war raging across the water. Some days ago a youngster named Castro down in Monterey county was riding his pet cayuse, Black Sam, along one of the mountain trails in the Abelardo region when the horse threw a fit at some imaginary bugaboo, lost his balance and went over the cliff with his rider. Down the side of the mountain for a quarter of a mile the pair plunged before getting a solid foothold, but neither horse nor vaquero was injured further than a few scratches of a merely minor nature. To a purely peaceful, disinterested party, it would seem that horses of this kind would be most useful in warfare.

◈ ◈ ◈

E. T. Ayres, one of the main stays of local amateur racing, is wintering two good fun horses at his Devisadero Street Stables, the Stadium favorites Tom Murphy and Dalta A. The former, who is a son of Gossiper 2:14¾ and out of a daughter of Memo (sire of the dam of Charley D. 2:06¼, etc.) has a race record of 2:09½ pacing in professional company and has been a most consistent matinee performer. He has topped the summary on numerous occasions at the Stadium, and last year stepped a third heat in a winning four-heat race in 2:11. The other lad, by Charles Derby, has a matinee record of 2:24½ and has won several of the Stadium events for trotters. Mr. Ayres is giving them easy winter work and expects to have them ready for the amateur classes at the June meeting at the P.-P. I. E., as well as the regular driving club programs.

Billy Roeder, proprietor of one of the fastest tracks in the local highball circuit, is on the scout for a good matinee trotter according to local rumor and will join in the fun in the local amateur events this season. If the fun drivers race half as fast in July as they are doing now on the highball circuit there will be some great doings, for sure, as from the ferry slips to "the Cliff" they are going some awful miles.

◈ ◈ ◈

Clarence J. Berry has been a recent visitor in Los Angeles, getting first hand information as to how his trotters are coming along in the Durfee stable. Not content with grabbing all the three-year-old money in sight locally in 1914 he is planning to repeat in 1915, sink his fins deep into the big money of the 2:06 pace and 2:10 trot at the exposition, and annex a bunch of class money as well. He'll do it too, if someone isn't mighty careful!

◈ ◈ ◈

John N. Colomb of this city while in Pleasanton recently arranged with C. L. DeRyder to breed Mary Gordon 2:09¾ by Gordon 3427 back to Vernon McKinney 2:01½ this season. She is due to foal to the cover of the same speedy member of the MacKenzie stable in a few weeks and Mr. Colomb is already turning down generous offers for the coming youngster. Mary Gordon is already the dam of Onward McGregor (3) 2:23¼, and has a maternal inheritance that was never more highly regarded than at present, her dam being a daughter of Young Octoroon, sire among others of the granddam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.

◈ ◈ ◈

Kinney Benton, the young hopeful owned by C. A. Harrison of Seattle, now rejoices in the registry number of 62013 and is in the records as being by that good young trotter and sire, True Kinney 2:12¼, out of Princess Viola by Prince Ansel (2) 2:20½, sire of the dam of the one-time champion John Malcolm (2) 2:11½, etc.; second dam Viola by General Benton, sire of the dams of Sunol 2:08¼, Serpol 2:10, Lena N. 2:05¼, etc.; third dam Violet, great brood mare, by Electioneer, sire of the dams of eleven 2:10 performers, etc.; fourth dam also a producer. He is entered in the Breeders Futurity and other stakes, and as C. A. has sent out warning that he is "in to stay," somebody—or several somebodies—had better begin to make a little speed if they want part of the stake money. Mr. Harrison's four-year-old pacing filly Tosora by The Patchen Boy (3) 2:10¾, dam Niquee 2:13¼ by Joe Patchen 2:01¼ is wintering fine for Trainer J. B. Stetson at Salem, and this good judge of horseflesh hails her half sister Boniquee (by Count Boni and out of Niquee) as one of the most beautiful fillies in the world and a sure-enough pacer. C. A. stopped figuring the profits on the New Richmond Hotel long enough to arrange to trade this lass to Canadian parties, but her trainer raised a riot that caused the deal to die an early death. Here's hopin' they all stand the acid.

A LETTER FROM HARRY NELSON.

Selma, Cal., Jan. 24, 1915.

Breeder and Sportsman:

I was called to Hanford on business, and having an hour or so in the evening I drove out to the track at the King's County Fair Grounds and found all the horses looking good and their trainers well pleased with the way they are starting up.

Moody Liggett has a very promising two-year-old pacer by Guy Borden 2:07¼ and out of a mare by Athadon 2:27; this fellow is in one stake only, but makes his trainer and owner wish he was entered in more. Mollie, the green mare that was started in a special at Hanford last fall and made a nice showing, is looking fine and is well thought of, having worked the local track after the fair in 2:13, last half in 1:03. Mountaineer, a trotting son of Athadon belonging to Joe Senter, is also in Liggett's stable—looks like a good horse and is learning to trot.

Russell Gray, who was Walter Gallup's right hand man in the making of Clara Mac 2:04½, is much pleased with his horses and thinks they are a select bunch. The stable is headed by Harry Mac, by Expressive Mac 2:25½, a youngster that always has two-minute speed on tap and that will be raced this year; he also has a big, fine looking trotter in another son of Expressive Mac—Ira Mac, first dam by Iris, second dam by Strathway. This fellow trotted a mile in 2:33, last half in 1:15 in his second workout this winter and is a grand big horse. King Policy by Best Policy, and out of a daughter of Hambletonian Wilkes, second dam the great brood mare Ida May by Hawthorne, has been working very nicely on the trot and went a mile in his 1914 work in 2:25. A son of Robert Direct in Gray's stable is also some trotter.

Philip C. Byrne has Scott McKinney, the fast little mare Oleander which is quite a pacer, and a Percheron draft stallion, Irun. All are in good shape and Mr. Byrne enjoys riding behind Oleander so well that he thinks he would like to sell both stallions and devote his entire time to training.

The district attorney has started suit to condemn property adjoining the fair grounds, as they are bound to have a mile track at Hanford. I write you this bit of news so Hanford boys will feel that they are on the map, and, as I told them, Hanford is due for one good money getter every year. Here's hoping the mile track will be ready for 1915.

Yours truly,

J. H. NELSON.

HAL BOY 2:06¼.

In the five years just passed, six of the get of Hal B. 2:04¼ have won in excess of five thousand dollars each, the gross winnings of the six for that period being approximately $80,000, and in 1914 the get of the unregistered son of Hal Dillard 2:04¾ and Ellen M. by Blue Boy annexed $31,460, a figure generously in excess of the winnings of the get of any other one stallion, save Peter the Great, for that season. Of this latter amount, approximately one-third must be credited to the individual efforts of Hal Boy 2:06¼, the great pacer in the stable of Marvin Childs at Pleasanton whose likeness appears on our cover page this week.

Hal Boy's racing career began very modestly in 1912 while he was a member of the Squires stable up in Oregon, his initial appearance in professional company being on July fourth at Gresham, where he was entered in the 2:25 mixed class, purse $200, half-mile heats. After a five heat contest in which three heat winners appeared, he managed to top the summary, his third heat in 1:10 the fastest of the event and equaled but once during the day. Later in the year Squires took him across the line to Vancouver, B. C., and started him in the 2:20 pace, in which he finished third to Hal Edo and Baron Lovelace, the fastest time of the race being 2:17¾.

This was the extent of his "preliminary" campaign, but the following August he again made his appearance in the hands of Mr. Squires when the 2:20 pace at the Centralia-Chehalis fair was called, finishing second to Delmas in 2:13¼, 2:13¼ and 2:11¾, and about this time folks up north began to take notice of a brand new Hal B. "good 'un." Back to Canada again for the Vancouver meeting, he registered his first winning performance in straight heats in the twenty class, being obliged to acquire a standard record in next to the slowest time allowable, 2:24¾. After this performance he passed to the stable of Marvin Childs, and in his first start for that young gentleman, over the track at The Meadows, Seattle, he proved himself possessed of 2:10 speed by finishing 2-2-2 to College Gent in 2:09¾, 2:10 and 2:11, repeating the trick at Spokane the following week in about the same time. Starting in the four thousand dollar stake for 2:08 pacers at Salem he ranked third in the summary to Hal Gray and Francis J., having finished 2-3-2 in 2:08, 2:08¼ and 2:08¼.

Winter quarters caught him shortly after this race, but winter quarters were not to hold him long, as he was entered straight through the Canadian circuit and on May 25th at Edmonton he made the first start of the campaign that was to rank him as the best winner ever raced in that territory, and give him fifth position among all the money winning pacers of the year, his earnings for the season of 1914 being exceeded, among his kind, by only these four—King Couchman 2:02¾, Napoleon Direct 2:02¼, Peter Stevens 2:02¼ and Directum I 1:58.

At Edmonton he finished third in the 2:25 pace, $400, Hal Chief and Jim Stewart outranking him in the final summary, though he won the fifth heat in the fastest time of the race, 2:17¼. On June 6 at Saskatoon he trounced Joe McGregor after a five heat battle in a mixed class for a purse of $500, with the fastest heat in 2:15¼, and from that time on he "had on his winning clothes," registering the following successive straight heat wins: June 10, Yorktown, 2:15 trot and 2:20 pace, $600; June 20, Regina, 2:20 pace, $1000; June 23, Moose Jaw, 2:25 pace, $1000; July 2, Calgary, 2:22 pace, $1000; July 6, Swift Current, 2:25 pace, $1000; July 15, Winnipeg, 2:20 pace, $4000; July 17, Winnipeg, 2:17 pace, $1000. At Calgary he obtained his present win-race record of 2:12¼, being one of three horses to establish the new track record at that figure during the week, the other two being Knight Onwardo and Oviedo.

Starting westward from Winnipeg for the second meetings of the prairie towns and the fairs in the northwest on this side of the international boundary, the lad won the 2:25 pace, $1000, at Regina on July 29 after dropping the first heat to Mussell Shell in 2:15, but before leaving the Saskatchewan valley metropolis re-assumed the straight heat habit and annexed the following events in that decisive style: August 1, Regina, 2:20 pace, $1000; August 4, Saskatoon, 2:15 pace, $1000; August 7, Saskatoon, 2:22 pace, $1000; August 13, Edmonton, 2:18 pace, $3000; September 8, Vancouver, B. C., 2:20 pace, $1000; September 16, Walla Walla, free-for-all pace, $1000, at this point showing his ability to go the route in heavy footing by beating Ovieda, College Gent, Dan Logan and Delmas, a pretty hard bunch of pacers to handle. On September 21 at North Yakima, in the race in which a new record was established for that oval, he again tangled up with College Gent and Ovieda, the summary standing at the end of the three-heat free-for-all for $1000, College Gent 2-1-2, Ovieda 1-2-3, Hal Boy 2-4-1, and the time 2:05, 2:06½, 2:06¼. Shipped to Salem for the 2:20 pace, $700, he won in straight heats and slow time, going into winter quarters at Pleasanton not long afterwards with a record of eighteen starts for his campaign, sixteen of them firsts and two thirds.

Hal Boy was foaled in 1907 and was bred by August Erickson of Portland, Oregon. The Hal B. blood is well backed on the maternal side, as the boy's dam is the great brood mare Altalena (dam also of Sunny Jim 2:11½) by Altamont 2:26¾ (sire of the dams of eight in 2:10); second dam Laska by Rockwood 1467, etc. For some time past he has been owned by Edward Peterson of Omaha, one of the principal patrons of both Frank and Marvin Childs in the campaigning of both trotters and pacers, and he is entered in the 2:06 pace for the big money at the June and November meetings to be held in connection with the Panama-Pacific International Exposition.

Hal Boy is a very attractively built bay gelding of medium size, with the kind of manners and a way of going that are great assets to a horse when going up against a hard field; he has plenty of speed which has come to him in a steadily increasing measure, has an excellent set of legs and feet under him, and will furnish competition for the horse that shows him the way to the wire in his class in 1915. Coupled with him in our cover illustration (which is from a picture taken a few days ago at Pleasanton) is his friend and sidekicker, Raffles, the mascot of the Childs establishment. Raffles is some dog, as anyone who knows him will admit, but like Sam, of the Sutherland & Chadbourn stable, he has one very bad habit—an inordinate desire for fast company. Seems like neither of them is really satisfied unless there are a bunch of those close to two-minute pacers somewhere around, and the thicker they get and the faster they are, the better pleased Raffles and Sam both seem to be. Do you suppose that is why their owners always arrange to have some of that kind on hand—do you? Ask them—or the dogs!

TRAGEDIES OF THE CARPATHIAN PASSES.

It's not a gasoline power war in Austria but a horse power war, and the tragedy of the horse is seen at every turn. The great roads in Galicia, leading through the Carpathians, were literally jammed, for miles, with wagon trains, in October and early November, and the steam from the backs of the thousands of faithful toiling animals ascended like clouds in the cold wintry air.

These wagon trains on the narrow roads are like endless chains. They can't be delayed. And woe to the horse that falls! He is coaxed to his feet again and again. Every last ounce of strength in his tired body is urged out of him and he gives his last pull with bulging eyes and then topples over.

But that isn't the last that the Austrians expect of him. At the beginning of the war the orders were that any horse which fell must be shot immediately. However, horse flesh began to grow scarce, after the first six weeks of fighting, and the armies on the Russian frontier were helpless without the hundreds of thousands of tons of supplies which must be carried to them over the mountain roads in the odd willow basket wagons of the Galician farmers. So a new order was issued that no horse was to be shot unless one of his limbs were broken.

The result of this order was that when an animal fell from exhaustion and had given to his masters even the strength that was necessary to keep him on his feet, he was dragged aside, preferably into a field where there was grass, and left to work out his own fate. Usually he died, uncared for, but now and then a horse survived and became strong again, whereupon he would be seized by some passing soldier and put back into the daily grind.

I watched a horse "come back" that way, in a field near Przemysl. He had fallen in the middle of a steep hill, a hill which has caused the death of many an exhausted horse. He was lying with scores of other horses in a field alongside the hill road. Evidently he had an ounce or two more of vitality than they, for he was stretched out, with his legs curled under him, while they were lying on their sides with their heads on the ground. His head was raised and I fancied that he was watching, with a horse's interest, the never-ending train of wagons that was passing him. I was sorry for him, too. To get well only meant more horrors for him. When I returned that way in the evening he was still lying down but there was a circle of nibbled grass about his head. The next morning he was weakly standing up, with his legs stretched wide apart, and he had gone away from the other dead and dying horses to a lonely corner of the field. Incidentally, I noticed time and again that there is nothing that frightens a horse so much as the body of a dead horse, and I suppose that it was sheer terror that got this fellow to his feet and helped him to struggle away to more cheerful surroundings. He was nibbling gingerly at the dry grass and now and then he raised his head and seemed to look at the mighty tide of horses and wagons and men that filled the road.

"There's a horse that will be all right within a couple of weeks," said the Austrian officer who was with me. "He's a Siberian horse. They're wonderful animals. They're the only horses in the world that will make two pulls at an immovable object. You can hitch one of them to an object, a tree or a house, that cannot possibly be moved and he will put his last ounce of strength into it. An ordinary horse would stop at that and would refuse to the next pull, but not a Siberian pony. He's all sand and he'll make his second try just as bravely as he did his first. Yes, indeed, that little fellow will be back in the wagon trains again within a couple of weeks."

And I suppose he was, for by evening he had nibbled a huge circle of grass in his private corner of the field and when I went by that way two days later he was gone.

Three weeks of steady work in Galicia and in the Carpathians killed the average horse. The fields were dotted with their bodies. The Austrians told me that hundreds of horses died daily in the Carpathian passes from broken lungs, broken courage or broken hearts.—W. G. Shepherd, United Press.

OFFICIAL REPORT, GRAND CIRCUIT STEWARDS' MEETING.

At the annual meeting of the stewards of the Grand Circuit, held in Detroit Jan. 12, 1915, the following regulations to govern all members were adopted:

1—Every member of the Grand Circuit every year shall close its early-closing events 126 days before the opening of its meeting.

2—The entry fee in early-closing events and the number of payments may be fixed by each member.

3—The entry fee in late-closing events shall be 5 per cent of the purse. Two horses from the same stable, or the same interest, may be entered in one class for one entry fee of 5 per cent, and for each additional entry made in the same class for the same stable or interest, an additional entry of 2½ per cent must be paid. One horse may be named in two races, for the same week, for a total entrance fee of 7½ per cent of the amount offered in such two races. The full entry fee of 5 per cent additional must be charged to all money winners.

4—Two or more horses controlled in whole or part by one or more persons, or trained in the same stable, cannot be started in the same race, unless it be a dash race, except in events where there are four or less starters, in which case announcement must be made from the judges' stand prior to the race, of such ownership or control, and these starters shall be coupled in the betting and the penalties.

5—A horse that has started in two races and is outside of the money, shall be allowed to start in his next race in a class two seconds slower than his best record; if he has started in three races and won no money, he shall be allowed to start in a class three seconds slower than his best record; if he has started in four races and won no money, he shall be allowed to start in a class four seconds slower than his best record, which shall be the limit of his time allowance. These allowances shall hold good until the horse wins a race and a horse granted any of these allowances shall, on winning a race, be eligible to the class only in which his record made in that race entitles him to start, provided such record does not admit him to a slower class to which his winning performance renders him ineligible. Allowances earned in 1914 shall be good for 1915. These provisions are not to apply to early-closing events.

6—No member shall be allowed to release any nominator from payment of entry in class races because those entries are named or started in early-closing events.

7—Advertising for 1915 in the turf papers shall be done as a circuit and not individually.

8—The conditions governing each race must be printed in the daily race program of every member and appear on the page with the race entries and immediately following the title of the event.

The by-laws were amended as follows:

To require the stewards to appoint a board of racing stewards every year, in accordance with the rules of the parent associations.

Providing that in case any member fails to give a meeting, the stewards may forfeit the franchise of that member, paying back to it, if in good standing, the $500 paid for its franchise.

Providing that if any member, after a schedule of dates has been adopted, fail to give its meeting, the president may fill any vacancy or vacancies thus created with subscribing members. A subscribing member is hereby defined as one that complies with the provisions of the by-laws. Its membership shall continue for one year, and it shall pay the Grand Circuit the sum of $250 for the membership so awarded it.

The following resolution was adopted:

Resolved, That after the year 1915 the Grand Circuit will class horses in early-closing events on their best records, whether made in winning or losing faces, but that in no case shall a time record be considered as defining eligibility.

The following members resigned: Pittsburgh Driving Club, Niagara Racing Association, and Rockingham Park. The Michigan State Fair resigned in August, 1914.

Officers were elected as follows: President, H. K. Devereux; vice-president, Fred Postal; secretary-treasurer, H. J. Kline.

The schedule of dates for 1915 is as follows: Cleveland, July 19-24; Detroit, July 26-31; Kalamazoo, Aug. 2-7; Grand Rapids, Aug. 9-14; Montreal the weeks of Aug 16-28, three days' racing each week; Yonkers (Empire track), Aug. 30-Sept. 4; Hartford, Sept. 6-11; Syracuse, Sept. 13-18; Columbus, Sept. 20-Oct.2; Lexington, Oct. 4-16.

H. J. KLINE, Secretary.

Trainer Geo. Haag of Calgary, Alta., the man who brought out and raced such notables as General H. 2:04¾ and Alberta 2:03¾, writes that he is wintering twenty head at Calgary, Alberta. The lot includes a promising three-year-old trotter by General H. 2:04¾, dam Clearwater 2:21¼ by Capt. Waters; a good filly by Kentucky Todd (3) 2:08¾; a green trotter by Oro Wilkes 2:11¼; a three-year-old trotter by Bonnie McK., a son of McKinney 2:11¼, and colts by Earl Jr. 2:01¼, Mainsheet 2:05, Vice Commodore 2:11, Ray o' Light (3) 2:08, General H. 2:04¾, Colonel C. 2:15½, M. S. McCarthy 2:24¼, son of The Director General and Jas Faris, son of Monbells. Mr. Haag states that this has been the best winter for eight years. The sleighing has been splendid wih good steady crisp weather and all the horses are doing fine.—Canadian Sportsman.

P.-P. I. E. LIVE STOCK NOTES.

The final classification and prize list of the Department of Live Stock of the Panama-Pacific International Exposition, which will soon be ready for distribution, will contain provision for the exhibition of a number of breeds that have not shown strongly in previous expositions, but which have been growing in popularity as their qualities become better known. There will be no place for freaks in this prize list and only animals and birds of known utility or educational value will be reviewed for award.

The Dairy Shorthorn will be given a full classification in addition to the regular classification provided for Shorthorn cattle. This is expected to bring out a very strong showing of this strain which has demonstrated its usefulness and hence grown in popularity. Devon cattle, which were once quite common in the United States, have again grown rapidly in popularity in recent years and will have a full classification in the prize list.

Sheep.

There will be several breeds of sheep on exhibition that are well known in other countries and that are attracting attention of sheep breeders and flock masters in the United States. Among these will be the Corriedale, with which the Australians have won such decided success. The Romney Marsh will have a classification in recognition of its merits. The Tunis will be recognized, as will also the Karakule, the Persian Fat Tails, the Exmoor of Great Britain and other breeds.

As a fur producer the Karakule is attracting a great deal of attention, especially when used to cross with the Lincoln or other long-wooled sheep. The pure bred animals produce the fur known as Astrachan, so highly valued by the aristocracy of Persia and by the ladies of all countries. The Persian Fat Tailed sheep is less well known here but is of high utility value on account of the oil extracted from its enormously fat tail. This is appreciated as a great delicacy among the Persians, and is used in various arts where a very fine quality of animal oil is required.

Some Special Prizes.

The Hunters' Improvement and National Light Horse Breeding Society of London, England, has offered two gold medals to be given respectively to the best stallion and brood mare which may be shown in the saddle classes. These medals will be awarded as supplemental premiums in addition to the regular cash premiums provided in the classification.

The Shire Horse Society of Great Britain and Ireland has made an offer of two gold cups to the value of £50 each, to be awarded to the Shire horses shown in the Exposition. These awards are supplemental to the Exposition prize money, amounting to $5,000, and the American Shire Horse Association prize money amounting to $1,500, making a total prize value of $7,000.

The National Pony Society, which has existed in Great Britain for many years for the encouragement of the breeding of polo and riding ponies, will give two silver medals, to be awarded respectively to the best stallion and mare riding ponies; and two bronze medals to be awarded to the reserve animals in this championship class.

Business Opportunity.

Through this department the Panama-Pacific International Exposition will afford a great opportunity to breeders of the corn belt and other sections of the country for developing a new territory in which to make sales. The West Coast country of the United States has not been fully developed as yet in a pure-bred sense, and the activities of the Department of Live Stock have served to arouse an interest in the value of this essential factor of modern agriculture to such an extent that the demand is already great for pure-bred animals of most breeds. The farmers, breeders and business men of the Coast country are awaiting the arrival of the exposition animals in order that they may make purchases of high quality and new blood, and it is fully believed that no animal of merit need be returned for lack of an opportunity to sell at a remunerative figure.

This fact cannot well be emphasized too strongly, as the demands for good live stock on the Pacific coast are not only strong, but are enhanced by the demands which come from Oriental countries and from Latin America.

The buildings of the Department of Live Stock were erected at a cost of $150,000, and have been specially constructed under the plans formulated by Chief D. O. Lively for exhibition purposes. In this respect they differ from those of previous expositions and will afford the visitor an opportunity to see and study the characteristics and qualities of the different animals on exhibition. These buildings will also become models for future live stock expositions. They will be provided with every convenience not only for the comfort of the animals but for the exhibitor and visitor as well.

A Hall of Congresses is included in the group of live stock buildings as a meeting place for the various live stock and allied associations which will hold their sessions in San Francisco in 1915. This hall will be equipped with apparatus for demonstrations and for the illustration of lectures and addresses and will be given rent free to these associations. Nearly fifty associations of this character have already signified their intention of meeting in San Francisco in 1915.

There will provided telegraph, telephone, express, freight and post offices in the grounds of the exposition for the special convenience of exhibitors as well as for visitors. There will also be a bank maintained inside the grounds which will conduct a general banking business, including savings and commercial deposits, and by which no charge will be made for handling accounts of exhibitors.

Entries Are Free.

There will be no charge made for entry fees, stall rent or water in the Department of Live Stock, though a nominal fee will be charged for the cooping, feeding, watering, exhibiting and returning of poultry, pigeons and pet stock, and for receiving, benching, exhibiting and feeding dogs and cats.

Co-operating in the Exposition.

More money has been appropriated by the various breed associations, to be given as supplemental premiums in the Department of Live Stock of the Panama-Pacific International Exposition, than was ever given by such associations at any previous exposition. This money amounts to $125,000, given by forty-two different breed record associations in cash, besides numerous cups, trophies and other objects of value which will serve to increase this total materially. This fact is of vast importance as showing the widespread interest in the activities of the Department of Live Stock and the co-operation which has been accorded to it.

Of great importance in this connection is the fact that more different States of the Union have voted money for live stock participation in this exposition than in any previous one. More than twenty different States have voted amounts aggregating $130,000, and this money will be used chiefly in the payment of transportation charges on live stock exhibits sent to the exposition, though some of it may be used in giving supplemental premiums for the benefit of the animals shown from the States so participating.

Exhibition Dates.

The dates on which animals of various classes will be shown in competition for premiums are given herewith. The entries for the several classes will close one month previous to the show dates for each class. This arrangement does not have any application to or connection with the view herds, which are maintained as non-competitive, educational exhibits throughout the entire period of the exposition. The dates when animals of different groups will be placed on exhibition are as follows:

Horses, mules and asses—September 30 to October 13, 1915.

Cattle, beef and dairy—October 18 to November 1, 1915.

Sheep, swine and goats—November 3 to November 16, 1915.

Carlots of cattle, sheep and swine—November 11 to November 14, 1915.

Poultry and pigeons—November 18 to November 28, 1915.

Dogs, cats, pet stock and children's pets—November 28 to December 3, 1915.

Climatic Conditions

The Panama-Pacific International Exposition is located on the north end of a long and narrow peninsula lying between the Bay of San Francisco and the Pacific ocean. The Department of Live Stock occupies the west end of the 635 acres covered by the exposition, which lies at the north side of San Francisco and immediately fronting on the Golden Gate and the Bay of San Francisco. Owing to its peculiar location, the climate is different from the other portions of the State of California, and the temperature is very constant. The records of the Weather Bureau show that the mean average temperature for more than forty years is 59.1 degrees, and animals and birds located on these grounds will have the advantage of a temperature which will conduce to their best health and performance.

The grounds of the Department of Live Stock are easily accessible both by water and land, and animals will be delivered directly in the grounds without trans-shipment. It is believed that no better site could have been selected for a continuous exhibit of live stock, as the difference in temperature between winter and summer is only about 10 degrees, while that between daylight and dark averages about 4 degrees. Breeders and exhibitors need have no apprehension in regard to oppressive temperatures in summer or severe cold in winter.

AS TO BABY BEEF.

A convincing demonstration that fitting yearling cattle may be made profitable is found in the experience of feeders who have been at it many years, and continue to use it as their mainstay. Failure in this sphere of production is, however, more frequent than success, due to the fact that a majority of those who put in calves have neither the experience nor the conception of the care essential to getting them ready for the butcher. While yearlings are popular at the market, finish is essential. The half-fat yearling is subjected to severe discounts, and most of the time is not wanted. Every summer the Chicago market is literally flooded with little cattle that are merely in stocker condition. It is an axiom in stockyard circles that few feeders are able to make a fat yearling. Calves are babies, and must be treated as such. To keep them growing from babyhood is essential to marketing fat yearlings at 15 to 18 months of age. This is the rock on which most of these yearling operations are wrecked.—Breeder's Gazette.

HOW THEY DO IT AT NEW ORLEANS.

Down in the native haunts of the pelican they are racing thoroughbreds again for a forty-day stretch, after a hiatus of some seven years owing to adverse legislation concerning bookmaking. The business men's committee in charge are more than pleased with the way the public is turning out in support of the meeting, and the following account of the betting system given by a recent visitor gives insight into the manner in which betting is carried on without books or mutuals:

"After paying my admission fee to the track," he said, "I went to the upper end of the track in an enclosed space they call the Palm Garden, to which an extra dollar of admission is charged. They gave me a numbered badge, which I wore conspicuously. Scattered about the Garden were a number of men whose chance acquaintance I had made during race meetings at Belmont Park, Saratoga and the Empire City track. Over on one side were a number of other men I did not know, who wore caps with numbers on them and who were known as the bonded stakeholders. They are regular employes of the Business Men's Association and it is understood they are bonded by the association, which guarantees that any money entrusted to them will be passed over to whomsoever may win a wager made on the horses.

"As usual I had an idea that I knew which horse would win the race about to be run. I found one of the old Forty-third Street boys who was willing to bet me at odds of 4 to 1, that I was a pretty bad guesser about the speed of the nags engaged. I told him I would back my belief $10 worth on the nag I selected and he expressed a greedy willingness to take the wager.

"We walked over to one of these bonded stakeholders, who gave me an envelope into which I put the $10 I wagered, and my friend put his $40. The envelope was sealed in our presence and was then marked with these cabalistic figures in an up and down row like a Chinese laundry check: '3, 5, 1, 832.' Translated into English that read that in the third race I had bet on horse No. 5 on the program to run first, and that the bet would be paid to the holder of badge 832 in case the horse won the race, while another set of cabalistics insured the collection of the wager by the other party in case of his winning. It was as easy as rolling off a log. So was the collection; for it so happened that in this race I did guess the winner.

"When the race was over and the weights announced as correct, I walked over to the chap who had taken my money, showed my badge, and asked for my bundle. He ran over the envelopes he had, handed mine to me, and that was an end to it. While I was there they did not allow anyone to pay the bonded stakeholder anything for his services or even slip him a tip. It was against the rules of the track to do so. It is a system that has the one used in New York beaten to a frazzle, and is mighty popular with the racegoers.

"Whether it will remain so with the men who lay the odds is a question. It takes a lot of capital for them to carry on such a business if there is any heavy betting, as they have to put up the cash with every transaction. On the other hand, it is a good thing for the man with the bank roll, if his roll is big enough. There is no credit betting, no 'I'll settle with you at the hotel after the race' business. It's a cash proposition all the way. The fellow with a shoestring who bets on credit, collects if he wins, and forgets to make good if he loses, is shut off, out of speculating unless the layer is willing to bet on credit, and does that sort of business on the sly. Of course, if he takes that risk and loses, he cannot kick if the man he trusts neglects to make good. Any way he has fewer worthless 'I. O. U.'s' than he would have in a few days of the promiscuous credit betting, as it was carried on at the opening of the season in New York when the layers accumulated a lot of 'dead wood' that has not been paid yet, according to gossip I heard at New Orleans."

The success of the meeting at New Orleans has stirred up the people of Hot Springs, Ark., where at one time two race tracks had winter racing. Owing to the greed of the bookmakers who ran things the people put a stop to the game by restrictive legislation prohibiting bookmaking. The Arkansas people are not quite satisfied with the strictly business methods of the New Orleans people who are back of the racing there. So they have gone a step further, and at the session of the legislature about to meet will ask for the passage of a law permitting racing with the Pari-mutuel system of betting, with a 5 per cent rake-off from the machines for the benefit of the State Fair Association, which owns the race track at Hot Springs and holds a State fair there annually.

The success of the adoption of the system at tracks in Maryland and Canada is cited as an example of how racing may be carried on with benefit to the breeding interests of the State in the way of income from the machines and with perfect fairness to the speculator and horseman alike. The people of the city, at a mass meeting recently held, petitioned the legislature to pass the necessary law, and so far there has been no opposition from any quarter of the State. The farmers' organization favor it as they will benefit in that the prizes at the fair will come from the percentage from the mutual machines instead of from direct legislative appropriation as at present.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

GOSSIP FOR SPORTSMEN.

The open season for hunting wild fowl will close in this State Monday, February 1. In the list of birds is included all varieties of wild ducks and wild geese, mudhens and swans are also in the prohibited schedule under the Federal game laws protecting migratory wild fowl and which take precedence over the State game laws—for this season, at all events. English snipe, black-breasted and golden plover and kellow snipe will be in close season also.

February 1 calls the time limit on cottontail rabbits. The long-eared jack rabbit, however, can be hunted all the year round. The season on valley and desert quail in game districts 1, 2, 3 and 4 will be open until February 15. The season for shooting mountain quail, grouse and sage-hen closed December 31, as did the open season on tree squirrels.

* * *

The proposed bill to create a State Commissioner of Conservation, "with a large salary," and place the State Fish and Game Commission, State Forestry Board and State Forester under his control will be watched closely by sportsmen devotees of the shotgun, rifle and rod. The hunting license fund alone for 1913-14 amounts to $164,111. This is supplemented by about $80,000 received for fishing licenses.

The sportsmen argue that the wild game and fish interests of the State are kept up and paid for out of their pockets and the State treasury is not drawn upon for a cent outside that revenue. Local sportsmen and the fraternity at large throughout the State are quoted as being decidedly averse to diverting those moneys to any other use, however beneficial or important the objects may be.

* * *

Either mountain lions are increasing in Northern California or else the $20 bounty offered for each scalp by the State is prompting hunters of the mountain districts to search out the deer and stock-destroying animals. According to the reports of the State Controller there has been an increase of late in lion bounties. Last November the State paid out $700 for 35 lion scalps and in December, 1914, $440 for 22 pelts.

Siskiyou was the banner county during December, hunters returning ten scalps and collecting $200. Humboldt was next with five and the following counties collected for one lion each: Los Angeles, San Luis Obispo, Mendocino, Kern, Shasta, Lake and Trinity.

* * *

Rumor has it that the Los Banos country will be closed to both the sportsman and market hunter next season. It is reported that Miller & Lux, whose holdings in that section are over 500,000 acres, will not renew a shooting lease to any one after the close of the present season. Furthermore, no water will be turned on the lands from the Mendota dam irrigation ditches this summer. This means that at least nine gun clubs, the hotel preserves and hundreds of individual shooters may be barred. The recent killing of a deputy fish and game commissioner by one of two market hunters is given as the principal reason for shutting out duck hunters after this season.

According to Fish and Game Deputy Ferguson, hunters have supplied San Francisco markets with 28,000 ducks during the past month and violations of the game laws have been open and flagrant, especially in the vicinity of Los Banos. It was there that Deputy George Rodolph was slain for accosting a couple of market hunters who had exceeded the bag limit. Two men were recently arrested there for exceeding the limit and for shooting with a horse for a shield. One was released on bail and when the warden went to the Los Banos jail to take the other one to the county bastile at Merced a mob gathered, the lights were put out and the prisoner taken away from the warden by force. Deputy Ferguson announces that this lawlessness must cease at any cost and every right-thinking person will agree with him.

* * *

The recently organized Santa Cruz Sportsmen's Association elected the following officers for the coming year: H. F. Faneuf, president; Eulice Hihn and Ben Crews, of Santa Cruz, James Maddock, of Boulder Creek, vice-presidents; Orrin Blodgett, secretary-treasurer; Ralph Mattison, James Harvey, J. O'Conner and Allen C. Rennie, trustees. The association favors the following seasons for hunting and fishing, which may apply later on in the county: Deer, August 1 to September 15; quail, 15 in one day, 40 birds in one week; steelhead trout, close season in tidewater and above tidewater, from December 1 to April 1. The association also passed a resolution favoring legislation prohibiting all aliens, non-citizens of the United States, from owning, carrying or having in possession firearms of any description.

* * *

Perhaps the last of the old-timers, and thought to be a long hunted man-killer, a giant grizzly bear, silver tipped and weighing about 900 pounds, has been seen roaming the mountain trails in the vicinity of Big Bar, Plumas county, by Tom Morehead, an aged prospector of the Feather river country, who was unarmed at the time. Morehead thought it useless to attempt to follow the creature to his den, which is thought to be somewhere on the sides of Big Bear mountain, not far from Camp Mayaro, on the Feather river.

The grizzly is the first seen in this region in twenty years. Ed Phelps, a Big Bar trapper, and Charlie Gramps, a guide, came upon the trail of the bear last week in the vicinity where it was seen by Morehead. Its tracks in patches of snow were the size of a large dinner plate. After following the tracks for nearly four miles, they were forced to return to camp on account of darkness.

That the grizzly is the one which nearly twenty years ago attacked and killed Indian Joe, is the belief of the natives of that vicinity. He is a particularly fine specimen, and as such would be enormously valuable if captured.

Hunters are keeping a sharp lookout for the grizzly's reappearance, as they believe that he will return to his old trail in the canyon in search of wild hogs, which are numerous in the timber along the river.

Many bear have been caught this winter in the Big Bend of Pit river near Henderson. Lee Cintrell killed four. Ed Pearl has trapped and killed eleven. John Watts killed two bear early in the fall and just lately captured seven coons in a hollow log. Bert Stuart caught a good specimen of otter in a trap last Sunday.

* * *

There has been considerable speculation regarding the origin of the opossums which are beginning to be quite numerous along Branciforte Creek in Santa Cruz county, and which are not native to California.

O. S. Blodgett informed a News man that about ten or twelve years ago a man from the south, living in Blackburn Gulch, sent back for a pair of 'possums and they multiplied so fast for him that he finally got disgusted and turned them loose.

They readily took to their new environment and have increased to such an extent that they are now quite numerous and are found even over in Santa Clara county, the San Jose Mercury a few weeks ago telling of one caught near Los Gatos. Santa Cruz county may yet become as famous as Virginia for its 'possum and sweet potatoes.

* * *

A movement has been started by the sportsmen of Plumas county for the enactment of a county ordinance prohibiting the shooting of grouse in the county for a period of three years, or until September 1, 1918.

* * *

Upland sportsmen are now having fair quail shooting. Baldo Ivancovich bagged a limit near Ignacio last Monday. J. C. Walker found the shooting good for three days near Nicasio. Fred Schmidt and Fred Surryhue shot fair bags near Middleton, in Marin county. Chas. Pease and Eugene Hunt had good sport in the Point Reyes Sportsmen's Club coverts Monday and Tuesday. Near Bolinas, Bastine De Mourge and brother located enough birds for a fair day's sport.

* * *

For the past week the duck hunters have had good or bad shooting, according to locality selected. At some of the Suisun marsh ponds the gunners have had no trouble in shooting full bags.

Henry Klevesahl, Captain J. F. Seymour, Thomas Haskins, Gus Harper and Dr. Charles Randall shot canvasback limits during two regular weekly shooting days at the Seymour Gun Club. Mallards and sprig were not much in evidence.

Messrs. Tubbs, Otis and E. L. Hoag, shooting on the nearby Cordelia Club ponds, also shot limit bags, mostly canvasbacks.

Captain A. W. Du Bray and Frank Maskey were at the Sunrise Club ponds for a Wednesday shoot, when large ducks were numerous enough to offer agreeable sport. W. C. Murdoch and W. D. Burlingame shot on the Jacksnipe duck ponds a week ago, when birds were not overly numerous.

The visiting members of the Joyce Island Gun clubs last Sunday were fewer than usual and returned with attenuated Osborne game bags.

For regular and consistent webfooted dividends the Los Banos and Westside shooting districts have held good ever since October 15. At the Los Banos Gun Club, G. H. T. Jackson, Ramon Jackson and H. Hutton accounted for limits during a recent two days' shoot. Nat Boas, Jack Wirtner, J. B. Coleman, Joe Harlan and other members of the Field and Tule Gun Club gathered the usual two-day limit again a week ago. T. J. Woods and Arthur Newhall also had the same excellent sport at a near-by duck shooting resort. Dr. Henry Abrahms shot limit strings at Gustine, Frank M. Carter dropped forty-one birds during his two-day shoot. O. O. Orr left Thursday for a three-day shoot at Los Banos.

W. W. Terrill's trip to Goodyears, above Benicia, a week ago, found the famous old snipe grounds full of long-bills. A cold frosty morning and birds working a bit wild did not, however, prevent him from bagging a limit string.

The big flocks of canvasbacks that worked into Petaluma and Napa creeks week before last stayed long enough to allow Hog Island Gun Club members a fine shoot at Blind bay last Sunday. Germain Carp, H. Ootmon and Captain W. A. Simonton of Wilmington, Del., and others bagged good strings. George Hosman shot near Black Point; teal and canvasback was his toll.

At Island No. 3 on a branch of Napa creek, J. Hervey Jones, T. W. Brockbank and W. Hemminga were kept busy. Good sport was had by members of the Alameda Gun Club on Holmes island, near by.

Near Gridley the sportsmen continue to gather big bags of sprig, mallards and geese. Howard Nauman is trying a two-day shoot at that point. Captain A. W. Du Bray and E. R. Cuthbert were at Willows, where geese of all varieties are very numerous. Bodega bay hunters have had no trouble recently in getting bluebill and canvasback ducks. Captain N. Nelson and A. H. Lawrence returned from that section last week with well-filled duck bags.

Hundreds of duck shooters were out in the lower Alameda marshes Sunday. The general run of luck, however, was not up to results of the previous week. In the vicinity of Alviso, from a couple to a dozen ducks, principally canvasbacks, were about the average. Near Arden, members of the Arden Gun Club, Tony Korbell, Jack Connelly, Rube C. Haas, Dr. A. J. Sylvester, W. H. Price and others shot over a vast salt pond where the water was so placid and calm that the surrounding landscape was mirrored in the minutest detail. Ducks were plentiful (spoonbills they were), but the wary birds kept out of gunshot, either lazily resting out of range or, when in flight, staying far out of reach up in the air. Dr. W. O. Ogle, who shot on the California ponds, came in to Arden station with the best bag shot during the day in that district. George Franzen and Pete Swenson, shooting at the same resort, also had fair bags. Wm. Ealand's trip to Alvarado netted him 13 spooneys only, shot on the Chisler pond.

At some of the inside Alameda ponds a few sprig were shot. Most of the gunners out returned with slim duck straps.

Off the Redwood shores the same conditions applied. The lower bay was well populated with big flocks of canvasbacks and other ducks, but the scull boat operators got only a few of them.

Off Bay Farm island shores a number of hunters managed to bag a few canvasbacks and bluebills. It was an off day all through the marsh, and, what is worse, a repetition may take place tomorrow. The Marin marshes were also deserted by the ducks. Bayshore market hunters have been able to get but few canvasbacks.

Goose hunters have turned their attention to the Rio Vista country, where "the morning sky has been black" with geese for the past two weeks. A Saturday and Sunday shoot by Leroy Rione, J. Bowman and Capt. C. Ward tallied a combined bag of 48 geese. Gus Grief and party returned from Rio Vista with 40 fat geese. Many wild geese and canvasback ducks have been shipped here from Vallejo recently.

Black grant shot in Tomales bay and Limantour bay the past fortnight have had a strong herring roe flavor. The birds have been feeding on eelgrass coated with the fish spawn.

The San Pablo shores have been deserted recently by the bay ducks; they keep away from that side during the northerly winds. Indications point to fair shooting on the east side blinds tomorrow, however.

* * *

The rod and line fraternity are much interested in the success of the Assembly bill fathered by Assemblyman Reams of Sisson, which, if passed, will open the trout streams of this State which have been stocked by the Fish and Game Commission to all of the people who wish to fish in those waters. The interest in this is accentuated by the fact that the fishing licenses bought by the fishermen provided the funds to stock the State waters. The bill provides that Boards of County Supervisors may declare public highways all rivers and sloughs which pass through uncultivated lands and which waters have had fish of any variety placed in them by the Commission officials. Section 25 of Article 1, State Constitution, provides "that no land owned by the State shall ever be sold or transferred without reserving to the people the absolute right to fish thereupon"; and no law shall ever be passed making it a crime to enter upon the public lands for the purpose of fishing in water containing fish that have been planted therein, during open season for the same.

This section means that in the Mt. Whitney Sierra regions, where there are many large streams and hundreds of tributaries and also about 1000 lakes and lakelets, and which waters have nearly all been stocked by the commission, these waters will not be gobbled up in the future and the public excluded from fishing, as is the case on some rivers and lakes of this State.

The new bill is aimed at owners of property along mountain streams, and they are at present quite numerous, who had no use for the water, were not cultivating the land, but were using their ownership to bar the public from fishing waters developed by the State.

* * *

Striped bass fishermen have experienced a slight change for the better in rod and line sport recently.

Louis Radigan, Harvey Harmon, Louis Gotthelf and Adam Hackmeier composed a party who tried their luck in Napa creek last Sunday. Results were pleasing to Gotthelf, who captured a 23½-pound prize. Harmon hooked a bass, and after playing the capture a half hour it broke away. That trip was encouraging for other fishermen, who will try the "drawbridge" tomorrow. Some big bass, one over 50 pounds in weight, have been caught at that resort in past times.

Notwithstanding dredger operations have recently deterred a number of the Wingo regulars from prospecting the bass holes of that district, Charley Urfer made a fine catch last Sunday. Five bass, running from 4 to 13½ pounds, were his capture. He fished in Appleby bay, about twelve miles below the Wingo bridge and two miles from Napa "drawbridge." Possibly his good luck can be laid to a new bait he used—red cedar shavings steeped in mudhen fat. Rather odd, to say the least. The shavings are tied in small bunches similar in style to the bucktail on a black bass hook. Striped bass are notorious for the variety of forage they will take. Bullheads, crab, duck entrails, etc., were in vogue one after the other, and now cedar shavings and mudhen lard!

The San Antone fishermen also had a look-in Sunday. Charles Bond and party landed several fair-sized bass. Billy Goodwin's fish weighed over 15 pounds. Bob Sangster and Jake Christianson were at their old standby, the mouth of Schultz slough.

Corte Madera slough near Greenbrae is worth a trial, for quite a number of striped bass have been taken there recently. Duck shooters in the shore and creek marsh blinds over there are in the habit of putting out a rod for the fish while waiting for careless ducks to fly near. Other good catches have been made off the levee in East San Rafael.

That striped bass are plentiful somewhere, if not around the bay creek fishing places, is proven by the record catch Friday morning of last week of a Middle river fisherman. His net haul weighed 6,000 pounds, the largest catch ever made in that district. He sold the catch in Stockton for $480—8 cents a pound. The buyer shipped to Fresno, Los Angeles, this city and San Diego. The season in Middle river had been very poor, which makes this catch rather remarkable.

GOOSE STEW FOR 1915.

Sacramento sportsmen and gun clubs are behind a movement planned to terminate the wholesale slaughter of geese which are daily shipped to the markets and commission dealers. Briefly, the plan provides for the preparation of 24,000 cans of goose stew to be utilized by local development and publicity associations as an advertising feature tributary of the natural resources of the Sacramento valley, states the Sacramento Union.

Besides the general advertising purposes of the canned goose stew the plan has two more specific objects. In the first place, the cans will be shipped away as reminders of Sacramento's 1915 goose stew which is to be better and bigger than that of last year. In the second place the promoters of the plan figure that the shipment of such large quantities of goose to all parts of the country will attract sufficient attention to inspire legislation giving this species of wild game more protection.

Arrangements have already been concluded with market hunters, who have signified their willingness to co-operate with the local plan and ship their birds to Sacramento, where they will be confined to cold storage until a sufficient number to warrant their canning is obtained. Libby, McNeill & Libby will prepare the geese, the copyright for the richly-embossed label having already been secured. The main annual migration of geese for the north will take place in April, and it is expected that a full supply will easily be ready by January 15.

The plan was originated by J. R. Craig, representing local sportsmen and gun clubs, who asserts that Sacramentans have contributed liberally to the support of the plan. He declares that the present exploitation movement will surpass the notable goose stew held there in November, 1913, which was attended by 9,000 people and attracted the attention of the entire country. Owing to the scarcity of green feed it is claimed that the geese to be canned will be of unsurpassed flavor—a canned souvenir of the wild life abounding in the Sacramento valley.

Sacramento outing clubs are the principal factors backing the plan, while the West Butte Gun Club, Chico Gun Club and the Colusa Gun Club are active.

A VETERAN SPORTSMAN GONE.

Jabez S. Swan passed away, after a lingering illness, last Sunday evening. He was a prominent member of the California Anglers' Association and was popular with all whom he came in contact.

He came to California in 1849 and was identified with the pioneer history of San Francisco in many of its phases. Formerly a newspaper man, he finally became interested in a prosperous and leading sign painting business. As an entertainer and raconteur, old time club men of this city will recall Swan with pleasant memories. In former years he was a member of both the Press and Bohemian clubs. He was a member of the San Francisco Chamber of Commerce, the California Development Board and of the Odd Fellows.

He was a native of Stonington, Conn., and was 72 years of age. He leaves a widow, three daughters, Emma Swan, Mrs. G. Adkins and Mrs. Athow, and three sons, Fred, Jabez Jr. and Arthur Swan.

THE IN-BREEDING OF DOGS.

A most thorough and capable writer on canine affairs is William Haynes. Mr. Haynes recently has been giving considerable study to the question of inbreeding, and from a mass of statistics embracing the pedigrees of Airedale and Scottish terriers he has reached the conclusion that inbreeding is not so commonly practiced by dog fanciers as popularly supposed, and is not so productive of results as line-breeding. Mr. Haynes' views were set forth as follows in a recent issue of the Journal of Heredity, a publication devoted to plant-breeding, animal-breeding, and eugenics.

That the thoroughbred dog is very closely inbred is the belief shared alike by the general public and breeders of other kinds of stock. Upon this belief are based most of the objections raised against the thoroughbred either as a companion or a hunting dog. Among dog fanciers one hears both extravagant praise and bitter denunciation of inbreeding.

In certain studies I have recently carried on in terrier-breeding I was collecting some data from the studbook records and I determined at the same time to discover, if possible, what proporion of registered dogs are inbred and whether or not these inbred dogs had been markedly successful in bench show competitions. The results are surprising, and furnish some interesting conclusions on the comparative value of in and line breeding.

For this analysis I selected two breeds, the Airedale and Scottish terriers. Both belong to the same general family; both are popular; both have known histories and carefully compiled records. But each has a very distinct origin, and neither is in any way related in blood. The Scottish terrier came from the Highlands, where they have been known as a distinct breed since the sixteenth century. They are the oldest breed of terriers that have been preserved in anythink like their original form. The Airedale terrier, on the other hand, is a manufactured breed which originated in Yorkshire something over fifty years ago.

Selecting at random, but picking half from each sex and ten from each volume of the stud-book for the past ten years, in one hundred Scottish terriers we find three inbred dogs, one from a sire bred to his own daughter, one from a dam bred to her son, and one from full brother and sister. Selecting one hundred Airedale terrier pedigrees in the same manner, we find seven examples of inbreeding, six from a sire bred to his daughter, and one from a full brother and sister. In other words, in the pedigrees examined, 3 per cent of the Scottish terriers and 7 per cent of the Airedales are inbred.

The avowed object of breeders of these dogs is to produce a dog that shall win at the bench shows. The highest honor a dog can receive is the right to the title of champion, which means that it has won a certain number of first prizes under at least three different judges. The rules differ somewhat in detail in England and this country, but the underlying principle is the same. While there are undoubtedly dogs that in fanciers' phraseology are known as "lucky champions," still it is safe to say that dogs winning the title are above the average quality of their breed, closer to the ideal as expressed in the standard. Moreover, since to breed champions is the object of the fancier's breeding operations, the per centum of inbred dogs winning championships furnishes a gauge to judge the effectiveness of this breeding system in accomplishing the result desired by the breeders of these animals.

Of one hundred Scottish terrier champions, one is inbred, from a dog mated to his own daughter. Of one hundred Airedale champions, two are inbred, one from a bitch mated to her own son and one from a full brother and sister.

In the case of line-breeding, however, we get very different figures. Taking only the two primary crosses of line-breeding, i. e., the crossing of half brother and sister, sired by the same dog, and half brother and sister, dammed by the same bitch, which, of course, does not begin to include all line-bred dogs, we find that of the hundred Scottish terriers picked at random four are line-bred, all from half brother and sister with the same sire. Of the hundred average Airedales six are line-bred, five from half brother and sister with the same sire, and one from half brother and sister with the same dam. Among the hundred Scottish terrier champions, nine were bred this way, eight from half brother and sister with the same sire, and one from half brother and sister with the same dam; and ten Airedale champions were so bred, nine from half brother and sister with the same sire and one from half brother and sister with the same dam.

Scotch Terriers—In-bred, 3 average dogs, 1 champion; line-bred, 4 average dogs, 9 champions; outbred, 93 average dogs, 90 champions.

Airedale Terriers—In-bred, 7 average dogs, 2 champions; line-bred, 87 average dogs, 88 champions.

Note.—The "line-bred" in the above only includes dogs bred from the primary cross of half brother to half sister, and there are certainly dogs in the "outbred" that are truly in-bred.

It will be immediately noted in the above that in and line breeding are more common in Airedales than in Scottish terriers, the ratio being close to two to one in all cases. Possibly this may be accounted for by the fact that, being a manufactured variety, close breeding has been more or less forced because of lack of breeding stock. It will also be noted that the close breeding popularly supposed to be practiced by dog fanciers is not apparent. In the caes essof the average dogs only 7 per cent. of the Scottish terriers and 14 per cent of the Airedales are closely bred.

The salient feature of these figures for the breeder is, of course, the evidence they present that line-breding has, in the cases of these two breeds at least, proved very much more effective than inbreeding in accomplishing the object desired. The ratios of champions produced in Scottish terriers are one to nine and in Airedales one to five. These figures confirm my studies in prepotency in Airedales.

Summarizing the data, it is evident that neither inbreeding nor close line-breeding is used as much by dog breeders as is generally supposed, and that of the two systems line breeding has been the more productive of results.

PACIFIC COAST FIELD TRIALS.

The Pacific Coast Field Trials Club's thirty-second annual trials started, on the club grounds near Bakersfield, Saturday, January 23 and were finished the next day. The winning dogs were: First—J. W. Considine's English setter Melrose Jack. Second—S. Christenson's English setter Forestress. Equal third—Lloyd Tevis' pointer Dr. Spot and Frank J. Ruhstaller's English setter Chestnut Belle.

The Derby was started Sunday and finished Monday. The winning dogs were: First—J. W. Considine's English setter Melrose Rod. Second—Frank J. Ruhstaller's English setter Shasta Maid. Third—J. W. Considine's English setter Melrose Chief.

The All-Age stake was commenced Tuesday and concluded Wednesday, the placed dogs were: First—J. A. Chanslor's English setter, Old Forester. Second—Mrs. A. G. Wilkes' English setter Melrose Dude. Third—R. E. Munger's English setter Llewellen Dunstan.

A more complete report of the trials will appear next week.

DOINGS IN DOGDOM.

Many important details for the Panama-Pacific Exposition international dog show have been completed, it is reported. Entries will close October 25. The dogs will be accepted at the fair grounds on Saturday, November 29, and the show will be held November 29 to December 1 inclusive.

The judges have not yet been selected, but it is expected that they all will be Eastern men of experience and standing. The prizes will be nearly all cash awards, but those who prefer cups will be given them.

Assistant Director I. B. Graham of the Livestock Department of the Panama-Pacific Exposition has received letters from fanciers and breeders all over the world who have expressed their wish to show at this big event.

The three dollar entrance fee includes taking the dogs out of their crates and having them taken care of during the show and preparing them for shipment back to the kennels after the event.

Every dog fancier in California and the entire Pacific Coast should show at the Panama-Pacific Exposition if just for the pride in the great undertaking of San Francisco. The dog show grounds will be in one of the largest halls in the world and the rings and benching will be up to date and sanitary. Leading fanciers and prominent kennel clubs of the Coast urge every dog fancier to prepare for this epoch in dogdom and to begin right now to get their dogs ready.

* * *

W. E. Mason has just received proofs from the printer of a book which he proposes to use in connection with the concession at the Panama-Pacific Exposition. The book will contain half-tone cuts of most of the noted dogs in the world, along with a short history of each. Mr. Mason, by the way, intends to conduct a full-grown dog show at the Exposition from the opening day to the last, and will have on exhibition representative specimens of almost every conceivable breed.

* * *

F. C. Farwell, owner of the world-famous "Sabine" kennels of Orange, Texas, intends to send a string of his best dogs to the Exposition show. Mr. Farwell has one of the finest appointed kennels in the world, breeding fox terriers exclusively. Some of the dogs that have made history for the "Sabines" are Sabine-Rifle, Sabine Red Gem, Sabine Remember, Sabine Result, Sabine Fireball, Sabine Rifleman and others too numerous to mention.

* * *

"The Greyhound Stud Book," England, is now kept by B. Mulcaster, secretary of the National Coursing Club. This year's volume has 600 pages, and last year over 5000 new greyhounds were registered.

* * *

Moritz Osterberg of Modesto set a steel trap for coons one night recently and captured a large beaver. As the animal's leg was injured he decided to care for it until it had healed, but his humane intentions were evidently not appreciated as the creature made his escape after several days of captivity and was traced to the edge of the river where he had felled two small willow trees, and as they, too, had disappeared, Moritz is wondering whether they were utilized as splints on the injured leg, or in building a raft for transportation to safer shores.

Drink Jackson's Napa Soda.

REGISTERED TOURNAMENT.

[Continued from last week.]

Status of An Amateur—Whenever a contestant's amateur standing is questioned in writing by a stockholder or by a representative of a stockholder of The Interstate Association, or whenever official exception is taken to anyone having signed The Interstate Association's amateur certificate, and is duly submitted to the Interstate Association, The secretary shall communicate with the manufacturer or manufacturers whose product is used by said contestant and obtain from said manufacturer or manufacturers the facts concerning the statements set forth in said certificate. In case full information is not given by said manufacturer or manufacturers the secretary, if he deems it proper so to do, may strike said contestant's name from the list of amateurs. This arrangement shall be effective as of January 1, 1908, and thereafter, but shall not be retroactive.

Status of a Professional.—Any professional who has in either of the last two years of his employment averaged 90 per cent. or better on registered targets shall not be permitted, from and after December 4, 1914, to compete at any registered tournament with amateurs for cash or merchandise prizes, or for any trophy or trophies "open to amateurs only," at such tournaments, within a period of three years from the date of the termination of his employment. All others who have not averaged 90 per cent in either of the last two years of their employment shall not be permitted to compete as above with amateurs for a period of one year from the date of the termination of their employment.

Miscellaneous Rules.—Not more than two tournaments of any one club shall be registered in any one year. For the year 1915 a contribution will not be made to more than one tournament of any one club.

No tournament shall be registered for a Sunday only. A tournament which includes a Sunday may be registered, but the scores made on weekdays only shall count in the yearly averages.

A club holding a registered tournament shall allow any contestant, who so desires, to shoot for "Targets only" in any or all events.

A club holding a registered tournament shall not charge more than 2 cents for each target shot at, except in the case of a club located in a section where freight rates are excessively high, thus making targets cost more than they do in the East, in which case such club may charge 2½ cents or 3 cents per target, if it is customary to make such charge at tournaments.

A club which has been duly authorized to hold a registered tournament shall require contestants to give their names and addresses on blanks furnished by The Interstate Association, and said blanks, filled out by the contestants, shall be sent to the Secretary of The Interstate Association at the time the report of the tournament is mailed.

A club holding a registered tournament where shooting names (assumed names) are allowed must forward to the secretary of The Interstate Association, with the other records, the real names of those using assumed names.

With the exception of practice day, weather permitting, a tournament shall be started in the morning before 11 o'clock, and the time of starting shall be stated in the program. The hour shall be reasonably governed by the scheduled time of arrival of trains or trolleys at the place where tournament is held.

All scores shall be shot in competition, and no scores shall be recorded which are shot prior to the advertised hour for starting the competition.

No contestant, whether amateur or professional, shall be allowed to "shoot up" any event or events other than events one, two and three scheduled for the first day, and this in no case unless the unanimous consent of the other contestants and the management are given.

No contestant, whether amateur or professional, shall be allowed to shoot any event or events in advance of the regular order of scheduled time for the competition as designated in the program.

No contestant, whether amateur or professional, shall be allowed to shoot any event or events other than those of the one day's program except in case the entry list is so large, or unavoidable conditions such, that it is necessary to carry over a tournament from day to day. The scores of any event or events thus carried over shall be recorded as being made on the day for which said event or events were originally scheduled.

Registration as herein set forth applies to United States gun clubs only. The old policy is still in force as to Canadian clubs.

Note Carefully.—There is such a thing as too much shooting, with its harmful reactions; therefore applications for one-day Registered Tournaments will be given the preference.

Preference will also be given to applications of clubs that will add money or trophies, in addition to the Interstate Association's contribution, to their respective programs for the benefit of contestants.

Furthermore, preference will be given on applications of clubs using a system of money division which provides for the clubs giving the tournaments to retain only one cent per target trapped.

Clubs holding Registered Tournaments shall use The Interstate Association's trap shooting rules, and must not change or modify the rule relating to shooting at a broken target.

Send applications for Registered Tournaments to The Interstate Association, E. Reed Shaner, Secretary, 219 Coltart Avenue, Pittsburgh, Pa.

THREE BIG TOURNAMENTS DATED.

A communication from Tlmer E. Shaner, Tournament Manager of The Interstate Association, is the following:

"Please announce to the readers of Breeder and Sportsman that the sixteenth Grand American Handicap tournament will be held in Grant Park, Chicago, Illinois, on August 16, 17, 18, 19 and 20, 1915, under the auspices of the Chicago Association of Trap Shooters. There will be $3,500 added money and the winner of first place in the Grand American Handicap will be guaranteed $500 and a trophy; winner of second place will be guaranteed $400 and a trophy; winner of third place will be guaranteed $300 and a trophy; winner of fourth place will be guaranteed $200 and a trophy, and the winner of fifth place will be guaranteed $100 and a trophy. Numerous other trophies will also be awarded.

"Also announce that the tenth Southern Handicap tournament will be held at Memphis, Tennessee, on May 11, 12 and 13, 1915, under the auspices of the Memphis Gun Club. There will be $1,000 added money and the winner of first place will be guaranteed $100 and a trophy; the winner of second place will be guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded.

"The tenth Western Handicap tournament will be held at St. Louis, Missouri, on June 15, 16 and 17, 1915, under the auspices of the Missouri Athletic Association Gun Club. There will be $1,000 added money and the winner of first place in the Western Handicap will be guaranteed $100 and a trophy; the winner of second place will be guaranteed $75 and a trophy, and the winner of third place will be guaranteed $50 and a trophy. Several other trophies will also be awarded."

AT THE TRAPS.

The local trapshooting season will be started by the Golden Gate Gun Club with a big blue rock prize shoot on the Alameda grounds Sunday, February 21, instead of on Washington's birthday, as originally given out. There will be a large attendance of trapshooting enthusiasts from near-by points. The main program will consist of two twenty-bird matches. Time allowing, other events will be pulled off.

A feature of the day is promised when clay pigeons will be thrown from a handtrap. This device was perfected by Jack Fanning, formerly prominent in local shotgun circles. The handtrap is held in the hand and the targets projected at any angle or speed, and has proven a baffling target thrower for many of the best shooters in the country.

The club officers elected for the ensuing year are: W. H. Price, president; Ted Riley, secretary-treasurer; Clarence D. Lancaster, of Oakland, captain; J. Hervey Jones, Tony Prior and George Thomas, directors.

The club season of seven monthly trap shoots will be held on the Alameda grounds, beginning in March.

* * *

The San Jose Blue Rock Club had its regular bi-weekly shoot Sunday afternoon, January 24. Earl Lamb, a new member of the club, shot his first blue rocks and scored well for a beginner, breaking 37 out of 50.

The scores made read as follows: O. N. Ford, 44-50; J. T. Dounes, 43-50; C. H. Nash, 42-50; Wm. J. McKagney, 41-50; E. Lamb, 37-50.

The next practice shoot was held January 24. A hundred-target program will be shot tomorrow. On February 22, the Golden Gate Club of San Francisco holds its opening shoot, and a squad from San Jose will attend. On March 7 next, the San Jose Blue Rock Club will hold its opening 1915 shoot.

* * *

Arrangements have been perfected for the holding of the tenth annual competition for the clay target amateur championship of America by the committee of the New York Athletic Club, which annually has the management of the affair in charge. As usual, the shoot will take place on the Travers Island grounds of the club. Friday, April 30, and Saturday, May 1, are the dates selected for the contests, which will bring together all the noted amateur target shooters of the country, including Woolfolk Henderson of Lexington, Ky., winner of the National Amateur Championship, as well as the Grand American Handicap, the premier event in the shooting world last year.

Two hundred targets will be shot at each day, the contest on Friday being in the nature of a preliminary run for honors, with five trophies for the several events. Saturday will be the time for the decision of the amateur championship, and there will be ten trophies to be shot for on that day, including the chief honor. On the same day the interclub five-men team race will be shot. This will be under novel arrangements, for, instead of naming a team of five men who will be compelled to represent the clubs which may enter, the clubs will have the privilege of selecting from the scores the five highest made by members as the team score, and the award will be made on that selection.

Philadelphia, Boston, Baltimore, Wilmington, Pittsburgh, and Chicago are expected to have teams in competition for this prize under these unusual conditions. There will be a suitable gold medal for each member of the team. There are to be special prizes for the longest continuous run at the traps in the two days, for the highest average, and for the high score at each of the four traps.

Shooting at all the events will be at sixteen yards, any standard load allowed. As shooting is to begin each day at 8:30, the club has decided to extend to all entrants the courtesies of the clubhouse during the two days' meeting.

* * *

Jack Fanning's suggestions, profusely illustrated, for handling a shotgun both in trap and wing shooting, and which appears in the December number of Recreation, edited by Edward Cave, we recommend to every devotee of the scatter gun. The story is full of practical information that all sportsmen can read with benefit.

* * *

Clarence J. Ashlin, a popular member of the local trapshooting fraternity two seasons ago, is back in the United States again, in Jacksonville, Florida. He was in Europe when the fireworks were started, but got away as soon as he could.

* * *

Just where and when the California-Nevada State Tournament will be held this year has not yet been decided.

Secretary Ted Riley sent notices to each gun club member of the two-State association, requesting a "bid" for the opportunity to hold the shoot at the club's home town.

ECHOES FROM THE NORTHWEST.

[By August Wolf.]

Officers of the provincial department of fisheries, with the assistance of the Royal North West MountedPolice, will direct their endeavors in the future to better enforcement of the laws regulating angling in Alberta than in former years.

J. D. Willson, provincial inspector of fisheries, who made the foregoing announcement in Edmonton recently, said that no license is required by settlers and other residents angling for jackfish, pickerel, perch, gold eyes and other coarse fish, adding:

"I am sure that the following extracts from the fishery regulations, which apply to angling, will meet with the approval of all true sportsmen, as well as by all settlers who have any regard and set any value on the natural resources of Alberta:

"'The use of spears, lights, firearms, dynamite or other explosive material in killing fish is prohibited.

"'The use of bare unbaited hooks or grapnels is prohibited.

"'No river or creek shall be obstructed by any kind of dam or trap for the purpose of killing fish.

"'Section 31. (a) Angling or trolling in waters frequented by trout, grayling or Rocky Mountain whitefish is prohibited, except under permit.

"'(b) Every British subject resident in the province for which it is issued shall be eligible for an angling and trolling permit. The annual fee for such permit shall be $1.

"'(c) Every non-resident shall be eligible for an angling and trolling permit, the fee on which shall be one dollar for a single day, or $5 for a season.

"'(d) In waters not frequented by trout, grayling or Rocky Mountain whitefish, angling or trolling may be carried on by resident British subjects without a permit.

"'Section 32. (a) In the Red Deer river and its tributaries, and the North Saskatchewan river and its tributaries, no one shall fish for, catch or kill any trout, grayling or Rocky Mountain whitefish from September in each year to April 30 following, both days inclusive.

"'Section 34. (a) No one shall in one day catch or retain more than twenty-five cutthroat trout, rainbow trout or Rocky Mountain whitefish, or of the different species named than will in the aggregate amount to more than twenty fish.

"'(b) No one shall catch and retain more than 10 lake trout in one day.

"'(c) No one shall, in one day, by angling or trolling catch or retain more than 25 jackfish, pickerel (dore), or of either of these species than in the aggregate will amount to 25.'"

Mr. Willson said also that the law requiring a permit and fees for angling in waters frequented by trout, grayling or Rocky Mountain whitefish is more particularly with reference to the upper waters of the Saskatchewan, Pembina, McLeod and Athabasca rivers and their tributaries. Trout are often found in the vicinity of Edmonton.

Small Bore Ammunition.

Remington-UMC .410 shot shells for small game has recently become extremely popular in the United States. For many seasons past this small gauge shell has been used extensively in England, Canada and the Colonies.

It is manufactured especially to meet the persistent demand for a small gauge shotgun shell of sufficient power to kill pests and nuisances, and small animals such as squirrels, rabbits, chipmunks, muskrats, weasels, woodchucks, small birds, etc., where the shocking power and range of the larger shells are not necessary. This shell can be used in settled communities where the range and scatter of the larger shells might be dangerous.

The 410 shell is made for use in special arms manufactured by American gun makers, and also for several guns of foreign make.

Loaded with shot from number 6 to 12 inclusive. Only one load is made up. The effective range is from 20 to 30 yards. Packed 25 in a box and 500 to the case.

HOW HEREFORDS CAME TO RANGE VALLEY.

This happened many years ago, about the year 1887. Range Valley in those days was a paradise for cattle. The ranges lay up on high mesas or tables; in summer the cattle ranged sometimes above the clouds in a green paradise that never got hot or dry. In the fall they came down into the canyons, where there were shelter, warmth and grass. As snows followed them down they emerged from the canyons and came out onto dry lower mesas, covered with yellow bunch grass as a Dakota prairie in September is covered with wheat. There were hundreds of square miles of magnificent range on both sides of Green River, and beyond lay the desert of Castle Valley.

On Range Valley range we bred "Durhams." We had a few very good purebred bulls and a good many good grade bulls. We had a lot of fine old Shorthorn cows, more or less of the milking strain. So milky were they, that we had trouble with them at calving time, and many a case of garget was caused by the failure of the calves fully to relieve the udders of their dams. We got the cows up sometimes to milk them for the house or camp and had no difficulty to select a three-gallon cow.

We believed in the "Durham" cow; we swore by her. Over in Castle Valley a man was breeding Holsteins on a desert range; through ignorance of breeds and environment other men were experimenting with Devons and Angus, which gave them poor calf crops. We with cowboy assurance pinned our faith to the reds and roans; whites were uncommon with us them. In those days we were sure of what we knew. A sheep poisoned the grass over which it walked. A sheep herder was a vile scoundrel, lazy and degenerate, and only fit for our ridicule and abuse. The only gun worth owning was a Sharp's old reliable 45-70; it would bring down the deer every time. The only horse worth riding was the one especial horse that each of us owned and loved, and so on went our list of things that we knew and knew well.

When rumors of the goodness of white-faced or "baldy" cattle, as the Herefords were commonly termed, came to us we jeered, "We've seen them; peaked-rumped, big-headed brutes; keep them away from this country." That was our comment. Then one day we succumbed and bought one Hereford bull calf and brought him down to the farm to run about the corral. He was a bright, cheery, merry little fellow, always full of feed and always fat. We could not but admire his shining white face and his bright eyes, but it was still a case of this conviction: "Herefords will do for the bad ranges; Durhams are the things for us."

Then came rumors of the approach of a great herd of purebred Herefords. They belonged to the McPhersons of Ogden; they were in care of one Alex. McPherson, a strange character of whom rumor said that he was half hunter, half cowboy and wholly wild Scot. Many and merry were the tales they told of old Alex. McPherson and his strange caravan. The day came at last when in his slow peregrinations through the desert of Castle Valley, the mountain of Emma's Park and the wild, rough trail of Price river he reached our range, and was about to pass through. Cowboy-like, we were all curiosity, and rode down beside the canyon to meet the cattle. We met them beside the little creek as they came wearily yet determinedly up the trail beneath ancient cottonwoods. These gaunt old wide-horned cows had big, raw-boned calves at their sides. The heifers looked fair and in good flesh, considering the heat and the travel; the bulls were thin but muscular and one or two at least were "on the prod." There were nearly 300 of these cattle; not all were purebreds. Beside the herd rode old Alex. and he drew up his weary horse beside us to talk as the cattle went by. He was very tall, angular and muscular. His face was tanned dark reddish brown and was thin and anxious, but held a Scottish twinkle in a firm blue eye. His dress was a thing of patches and in his old leather chaparejos he carried two large revolvers. We then and there dubbed him "Doubleshot" and "Doubleshot" he remained to the end of his life, which unhappily was not long. He was drowned in Green river a few years later.

"And these are the Hereford cattle, Mr. McPherson?"

"Yes. They are terribly thin because the grass is so bad. I have been driving them around now for five years, and I can not see that they get a blamed bit fatter."

We laughed and replied, "You won't drive them around much longer; when you get them across Green river you are at the end of the world."

"Well, then, that's where we'll stick together," was his grim response. They went on their weary way and forded Green river to Florence creek. There was a lad along, young Jimmie McPherson. The cattle rested; there was nowhere now that old Alex. could drive them further, so he let them fatten while he killed bear, built cabins and corrals and did all sorts of necessary pioneering work. The cattle fattened and were fine; we all had to admit that. Far up on the mountain sides one could see McPherson's whitefaces feeding. Our own little bull grew into useful age and began service. White-faced calves in numbers beyond expectation came in Range Valley. They were plump, growthy, self-reliant and hardy; they climbed so high after grass and stood the winter's storms so well that one by one we were converted. We admitted that "whitefaces are the thing for a rough range, but you want a Durham cow for the mother stock."

Later on, when sheep came and cleaned up a lot of our winter feed and our cattle starved and a good many of them died one winter, we found that it was the "Durham" that died; the whiteface somehow found the last bunch of grass up under a cedar tree or behind a ledge, found the grass, ate it, climbed resolutely higher after more, and died not.

So now the whitefaces dominate the hills and mesas, and the boy Jimmie McPherson is yet managing the descendants of those that old Alex. brought in. He is a father and for aught I know a grandfather in his own right by this time. And today men say, "The very best cattle are the Durhams when you have feed for them in winter and use good whiteface bulls on them, but when they must rustle for themselves give us whitefaces straight."—Jos. E. Wing, Breeders Gazette.

THE RISE OF THE JERSEY.

The Jersey breed of cattle originated on the Island of Jersey, which is in the English Channel about fourteen miles from the coast of France. The island is very small, being eleven miles long, four miles wide, and containing 28,717 acres. Market gardening is the leading industry, but the island has made its international reputation through its cattle. The farms are small in size, ranging from five to twenty acres, and on the average there is about one Jersey cow for every acre.

Originally the Jersey sprang from the large, red cattle of Normandy and the small, black cattle of Brittany, the latter blood predominating. This amalgamation of blood occurred several centuries ago; since that time a very fixed and uniform type has been established by careful selection. So much progress was made by 1799 that laws were passed forbidding the importation of any cattle to the island, save for immediate slaughter, and similar but more stringent laws are still in force.

As early as 1812, Jersey cattle were said to be phenomenal milkers. In color they were, at that time, red, red and white, cream colored, and cream colored and white. Some few were black, and some were black with brownish stripes down the back. In 1834 it was stated that Jersey cows were poor in shape, had bad udders, and some had short, bull necks and heavy shoulders, but the exhibitions at the Royal Jersey Show worked steady improvement in these points. Inferior animals were sent to the butcher.

A number of breeders in England took up Jersey cattle and improved them, beginning as early as 1811. The most noted of these was Philip Dauncey of Buckingham County, who began his work about 1821 and continued it until 1867. He bred for large average better production, constitutional vigor, and a uniform color, free from white markings. In this way a color fad was started which gave the breed a setback for a time, inasmuch as useful points were in many cases made secondary to color. However, Mr. Dauncey bred many notable animals.

Eventually the Jersey was given a fixed, uniform type, showing the most extreme dairy temperament and yielding the richest milk of any breed of dairy cattle. Breeders have emphasized butter-fat production, the quantity of milk being secondary, but important.

Today Jersey cows average about 850 pounds in weight, and bulls about 1300 pounds. Some families average considerably larger in size than do other families of the breed. Jerseys reach breeding age quickly; some few breeders have practiced having the heifers calve at 18 to 20 months of age, and it has been reported that heifers under 365 days old have produced calves.

The Jersey has excellent dairy form and is very lean in appearance. They have superb quality throughout, but sometimes lack constitutional vigor and desirable ruggedness. Their color varies, including various shades of fawn color from silvery and yellowish to orange and brownish. Some are a mulberry black. White markings are not uncommon, but the solid fawn color is preferred. Brindles are disliked.

The head is very clean-cut, very "breedy," dished, rather short, and fairly broad. The eyes are very large and prominent. The horns are short and strong in the bull, but are fine and curving in the cow. White or amber colored horns with black tips are liked best. A long, finely modeled neck is characteristic of the breed.

The chest is deep, but often lacks proper width. Depth and capacity of barrel are good. The back and loin should be straight, and the rump is long and lean, but sometimes narrows too much at the tailhead. The thighs are thin and nicely hollowed inside the leg to make room for the udder.

The Jersey udder is usually very mellow and milks out well, but some Jerseys are criticized for small udders and small teats. However, many cows of the breed have beautiful udders of great capacity. Short, cut-up fore udders are rather too common. The development of the milk veins and milk wells is very good. Jerseys are economical butter-fat producers, and on small or hilly farms, and where concentrated feeds are fed in goodly amounts as compared to roughage, this breed is excellently adapted.

The milk of the Jersey contains very large fat globules, and the cream rises, separates, and churns easily. Many cows produce 14 to 17 pounds of butter per week, while a few exceed 20 pounds. The butter color is excellent. A fair grade of Jersey milk will contain at least 4.5 per cent of fat, and the breed commonly averages more than this. In quantity of milk, Jerseys do not rank high, although some produce 5,000 pounds of milk per year.

Jerseys were first brought to the United States in 1850, and following that date many importations were made, mostly by wealthy men. In 1870 came the color fad, and the breed began to boom about the same time. The boom culminated in 1883, and then prices fell and many fancy herds were dispersed at prices low enough to put the cattle into the hands of men of moderate means. From that time forward, the utility points of the animals received greater attention and development in this country.

The American Jersey Cattle Club was organized in 1886 and has done much to encourage and foster the breed. This association publishes the Herd Register, in which 364,000 animals have been recorded to date. The Club started its seven-day tests in 1884, and in 1903 established the Register of Merit, in which are recorded those animals which meet the requirements for official tests. The official requirement for a mature cow is 360 pounds of butter-fat in one year.

The highest record cow of the breed is Sophie 19th of Hood Farm. At eight years of age she produced in one year 17,557 lbs. of milk, testing 5.7 per cent butter-fat, and her butter-fat yield was 999.2 lbs. Eminent's Bess, at the same age, made a yearly record of 18,782.9 lbs. of milk and 962.8 lbs. of butter-fat.

The list of famous Jersey sires includes Exile of St. Lambert 13657, St. Lambert Boy 17408, King of St. Lambert's King 30752, Ida's Rioter of St. Lambert 13656, King of St. Lambert 15175, Pedro 3187, Diploma 16219, Tormentor 3533, Fancy's Harry 9777, and Stoke Pogis 3rd 2238.

Prices for Jersey cattle have reached high levels in America. The cow, Imported Blue Belle, sold for $3,600 in 1904, and the bull, Noble of Oaklands, sold for $15,000 in 1909.

In conclusion it may be said that the good points of Jersey cattle are: 1. Extreme quality. 2. Extreme dairy temperament. 3. Good dairy form. 4. Early maturity. 5. Beauty of appearance. 6. Mellow udder. 7. Good mammary capacity. 9. Especially adapted to rough lands and hot climates. 10. Breeders to type. 11. High per cent of butter-fat. 12. Large fat globules. 13. Good butter color. 14. Economical butter-fat producers. 15. Popular as a family cow.—American Breeder.

FARMERS WANTED.

Uncle Sam is looking for several hundred practical farmers to take up homes on the irrigation projects he has been building in the West. The land is free, but the law requires settlers to pay their share of building the irrigation system, and for this reason a moderate capital is necessary. A practical farmer with from $1,500 to $3,000 should have no trouble in acquiring one of these farms and putting it in successful cultivation.

Under the new Extension Act the settlers are allowed twenty years in which to pay for their water right, and no interest is required on deferred payments. Details concerning opportunities and terms will be furnished upon request by the Statistician of the Reclamation Service, Washington, D. C.

The farms are located in Idaho, Montana, South Dakota, Nebraska, Wyoming and Nevada, and offer opportunities for citizens to establish homes in a growing country. Adjacent farms are under cultivation, railroads have been built, schools and churches established, telephone and rural free delivery are available, and most of the hardships of pioneering already have been overcome.

Alfalfa is the big crop, although grain and sugar beets are profitable and in some sections truck farming pays well. Livestock and dairying are the principal industries.

AYRSHIRE BREEDERS MEET.

The fortieth annual meeting of the Ayrshire Breeders' Association was held at Manhattan Hotel, New York., Jan. 14, 1915, with about 100 members and friends present. The report showed the association in a prosperous condition, with 104 new members.

Officers elected were: John A. Ness, Auburn, Me., president; J. W. Clise, Seattle, Wash., John R. Valentine, Bryn Mawr, Pa., Wm. T. Wells, Newington, Conn., Geo. E. Converse, Woodville, N. Y., vice-presidents; C. M. Winslow, Brandon, Vt., secretary-treasurer; Geo. H. Yeaton, Dover, N. H., auditor; Geo. R. Wales, No. Beverly, Mass., Dudley Wells 2d, Wethersfield, Conn., John Sherwin, Cleveland, Ohio, A. J. McNab, Black River Falls, Wis., W. P. Schanck, Avon, N. Y., G. M. Leslie, Ft. Wayne, Ind., E. J. Fletcher, Greenfield, N. H., F. N. Dow, Portland, Me., directors for three years.

The J. W. Ogden Sterling Silver cup was won by Penshurst Farm, Narberth, Pa. The French Prize Cups for best record in each class during the past year were: Mature class, Garclaugh Spottie, 22589 lbs. milk, 816.25 lbs. fat, owned by John R. Valentine, Bryn Mawr, Pa.; four-year-old class, Broomhill Bessie 3d, 14319 lbs. milk, 530.12 lbs. fat, owned by Barclay Farms, Rosemont, Pa.; three-year-old class, Rena Ross 3d, 13710 lbs. milk, 551.89 lbs. fat, owned by John R. Valentine, Bryn Mawr, Pa.; two-year-old class, Beuchan Ermine, 15186 lbs. milk, 516.64 lbs. fat, owned by Hugh J. Chisholm, Port Chester, N. Y.

Mr. W. E. Skinner of the National Dairy Show at Chicago, was a guest and made a very interesting and instructive talk on the foot and mouth outbreak. The association voted substantial aid to the Panama-Pacific Exposition, the National Dairy Show, and to all other fairs offering $400 and over to the Ayrshire class. Forty-eight sat down to the banquet.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects

READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

DON PRONTO 2:02¼, eight years old, pacer, no straps, needs no boots; sound, not a blemish or a puff. Any amateur can drive him as well as a professional; has been in 2:02 with a 230 pound amateur up. This is a matter of record. Don Pronto is the cleverest all-round high class pacer in the country. Has held a world's record and is from the dam of Manrico (3) 2:07¾, a world's record holder. Is bred to be a great sire, being by **THE DIRECTOR GENERAL** (sire also of Wy-Drad 2:04¼, William O. 2:04¼, Mainsheet 2:05, Deuchester 2:07, etc., 8 in 2:10), and out of **SILURIAN,** that wonderful producing daughter of Wilton. Don Pronto was the biggest money winning free-for-all pacer in the west both in 1913 and 1914. Can surely beat his record. Is very beautiful, pleasant and a great favorite. **Price $1750.00.**

ALARICH 2:11¼ (Breeder's mark 2:09), trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. **Price, $650.00.**

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, **CARLOKIN 2:07½.** First dam Carolyn C. by **Axtell (3) 2:12** (a champion); second dam by **Expedition,** sire of Bon Voyage 2:08; third dam by **Princeps** (son of Woodford Mamb.); fourth dam by **Hambletonian 10.**

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident and Stanford stakes, the State Fair, P. C. T. H. B. A., Pleasanton and Oregon Futurities for 1915. **The best buy in California at $1750.00.**

NELLIE Mc, black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by **ZOLOCK 2:05¼,** dam by **Wilkes Moor,** son of **Guy Wilkes.**

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not puil a pound and can be placed anywhere. Eligible to any class. **Price $1000.00.**

CARLETA, bay filly, two years old, by **CARLOKIN,** dam **ALEXANDRIA, tr. 2:20,** by **Bon Voyage 2:08;** second dam by **Oakland Baron 2:09¼;** third dam by **Allandorf,** etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. She has been up from pasture about eight weeks and trialed this week in 2:49 very easily, last eighth in :19¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. **Take her at one-third her value, $500.00.**

OMAR, gelding, trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by **DEL CORONADO 2:09½,** dam Pineapple by **Albion** (son of **General Benton**). **A present at $350.00.**

CARLSCHEN (2) 2:23, breeder's record, brown gelding by **CARLOKIN,** dam **BONNIE AILSIE 2:08½** (dam of **Contention B. (3) 2:08¼**) by **Faustino,** son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. **Price $800.00.**

HERMES, brown colt, two years old, by **CARLOKIN,** dam **MISS QUEALY** (full sister to **Manrico 2:07¼**).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. **Price $1500.00.**

JOHNNY DUGAN, 3-yr.-old breeder's record 2:16, pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, **CARLOKIN 2:07½;** dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. **A great buy at $350.00.**

OLD FOLKS, bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by **DEL CORONADO 2:09½,** dam **IRAN BELLE,** by **Iran Alto 2:12¼;** second dam **ANNABELLE,** etc. He stands A-1 with the railbirds around Los Angeles and is ready to begin fast work, having been jogged all winter. **Price $1000.00.**

CARINA, bay filly, trotter, two years old, by **CARLOKIN,** dam **ATHERINE** (dam of Copa de Oro 1:59, Rags 2:09¼ and Nicola B. (2) 2:23¼, tr. 2:17, winner of the Oregon Futurity and second in the P. C. T. H. B. A. stakes for two-year-old trotters). Carina is entered and paid up in the same stakes as Carleta. She is a grand looking, well developed filly, showed a :40 gait at eleven months old. Is good gaited and good headed, is in training and promises to make a high class trotter. Trialed this week in 2:46, last half in 1:12½. **Price $600.00.**

AND ONE FOR THE $20,000 P.-P. I. E. TROTS — RAGS 2:09¼, winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old — in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion a good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by **Del Coronado** and out of the dam of **Copa de Oro 1:59,** etc. **Price $2000.**

In addition to the ones above mentioned I will offer to intending buyers **NICOLA B. (2) 2:23¼, JIM CRAM,** three-year-old pacer (brother to Chango 2:12¼), a **YEARLING BROTHER TO ESPERANZA 2:09,** engaged in all of the Stakes, the phenomenal two-year-old pacer **SANDY McNABB** (staked), **MISS QUEALY** (full sister to Manrico), **FIVE YEARLINGS** and **SIX TWO-YEAR-OLDS,** most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

THE FARM

A GRINDING MACHINE IS PROFITABLE.

When the writer worked on a farm it was customary to feed the milk cows whole ears of corn. One particular farmer had a standard ration of eight ears for each cow, no matter how much or how little milk the cow produced, nor whether it was rich milk or poor milk. They all received their regulation eight ears twice each day. This was a poor way of feeding cows, but it was the best that this particular farmer knew.

A few years later the writer visited this man's farm and he had changed his method of feeding. Instead of feeding whole corn ears he was feeding soaked shelled corn. Every night so much corn was put to soak in a barrel of water and the next day the cows were fed their ration from this corn. This probably was a step ahead of the old way of feeding, but still it was not considered a very successful method. The water soon got sour, some corn was over-soaked, and some was under-soaked. In cold weather the water in the barrel would often freeze. This ice water made the corn very cold. As a whole it was not satisfactory.

This same farmer has now purchased a gasoline engine and a grinder and every kernel of corn fed to his cows is ground. He learned that it did not pay to feed cows whole grain and have it pass through the digestive tract of the cow without being digested.

Formerly it was thought that even if the corn did pass through the cows in an undigestive form, most of the nutriments had been absorbed. Several experiment stations have now proven by chemical analysis that the corn and the grain that passes through the cow whole, is practically as nutritious as is the corn before it passed through the cow. Several experiments show that when cows are fed the grain whole, as much as 22 per cent of the grain passes through the cow in an unmasticated and undigestive condition. This is a serious loss, especially when grain is so high priced as it is now.

Every dairyman should plan to have a feed grinder. These can be purchased now for a relatively small sum.

Grinding the grain saves the energy and work of the cow. What is the use of feeding a cow a lot of grain and then have her spend a large portion of it in grinding it herself. Take this load off the cow and let the cow reserve her energy for putting this feed into the milk pail.

Grinding the grain saves the life of the cow. In nearly every instance it is the stomach and the teeth that give out first in a dairy cow. A good dairy cow we want to have last just as long as possible, so save her teeth and her stomach by grinding her food.

The cow that will digest the greatest percentage of the food that she eats and put it into the milk pail, is the best and most profitable cow. Unless the feed is put into a condition so that it can be digested, little can be expected from a cow in the way of changing feed into dairy products—Dakota Farmer.

VALUE OF MARKET REPORTS.

The farmer who fails to keep fully informed as to the condition of the markets and the value of the products which he has for sale is making a serious business mistake. Such a mistake if made in any other business would mean immediate bankruptcy.

Most buyers of stock and produce are not philanthropists, but are looking for the dollars, and they usually look closely. They are also well posted concerning the market value.

There is no excuse in these modern times for dereliction in this respect on the part of farmers. The mail brings the daily newspapers containing the market reports, and the telephone may be brought into use when required.

Keep in touch with the markets, especially for those products which you have for sale or may have to offer.

EASY MONEY IN SHEEP.

"Keep all the sheep your spare pasture will support. And for sheep pasture you can count every nook, fence corner, and brier thicket where no other stock will do any good. Sheep," says D. A. McComb in Farm and Fireside, "can be relied on not only to help clean up the farm, but to gather up young weeds, briers, fence-corner grass and thistles and actually turn them into your bank account or your pocketbook. And when I say this I am speaking from real experience. On our farm we have 35 ewes. We always winter that many. Then we keep a pure-bred buck. We breed so that our lambs come in March.

"A year ago last fall our sheep money was $206. This we could almost call clear gain, at least it was almost self-made money; made while we slept and while we were busy doing other work on the farm.

"Later in the season, when we thought the market suited us we had 35 nice lambs to sell. The money we got for them was made from material which would otherwise have gone to waste, and it was made almost without any effort or cost on our part. Then the ewes and ram in the wool crop, will just about even up with you every year for their keeping. So we have come to call the sheep money the easiest clear money on the farm.

"Every farmer with 40 acres or more should always have some sheep. Go at it according to the capacity of your fence corners and other little nooks and places of nipping for keeping them without special feeding."

YOLO DAIRY HERDS IMPROVE.

J. F. Grass, Jr., official cow tester of Yolo county, has filed his report on the conditions of county dairy herds for the month ending December 31. It is recorded that there are six cows in the association which have produced better than 50 pounds of butter fat during the month. The owners of these cows areA. B. Welch, Charles Hoppin, J. Gould and George Griffes. J. Gould has the record cow for the month with a total of 56.35 pounds of fat for the period. His dairy also has the best average for the season with a mark of 35.10 pounds.

The first six months of the life of the association shows A. B. Welch to have the best averaging herd for that length of time. His dairy stock has produced an average of 38.53 lbs. of butter fat per month for the past six months.

Improvement is being seen in the tests of Mr. Grass every month they are turned in, showing that the worthless stock is fast being weeded out of the Yolo county herds and greatly increasing the efficiency of the industry.

The Amador-El Dorado Stockmen's Association is moving in the matter of getting a law passed by the legislature to remove the scrub bulls from the ranges in order that a higher grade of stock may be assured.

Sutter county will very materially increase the bean acreage the coming season. Large tracts of land have already been leased for this crop to agricultural contractors, and others are being negotiated. The late crop turned out very heavy and returned the growers a good profit.

The date crop of Coachella valley has all been sold at private sale and has realized unexpectedly high prices. The crop has been a very large one and the fruit of exceptionally good quality. It is estimated that in the Coachella valley there are 50,000 acres of land adapted to the profitable raising of dates, though at the present time there is under cultivation only a few hundred acres and only 1500 palms in bearing.

COPA DE ORO 1:59
WINNING PERFORMANCE

○ DURFEE'S STALLIONS ○

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1298

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ De Ora (3) 2:17
2-yr.-old record 2:13½. 2-yr.-old record 2:27¼.
Trial (3) .....2:09 Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1297.

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 Nicola B. (2).....2:23½
John Warwick (2) 2:17 Santiago (3) 2:24¼
The Lark (3).....2:18½ May Marian p (3)..2:24¼
Carl (2) .....2:19¾ Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 El Carbine (2).....2:27½
Carsto (2) .....2:22½ Eileen C. (3) 2:29
Carlschen (2) .....2:23 Carlos (2) 2:29¼
Fulton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

I wish to announce to coast breeders and owners of trotters and pacers that for the season of 1915 I will maintain a

Public Stable
—AT—
Pleasanton Driving Park

where the facilities for the successful production of speed are unrivalled.

Parties having staked youngsters for development for their engagements or aged horses to be fitted and raced during this or future seasons may consign same to my hands, knowing that they will receive the very best of care in every way and the intelligent handling necessary for their fullest development. Address for all particulars,

Lou B. Taylor,
Box 441 Pleasanton, California.

SAVE-THE-HORSE
(Trade Mark Registered.)

BEATS OUT THE HUMANE SOCIETY

Youngstown, O., May 4, 1914.
Troy Chemical Co., Binghamton, N. Y.

I used Save-theHorse for splint when the veterinary said I simply had to let her up and blister her—however, I sent for your Save-the-Horse, and used it as directed and never let her up. I would take her out and jog her at 4 o'clock in the morning, when she was so dead lame that the "Humane Society" would have had me arrested had they seen her. But she was worked right through it, and won five races, one after the other a week apart, and no one ever saw her take a lame step. Very respectfully yours,
C. O. BROWN.

Another Lesson From Experience. J. A. Jones, Southampton, Mass., writes: "Send bottle of Save-the-Horse. Just counting up the different horses—nine before this and on all it did the trick. I think it the best remedy on earth."

19 YEARS A SUCCESS

Every bottle of Save-the-Horse is sold with signed contract bond to return money if remedy fails on ringbone, thoropin, SPAVIN or ANY shoulder, knee, ankle or tendon disease. NO blistering or loss of hair. Horse works as usual. —Any season.

$5 at druggists', WITH CONTRACT, or we send by Parcel Post or Express paid.

2053 Sutter St., San Francisco, Cal.

FOR SALE.

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great procer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

FRED W. KELLEY.
366 Pacific Bldg. San Francisco.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

BREEDER AND SPORTSMAN, 366 PACIFIC BUILDING SAN FRANCISCO

J. J. Ryan, San Francisco, offers for sale the pacing gelding

Happy Dentist 2:05 3-4, MATINEE RECORD 2:06 1-4

useful in his class in professional company, unexcelled as a matinee horse. Holds coast matinee record, 2:06¼ and 2:06¾, and was best winning horse in San Francisco Driving Club matinees in 1914, by actual figures. Right in every way physically, perfect in gait and manners, fearless on road, and can be driven in any company by a lady. Offered for sale only because I have too many horses for my use. None better bred—by Nutwood Wilkes 2:16½ and out of the great brood mare Azrose (dam of 3) by Azmoor 2:20¾, son of Electioneer 125. See him at the McKinney Stables or address for particulars

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

DISTRICT FAIR BILL AMENDED.

As a result of a conference of a number of directly interested parties during the closing days of the first period of the executive session of the present legislative bodies, amendments were made to the Judson bill that make the outlook for its passage and signature by the governor much more promising, as the present form of Mr. Judson's measure is known to be very much more in keeping with Governor Johnson's previously expressed ideas.

As amended, the bill provides for seven districts, each district to have an appropriation of $3,000 per year for 1915 and 1916, which is a sufficiently modest start, by all means. California can well afford this step, and its taking can have but one result if these initial fairs are honestly administered—a return of district fairs in California on an absolutely assured basis, and in sufficient number to allow every community that can and will support a fair to have one. The individual appropriation is not large, but it is of sufficient size to throw the balance between profit and loss in favor of the former in almost every instance, and enable the various fairs to get on their feet.

As there is a great deal of hard truth in the old saying that "the Lord helps those who help themselves" and that "to him that hath, shall be given," it is most probable that in case of the enactment of the bill as amended, those points that have maintained a fair without assistance will be the scenes of the first of the state-aided events, which to most people seems absolutely right and fair. Working independently and against the same odds that put other associations out of business when state appropriations were withdrawn and betting on the speed events prohibited, fairs have been given at Santa Rosa, Fresno, Hanford, Pleasanton and Riverside that have proven popular with the people of the adjacent territories and in the main have paid some measure of profit, while Woodland has kept on the map as a racing point on speed events alone and Yolo folks are "ripe" for a fair. Given an appropriation of the sums above mentioned there is positive assurance of success at these points, and as "nothing succeeds like success," that is exactly what is vital to the growth and spread of state-aided district fairs.

We are very hopeful of the bill going through both houses in its present form, in which case we are also inclined to the belief that Governor Johnson will affix his signature to the same, thereby bringing a great relief to a condition of affairs that has for some time been assuming very grave aspects. California has for many, many years maintained high rank as a breeding state, and the sums invested in breeding farms and stock runs into a very large sum—a total composed of individual investments which in some instances never paid large return on the cash involved permanently, and whose continuance under existing conditions meant facing a certain loss. A re-establishment of district fairs on even the extremely modest basis proposed means a great impetus to horse breeding through opening a field for earning capacity for track or show ring stars, and the return of the horse to the position he occupied in previous years as a means of bringing pleasure to the countless thousands of his admirers.

There are stables of horses at present in training in California that were facing a trip east or north this year in order to find sufficient racing to pay for fitting horses for campaigning, but, given these seven fairs, most, or all, of these strings will be enabled to stay at home, which means not only an added pleasure for their owners and admirers but a pronounced dollars and cents increase in money kept and spent in California. Also, it means an added incentive for eastern owners to ship to the June meeting of the P.-P. I. E. and remain here straight through until fall.

See to it that when the legislature re-convenes, your senator and assemblyman is "lined up" to put the bill up to the Governor as it now stands, for by no other method will district fairs soon be brought back to California.

AS TO STALLION ADVERTISING.

The attention of stallion owners who intend having their horses in service during the breeding season of 1915 is called to the fact that a number of California's progressive breeders who get their full share of the business each year have started the season run of their announcements with this issue of the Breeder and Sportsman, and those who have not made such announcement are reminded that now is the proper time for inserting the same in our business pages. Brood mare owners are planning their bookings, and for the stallion owner to get full value received for money spent for publicity, that expenditure should be made early in the season before booking proper begins. There is a larger proportion of stallions than mares in the ranks of the light harness horse in California, so that competition among stud proprietors is pretty keen, but it is accepted among business men in all pursuits that the stiffer the competition the harder you must go after business if you are to keep your head above water financially, and the principal method of going after business in all merchandising ventures is by a liberal and convincing use of printer's ink. The stallion owner is merely a merchant, a vendor of the services of his horse, and if the wares he has to offer are worthy of being sought by the public, printer's ink plays the same important role in contributing to his success that it brings to the upbuilding of any other great vending enterprise.

For the purpose of reaching owners of broodmares in the west, no medium can be more advantageously employed than the Breeder and Sportsman, going as it does into the home or office of practically every "live" westerner who has a fondness for the great American trotter and who is a patron of breeding in either a modest or pretentious manner. It is the only paper in its territory that serves the wants of the horseman, and for over thirty years, without interruption, patrons of its business pages have found money so spent, well spent—invariably an investment that paid good returns. The markedly successful participants in any of the allied branches of the industries of breeding and racing trotters have been generous purchasers of Breeder and Sportsman advertising space for this one supreme reason—it paid, and pay is what men labor for.

We have for some time maintained that the tide of the trotting horse business reached its ebb in California in the year 1914, and that the outlook for the future is brighter than for some time past. There seems at present a very strong probability of the restoration of district fairs in California this year, and even though they be re-established in a most modest manner, the step is one that opens a great field for expansion in the production of horse flesh. Our growing agricultural operations—and there are thousands of acres in California now "laying out" that are susceptible to cultivation as our population increases and our knowledge of locally adaptable methods of scientific husbandry waxes larger—require annually a greater number of generally serviceable horses, and no horse is so generally serviceable as is the trotter. Moreover, the European powers show no let-up in their demands for American horseflesh for the pursuit of their campaigns—demands which, with the coming of peace, will be vastly enhanced in the future. True it is that gasoline will be the means of tilling untold areas of European soil in the new regime, even as today the power-farmed acreage of America runs into a staggering total, but for the rank and file of farmers, both at home and abroad, the horse is and will be for unnumbered years the major instrument in use in their pursuit of livelihood.

It is in the light of these considerations that we say the future is brighter than we have known for long; that we say to the stallion owner to put his business announcement where it will reach the highways and the byways of the realm of the trotter on the Pacific coast, and that we say to the owner of every brood mare in the land, select the best stallion to whose services you have access and see to it that she gets with foal. You will thank us for the advice in the future.

A USEFUL PUBLICATION.

A copy of the second edition of the Horseman's useful little book, "The Care and Training of Trotters and Pacers," has reached our reference table and is quite an improvement over the original publication, which had attained great popularity and a wide circulation among horsemen. The new book, which is little only in size but great in the fund of authoritative information contained within its covers, contains several pages more than its predecessor, and is an excellent example of modern printing. It has been compiled by the editorial staff of the Horseman from matter gathered from the foremost of American owners, breeders and trainers of light harness horses, and will be found a valuable addition to the library of every practical horseman.

The volume is divided into ten major chapters, as follows: The Suckling Colt, The Weanling Colt, Making Speed with Yearlings, Shoeing Colts, Preparing for Two-year-old Futurities, Three-year-olds, Shoeing of 101 Famous Colts, Six Principal Defects in Gait, Types of Shoes, and Miscellany, the latter chapter containing several valuable bits of information not properly to be classified under the foregoing headings.

We have supplied a number of our readers with copies of the first edition, and will gladly take care of orders for the new books, which we can most warmly recommend as "Volume 1 of the Horseman Library"—an excellent foundation upon which to build for the newcomer to the game, or a valuable addition to any old established collection of books relating to the trotter, no matter how complete.

AND ONCE AGAIN the east and the west clash in this matter of nomenclature. Our eastern contemporaries cast aspersions last season upon those redoubtable westerners, Shoestring Billy, Billy Dog Tracks, Sand Hill Pete, and others of their kind, and now comes one of the aforesaid eastern contemps with word that the name of the lamented Squantum, who cashed in at Phoenix last fall, is a Nantucket whaleman's word, probably of Indian origin, signifying a feast or picnic. Right here we rise to a point of order to remark that there is absolutely no comparison, as inherently descriptive terms, between the Indian idioms of the extreme east and the far west in this matter of hanging a brand on a festival. "Squantum" rolls past us without creating a ripple of curiosity as to the whenceness of its why or imparting to our feeble intellect the slightest hint as to its meaning—musical on some tongues, perhaps, and reminiscent of days gone by down in the Cummaquid or Quinapoxet neighborhood when the noble red man wandered from Paugus to Saugus and southward as far as Quinebaug or Pequabuck, but, on the whole, flat, friends—flat. Also colloquial and little known. Once away from the confines of Teaticket or Tarpaulin Cove we doubt if ten per cent of the natives of New England could tell the chance inquiring stranger the true meaning of the word. How different with our simple and expressive Siwash idiom, "Potlatch"! Less graceful, perhaps, for gracefulness is not a Siwash characteristic. Less musical, perhaps, for music is scarcely a long suit of the Siwash, save in its less finished harmonies—or rather more finished inharmonies. But descriptive—my, yes! Suggestive of its true origin and meaning—you bet! Say "Potlatch" to the veriest tenderfoot just arrived from way the other side of the big divide and he pricks up his ears with interest and a suspicion, at least, of comprehension, and therein lies the vast superiority of our western lingo. "Squantum"—"Potlatch." Put 'em side by side, try 'em out on the dog, or the next man you meet, and we win hands down.

Wintering in Angeltown

ROBERT A. SMITH, Correspondent.

A very close observing "old timer," one of a coterie of horsemen at Exposition Park, Los Angeles, last Thursday morning remarked: "I have never in my life seen so many high class colts at one race track." The trainers here are busy from dawn 'til dark, "starting up" their colts, getting them properly booted and balanced and having ever in mind the hope of topping the summary in some of the two-year-old stakes to be trotted in California the coming season. The preparatory jogging period of over a hundred head commenced about New Year's day while the colts have been studying their lessons and some of the older ones moved up a little in a short brush. The young reinsman Will Durfee, with his usual equanimity, tireless endeavor and ceaseless vigilance, has in his training department thirty-five head and with his corps of assistants is "honeing" every day. In addition to his sires Copa de Oro 2:01 by Nutwood Wilkes 2:16½ and Carlokin 2:07½ by McKinney 2:11¼ Will has among his record horses every one of which, except Don Pronto, obtained their marks last year:

Virginia Barnette (3 2:08¼, by Moko, dam Zephyr 2:07¼ by Zombro 2:11. Virginia will probably start in both of the $20,000 stakes for 2:10 class trotters at the Panama-Pacific meetings in June and November.

Rags 2:09¼ by Del Coronado 2:09½, dam Atherine 2:16¾ (dam of Copa de Oro p. 2:01) by Patron 2:14¼. As a three year old Rags won all his engagements, acquiring a record of 2:13¼, which he reduced last year to 2:09¼, and later won the $5,000 stake at Sacramento. He will be entered this season at the "Fair," and through the California circuit.

Esperanza (3) 2:09 by Carlokin 2:07½, dam My Irene S. (2) 2:28¾ by Petigru 2:10½. This filly won six races last year, including all the three-year-old classic California stakes, was unbeaten and worked a mile at Santa Rosa during the meeting in 2:07¾. She is entered in the $20,000 stake at the San Francisco June meeting.

Bertha Pointer 2:08½ by Del Coronado 2:09½, dam by Sky Pointer (full brother to Star Pointer 1:59¼). This is a very clever, good headed and very fast mare and may be "kept over" for the big stakes in the Grand Circuit in 1916.

Josephine Watts (3) 2:09½ by General Watts (3) 2:06¾, dam Belle Andrews (dam of Beirne Holt 2:11¼, etc.) by Billy Andrews. This daughter of General Watts is extraordinarily good headed, has a tremendous lick, and can trot any eighth on the race track in 15 seconds or better.

Alerick 2:09¼ by Direcho, dam Alhambra Lilly by Geo. W. McKinney 2:14¼. This fellow is eligible to the 2:13 class in 1915, worked a mile at Santa Rosa last summer in 2:06¾, and will probably be raced the coming season on the twice-arounds.

Ethyl D. (3) 2:11 by Carlokin 2:07½, dam Roberta Madison by Jas. Madison 2:17¾. Ethyl is a very handsome filly, took a breeder's record of 2:11 early last season and during the Santa Rosa meeting was driven a mile by Mr. Chas. A. Durfee in 2:10.

Carl (2) 2:19¾ by Carlokin 2:07½, dam My Irene S. (2) 2:28¾ (dam of Esperanza 2:09, etc.) by Petigru 2:10½. Mr. Durfee is particularly "sweet" on this colt and looks for him to duplicate the performances of his older sister Esperanza 2:09 by winning all the three-year-old stakes in California and Oregon in 1915. He is also to be the representative of the Durfee stable in the $5000 stake for three-year-old trotters at the 'Frisco meeting in June. Worked in 2:14¾ last fall.

Byron (2) 2:20½ by Tom Moko 2:13, dam Rita H. p. 2:11¼ by McKinney 2:11¼. This colt was the champion two-year-old of California last year; won all the two-year-old futurities, could trot close to 2:12 last fall and is destined to be of the epoch-making variety. Byron is entered in the classic three-year-old stakes in California this year.

Helen Belle (2) 2:22¼ by Carlokin 2:07½, dam Carolyn C. by Axtell 2:12; second dam by Expedition 2:15¾. This filly was started on at the time Mr. Durfee returned from the races in October, taking a breeder's two-year-old record of 2:22¼ on December 29. She stepped thro' the stretch last week in 33¼ with the eighth in 16¼ seconds; is at present the "talk of the track" and is entered in the Occident, Stanford, State Fair Futurity, Breeders Futurity, Pleasanton Futurity and Oregon Futurity, all stakes for three-year-old trotters.

Nicola B. (2) 2:23¼ by Carlokin 2:07½, dam Atherine 2:16¾ (dam of Copa de Oro 2:01) by Patron 2:14¼. "Nic" worked a mile last June in 2:17 as a two-year-old; later was thrown out of training by reason of a slight injury. Appears to be O. K. now and is entered in the $5000 Panama-Pacific stake for three-year-olds at the June meeting, and all other western three-year-old trotting stakes.

Carlschen (2) 2:23 by Carlokin 2:07½, dam Bonnie Ailsie p. 2:08½ (dam of Contention B. (3) p. 2:08¼) by Faustino. This colt is working nicely, trotted a half in 1:09 recently and is entered in several three-year-old stakes.

Miss Quealy (2) 2:26¾ by Moko, dam Silurian 2:25¾ (dam of Manrico (3) 2:07¼) by Wilton 2:19—a full sister to Manrico. My! what a distinction to be so closely related to such a horse, who as a three-year-old won the Kentucky Futurity, lowering the world's record for the fastest sixth heat ever trotted by a horse of any age, to 2:07¼, which mark still stands. Miss Quealy is in regular training now, has been a half in 1:06 and on Thursday last stepped an eighth in 15¾ seconds to cart. "Bill" regards this mare as one of his most promising trotters and will be liberally staked this coming season.

* * *

"Bill's" record horses in the pacing department are not many, but have made themselves known.

Don Pronto 2:02¼ by The Director General, dam Silurian 2:25¾ (dam of Manrico) by Wilton 2:19. All the light harness horse world will remember the sparkling races Don went and especially when he invaded the Grand Circuit as a five-year-old and brought to California the five-year-old world's record for pacers. There is another world's record Don obtained when he drew Capt. Barnette, weighing 237 pounds, to a matinee record of 2:02 at Los Angeles.

White Sox, t. 2:13½ p. 2:06¼, by Del Coronado 2:09½, dam Subito (dam of Blanche p. 2:06¼, etc.) by Steinway. This mare was a big winner in California last season, was a close second in the third heat at Sacramento in 2:04½, and is very likely to be prominently mixed up in the heat of battle and to have "a hand" in the distribution of the $20,000 to be paid out at the conclusion of the 2:06 pace at San Francisco next June.

Contention B. (3) 2:08¼ by Copa de Oro, dam Bonnie Ailsie p. 2:08½ by Faustino 2:14¾. This son of Copa de Oro has the tremendous whizz and many other qualifications that are required in a two-minute horse. With limited work last summer he paced an eighth in 13¼, a quarter in 29 1-5 seconds, a half in 1:01¼ and two heats the same day in 2:07¾ and 2:07¼, both of these miles being faster than the world's record for three-year-old pacing geldings. He will probably be worked lightly as a four-year-old and staked in the Grand Circuit in 1916.

Chango (3) 2:12¼ by Copa de Oro 2:01, dam Lady H. 2:26 by Del Coronado 2:09½. The word "chango" in a foreign tongue means "monkey," but it is a misnomer in this instance, as this colt neither looks, acts nor is gaited like one. He has won all the western pacing futurity stakes both as a two- and a three-year-old, except the Breeders; acquired a three-year-old record of 2:12¼ at Phoenix, Ariz., driven by his owner, an amateur, and worked a mile at Santa Rosa in 2:09.

* * *

The green division comprises—

Nelly Mc, trotter, by Zolock 2:05¼, dam by Wilkes Moor, a son of Guy Wilkes. Nellie worked a mile last year in 2:10½ with a half in 1:03¼ and an eighth in 15 seconds. She will likely be raced this year on half-mile tracks.

The Lark, by Carlokin 2:07½, dam Subito (dam of White Sox 2:06¼, Blanche 2:06¼) by Steinway, trotted a mile last year as a three-year-old in 2:18½ and is working fine now.

Carlrich, pacer, by Carlokin 2:07½, dam by A. W. Richmond, paced a trial last summer in 2:14 with a half in 1:03.

Old Folks, a five-year-old gelding by Del Coronado 2:09½, worked a mile at the trot in 2:11¼ with a half in 1:04.

The green three-year-olds are:

Silvas, bay colt by Siliko, European 2:08 2-5, dam Countess Leyburn by Arion 2:07¾; a very handsome colt, as a two-year-old trotted an eighth in 18 seconds, and is entered in the western stakes.

Jim Cram, bay gelding by Copa de Oro, dam Lady H. 2:26 (dam of Chango 2:12¼) by Del Coronado 2:09½, paced a half in 1:12½ last year as a two-year old and is in all the western futurities.

Cope, by Copa de Oro 2:01, dam Leonor Mc, pacer, matinee record 2:08¼, by McKinney 2:11¼, is a very racy looking colt and paced a half in 1:09 as a two-year-old and is also entered in all the western futurities.

* * *

The following 1915 two-year-olds by Carlokin 2:07½ and entered in all the western stakes are:

Hermes, brown colt, dam Miss Quealy 2:26¾ (full sister to Manrico 2:07¼) by Moko. One of the most impressive young colt trotters that has shown here for a long time; has been worked about a month and has been a quarter in 37½ seconds.

Carina, bay filly, dam Atherine 2:16¾ (dam of Copa de Oro p. 2:01 and Nicola B. (2) 2:23¼) by Patron 2:14¼, has been a mile in 2:48, last eighth in 19¾ seconds.

Carleta, bay filly, dam Alexandria by Bon Voyage 2:08, a mile in 2:46 with an eighth in 19¼ seconds.

Baron Long, gray colt, dam (dam of John Warwick (2) 2:17) by Eros; one-eighth in :22.

By Copa de Oro p. 2:01:

Sandy McNab, chestnut gelding, dam Lucy May 2:20 by Oakland Baron; one-fourth as a yearling in :33½ at the pace.

Tom Thumb, bay colt, dam Leonor Mc p., matinee 2:08¼, by McKinney 2:11¼; mile in 2:50, last eighth in 20 seconds. This will be the Durfee representative in the $2000 stake for two-year-old pacers at San Francisco.

By Manrico (3) 2:07¼:

Manuelito, chestnut colt, dam My Irene S. (2) 2:28¾ (dam of Esperanza (3) 2:09, etc.) by Petigru 2:10½; an eighth in 19¾ seconds.

Rico, chestnut colt, dam Pavlowa B. by Petigru; second dam Subito (dam of White Sox 2:06¼, etc.) by Steinway. Paced an eighth in 17 seconds.

Black filly, dam Subito by Steinway, trotted an eighth in 19¾ seconds.

Frank Berry, brown colt, dam Zephyr 2:07¼ (dam of Virginia Barnette (3) 2:08¼) by Zombro 2:11; a quarter in 42 seconds.

* * *

W. R. Murphy, "the silent man" from Inglewood, with his son as assistant trainer, is preparing for a season of activity, with the following:

Danube 2:12¼ by Direcho who, it will be remembered, was a big winner of the Salisbury stable several years ago.

Radium, a green trotter by Carlokin 2:07½, dam Zola by Guide; second dam by Altamont 2:26¾. Worked a mile last week in 2:17½. He is owned by J. H. Dunlap, formerly of Pittsburgh, Pa., and will probably be raced on the Pennsylvania and Ohio half-mile tracks.

Donna Lee, bay filly (3) by Donasham 2:09¼, dam Bay Leaf by Telephone. Stepped a mile as a two-year-old last June in 2:15½ and a half in 1:05. This filly is the apple of Murphy's eye and is "high priced" on her chances in the three-year-old stakes.

Tim Whiffler, pacer, by Zombro 2:11, dam Lady by Neernut 2:12¼. Tim has been prominent in the matinees here; has been a mile in 2:11½ with a half in 1:03½.

Hal Wilkes is another green pacer by Young Hal, dam May by Roy Wilkes 2:06; has not been worked much but is a good going fellow with a "lot of lick."

Della Pronto, yearling trotter by Bon McKinney, dam Cecelia M. by Robin. This filly is out of the dam of the good trotter Great Northern 2:17¼ and steps off like a real "phenom."

Redway, a three-year-old by Red McK., dam Lassie by Strathway 2:19. "Bill" has been working this fellow only three weeks and has been a half in 1:15, the quarter in 36 seconds.

A yearling filly by Red McK., dam Bird by Warspite (a son of Steinway); an eighth in 20 seconds.

* * *

Chas. Atkinson, formerly of Maryland, and who so successfully drove Little Bernice p. 2:06¼ in her three-year-old campaign two years ago, has seven head, the main attraction of which, of course, is Little Bernice p. 2:06¼ by Del Coronado 2:09½, dam by Sky Pointer (full brother to Star Pointer p. 1:59¼). Charley raced Bernice in her memorable trip east in 1913, won many races and forced William p. 2:00 to go in 2:05, which was the world's record at that time for three-year-old pacers. At Peoria, the same season, the filly worked a mile in 2:04. After a year's absence from the Atkinson stable Charley is again preparing her with the one aim in view, first money in the $20,000 stakes at the Panama-Pacific meeting. She is owned by the good sportsman Sam Watkins of Los Angeles, prominent as a horse auctioneer in California for many years.

Directum Penn 2:12¼ by Directum 2:05¼, dam Llul B. (dam of Wm. Penn 2:07¼) by Dauntless, worked last week a quarter in 31 seconds, eights in 15 seconds.

Trix, green trotter by Redlac 2:07¼, dam Hawthorne by McKinney 2:11¼; a mile in 2:13½ with a half in 1:04.

Alexandria by Bon Voyage 2:08, dam Lucy May 2:20 by Oakland Baron, a mile in 2:20½ trotting.

Lulu B. (dam of Wm. Penn 2:07¼) by Dauntless, by Hailcloud p. 2:07¼, stepped recently in 2:16¼.

Bay three-year-old colt by Kinney Lou 2:07¾, dam by Jerome; broken last fall and has been an eighth in 20 seconds.

Lady Lawrence, two-year-old filly by Directum Penn 2:12¼, dam Bonita by Knight, just broken, has been an eighth in 19 seconds.

* * *

The genial Fred Ward, in connection with other track duties, is jogging the good trotter Great Northern 2:17¼ by Wayland W. 2:12¼, dam Cecelia M. by Robin. This is a very fast and exceptionally good headed trotter, worked last June in 2:10½ and back in 2:10; raced very successfully in California and Oregon and is rated as one of the topnotchers.

Dr. Wayo 2:12¼ by Wilkhurst 2:17¼, dam Treville by Trevillian 2:11¼; second dam Beautiful Bells by Electioneer. The Dr. stepped three heats in 2:09¼, 2:08¼, 2:09½ in the race won by Duchess 2:07¼ last fall at Phoenix, Ariz.

Beirne (2) 2:21 by Beirne Holt 2:11¼, dam Freckle Bird 2:26 by Freckles. This colt was a fast two-year-old and will be heard from this year in the three-year-old California and Oregon stakes.

Two-year-old by Dr. Wayo 2:12½, out of Emily W. 2:10 by Jas. Madison 2:17¾. Fred moved this colt a quarter in :39¾ as a yearling.

McVerde p. 2:19¼ by Zolock is a very rugged pacer; stepped a mile last spring in 2:06¼, with a half in 1:01¾. He will be raced this year and will surely pace in 2:05.

* * *

C. T. Hewitt, of Inferlotta p. 2:04¾ fame, and our premier saddle and high school horseman, has:

McGregor Parole, the eight-year-old bay stallion by Parole 2:16, dam by Robt. McGregor 2:17½. Mr. Hewitt worked this horse a half in 1:07 barefooted. Three yearlings by him worked eighths in 20 seconds.

Chauncey 2:17 by Strathway 2:19, owned by Mr.

P. F. Pidgeon of San Diego, took a breeder's record of 2:17 and worked a half in 1:06.

Directless (2) by McGregor Parole, dam Belle 2:30 by Titus, trotted an eighth in 19 seconds recently.

Also two very high class show mares, Mabel Rex and Selma, winners from Madison Square Garden to the Pacific coast.

* * *

Charley Nickerson, who forsook the heat of the Imperial Valley last summer for the charms of Exposition Park, is again working Marie G., matinee record 2:16, by Zombro 2:11, dam by Woolsey (full brother to Sunol 2:08¼); a mile in 2:12 last year, driven by an amateur.

Belle Pepper, by Silver Coin 2:10, dam by Wilkie Knox 2:10¼. Charley drove this mare a mile last year in 2:11, with a half in 1:02½ and quarter in 29¾ seconds. When she is out for business she is decorated with a "hobble skirt."

Three-year-old pacing colt by Copa de Oro 2:01 out of Easter D. p. (2) 2:13¼ (dam of Patrick de Oro (3) 2:22¼), full brother to Patrick de Oro, who last year as a three-year-old paced that sparkling mile in 2:08½ on a half-mile track in Canada. Jim Stewart, before his departure for the races last May, drove this (then a two-year-old) colt with very little training in 2:20, with the last half in 1:07, immediately thereafter selling him to Mr. John Nickerson of this city.

Ossewinamakee, bay colt by Copa de Oro p. 2:01, dam by Wilkie Knox 2:10¼, has just been started up, has been a mile in 2:36, one-eighth in 17 seconds, and is a study in nomenclature.

* * *

J. W. Cooper is getting ready the members of the matinee stable of F. J. Christopher, viz.:

Alaca, matinee record pacing 2:10¼, by Symboleer 2:09¼, dam by Joe Young (sire of dam of Joe Patchen 2:01¼) moved a quarter last week in 32 seconds.

Also a yearling filly by Carlokin 2:07½, dam May Madison by Jas. Madison 2:17¾, and two yearlings by Alaca, a bay colt out of Princess by Redlac 2:07¼ and a brown colt out of Direct Maid, matinee record 2:20, by Direcho.

* * *

Joe Torrey has recently moved to the track from Long Beach with Baronteer Todd, bay horse by Todd 2:14¾, dam by Baron Wilkes. Al Russell trained him some time ago and drove him in 2:12 on the pace.

Bessie Tea 2:22 by Zombro 2:11, dam Manilla (dam of Eloreta 2:12½, etc.) by Shadeland Hero. Russell also worked this mare in 2:12½.

Joe Todd, a six-year-old son of Baronteer Todd out of Bessie Tea 2:22.

A. W. Wright, also of Long Beach, has Capt. Todd p. 2:24¼ by Baronteer Todd, who has been prominent in matinees of the Los Angeles Driving Club and has been a half in 1:04.

* * *

Messrs. Nesmith & San have King Lilly Pointer p. 2:19½ (breeder's record) by Star Pointer 1:59¼, dam by Direct 2:05½; has been a mile in 2:12, half in 1:03½.

Julia Clay by Clay Edwin 0692, dam s. t. b. by Egmont, trotted in 2:10¼ last year, half in 1:03½.

Happy Clay, by Clay Edwin, dam Daisy by Ayers Hambletonian, double gaited gelding, can trot or pace in 2:15.

Imbro Clay (3), brown colt by Imbro p. 2:12½, dam Bedelia Clay by Clay Edwin, trotted a quarter in 36 seconds.

Cappy Clay (full brother to Julia Clay), a seven-year-old gelding, trotted in 2:24; and

Two yearlings by King Lilly Pointer, one out of Clay Belle by Clay Edwin, which at six months old paced beside its sire an eighth in 25 seconds, while the one out of Bedelia by Clay Edwin stepped an eighth in 22½ seconds the day it was 13 months old.

* * *

W. G. Boyd of Long Beach, who trained a little last year at this track, is again on the job with June Bug, matinee record 2:20, by Zombro 2:11; trotted in 2:16 last year and seems to have kept her speed with her, as last week she breezed a half in 1:05, with a quarter in 31½ seconds. This mare will probably be headed for the 'Frisco meeting.

Jessie Marie (3), by Zobeck (son of Zolock 2:05¼), quarter in 40½ and eighth in 19½ seconds.

Nattie Ellen (2) by Zobeck, just broken, trotted an eighth in 25 seconds.

Ben Beach (2) by Baronteer Todd, recently broken, quarter :40½ trotting.

* * *

Chas. Chicke, who developed the Zombro mare Bertha Carey 2:08¼ and sold her to R. J. MacKenzie, has just begun on three green ones:

Simo, by Limonero (3) 2:15¾, dam Zona by McKinney 2:11¼. Charley has just purchased this mare who has had very little training but has been a mile in 2:21, quarter in 33 seconds.

Ebe, brown cold (3), by Kentucky Todd (3) 2:08¾, dam Bow Wow by Libertine; eighth in 21 seconds.

Bon Actor, three-year-old colt by Bon McKinney out of the dam of Bertha Pointer 2:08½, trotted an eighth as a two-year-old in 20 seconds.

* * *

E. C. Matthews & Son, formerly of Minneapolis, have been training here a short time. It was the senior member of the firm who broke, as a two-year-old, Little Bernice p. 2:06¼ and drove her a quarter in 32 seconds. He is now handling Mabel Van 2:11¼ by On Stanley, dam by a son of Silkwood 2:08. Mabel trotted some admirable races in California and Arizona last season, and late in the fall went a trial at Los Angeles in 2:07½. The secretary of the big meeting at San Francisco is apt to have a good sized check "payable to her order" at the close of the races in June.

Lillian Van is a full sister to Mabel Van, a year younger, and worked a mile last year in 2:30.

Zobeck, by Zolock p. 2:05¼, dam by Zombro 2:11, is a very fast horse, having paced a quarter in 30 seconds.

Nora Hal, by Hal McKinney p. 2:06¼, paced a half in 1:08, with the quarter in 32 seconds.

Also a three-year-old filly by Zolock 2:05¼, dam by Zombro 2:11.

* * *

P. Kelly, assistant to Jas. Stewart, who is now racing on the ice in Canada, has just arrived here from the ranch with a five-year-old brown gelding by Guy Dillon, dam Russie Russ (dam of Ruth Dillon 2:06½). Never had any previous work beyond breaking and worked a mile in 2:41½ last week.

Bay gelding by Guy Dillon, dam Stambouletta by Stamboul 2:07½. A two-year-old but has had nothing done with him until recently, when he trotted a quarter in 34½ and an eighth in 16 seconds.

Bay filly (2) by F. S. Whitney 2:09¾, dam by Star Pointer p. 1:59½.

Chestnut colt yearling, a full brother to Patrick de Oro (tr. 2:08½, three-year-old, half-mile track); also

Easter D. (2) 2:13¼, the grand brood mare, who on Jan. 21 produced a filly to the embrace of Copa de Oro.

* * *

I. N. Mosher, the well known horseman of California and Oregon, is training a very fast young pacer out of his old favorite Oma A.2:13. He calls him Thos. A.; he is a nice going bay gelding and Mr. Mosher rode a half in 1:03 behind him a couple of days ago.

* * *

Ed Mosher is devoting lots of time to Miss Carlokin p. 2:20 by Carlokin 2:07½ out of Miss Williams p 2:09¼, and Miss Imbro by Imbro p. 2:12½, also out of Miss Williams. These mares are learning fast. Both can beat 2:20 and are owned by Mr. C. C. Price, who has been prominently identified with the horse interests in Colorado for many years, and is now a resident of Los Angeles.

* * *

The versatile Harry Messmore, equally adept in the saddle, on a sulky, or serving a chicken pie, occasionally tears himself away from his cafe business to work his mares. One, a trotter by Limonero 2:15¾, dam by Zolock p. 2:05¼, stepped a half in 1:04½ last summer, while the other is a pacer by Zolock 2:05¼ that Harry worked a half in 1:06 and quarter in 32 seconds.

* * *

"Dave" Stewart, one of the pioneers in the horse game in Spokane, Wash., where he accumulated sufficient "mazuma" in providing the trotters in that country with "footwear" to enjoy the life of Southern California, has Zomera 2:11¼ by Zombro. Dave has had many pleasant rides behind this clever mare and will probably race her this year.

In addition to the above list of horses at this place are the eastern horses, eleven in the stable of Alonzo McDonald, of Indianapolis, Ind., and two in the stable of "Al" Whitney of Chicago, which were described fully in last week's Breeder.

ONE TREE BRINGS $100.

The government has received $99.40 in settlement for a single sugar pine tree which was cut in trespass in the Stanislaus National Forest, in this state, and which yielded more than enough actual lumber to build a good-sized suburban frame house. The tree scaled 18,933 board feet and was valued at $5.25 per thousand feet.

Not many trees contain enough lumber to build a two-foot board walk nearly two miles long, and this is believed to be the first case on record in which a single tree felled in a national forest was valued at almost $100 on the stump, although national forest timber is frequently sold at considerably higher rates.

Calino, the imported Percheron stallion owned by the Altamont Horse Company, was sold last Saturday at public auction to Max Berlin of Livermore at a very healthy figure.

WALNUT HALL.

It having been known for some time past that the health of Mr. L. V. Harkness was in a very precarious condition, the death of that breeder, announced in last week's Review, while it has excited universal regret, has caused no surprise among those aware of the situation which had for some time existed. The constitution of the owner of Walnut Hall Farm had been undermined by one of the most insidious of diseases which, once a human being becomes subject to it, never relaxes its hold until the end. The most eminent physicians in two hemispheres had sought in vain to arrest the progress of the malady in the case of Mr. Harkness, but without avail, and all those near to him, as well as numerous others, had been aware that he was fighting a losing battle and that his days were numbered.

In his connection with turf and breeding interests, every action of the dead man has redounded to his honor. He possessed a genuine love for the trotter, and his ideals of racing and breeding were of the highest. Being able to command the resources of vast wealth, he carried out his plans upon the same lines that marked their conception—a thing which few men have been enabled to do—and became the world's leading breeder of trotters; a position which must have caused him pardonable pride, but in which his modesty never suffered him to seek "the limelight," or to angle for the "reclame" which most men in the same position would desire. When his health and time allowed, he was always one of the most interested spectators at the Lexington meetings, to which, in years gone by, he used to drive behind a superb four-in-hand that excited invariable admiration. While the remembrance of the episode may have faded from many minds, he was at one time deeply interested in the coaching type and expended large sums of money in the purchase of stallions and mares of the French Coach strain. By means of these animals and selected individuals from his trotting stud he hoped to found a family of higher stamp, for fancy heavy harness uses, than ever before known in this country, but disappointment awaited him. His French Coach stallions—for one of which he paid $10,000—did not "breed true," and eventually he cleared out the entire collection and gave up the attempt, limiting himself thereafter to trotting breeding exclusively. The success of his operations in this field enabled him repeatedly to witness horses of his own breeding, many of them also his own property, win the most coveted and valuable classics of the turf, but latterly he had discontinued campaigning a racing stable and sold the produce of his mares annually at the auctions.

Thousands of horse-lovers from all parts of the United States and Canada have visited Walnut Hall, as have also a large number from overseas—and we doubt if one of them ever went away from there save regretfully and with renewed love for the trotter, and the feeling that nowhere else in the world was trotting breeding carried on in an environment and under conditions which so nearly verged upon the ideal. Not many miles away was the magnificent Elmendorf estate of the late J. B. Haggin, larger in extent, and, in some respects, more magnificently appointed—it being, indeed, the more costly of the two. But we have heard hundreds of men and women, fresh from visits to both, invariably voice their preference for Walnut Hall. This was due to the greater natural beauty of its situation and to the fact that it had an atmosphere of its own quite indefinable, but equally penetrating and impossible to resist. Devoid of ostentation or any attempt at the merely sumptuous or ornate, there dwelt upon it a pastoral charm, a harmonious completeness and fitness for its own ends and aims, a serene spirit of restfulness and retirement, "far from the madding crowd's ignoble strife," that, once felt, was never to be forgotten. In the early spring it was like a lyric; in mid-summer it pulsed with the full-throated strain of nature's song; in the autumn, garbed in gold and crimson, it was a splendid pageant of reverberant tone. In such a setting the beauty and glory of the high-bred horse take on a heightened potency, as those who have lingered before Moko and Walnut Hall 2:08¼ as they were led out in the grassy yard before the stallion barn, or wandered through the paddocks and pastures to inspect the matrons and the colts and fillies, will attest. The mind of the writer of these lines goes back to many such a moment, the memory of which will never fade.

It is, therefore, with a pang we face the knowledge that the death of Mr. Harkness means, with little doubt, the "passing" of Walnut Hall from the ranks of trotting nurseries. It was his creation, and, it appears, among the members of his family there is no one apt to perpetuate and carry it on as he did. This is only in consonance with the vicariousness of all things mundane, but it is nevertheless something intensely to be regretted. It will have no successor, because it has been unique, and as such it will remain in breeding history. Its place, historically, is upon the same page with Woodburn, Fairlawn, Glenview, Stony Ford, Palo Alto, Rosemeade, Bitter Root Ranche, Suburban Farm, Forbes Farm, Village Farm, among the great history-making ones of the past, whose stamp was and is indelible. Each of these renowned establishments had its own special quality, its own individual form and flavor, but of them all, Walnut Hall has been the most perfect of its kind, the most unapproachable in its way. Its career has covered a period of twenty years, which, perhaps, exceeds the span things of its kind commonly attain, and it is a matter for gratulation that it has not survived to a day of decadence and vanished fame. It will not totter from the scene and pass ignominiously into the realms of memory, but yield its place with the same dignity and poise that have marked its course throughout.

It is hard to part with Walnut Hall—but in doing so, we can feel sure that one of its chief factors will remain identified with the trotters. That is the Superintendent Harry Burgoyne, to whom so much of its success has been due. In fact, such an establishment could never have been possible without such a hand as his upon the tiller. His work, alike in its methods and its results, has been of a character unequaled and, practically, beyond praise. It is difficult to imagine either Walnut Hall without Harry Burgoyne or Burgoyne without Walnut Hall, and possibly the two may not be separated. But, whatever does transpire, we may feel sure that he will remain loyal to the trotting interests and still a worker in the field where he has accomplished so much. At least, that is our hope, and, we feel sure, that of all trotting horsemen.—Horse Review.

NOTES and NEWS

Tacoma is to have a new track.

◈ ◈ ◈

The Montana State Fair will be held this year during the week of September 20-25.

◈ ◈ ◈

A. B. Coxe has been elected to the vacancy in the directorate of the K. T. H. B. A. caused by the death of L. V. Harkness.

◈ ◈ ◈

Charley Todd of Portland has bought Haltamont 2:05¼ of Frank Anderson, so the speedy son of Hal B. 2:04¼ did not come to Pleasanton as was expected.

◈ ◈ ◈

Arizona stages the first regular meeting of the season of which we have heard, Tucson having claimed March 18-19-20 for a three-day affair.

◈ ◈ ◈

Tommy Murphy has purchased of John E. Madden the trotting mare Margaret Parrish 2:06¼ by Vice Commodore, eligible to all the green classes as her record was made against time.

◈ ◈ ◈

J. O. Keene of Lexington, who is the trainer of the Camden stable of thoroughbreds, has been spending several days on the coast, annexing a bit of pleasure and incidentally looking at some good colts here and there. ◈ ◈ ◈

Etawah 2:03¼ and Anvil 2:02¾ are to be in the stud at Castleton Farm, Lexington, this season, and if the only foal by Anvil here on the coast is a fair sample of his kind, the latter horse gives promise of becoming a great sire.

◈ ◈ ◈

Frank Caton, after several months of "idleness" spent in visiting his family and friends and scouting for promising material for export, has grown tired of the peaceful haunts of his boyhood and expects to start for Russia about the middle of the month.

◈ ◈ ◈

Mr. and Mrs. Wm. Holbrook of Helena, Mont., are spending several weeks of the mid-winter in California, and are often among the visitors at Pleasanton Driving Park, where Mr. Holbrook has the trotter R. C. H. 2:18 in the stable of Frank and Marvin Childs. ◈ ◈ ◈

McKinney 2:11¼ ranks all living sires in point of number of performers with 193, his nearest competitor being Peter the Great 2:07¼ with 171. Onward, Gambetta Wilkes and Allerton, all gone to the range across the Jordan, are the only stallions with two hundred or over to their credit.

◈ ◈ ◈

John R. Dillon 2:11¼, touted as the fastest horse sired by Sidney Dillon, changed from the ownership of Dr. D. L. Peacock of Athens, Ga., to that of A. M. Watson of Thomasville recently for a consideration of $5000, Billy Andrews engineering the deal. He goes down the big line this year.

◈ ◈ ◈

The Minneapolis State Fair in thirty-one years has paid back in property value one dollar and seventy cents for every dollar invested by the state, and in the season of 1914 paid a profit of $12,237, a truly remarkable showing. Given the same encouragement, California would doubtless do as well—or better. ◈ ◈ ◈

Edward Peterson of Omaha, owner of Hal Boy 2:06¼, Loe Blossom 2:10½, Tom Smith 2:11¼ and Major By By 2:19¼, was expected here on the coast this week or next, to remain until after the June meeting at the P.-P. I. E., in which he will have entries in both big stakes and a number of the class races. ◈ ◈ ◈

Frank Childs, who campaigned Leata J. 2:03 and others so successfully for Mr. S. S. Bailey in recent years, will again race the horses belonging to that gentleman, having taken over the stable at present at Pleasanton the first of the month. There is some good material in the string and friends of both parties will be glad to hear of their success at the races this season.

◈ ◈ ◈

A Tacoma correspondent writes that the light harness game is to be given a boost at that point by the construction of a new track and that both Tacoma and Seattle are to have good meetings this season, which means much for north coast horsemen. He also states that the Puget Sound country will furnish a car of horses for the fall meeting at the P.-P. I. E., which looms as the great event in trotting circles for 1915, as it promises to be even greater than the June meeting.

◈ ◈ ◈

The Colorado Fair and Racing Association has nominated the classes for a new circuit for the coming season. The programs will include classes for trotting, 2:17, 3:00, free-for-all and 2:24. The pacing, 2:24, 2:15, 3:00, free-for-all, at each meeting, the dates of which are Sterling, week of August 2; Fort Morgan, week of August 9; Greely, week of August 16; Fort Collins, week of August 23; Loveland, week of August 30; Longmont, week of September 6; Pueblo, week of September 13; Casper, Wyoming, week of September 20; Douglas, Wyoming, week of September 27; Denver, week of October 4. No arrangements have been made thus far for filling the dates on the old Santa Fe circuit, which is evidently held up at the present.—Field and Farm.

The Charity Horse Show for the benefit of the People's Place is scheduled for Thursday, Friday and Saturday of next week, afternoon and evening, and the classes have filled in a manner that means much pleasure to be derived from being present.

◈ ◈ ◈

Childs Brothers have a new one in their stable—Jimmy Ray, the Stockton pacer by Nearest McKinney 2:13¼ out of Much Better 2:07¼ by Charles Derby 2:20. He is owned by Toombs & Frederick of Modesto and worked the Stockton track last year in 2:12, with much faster fractional distances.

◈ ◈ ◈

D. R. Morrison of Hemet, who recently purchased a couple of youngsters from Hemet Stock Farm, has added the free-for-all pacer Hal McKinney 2:06¼ by Hal B. 2:04¼ to the string he is training over the track at the home of Wilbur Lou. Hal McKinney was raced in the southwest by Bob Sebastian in 1914 and won in excess of two thousand dollars, incidentally setting some new records for the Oklahoma and Texas two-lap tracks while he was at it.

◈ ◈ ◈

Directum I 1:58 was sold early this week by James Butler to M. E. Sturges of New York city, formerly the owner of Dan Patch 1:55¼ and other famous stars. The reported price is $45,000, which is more than double the figure Mr. Sturges paid Dan Messner for the unbeaten son of Joe Patchen. The "little red hoss" was shipped immediately from Kirkwood, Del., to Poughkeepsie, where he becomes a member of the stable of Tommy Murphy, who will fit him for racing and exhibition purposes this year.

◈ ◈ ◈

Things are beginning to look brighter for horsemen in various localities. California promises to have a modest appropriation for district fairs, and in Nevada and Arkansas bills providing for racing commissions and pari-mutual betting have passed the branches of the legislature in which they originated, and are claimed to be in favor with the other branch and the governors of the respective states. The passing of the Nevada bill is of especial interest to California breeders, as it means a big revival in their operations.

◈ ◈ ◈

Henri de Redding, the pleasant young gentleman who was for some time secretary to Captain McCan at Forest Grove Farm in western Oregon and who has been a visitor in California since early in the winter, left San Francisco this week for New York, whence he will sail for his native France to offer his services to his country in the present conflict. M. de Redding's father was killed in action in Morocco while serving the tricolor, and the de Redding mansion in Paris is now doing hospital duty. He has acquired numerous friends during his residence on the coast who wish him the best of luck and a safe return some day to the land of his adoption.

◈ ◈ ◈

Henry Helman has recently had shipped to him for development at Salinas one of the best bred three-year-old stallions in the country, the property of a prominent Santa Rosa business man. The lad is by Frank S. Turner's good stallion Guy Dillon 2:21½, sire of Guy Borden 2:07¼, etc. and out of Carima C. by McKinney 2:11¼; second dam Adioo (dam of Harry Dillon 2:10, etc., grandam of Dillon Axworthy 2:10¼, etc.) by Guy Wilkes 2:15¼; third dam By By (dam of 3) by Nutwood 2:18¾; fourth dam Rapidan (dam of 3) by Dictator; fifth dam Madam Headley (great brood mare) by Edwin Forrest; sixth dam Madam Stanhope by Mambrino Chief; seventh, eighth and ninth dams by Hunt's Commodore, Fenwick's Copperbottom and Imp. Royalist, respectively. With the exception of Edwin Forrest, the sires represented by the first half-dozen maternal crosses have daughters that have produced 2:10 speed, and Henry thinks the lad has the making of a great horse, provided he is not just naturally too high toned to do anything but eat forty dollar oats.

◈ ◈ ◈

Tom Sharkey is again in California and states his intention of making his future place of residence in the Golden State if he finds the right business opening. Tom has long been a friend of the trotter and always races a few over the twice-arounds down east, and his establishment of residence in California would undoubtedly mean that he would bring out the little band of trotters that is at present at his place at Fort Ticonderoga. The Sharkey stable has been built up from one mare to the cover of members of the Bingen dynasty—Lilly Stranger 2:15¼ by Stranger 3030, a matron that has proved an exceptionally good breeder. T. S. Bingen 2:15¼, six-year-old son of Bingen, heads the stable, which also includes Tootsie Aquilin, five-year-old mare, by Aquilin 2:19¾; Tammany Aquilin, four-year-old gelding by the same son of Bingen; a three-year-old filly by Cochato 2:11½, a two-year-old stallion by Bingara and a yearling stud by Joe Dodge, the mare being at present in foal to a son of Bingara. This string of youngsters would be welcomed in California and they ought to feel "perfectly at home" here, as May King was bred at Palo Alto and the dam of Lilly Stranger is Lillian Wilkes 2:17¾, a daughter of Guy Wilkes bred by William Corbitt and famous both as a race mare and as a producing matron. Her record was made as a three-year-old in 1889 in a race at Petaluma in which she defeated Sunol (3) 2:10½ and Margaret S. (3) 2:19¼, afterwards giving birth to three performers including Guy Axworthy 2:08¾, sire of four 2:10 trotters. She was the only three-year-old that ever defeated Sunol, as the only other defeats acknowledged by the Palo Alto filly that year was administered by old Pappy Time.

There is a renewal in the contracts in the buying of export horses, for the fighting Europeans are still short of the sinews of war that go on four feet. There is no inspection or receiving at Denver just at present, says Field and Farm, but other places are doing business. A San Antonio, Texas, firm has contracted to furnish English and French governments with fifty thousand horses within six months, the first shipment of five thousand having been made prior to February 1st. Of these animals forty thousand are to be used as saddle horses, while the other ten thousand are for the artillery. Dealers estimated the available number of horses for the foreign countries of war in Texas, Oaklahoma and Colorado alone as more than one-half million. A British agent in Montana says his government will require 400,000 head of horses within the year besides the 300,000 now in the army.

A GENUINE STAKE COLT.

Anvilite, the two-year-old Anvil—Martha Spy youngster in the MacKenzie stable at Pleasanton, jogged a half with Charley DeRyder last week in 1:09, and when the big teamster got down from behind the lad he made a bee line for the office to find out just how much stake money this fellow is entered in. The farther he looked in the futurity engagement book the more interesting his search became, and here is why:

Panama-Pacific, two-year-old trot	$ 2,000
Kentucky Futurity	26,000
New York State Fair	20,000
Horseman and Spirit of the Times	20,000
Horse Review	17,500
American Horse Breeder	10,000
Matron Stake	7,000
Western Breeders	3,000
Western Horseman	10,000
Pacific Breeders	7,250
California State Fair	5,000
Pleasanton	7,500
Occident (estimated)	3,000
Stanford	2,500
Total	$140,750

Whether this lad ever gets to the races or not, he seems at first glance to have annexed a world's record right off the reel in the matter of engagements, as it is doubtful if another colt in the country today is as liberally staked. Certain it is that there are few more promising ones for his age at this time, as he is, all around, about the best youngster that ever hit Pleasanton—and a number can be recalled who hailed from there that didn't care how fast or far they went in company. He is right as right, and DeRyder has issued information to all admirers that "he'll be that way the next time you see him, too," as he is taking advantage of every ounce of information gathered in a lengthy career to get this boy to the races. There's many a slip, and so on, but right now Anvilite looks like a colt trotter of the first rank.

$2,500,000 FOR FOOT-AND-MOUTH DISEASE.

Under the recent urgent deficiency act which was signed by the President on January 25, $2,500,000 is now available for the eradication of the foot-and-mouth disease. Up to January 1, 1915, the outbreak had cost the Federal Government a total of $2,129,-138.04. Of this sum $1,840,328.99 represents the Federal Government's share of the expense of slaughtering affected herds and reimbursing the owners for their loss, of which the Government pays half and the individual States the remainder. The figures show that exclusive of the work in January 101,176 animals have been slaughtered. Of these 46,268 were cattle, 47,735 swine, and the remainder sheep and goats.

The money now at the disposal of the Department of Agriculture will, it is believed, aid the campaign against the pestilence by enabling the Government to make prompt payment to all owners of infected herds, and thus minimize the reluctance of farmers to have their stock slaughtered. In Illinois, for example, approximately $600,000 is now available for this purpose. The loss in that State has been larger than in any other, thirty-six thousand, seven hundred fifty-eight animals, all together, having been slaughtered. Pennsylvania comes next with 17,896 animals, and Ohio third with 10,111. None of the sixteen other States in which there was an outbreak has lost as many as 8,000.

In those States in which the local quarantines have been rigidly enforced, and in which the farmers themselves have aided the authorities to stamp out the disease, satisfactory progress has been made at a smaller expense than was at one time feared. Indiana and Michigan, where the disease originated, were, for example, at first hard hit. Much of that territory is, however, now entirely freed from quarantine, and in only a small area is the movement of live stock absolutely prohibited. In Indiana 6,127 animals were slaughtered and in Michigan 7,728.

While Illinois and Pennsylvania are probably, today, the most seriously affected of all the States, there is, it is said, every reason to believe that energetic measures will stamp out the pestilence there as well as elsewhere. Although large quantities of stock have been affected already, the number up to the present is small in comparison with the total quantity in those States. In Illinois there was approximately 2,500,000 head of cattle at the beginning of the outbreak. Of those 14,653 have been slaughtered. Out of approximately 4,500,000 hogs, only 21,857 had been killed up to January 1. Of the 150,000 farms in that State about 500 have been involved.

LILY OF THE WEST, THE PRECOCIOUS STOCKTON TROTTER.

On our cover this week appears a pleasing little picture of a precocious California filly, posed for the camera by her enthusiastic owner, Ed Lavin of Stockton. Many are the railbird rumors that have emanated from the San Joaquin metropolis in days gone by about "phenoms" that had stepped that famous old oval in wonderfully fast time, the funny part of it being that the biggest part of the highly touted ones have come on and made good, and Lilly of the West has come in for a good deal of boosting ever since late last summer. Nor has her work been of the "moonlight" order, for a good many hundred people applauded her quarter in :34¾ on the day of the Jim Logan—Leata J. match, and she already has a host of admirers who wish her every possible bit of luck in living up to the pattern she set as a baby. Commenting on the Lavin-Lilly-Bunch combination the Evening Mail of Stockton recently carried the following story:

The subject of this sketch is the property of Ed Lavin, the owner of the Poodle Dog cafe, also interested in the El Dorado saloon and many other enterprises, and while owner of a $5000 automobile, he is nevertheless a great lover of horses, and being a member of the San Joaquin Valley Driving Club, it gives him great pleasure in starting his horses in all of the local matinees and driving them. He is ever ready to lend a helping hand to anything that will promote or advance the horse business and keep alive the memory of bygone days. Many records, some of them famous throughout the world, were made on Stockton's noted race track.

The name of this filly is Lilly of the West; a chestnut lassie sired by Dexter Derby 2:17¼, he by Charles Derby 2:20, sire of Klatawah 2:05½ and Jim Logan 2:05½, both records made when they were three years old. There are eight others by him in the 2:10 list.

Jim Logan's present record is 2:01¾ which is, incidentally, the race record for harness horses on the Pacific coast. The dam of Lilly of the West is Daisy O'Neal, trial 2:12, a pacer sired by Moses S., whose time is 2:19¼, he by Hawthorne, the sire of Little Thorne 2:07¾ and many other great campaigners. Moses S. 2:19¼ and Hawthorne were owned by the late L. U. Shippee, who refused $5000 for Moses S. when he was three years old, so you can see that this filly comes from a great producing family of early and extreme speed.

Lilly of the West is a very late colt, being foaled July 18, 1913, and with her breaking and training in 1914 she trotted a mile in 2:33, the last half being in 1:12 and the last quarter in 34¼ seconds. She did this a few days before she was twelve months old. The convincing part of it is that she did it with a small pair of shin boots behind. She wears a 6-ounce shoe in front with a 3-ounce toe weight and 3-ounce shoes behind. She wears a blind bridle with a little leather bit and chin strap; she goes with a low head and is a line trotter. She is game and resolute, and likes to race in company, and her ability to keep her gait without breaking is one of her best qualities. It is the claim of her trainer that she has made but five breaks in all her training.

Among the classics in which this celebrated little filly is entered is the Occident Stake and the Stanford Stake which are to be decided at Sacramento when the local product is in her three-year-old form.

"Farmer" F. C. Bunch is the trainer of this already famous filly and race horse men don't need to be told anything about Bunch. He was trainer and manager of the Vendome Stock Farm at San Jose for fourteen years and while there he developed the youngsters into rare form and saw them win the Stanford stake three times, the Occident stake once. Bunch had the satisfaction of seeing all his youngsters within the money oftener than any other trainer in the state, and it was a rare occasion indeed that his charges did not race the other entries off their feet.

In order to get a real line on the Lilly of the West all one has to do is to get "Farmer" Bunch started on the subject. Bunch expressed his confidence freely to a Mail representative today. He says that the girl will be the class in the big races she is entered in and that aside from passing under the wire ahead of all other starters she will hang up a new Pacific coast record. The record for two-year-olds stands at 2:14½, and is held by Lottie Ansel, the property of John W. Considine, owner and proprietor of the Woodland Stock Farm at Woodland.

Lottie Ansel made her record on the Stockton track two years ago at the Breeders' meeting when she won the Breeders' Futurity stake for two-year-old trotters. She was driven in the record heat by Walter Maben of Los Angeles.

Lilly of the West will be a starter in the two-year-old trot at the fall meeting at the Panama-Pacific Exposition in San Francisco, and on that occasion she is expected to meet the best youngsters in the world. Bunch says the little filly is being prepared for hard contests and that as she has the speed, temperament and grit, there is no reason why she will not land the rich stake. The horse is receiving the best of care at the hands of Jack Phagan, who looked after Leata J. 2:03 when she beat Jim Logan 2:01¾ and Don Pronto 2:02¼ at the State Fair in Sacramento last summer. Phagan has cared for other speedy ones and he is confident that the little one now under his care will be the sensation of the age.

Race horse men who have seen Lilly of the West in action say that Lavin has the speediest and liveliest prospect that ever trained at the Stockton track and they are giving him much praise for the way he is putting the youngster forward, because her every success means additional fame to the local track.

Carlokin and Copa de Oro

With the retirement of Carlokin and Copa de Oro to the stud after the close of the racing season of 1910, when by their performances they had earned the stamp of championship, William G. Durfee advanced the claim that they had every right to equal as sires the fame that they had gained as race horses, and subsequent developments have proved that Mr. Durfee had a pretty good idea of what he was talking about. Neither horse had served but very few mares until well along toward the close of their racing careers, and not until the summer of 1912 did either obtain a standard performer. From that time, however, the growth of their number of representatives has been steady and convincing, and

CARLOKIN 2:07½.

today they are well established in public esteem through the exceptionally excellent performances of their get.

Carlokin 2:07½, selected by Mr. Durfee as the one son of McKinney he desired to own to cement the link that has existed between two generations of the families of Durfee and McKinney, is out of what was undoubtedly one of the very best matrons ever bred to the son of Alcyone and Rosa Sprague—Carlotta Wilkes by Charley Wilkes 2:21¾. Her produce include ten standard performers, and to the cover of four different stallions — Inferna, Sidney Dillon, Guy Dillon and McKinney — she produced campaigners that achieved records faster than 2:08, the average time of the four—Inferlotta, Mary Dillon, Guy Borden and Carlokin—being 2:06.44. Carlotta Wilkes herself came from a line of prolific dams, her first and second maternal ancestors being producing daughters of Alcantara 2:23 and Clark Chief 89, both of whom are generously represented in fast company through the produce of their daughters.

Once the Carlokin youngsters attained training age they were not long in demonstrating their qualities, and in 1912 five trotters and one pacer achieved standard records, evenly divided between time and race performances, while in 1913 began their assaults upon coast trotting classics that have been so successful in establishing their fame as colt trotters. John Warwick won first money in the two-year-old trotting division of the Breeders Futurity and second money in the State Fair Futurity, while Esperanza won the State Fair and Oregon Futurities and annexed second money in the Breeders Futurity and the Canfield-Clark Stake. In 1914 Esperanza established a new record for three-year-old trotters on this coast, both in point of time made and events won, as she raced to a record of 2:10 and made a clean sweep of every classic for her age, while Nicola B. (2) 2:23½ looked after the family interests in the two-year-old trots by winning second money in the Breeders Futurity and first in the Oregon event. Nor were these the only ones of the clan to share in the division of the 1914 stake money, as Ethel D. (3) 2:11 and Carl (2) 2:19¾ both earned money in their engagements. Altogether, the Carlokins in the two seasons just passed have won more money in coast futurities than have the get of any other two stallions, which is a most remarkable showing in itself. The family inclination is to trot and trot early, for of the nineteen Carlokins in the list, all are colt performers and all but four are trotters.

Carlokin has had quite a bit of advantage over his stable mate in the growth of his representation in the great table, as he has a considerably greater number of living foals, but the Copa de Oros are developing as convincingly at the pace as are the Carlokins at the diagonal way of going, and it is doubtful if the get of any young sire have surpassed the speed shown by the Copa de Oro three-year-olds in 1914. So far as is known there were but three youngsters of this age in training last season, and in every instance they showed speed well on the faster side of 2:10. Contention B. in a public exhibition at Phoenix, in which he was considerably at a disadvantage from several existing conditions, equaled the three-year-old pacing gelding mark of Hemet 2:08¼, which stood as the world's record at that time, and trialed in his work in 2:07¼. Chango (3) 2:12¼ trialed in 2:09 and did a good job in his various engagements, pacing the most consistent race of any of the starters in the Breeders Futurity, and winning the Oregon event, the pacing division of the State Fair Futurity, and the three-year-old pace at Phoenix. Patrick de Oro, taken to Canada by Jim Stewart, closed his campaign with a record of having won his every start, and worked one of the two-lap prairie tracks in 2:08¼, so that the evidence that the Copa de Oros are endowed with natural and extreme speed is convincing in the highest degree.

Copa dé Oro 2:01 is the fastest son of Nutwood Wilkes 2:16½ and, like Carlokin, has for his dam a matron of exceptional merit—Atherine 2:15¾, dam of Rags 2:09¼ (whose performances in coast futurities nearly rival those of Esperanza), Stalene 2:21¼, Crescendo B. trial 2:12¾, and Nicola B., a stake

COPA DE ORO 2:01

winner already noted. Atherine is a daughter of Patron 2:14¼ and the great brood mare Athene by Harold, second dam Minerva, a double producer by Pilot Jr. 12, so that, to the fancy of very many students of speed producing pedigrees, Copa de Oro is one of the very best—if not the best—bred of the two-minute pacers.

As usual, these two great race horses and sires will be in service during the season of 1915 at Exposition Park, Los Angeles, and persons wishing to breed mares to them may obtain all further desired information concerning them, their get, or their terms of service by addressing Mr. Durfee at his home, 2019 South Figueroa Street.

THOSE INDIANA PACERS.

For many years Indiana has occupied an enviable position in the light harness horse world, due largely to the extreme speed shown by the pacers within its borders. Each season the statistics add to the glory of the Hoosier State and it will be a source of pleasure to horsemen in general to know that Indiana leads all other states in the number of new 2:05 pacers for the season of 1914.

Just nineteen pacers were added to the select 2:05 list and of this number the records show five were bred in Indiana. Tennessee, famous on account of the wonderful showing of the Hal family, is second with three; Kentucky, Ohio and California are credited with two each; While Pennsylvania, Montana, Virginia, Iowa and New Hampshire have contributed one each. It will be noted that the Hoosier State leads by a safe majority.

The fastest new 2:05 pacer contributed by Indiana this year is Possibility 2:02¾, the chestnut son of Newtown Boy, campaigned by S. F. Palin of Russiaville; then comes Fay Richmond 2:03¼, Mort Lane's pupil; Billy M. 2:03¾, trained by William Sweeney; Jaystone 2:04¼, a grand circuit winner for W. L. Snow; and John D. 2:04½, one of the best geldings that ever raced.

It is a significant fact that the blood of the old time Indiana pacing families is prominent in the best horses of the year. Possibility, undoubtedly a two-minute performer under favorable circumstances, traces in the male line to the Hoosier family founder, Bald Hornet, famed throughout the length and breadth of the state as a race horse and sire. Newtown Boy, the son of Venture 2:09, that sired Possibility, also sired Billy M. 2:03¾ and Doctor M. 2:06¼, a pacer that barely escaped the 2:05 list. In the maternal line Possibility and Billy M. are bred closely akin, their dams having been sired by Pocohontas Boy, a representative of a successful line of Indiana pacing blood.—Horseman.

HARRY DEVEREUX ON JOHN H. SHULTS AND DOC TANNER.

The recent passing of that good friend of the trotter, John H. Shults, calls to mind a certain incident in his sales ring career that will do no harm for the telling. Many of us know how eager he always was to tackle an abstruse problem and that nothing delighted him more than to get hold of a mean horse and practice his Rarey methods on the animal, for even when quite an old man he prided himself on his strength, which was unusual, and on his practices for subduing the temper of a wilful horse.

At one of the Fasig-Tipton Old Glory sales in New York some years ago Charles Tanner had in his consignment a pacing mare named Sunland Belle. She was an ex-hobbled bird and it took a large amount of gray matter on Tanner's part to get her to go square and stick to it. He finally succeeded and she acquired a matinee wagon record of 2:07½, the fastest in its day. Her owner sent her to one of the Old Glory sales and, attracted by the record, another of Tanner's clients purchased her. As she was not good enough to compete with others this man had, back to the sales she went and her return there, being so soon after the first sale of her, Tanner figured she would get a black eye and be sacrificed. He was, as it happened, in the mare's box stall underneath the Garden sale ring, when he espied the good natured gentleman, Mr. Shults, approaching. He sent the boy care-taker away on a hurried errand and as Mr. Shults came up, Tanner had the mare by the halter jerking her about in the stall. She was so entirely willing to follow him that she almost stepped on him and while he jerked he was talking to her in no complimentary words and rather violent language.

"What have you there?" asked Mr. Shults, at once interested.

Tanner did not answer him at once, being apparently out of breath and very angry. The amateur horse tamer got more interested and Doc told the mare in strong terms that if he owned her he would break her back or neck or something. Finally Mr. Shults got her number and looked her up in his catalog. She was a handsome mare, well bred, sound and the record looked good. When she was led into the sale ring, Mr. Shults was so close to her heels, if she had kicked she would have hit him, and in his hands he held a cord. When the bidding began he could not bid fast enough and raised his own bid a time or two, finally getting her for about $3,500. As soon as George Bain said "Sold," Mr. Shults stepped up and proceeded to put his cord on her ready for a tussle but the mare was so willing to go with him he had to hurry out of her way. It was not long before he saw the joke and he thoroughly enjoyed it. He and Tanner joked about it many times.

This reminds me of another sale ring story in which Tanner exercised his wits. A client of his had purchased Praytell 2:09½ for a long price, to use in matinee work. The horse had a great turn of speed and could brush a quarter in better than at 30 seconds which was unusual in those days. The mile was a bit long for him, however, but for a half he could beat any trotter. His owner sent him to the Old Glory sale and told Doc he hoped he would not lose too much on him. He was a good fellow and Doc wanted to get him out if he could. When he reached New York, he issued a defi to any Speedway horse that could be produced for a month on the Speedway and caused to be published, as well as announced when the horse was sold that whatever amount the horse should bring he would leave in the hands of Fasig-Tipton to cover in part or whole, an equal amount any daring owner desired to put up that Praytell could not beat any horse on the Speedway. Before the horse was offered, one of the many men to be found in New York who have clients on their staff ready to buy horses, came to Doc and ried to effect a private sale. This man said he had a client who would pay $3,500 for Praytell but that he (the agent) must have $500. Doc told him the horse was entered in the sale to go to the highest bidder and that was where he was going to be sold and he added: "If your client wants the horse tell him to dig deep for I have one that will give $5,000." This was a bit on the bluff order but Doc had learned that William Rockefeller and the late General Brayton Ives were interested in the horse and knowing that predilection to buy any one they wanted without regard to price, he felt sure of some good bidders.

Praytell was a sound horse but he had one very large wind-puff that was an eye-sore. Seeing Mr. Robert Bonner circulating about among the crowd the day Praytell was to be sold, Doc had an inspiration. He went downstairs to the horse's box stall and waited. Before long Mr. Bonner came along and spoke to Doc, asking what horse this was. Doc told him, giving him all the good points and telling him the horse could beat any horse ever owned by Mr. Bonner that ever raced on the Speedway. Doc also said that he expected Mr. Rockefeller or General Ives would buy him. He then called Mr. Bonner's attention to the puff and said, "They tell me you can take them off by shoeing properly but I don't believe you can, for I have tried everything." Thereupon ensued an argument. Mr. Bonner insisted he could shoe the horse so the puff would disappear and Doc goaded him on by expressing not only disbelief but ridicule. That night the horse was put up for sale and Mr. Bonner was so afraid he would lose him that he got on the steps just back of auctioneer Bain, meeting every other man's bid promptly and finally getting the horse, as I recollect, for about $5,100.

His future history so far as the puff is concerned, I have no knowledge of, but it is nice to think that perhaps Mr. Bonner at least reduced it through his witchery in shoeing.

Friend Doc figures in another good horse story that I believe never has been told in full. In 1899 there appeared at the Cleveland Grand Circuit meeting a horse from the "Show Me" state which started in a class race. He was a soft bay gelding, owned and manipulated by a very shrewd farmer horseman. Said gelding was about 16 hands, a rakish, good-looking chap and Doc's eagle eye photographed him on his mind at once, as a specimen to watch. Outside the horse himself, there was little connected with the outfit to hold one's attention although some things to attract it. The sulky, sans varnish or paint, was of the ancient vintage and the entire turn-out in keeping, including harness and driver, from whiskers to clothes.

When Colonel Edwards sent them on their journey for the first heat, the big bay, attractive going Missouri product began to eat up space like a real champion. His driver did not seem to care to go very near the inside fence. Maybe it was a case covered by a little ode dedicated to our good friend Chandler by one of the wits of the turf, like Walter Cox or Dick McMahon, which goes like this:

"To draw the pole is bad,
Second horse place worse,
The overland route for mine—
Safety first."

However it seems to me that Sagwa was driven in that heat as Bob Proctor used to drive Uhlan against the 2:08 birds, when he could trot in 2:05, all except at the finish. It was a finish that plainly evidenced the fact that Mr. W. R. Carter, his owner, felt to finish third was good enough for him and his nag from Missouri. The judges did not agree with him, however, and before the next heat called him to the stand. His explanation so fitted his entire make-up and was so cleverly put that he won Colonel Edwards' heart and he was permitted to continue to drive his horse which he was careful not to get too close to the front again.

Doc could not get the yellow bay out of his mind but he said nothing to anybody about him. At that time he was training a matinee stable at the old Glenville track and that fall he drew from the bank, in currency, a large sum of money and started on a gum shoe trip to Missouri. His story of getting to Mexico, driving with a farmer a long way through desolate country at night, the farmer regaling him with stories of old-fashioned road bandits and desperae characters, is most amusing and while Doc's hair raised, he kept his hand on his roll, vowing to die game but to save the money. The trip ended in his buying the horse and shipping him to Cleveland.

When he got the gelding home he began to pull the cockle burrs from his mane and tail and remove a few inches of the month's growth from his feet. Soon he had him "Tannerized" and the talk about the track was Tanner's new horse. He was entered in the Old Glory sale that fall and the story that went with him was not a poor one by any means. perate characters, is most amusing and while Doc's plan was to cinch the horse up with some fast miles and then invite the wise boys out to time him publicly. During this preliminary operation, Dr. Sprengle and I sat in the long-distance judges' stand timing the horse. Doc had him hooked to a Toomey cart, one of the old-fashioned kind fitted with a long spring to the seat and weighing about seventy pounds or more. The horse wore bell quarter boots with a large stuffed kid roll at the top. Just opposite us, Doc called on the horse and tapped him with his whip. He was trotting awfully fast and at the whip tap he seemed to make an extra stride. Then something happened. The front end of the horse went down and the cart and Doc went up. The horse and the cart stopped after making a couple of somersaults but Doc continued to ascend in a most beautiful parabolic curve, reaching the apex at what seemed a hundred feet high and descending on an equally symmetrical curve, he hit the track on the side of his head and his right shoulder. The horse did not get up—neither did Doc. Sprengle and I ran to him and as he was lying partially on his side, the doctor rolled him over on his back. As he did so there was a gasp from his lungs and he lay there, we thought a dead man, with his eyes open but the pupils turned back so that only the whites showed. The Missouri Whirlwind was equally as still. We had the wreckage cleared away and the story that goes with this is interesting but perhaps had best not be told. The shock occasioned by the fall of the horse made Dr. Sprengle stop his watch and we figured that had the horse continued to the wire at the same rate he had reached the long distance, he would have finished the mile in from 2:06 to 2:07. Some trotter, that!

This accident precluded any further public demonstration of the ability of the horse but his greatness was well established through friend Tanner's advertising.

Comes one day to Cleveland, a few weeks prior to the sale, a man named Gray, a buyer for Thomas W. Lawson, and negotiates with Doc for the horse at private sale. He begged and pleaded but to all his offers Doc turned a deaf ear and answered that the horse was entered in the Old Glory sale in good faith and had been well advertised by the sales firm and positively would go there and to the highest bidder if he only brought a dollar. Doc took Mr. Gray to his train and Gray made one last effort, saying: "Doc, let me have the horse. I will fix it up with the sale firm and give you ten thousand dollars for him." "No," said the unbendable Doc, and so Sagwa went to the sale and Thomas Lawson paid $7,500 for him (or thereabouts), later dubbing him "Doc Tanner's Gold Brick."

I am sure the name was a misnomer, unless applied to his color. Sagwa never seemed the same gaited or same acting horse. Maybe his accident accounts for it but I saw him do two things that make me knew he was an extremely fast horse—his work out the day he fell and his first heat, or rather parts of it, in the race at Cleveland.—Breeders' Journal.

FORESTRY SERVICE IMPROVING RANGE CONDITIONS.

That at least one-twentieth of all the stock bred on the open range of the west dies before it reaches market age and that much of this loss can be stopped is shown by results reported from the national forests, says a bulletin recently issued by the Forest Service, U. S. Department of Agriculture. This waste is said to add millions of dollars to the people's meat bill and gives one more cause of the high cost of living. Winter storms and summer droughts strew the ranges with the bones of cattle and sheep; predatory animals take a heavy toll; poisonous plants sometimes kill half the animals in a herd almost over night. Cattle contract anthrax, blackleg and other diseases, get stuck in bog holes, slip off slick hillsides; and sheep pile up and die of suffocation. Insects which madden and kill swell the total losses as do a multitude of other minor causes of death and injury.

If any of the animals to be grazed upon a national forest seem to be suffering from disease, the stock is subjected to a rigid inspection by the federal bureau of animal industry before it is allowed to enter the forest. If an animal grazing on the forest develops suspicious symptoms the permittee is requested to remove it. The carcasses of animals dying from infectious or communicable disease must be buried or burned, preferably the latter. To protect their stock against blackleg permittees are encouraged to use vaccine furnished free by the department of agriculture. Sheep suffering from scab or from lip or leg diseases are barred from the forests until they have been treated in conformity with the requirements of the bureau of animal industry. This co-operation between the two bureaus has made it possible to keep the forest ranges remarkably free from all forms of stock disease.

The settlement and development of the west does not appear to have greatly reduced the number of animals which prey upon domestic live stock, and the loss from that source alone runs into the millions of dollars each year. Within the forests, however, the number of domestic animals killed has been appreciably reduced by the campaign against wild animals waged by the officers of the service. During the past eight years forest officers have killed over thirty-five thousand predatory animals, consisting of coyotes, wolves, bear, mountain lion, wild cats, lynx, and so forth.

The losses due to poisonous plants have been in the aggregate the most numerous and the most difficult to guard against. Stockmen knew generally that certain flats or valleys or hillside slopes could not be used for grazing without heavy losses of stock, but there was much doubt as to what caused the loss. Gradually it was determined that the losses were due to various species of plants. Later, it was learned that in most instances these plants while extremely poisonous during certain periods of the year, were comparatively innoxious during the remainder of the grazing season. The forest officers determined the various species which cause death or injury of live stock, the periods during which each species is dangerous, and the areas of forest land upon which the plants are sufficiently abundant to cause losses of stock. The next step was to devise ways and means of preventing the losses. Where definite information is obtainable the outer limits of the poison areas are marked by warning placards which give the name of the poisonous plant, the kind of stock to which it is injurious, and the period during which it is most harmful. With this warning, stockmen are enabled to so handle their stock as to prevent the occupancy of the poison area during its danger period. In cases where the areas of poisonous plants are comparatively small, the permittees have been encouraged to fence them, material for fence construction being furnished free of charge by the forest service. The result of this work has been to reduce the number of animals lost through poisonous plants as compared to the numbers lost several years previously.

Notwithstanding all precautions which may be taken against stock poisoning, losses from this source must be expected. During the past several years the bureau of plant industry has been making a study of poisonous plants and of antidotes. In the case of larkspur, for example, the bureau has determined methods of treatment which are reasonably successful, under normal conditions. The only difficulty has been that the animals suffering from poison are generally out upon the open range and may not be observed by their owner until it is too late to apply an antidote. The forest service has therefore arranged to meet this situation in an experimental way by equipping a limited number of rangers with hypodermic syringes and the necessary chemicals. Armed with this equipment, a forest officer can in a few moments administer a treatment which may save a $40 steer.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

GOSSIP FOR SPORTSMEN.

Upland shooters are in accord generally upon the merits of proposed legislation for the protection of that grand game bird, the California valley quail. The claim has been made, and with good reason, that the birds are growing scarcer every year, and have almost disappeared in some sections. Where hunters could go out in the hills and get fifty and more quail in a day's shooting years ago, these same coverts will not produce a dozen birds now. Nearby quail hunting grounds have been almost shot out, and quail hunters must go farther and farther every season to reach ground where enough birds for the day's sport can be found, and this applies to many other districts in this State.

The settlement and clearing-up of big sections of land throughout the State where quail were once plentiful has been one cause of the growing scarcity of quail, rendering less and less each year the area of feeding and breeding grounds. The question of protecting the birds in close season as well as during the open shooting months has also become rather complex, according to the game wardens and deputies. The territory to be patrolled is so large and the use of the automobile so general that hundreds of quail can be shot at any season of the year without anyone being the wiser.

In some sections young half-grown birds have been regularly shot weeks before the legal shooting season opened. The increase of farming and ranching operations has been much responsible for decreasing the supply of quail. The natural covers have been destroyed, and the birds have in great measure lost their chosen hiding places, where when the gunners are numerous, they can find safe refuge. Automobiles afford easy access for hunters to comb distant or near quail territory—a score of gunners in the course of the shooting season visit shooting grounds where there was one shooter several years ago. The "sooners" are also much responsible for inroads on the quail crop. In some sections of the State, particularly in one or two southern counties, never for many years past were so many birds killed out of season as during the past year. That is the report given out by men who live in the hill country and who are familiar enough with bird life to know when a bevy of quail has been shot up.

The proposed cutting down of the daily bag from twenty to fifteen and from 140 to thirty per week to the individual gun has general support among the sportsmen. Cutting down the open season to two months is decidedly not regarded with approval.

Cutting down the open quail season to two months, it is claimed, will not help the situation at all. The ground vermin and natural enemies of the birds will have all the more opportunity to work unmolested.

Another view of the situation is taken by sportsmen who have young dogs that they desire to train. Two months a year is not adequate time in which to work a field dog.

So far as the proposed changes in the quail seasons or bag is concerned, we can go back for nearly 20 years and remember that at nearly every session of the legislature "changes in the quail laws" were submitted. As a result the pages of the statute books have been literally stuffed with game laws—most of them inefficient and the balance practically a dead letter.

* * *

The wild fowl shooting season came to a close in this State last Sunday. Bay counties sportsmen who were out for a parting salute at the broadbills were handicapped all day long by a drenching rain.

A week prior duck hunters who were out in the bay counties marshes were also under ban of a heavy rain. Birds were not overly plentiful and in rather poor table condition. The bay ducks, "cans" and "blueys," have been found thin and leathery in taste recently, other varieties are also in poor condition compared to the birds shot earlier in the season. Los Banos held good for limit bags of sprig and spooneys; teal were the most numerous, however, in that section. R. C. Prather and several friends shot limit strings at the Gadwell Club preserve. Alex Shields, Jack Wirtner, Ned Bosqui, Nat Boas, J. E. Coleman, and other members of the Field and Tule Club, were also in the limit class. Dick Reed, L. Middleton of this city, with Bob Richards of Tonopah, shot teal limits at Billy Sears' ground. Ted Riley, George Smith and O. O. Orr's two days' shoot was for a full tally. H. Woods and H. Newhall of Modesto were also limit shooters.

The closing days for the Suisun gunners have not been productive of limit straps. At Green Lodge, W. W. Richards, Dave Hearfield, Harlow Bancroft, and George Emmons have enjoyed a fair average on sprig, mallard and widgeon. Amby Buckley's vigil in the Tulle Belle Club blinds was satisfactory. Volante Gun Club members and other Joyce island gunners have not been pestered by big flights of birds the past week.

Near Gridley, Frank Ruhstaller, Frank Newbert and other Sacramento sportsmen have found ducks—mostly mallards—very plentiful. Good duck and goose shooting has been available near Woodland. Contractor Little's two-day visit was rewarded with limits of sprig and widgeon.

Otto Feudner and Charles C. Huber have recently found the snipe patches on the Newman Gun Club preserve stocked with enough English snipe for limit shoots. The present season has not been overly prolific in well-filled snipe bags, the weather conditions having been generally unfavorable.

East shore bay shooting was very indifferent for a fortnight past.

Members of the Chiquita Gun Club, whose preserve is located a few miles below Collinsville, have had fair shooting recently. A. G. Hebgen, F. E. Doussick, N. W. Sexton and F. F. Finch bagged enough sprig and mallard last Sunday to make the trip enjoyable, and a few English snipe were also grassed. Honker geese have also been plentiful in that region. Farther up the river near Rio Vista, ducks and geese were very numerous, and many limits have been shot.

Petaluma and Sonoma creek gunners last Sunday were up against rainy weather and the birds had scattered far from that district.

Harry Leap and other gunners have had fair shooting near Hamlet recently. The Point Reyes marsh has rendered good mallard shooting at times. Black sea brant are still plentiful in Tomales bay, but have been wary and hard to get within range.

Quite a delegation of Alameda marsh gunners put in the last day of the season at various shooting resorts. Down Alviso way on Sunday previous the general average for many gunners was about half a dozen ducks, mostly canvasbacks. George Franzen, Pete Swansen and other members of the Skyscraper Club, put in a non-satisfactory day at the big salt ponds. Dr. W. O. Ogle picked up a limit of fat bluebills during a mid-week visit to the club blinds.

Dr. Cornwall, Ed Doud, Joe Lobala, Dan Ritchie and other gunners, who shot along the lower Alviso sloughs, gathered few birds.

Birds were few at most of the Alvarado, Mt. Eden and other shooting ponds. Tony Korbell, Jack Connelly, Charles H. Kewell and other Arden Gun Club shooters, had no trouble in carrying the few spooneys shot near the Coyote hills. Other gunners in that district were also in poor luck.

The lower bay off Redwood shore has not been deserted by the big flocks of canvasback and other ducks. The birds, however, rested on the water in comparative safety, out of reach of a small fleet of scull boat gunners.

* * *

The hills a few miles back of San Mateo, near the water company reserve, were found well stocked with quail by Harold Ladd. That section is heavily covered with brush and is hard to hunt in.

* * *

Steelhead fishermen will be pleased to hear that big runs of these salt water trout have been seen going up different coast streams recently. The rains have filled the lagoons and creeks and enabled the fish to run upstream to spawn. A week ago a large run of quinat salmon started up the San Lorenzo river and steelhead trout are now beginning to go up that favorite Santa Cruz fishing water.

A shipment of fifteen boxes of steelhead trout, about a ton and a half in weight, was held up by Fish Commission deputies last week and sent back to the shippers, the Melarky Fish Company, Portland, Ore.

* * *

Striped bass fishermen out Sunday before last on San Antone slough were lucky in several instances. Emil Accret picked up an 8-pound fish, Hugh Draper a 6-pounder, Frank Marcus another 6-pound bass. Bob Sangster's catch was five bass, scaling from five to twelve pounds. All of which goes to show that the sport is getting better in that creek. Some of the rodsters used clamnecks for bait, others bullheads and herrings; all effective, it seems. Last Sunday it rained cats and dogs.

Louis Gotthelf landed three nice bass while fishing near the Napa and Santa Rosa railroad drawbridge, his fish weighing 6, 10 and 15 pounds, respectively, taken with bullhead baited hooks. Harvey Harmon and other rodsters were in line for numerous "strikes," but the fish broke away from the tackle.

A duck shooter, in a blind on Petaluma creek, near Black Point, is reported to have landed a large striped bass in a rather novel manner. He attached a baited hook to one of his wooden duck decoys. A fish came along and gobbled the bait, the hunter then gobbled the fish.

* * *

San Mateo shore fishing near Moss Beach last Sunday was first class, big strings of sea trout being caught by many fishermen. Jack Duckell, Terry Evans, Shorty Walthers and others were in the scrimmage for the sea fish. Red Snapper fishing, at the reef off Princeton, has only been so-so recently.

Quite a number of unterrified fishermen were at the Fort Point sea wall last Sunday. Good catches were taken until about 11 o'clock a. m., when the downpour drove the saltwater fishermen to shelter.

THE DACHSHUNDE AS A HUNTER.

In justice to a so-called "old man's dog," or freak, at least these are a few of the misnomers that I have heard the dachshunde called by those who do not know the use of this breed or his ability to do things that he is fitted for, I will give an account of a hunting trip I had this season in Virginia, states E. A. Stone, a well known Southern sportsman.

"I have eight couple of dachshunde that I have had great pleasure with hunting rabbits, and I dare say it is the only pack of working dachshundes in this country, but if there is another I would be very glad to hear from the owner, and would be pleased to arrange a match. But this, of course, is not the work of the dachshund.

I left Norfolk with a party of ten for a hunting trip up the James river; we had provisions for a week and eight dogs, which made a good load for our boat. We sailed about fifteen miles above Jamestown Island, where we put up our camp on the plantation of Mr. Bradley, over whose land we intended to hunt.

It was dark when we finished making camp, after which the cook served us a good supper, then we sat around the fire and rested until about twelve o'clock, when we started on a coon and 'possum hunt with four coon dogs that belonged to a negro we had along—the dogs were recommended to us as very fine.

The other four dogs we had along were dachshunde that we intended to use on rabbits and squirrels, and were left at the camp when we started out.

We were not away from the camp more than twenty minutes before the dogs had found the trail of our first 'possum, and before they had put him up a tree we heard the voices of two strange dogs in the pack, and much to our surprise, after going up to the tree, we found Heine and Schlitz, two of the dachshunde we had left at the camp. They had heard the other dogs baying and leaving camp went to them.

Taking turns with the axe it did not take long to fell the tree, but when it began to fall the 'possum jumped to a smaller tree, which one of the boys climbed in an effort to shake the 'possum out. We held the large dog so that we could get him alive, forgetting about the dachshunde, and the second Mr. 'Possum hit the ground Heinie and Schlitz were upon him, but we choked them off in time to save the 'possum.

Of course, the 'possum will not put up any kind of a fight, but as I raised both of these dogs, I know that they never before this time had seen a 'possum, which goes to show they are game. If it had been a coon, no doubt they would have received a good licking before the other dogs could come to their assistance, all of which taught me in the future to hold them when a coon was up a tree.

Before the night was over they proved to be, with the exception of one of the larger dogs, the only coon and 'possum dogs we had with us; of the other three large dogs, one was a puppy, another insisted upon running rabbits and the other dog we could not get to hunt until the other dogs gave tongue, then he would go to them; but he was valuable because he was true and would never open up until he was sure the game was treed.

What seemed to the rest of the party the most wonderful part of all was how these two short-legged little dachshunde could hunt in company with the big dogs, and as well as I know the virtues of the breed I can't say that I do either, unless it was as one of the party said, they caught the large dog by the tail and he carried them along with him. Nevertheless, we got two 'possum and one coon the first night and the two little dogs could be heard upon every trail with their large cousin.

We hunted the dachshunde days on rabbits and squirrels and Heinie and Schlitz hunted 'possum and coon nights; their endurance was remarkable, but they could not have lasted another day after our week's trip because when I got them home poor Heinie was in such bad shape from briars and fatigue that for two days he could hardly get around, and their feet were swollen up like puff-balls.

I do not know the number of rabbits and squirrels we bagged, but we got eight 'possum and seven coon on the trip. The dachshunde won the heart of nine new converts, who will swear by the breed for gameness and hunting ability. In fact it cost me two of my best dogs because my friends all wanted one as a present, but my heart was so swelled with pride that I could not part with more than two.

Now, when I hear some of the tales that the present owners tell of the feats of these little dogs, I blush with modesty because I would not dare tell some of the tales they do, for fear of being disbelieved, nevertheless they are true.

Every breed of dogs has its virtues but it is the unexpected things, things that you think are out of their line, which, when they do accomplish them, make you love and admire a breed.

Therefore, I feel justified in telling those who do not know the dachshunde when they ask me what he is good for, I say anything, and when I read that they are used by the German Red Cross to locate wounded, I do not think I am taking in too much territory."

———o———

Striped bass fishing is also beginning to pick up in Corte Madera slough, near Greenbrae. The bass fishing in that creek will improve from now on, if the experience of past seasons is anything to bank on.

CANVASBACK.

When the leaden clouds and the sweeping, swishing rainstorms of our late fall have taken the place of the golden sunshine and azure skies of early September; when the browns and golds of the once-flaming woods are deadening to dull grays; when the parched land has had its fill of moisture and the great rivers are slowly rising, and shallow ponds are forming in all the depressions and rough gullies of the lowlands; then it is that a few lordly canvasback, the forerunners of hosts to come, begin to make their appearance on our reed-fringed ponds and broad bays, and in our winding sloughs. Hundreds of miles from the far north they come, swinging southward away from the white winter in increasing numbers day by day, to spend the stormy days and months with thousands of their web-footed brethren along our shores and in our broad marshes. Every day of the advancing rainy season finds more of them with us, until when two weeks of our calendar winter have passed they form the majority of the birds in the bay portions of our State where aquatic feathered folk congregate.

Most of the ducks we are familiar with—widgeon, teal, golden-eye, blue-bill, gadwall, mallard, sprigtail and spoonbill—precede the canvasback in our marshes and markets; but when the sportsmen's strap-loads begin to show here and there the white back or red head of a great drake "can," a commotion starts that runs through the entire ducking fraternity—from the man who shoots from his comfortable blind over decoys on a baited, private pond, to the fellow who braves a wetting on a tossing, wind-swept bay in a small skiff for a chance to scull within gunshot of a dozen birds. For, although our coast canvasback are not up to the table standard set by their valisneria-fed brethren of the Chesapeake, they are still highly edible, except when they have been living on shellfish diet in shallow bay waters for some weeks; further, they are the largest and most imposing of all our ducks, and the man who kills a string of canvasback ducks gets a much wider hearing than he who only brings home ducks. Not necessarily among old sportsmen who know the true value of every game bird, but among those who judge the wiliness of a bird by its price on a menu.

The old sportsmen would only give him half the credit for a string of canvasback that they would give him for the same number of little teal or bright mallard. For the canvasback is often a foolish bird, and when a gunner is once in the line of flight it is no trick for him to bag the large birds in numbers. They decoy perhaps more readily than any other duck, and when their attention is once fixed on the lures it takes a marked lack of caution to drive them out of shot. In fact, over a baited pond when an evening flight was on I have kneeled in open sight of my decoys, some twenty yards from them, and killed bird after bird. And I have seen several of the unhit birds of a flock which has pitched to the decoys and been shot at, settle in the water with a surprised air long enough to give one who was so inclined an opportunity to shoot them on the sit. Not once have I seen this, but several times. And I have seen a man with a small bore rifle kill almost an entire flock of feeding canvasbacks without a single bird taking alarm. He simply waited for them to dive and the last bird to decide to go in search of a meal found himself suddenly in no need of one. But when I say that a canvasback is a fool I only mean comparatively—he learns in time to care for himself and when he does learn somebody else plays the fool. But the great majority still know nothing.

I thoroughly enjoy canvasback shooting, because when my strap is filled I have a bunch of the most sought after game birds of our coast—and then maybe because the canvasback is not the hardest bird in the world to hunt. I honestly admit than an all-day tramp for two quail, or a seven-hour hunt for a jack-snipe does not particularly appeal to me. I am somewhat of a depraved creature who enjoys results—lawful results obtained in a legal manner.

I like to once or twice during the season obtain a limit bag of birds. I can remember distinctly the shortest time it took me to kill my limit, then fifty, of canvasbacks. It was on a private preserve in southern Sonoma county, a great wheat ranch of some four thousand acres of reclaimed land, surrounded and traversed by tule-fringed sloughs. One of these, about three-quarters of a mile in length, which ran across the ranch, contained the heavily baited ponds over which we shot. There were no tides in it, the water being controlled by a great flood gate. It was deepest at the west end and here the canvasback blinds were hidden in the tules which were thickly ranked along either bank, looking from a distance like brown walls rising from the newly-sown fields. About a half mile from the blinds was the duck house, where scores of different kinds of decoys and several boats were kept in order by a keeper. This man also put out wheat in the ponds for the birds every evening and kept off trespassers, as well as setting out the decoys for the gunners and acting as instructor for any green hand. The keeper lived at the farmhouse set down behind a large broad dike, alongside of the slough-like Sonoma creek Here the visiting sportsmen put up, and many a time I dressed and undressed winter mornings and nights in that house by the light furnished by natural gas from a well in the back of the barn. But, although they have a great convenience in the natural gas, they are handicapped by a lack of drinking water, the solution from the wells being too salty to be palatable. All of their aqua pura is importel from external points.

It was a Saturday noon we arrived at the "island" on the hunt I have in mind, and when we had climbed into our shooting togs and were eating lunch, the keeper came in and assured us that the prospects for an excellent evening flight of "cans" were never better. No one had shot over the ponds for seven days and he had been feeding the birds continually. With the outlook for a good shoot ahead of us it was hard work to wait until even two o'clock in the afternoon before we made our way to the blinds. But when we were finally comfortably ensconced in the shooting boxes our impatience had its reward in the form of a tiresome two-hour wait for the flight—for, with the exception of a few ruddy ducks and numberless black coots that skittered away at our approach, nothing had been on the ponds when we arrived. About four o'clock the first shots came—two birds from the southwest, canvasback from the bay—but it was not I that killed them. In my impatience I had left my blind an hour previously in pursuit of two widgeon that had pitched into a far slough, and I had become thoroughly lost in a maze of small, winding, ooze-bottomed salt rivers. Shots continued to come from the direction of the blinds at intervals, and when I had finally struggled and fought my way back through mud and water it was five o'clock, and my companion and the keeper had eighteen birds, all canvasback.

There was a lull in the flight for about fifteen minutes after my arrival, and then of a sudden I saw five birds, far up the slough, coming my way. They were flying close to the water and I crouched in the blind until they were forty feet from the decoys. A quick shot downed one of the center birds, and as they soared the second barrel crumpled up another. One of the remaining three birds made a wide circle, and almost before I was aware of it was over the decoys again. This time he stayed.

Perhaps now I was down three minutes, perhaps one. I was becoming excited and could not tell. Anyway, I heard a quick, sharp whish-sh overhead and in back of me, and then into my line of sight swung two "cans" with their wings fixed. My gun shot to my shoulder, and just as one was settling into the decoys it spoke, and he turned over and kicked for a moment. When I fired the other soared and the second barrel only seemed to recall to his mind some distant appointment that he was already late in keeping. Next three or four single shots swung down the slough, and some were killed and some were allowed to go their way, with some haste but no hindrance. The sun was going down in a great blaze of golden glory, and the whishing of the birds' wings as they swung over the still ponds in wide circles was becoming almost continuous. My gun barrels were getting decidedly warm, and I was dimly aware of the frequent reports of the other gun. Just after I had killed three out of a small flock that had settled in the decoys and risen when I lifted over the tules, the keeper slipped into the blind. He reported the other gun as doing very well farther down the slough, and said that he came to call in the ducks for me.

It was well he did, for just then high over us a band of about twenty started circling. Lower and lower, closer and closer, they came, every once in awhile answering the hoarse calls of the keeper. Then of a sudden they pitched toward the decoys, their wings hissing. The keeper motioned to let them settle and I did. Then my pot-hunting instincts arose, and when they were well bunched we lifted over the edge of the blind and tore loose. I verily believe we killed half the flock before they were fairly into the air. Anyhow when the noise ceased there seemed a great many more dead ducks bobbing over toward the tules on the other bank. Following the keeper's orders I had retrieved none of my birds, but had kept well covered in the blind.

I continued shooting for the next twenty minutes at birds that literally poured into the ponds to feed, and when I stopped there were but a few of the one hundred and fifty shells left which I had brought out—but the tules across the slough, opposite the decoys, were lined with dead ducks.

We now started in our boats to retrieve, and as we were picking dead canvasback after canvasback from the water, numbers of live ones were dropping into the distant corners of the ponds, while the hissing of their wings overhead was almost continuous.

When we finally piled the birds up in the duck house and counted them by lantern light there were ninety-six, practically a limit for each gun—all shot in an hour and a half by two only medium marksmen; and, with the exception of a brace, they were all canvasback. But this, I was told, was an exceptional flight for even these remarkably excellent canvasback ponds.

I have shot canvasback under conditions which cannot be compared with those attendant on this big shoot—shot them from a brush blind along a bay shore in cold rainy weather, and gone home with half a dozen; and I have shot them on the salt marsh, when they were extremely wary from much hunting; and I have sculled on them in a brush-covered boat—but whenever I have swung my gun on a lordly canvasback a peculiar thrill has run through me which has always been absent when I aimed at any other duck; and I think this will always be the case—for to me the canvasback stands pre-eminent in the duck world.

A BRITISH COLUMBIA GRIZZLY HUNT.

The time to hunt the grizzly is in the early spring just as the snow is melting from the mountain sides, for at that season he has left his winter den after his long sleep and his coat is just in its prime. On the mountains of upper British Columbia everything begins to grow directly as the snow leaves and even before. Large slides of snow and gravel are very common about that time, the immense mass of debris carrying with it every tree or loose rock that stands in its way and leaving in its wake a clear strip often miles in length. On these "slides," as they are called, the young herbage is very succulent and they are the first feeding places of the bear after he awakens in the spring.

One of the ambitions of my life has been to kill one of the monarchs of the Rocky Mountain forests, so with that end in view I made my way to Lillooet one April a few seasons ago and there engaged a giude, Henry Schwartz, and Bell, an Indian cook, with whom I started out on the 21st of the month, taking along five pack horses, three for riding and one spare.

For two days we traveled with no more serious adventures than the bolting of a pack horse. The load was spilt all over the ground and guide Schwartz was obliged to tie up the other horses and go after her. He soon met her returning, she preferring toil to solitude.

On the third day, after leaving the main trail and climbing the summit of a divide in order to make a short cut, we came to a small lake about a mile long and quite narrow. It was swarming with fine rainbow trout and they were so hungry that we were able to catch enough in one hour to last men and dogs for the next three days.

That night we pitched our camp on Cadwallader creek and decided to make this our main camp or base of supplies. There were a few bear signs in the surrounding woods but none of them very fresh. We decided therefore to move on the south fork of Bridge river, where the guide's partner had shot an enormous grizzly the previous year.

The most successful plan of hunting the grizzly is to watch the open strips or slides in the early morning and evening when he is likely to be out feeding. At other times he lies in the thick bush in a regular lair. As soon as he is sighted the hunters proceed to stalk him, always approaching from the windward side in such a way that the wind shall be blowing from the bear to the hunters, otherwise he would smell them before they got within range and make off into the thickets.

While we were watching one of these slides with our glasses we heard a noise like thunder, and looking in the direction from which the noise came we saw, about ten miles away, what seemed a whole mountain side sliding downwards. It was a splendid sight but better viewed from a distance than near at hand. In the wake of the slide was a brown, barren strip more than half a mile wide, a bear pasture for next year.

The next day we pushed on a few miles farther, and soon came across two fresh grizzly tracks which we followed for some time. Several times we were much tempted to shoot a coyote which continually obtruded himself as if aware that he was immune while there was a chance of getting bigger game. When returning to camp we saw where the coyote had followed our back trail to camp, moved probably by curiosity or the knowledge that where there is a camp there is usually pork, also.

The first grizzly we saw was when we had camped at the foot of a slide five hundred yards wide and about two miles long. We were sraightening up the camp, and Bell had gone out into the open to gather some dry firewood when he came hurrying back to tell us that there was a big grizzly on the slide. We took off our boots and put on moccasins, but the delay cost us dear, for when we arrived on the scene he had gone into scme willow bushes and although Schwartz got a glimpse of him I did not see him at all. Picking up his trail we found that he had doubled round and passed within one hundred yards of where we were watching.

From this time on we saw bears every day. At one time it was a mother with her yearling cubs, the latter romping and tumbling over their mother as she fed and passively joined in the fun. At another I got a shot, but owing to the rareness of the atmosphere I misjudged the distance and the bullets all struck low. A third time a big fellow came out onto the selide, sat up on his haunches bear-fashion as if looking at us and then lurched off into the thickets.

One evening we had climbed into trees in order to better see the slide. It was bitterly cold but we stuck to our posts and were rewarded, just at dusk, by seeing a bear come out into the open about three hundred yards distant. Sighting carefully, I fired and the shot broke his back, but he pawed his way down the mountain, dragging his hind legs and roaring like a bull. Again and again I fired, but only one ball hit the mark and as it was now too dark to follow him we went home to camp.

Our grub was getting scarce...so Bell that evening cooked a porcupine. Its liver and kidneys were very good but the rest of the meat was soft and flabby. However, we were so hungry that we could have eaten anything. Whether the rest of the porcupine community realized what we had done and come to haunt us, or whether they were anxious to be cooked also I cannot say, but that night our dogs spent most of the time chasing porcupines and in the morning we found no less than a dozen of the quilled

beasts treed within a few yards of the camp. One was in a bare spruce tree right above the camp fire. It took us some time to get the quills out of the dogs' noses.

We breakfasted on porcupine and were away by six o'clock on the trail of the wounded bear. It was easy work following him as the tracks in the snow were very plain, and now and then he had lain down, leaving a pool of blood. We found him about a mile away lying in a hollow. He tried to get away but a ball through the neck put him out of his misery. No sooner was he dead than Bell began to sing a weird Indian song that they always sing when a bear is killed. It is supposed to act as a charm against ill luck which would otherwise fall on the person who should dare to kill one of the kings of the forest.

Our bear was of the brown or cinnamon variety, not a grizzly, although he was almost as large as one of the latter. This did not satisfy me, for I had come hundreds of miles to kill a grizzly and there seemed to be plenty in the woods, so I determined to try again. It was necessary first to return to our main camp, which we did, making from there a new start up the Cadwallader creek.

We had not gone many miles when, pointing to the other side of the creek, Bell said in Siwash:

"There one of horses."

Schwartz looked and then called to the Indian to come back. "It's a grizzly, sure enough," said he. One look through my glass confirmed this, so we hurried along, coming at last to an open spot just opposite where Bruin was feeding.

She—for it proved to be a female—was feeding on the other side of the creek about half a mile away. We hurried down the mountain and tried to find a place where we could cross the creek, but failing in that we climbed a little knoll right opposite the bear and not more than two hundred yards away. Just as we got there we saw a big gravel slide come rushing downwards with a noise like thunder within one hundred yards of the grizzly, but she took not the slightest notice of it, continuing her feeding as before, perfectly unconscious of her two enemies and of the dark muzzle of the Winchester pointing in her direction.

Remembering how I had misjudged the distance once before, I raised the sights to four hundred yards in spite of the protests of my companion, who told me to fire low. Accordingly my bullet went whistling over the bear's back, sending up a shower of sand just beyond her and showing me that I had missed. Anathematizing my folly in not accepting the advice of an experienced man, I expected to see the bear rush for the timber; but instead, she jumped around and stood broadside on. Ramming in another cartridge and lowering the sights I fired again, my shot this time taking effect. She flew round and charged for us with mouth open and uttering terrific roars or bellows. It was the finest sight I had ever seen but there was no time for contemplation. A false move meant certain death, and even the coolest brain and the strongest nerve could not be quite sure of winning out against this infuriated creature with the lives of a cat and the strength of an ox.

On she came and it seemed as if nothing would stop her. At the edge of the creek she raised herself a little, holding her head high in the air. It was just the opportunity I wanted to send a ball into the center of her chest, piercing both lungs and heart.

She fell and lay still for a few seconds and guide Schwartz went wild with excitement, slapping me on the back and shouting, "Good boy! You've got her." But we hadn't yet. My magazine was empty and I was busy pushing in more cartridges when up jumped the grizzly and tried to make for the timber. A ball through the back of the neck gave our Indian another opportunity to sing his weird death song over one of the finest silver-tips I have ever seen.

WILD CAT CHASING.

Probably there is no sport in all outdoors which equals that of riding to hounds—surely there is none which has been more written about, more praised by those who have participated in it and by those who have watched the chase from afar.

Beside it the stalker, whose work in the killing of deer or other wild game is in reality the most arduous of all the games of the hunting field, pales into insignificance in the public mind. In comparison, the man who can bring out of the air the swiftest flying teal or pigeon is an amateur, while he who bestrides some lank hunter in the long pursuit of Reynard or Lobo to his form in the dark earth has attained to the highest notch of fame as a Nimrod.

In the East, particularly in the Southeast, riding to hounds, which has become an established institution, is a society event of the first water as well. Here in the West it is as yet a matter of business, of hunting for the hunt, and not for the society one meets or the pretty girls who attend because it is good form.

Corduroys and khaki here have not as yet given place to red coats and ducks, and the high double cinch saddle is as yet the thing despite the introduction of the "jockey seat" in eastern hunts. Where the fox is the game in the blue grass country, the coyote and the wild cat, with an occasional mountain lion, is the game here, but the hunting and the hunters are altogether different.

North of the Tehachapi I am told they have good hunts for the bob cats which infest the higher hills; in fact I think I have seen accounts of such hunts in the sporting press, but of them I am not privileged to speak, seldom having been north of the line which divides the faunal zones of the State so accurately. Here in the South, however, around Los Angeles, we occasionally have a good chase on the ponies through the hills, and those who belong to the one hunt club which is worth while in the Southwest—the Santa Ana Valley organization—have sport every spring.

There are two species of wild cats in Southern California—the big gray lynx and the little red plateau lynx, both called "wild cats," and the larger dubbed "bob cat" to distinguish it in the vernacular from the more common variety.

As a rule I am opposed to hunting any sort of wild animal with hounds. It admits in itself an inferiority of the hunter to the hunted, but—and here's the rub of it—there is positively no other way to follow a wild cat among the hills of the Southwest.

I have spent hours trying to stalk a wild cat with a rifle and never succeeded but once—and then it was not my fault. I saw the gray form slip through the underbrush, hunger having driven the cat out to take a chance with a band of quail—and to get one. Of course I had no gun; indeed, I doubt very much if I should have used it after the exhibition of stalking which that lynx put up. But all of these things are merely incidental to the main issue, which is wild cat hunting.

Unlike the coyotes of the West, the wild cats are commonly found in the foothills. The little wolves range over the flat lands, wherever there are ranches and a possibility of poultry or rabbits or even ground squirrels, but the cats love the brushy tangles of the hills and the rocky ledges with their scattered caves which here and there scar the foothills.

To get the cats out of these hills, where they are as hidden as the proverbial needle in the haystack, nothing but the sharp nose of a dog, and a dog who knows the cats he hunts, will suffice. Provided with such dogs, which are gradually coming into high demand all over the southern end of the State as sportsmen realize that this is one of the real games of the outdoors, the hunter rides out early in the morning, while the fog and the dew still lie heavy on the chemisal and sage brush, into the hills, if possible, where there are no fences to obstruct the running of his horse or his dogs.

Then, we, for now I am going to take up one of the hunts in which I have been a participant, release, say, six of ten dogs, holding the best in leash for the time when the trailers break into voice. A pup working far ahead and overrunning the trails, as is usual with young humans and young dogs, breaks out; Spot, moving leisurely and just fast enough to keep out of the way of the horseman who is holding his leash, sniffs the air, gets a tip on a sure thing and lets out a noise which is neither bark nor bay, but yet a sort of inquisitive "woof? woof?" sort of asking for confirmation, as it were.

We let him go and he rushes over to the young dog, snuffs along the ground, finds it a false alarm and slips away into the brush on the side of a steep canyon, which, in this case, happens to be a branch of Santiago canyon, down in Orange county.

Silently the dogs and the horses and the men work, each drenched with the wetness of the early day; half an hour passes; we have moved, possibly, a mile. And then, suddenly, yet with that deep-toned intonation which denotes confidence, Spot, dimly and far away, lets go of a bay, following it up with still deeper and stronger calls.

His voice comes to us muffled and we suspect that he is down under the wall of the canyon, where he cannot be heard well enough to tell in which direction he is working.

The young dogs already are well ahead, but we loose the leash hounds, and led by them we plunge over the canyon rim, down, down, through brush, over loose boulders, around scanty patches of cactus, at length to see Spot's white back vanishing on the run through the chemisal on the far side of the gorge.

It seems that the dogs see him, too, for by the time we have reached the bottom, having some little respect for our necks, if not for our horses, the older dogs are in full cry, while the youngsters are cutting across the canyon half a mile above, to join the working pack.

Then it is every fellow for himself, and the devil take the hindmost; for while a chase after a wild cat is not long, it is sometimes very strenuous. Over the ridge the dogs go, and after them we trail, not in a compact body now, for the slip and slide down the side of the gorge set some so far back that there is little prospect of their being in at the death.

Up the hill we drive our horses; half a mile has been traversed, down the far side of that same hill, and we have covered very near a full mile. We drop down into the bed of a still larger canyon, where there has once been a stream, but where now there is but the faintest trickle of water. Instead of crossing this creek bed, the cat took straight up it. By this time he must have heard the dogs, and have known that behind them were men, for we made no pretense at concealing any noise we cared to make.

A quarter of a mile farther we came to a fallen sycamore which lies well across the canyon. Its top rests on a ledge in a gray conglomerate cliff which rises at least fifty feet from the bed of the stream; its roots completely upturned to the air. Here the hounds lose the trail; twice they circle the butt of the fallen tree, twice they swing the upper loop of a figure eight in the bed of the gorge above the tree, but to no avail.

(Continued next week.)

AT THE TRAPS

A communication from T. E. Doremus, Wilmington, Del., gives the following interesting statement:

"From sportsmen in all sections of the country have come requests that information regarding Mr. Fred Gilbert's yearly averages be published. This of course is desired from the time he entered the game, up to the present. His twentieth year found him still well above the 90% mark, and he finished the latter part of 1914 with some wonderful exhibitions of the art of breaking clay targets. Earlier in the year he was a constant sufferer from a combination of ailments which interfered with his shooting, and militated against him turning in anything like his usual scores.

Interest in the Fred Gilbert Twentieth Anniversary Celebration shows no abatement. in fact the reverse is the case. Each mail brings us a flood of letters from all sections of the country, containing good wishes for "our Fred" (from Iowa), "Fritz," etc., and already nearly two hundred clubs from coast to coast and from Canada to the gulf, have requested that Fred Gilbert Cups be reserved for them, and forwarded just as soon as possible.

Mr. Gilbert's records, as far as obtainable, are:

Year	Shot at.	Broke.	Per cent.
1895.....	Averages not compiled.		
1896.....	Averages not compiled.		
1897.....	3,290	3,056	92.90
1898.....	3,060	2,742	89.60
1899.....	2,875	2,700	93.90
1890.....	3,790	3,585	94.60
1901.....	4,285	4,015	92.70*
1902.....	7,800	7,406	94.90*
1903.....	9,205	8,655	94.20*
1904.....	17,015	16,179	95.08*
1905.....	17,845	17,065	95.06*
1906.....	Ill all year—did not shoot.		
1907.....	9,195	8,817	95.80*
1908.....	10,945	10,402	95.03
1909.....	12,630	12,079	95.63
1910.....	2,000	1,896	94.80**
1911.....	2,100	1,995	95.00**
1912.....	4,600	4,413	95.93
1913.....	5,940	5,615	94.53
1914.....	3,800	3,517	92.55

*Indicates high average winner for year. Mr. Gilbert won this honor six consecutive years, eliminating 1906 when he did not shoot, a feat never before or since accomplished by any shooter, amateur or professional.

**The averages these years were figured only on targets shot at in Interstate Association tournaments.

* * *

The Ithaca Gun Club, of Ithaca, New York, has been elected a member of The Interstate Association, so it is announced by Secretary E. Reed Shaner.

* * *

In preparation for the Montana State shoot of the Montana Gun Club, to be held in Lewistown June 21, 22 and 23, the Lewistown Gun Club has elected officers and appointed some committees, the latter to take in charge the preliminary arrangements for the big meet, which will bring to that city scores of crack trap shooters as well as some noted professional shooters.

Charles J. Marshall was chosen as president, with Fred Twitchell vice-president and A. H. Stephenson secretary and treasurer.

The Lewistown club is composed of a large number of enthusiasts, and they are all deeply interested in the coming State shoot. The preparations for this are to be begun early in order that the arrangements may all be perfect. This gathering is one that will give Lewistown a lot of prominence, and that feature will not be overlooked, but the chief interest of the members is to see that Lewistown rises to the occasion and that the visitors are given a whole-hearted welcome.

Rem-UMC Notes.

Merchants Gun Club, of Stafford, Kan., held a shoot on January 19, at which a team was picked to represent them at the State shoot. R. W. Bucke, Sherman Guthrie, and Grant Hicks, all using Nitro Club shells, took first, second, and third places in the order named.

B. L. Kammerer of Riverside, Ill., shooting Nitro Club shells, led the field at the traps of the Chicago Gun Club on January 17, breaking 93 out of his 100 targets.

At a shoot held by the Parker Gun Club, of Milwaukee, Wis., January 24, the three high guns all used Nitro Club shells, while the men scoring first and second places shot Remington guns. The winners were: J. Sausen, of Wawautosa, H. S. Smith, a local shooter, and H. Ludington, also of Wawautosa.

Although the day was very cold and windy, making high scores scarce, the Indianapolis Gun Club held a lively shoot Dec. 19. E. A. Edmonson, of Clayton, Ind., and Dr. O. E. Britton, of Indianapolis, made very creditable scores of 89x100, the former using a Remington pump gun, and both shooting Nitro Club shells. Again, on December 23, the weather conditions were very bad, making Dr. Hickman's score of 144x150 unusually good. Out of the first 75 targets shot at, he broke all but two, using a Remington pump gun and Nitro Club shells. Second place was a tie between E. A. Edmonson and E. P. Remy, of Anderson, Ind., both shooting Nitro Club shells. They broke 137 of their quota of 150 birds.

MODERN HORSE BREEDING.

There are three things that are very essential in breeding, if we would become successful. The first is a stallion that does discharge live sperm cells; the second, a good healthy mare to receive them; last but not least is cleanliness. If either of the three were lacking there would not be many colts to show for your work, writes a recent contributor to the American Breeder.

Now, we will take the stallion first. How are we to know that he does discharge live spermatazoa? We cannot detect it with the naked eye nor can we tell that he ejaculates completely. We may feel the pulsations of the urethra by holding the hand on the lower side of the penis, but that is not a sure sign that he has made a complete ejaculation. Now, how are we to tell? Shall we wait a year and see if that particular mare was fertilized at that time? No.

We have a better way; one that will absolutely tell us in a few seconds. How? By using the microscope, and making an examination at each and every service. It takes only a couple of minutes and you can be sure if the stallion has done its part. By taking a few drops of the fluid you will have sufficient for a test; put it on your slide and flirt the glass to distribute it thinly over the surface; adjust your machine, and you have before you a sample of what your horse is capable of at that particular service. You will have countless numbers, if the service is complete, moving over the glass at a very rapid gait, in fact, so fast that the eye of a person not accustomed to it will not detect them; but as they grow cold they move more slowly and you see them more distinctly. The small amount you have on your slide will not be more than a drop or two. But looking down on them you will actually see a good many hundred, all anxious to go some place, going in all directions. Sometimes you get a sample that contains live germs going round and round like a bird with a broken wing; that kind of a germ does not have enough life to travel far enough to meet the ovum, consequently cannot fertilize at that particular time, so this service is lost. Then you will have a sample where there is no life at all. You will however see present small sugar globules floating along. This teaches us that there was not a complete ejaculation of all the glands that are called upon to act, to form a complete service.

We do not know why this is. It may result from overwork or it may be worry or it may be caused from a change of feed or a poor place to make the cover. So you see it is safe to say that the only way to use a stallion successfully is to test him at every service. You are absolutely certain then that the service is good or bad. It only takes one germ to fertilize, all others are wasted. Science teaches us that the average discharge of a stallion is 8 ounces and contains 12,000,000,000 spermatazoa. If only a small fraction of this discharge is taken, you will have enough to fertilize all mares present if they be in breeding condition.

Now we come to the brood mare. It is just as essential that the brood mare be in good health as it is for the sire. If the mare be sick or a little off, you want to know it. You want to be able to make an examination to determine if she be in a breeding condition. Right here is where the speculum comes into play. With it you soon are able to tell at a glance the difference between a mare in the pink of condition and one out of condition. You are not guessing at it. You know and are thus able to either breed her intelligently or turn her down. A stallion groom of today should school himself to make an examination to detect diseased kidneys and ovaries in the mares presented for service, if there be any suspicious ones. If a kidney or ovary be diseased you stand a poor chance of getting that mare in foal. If you have a bad case it is best to give your veterinary surgeon a chance to either try his skill or pass her up as he sees fit. By doing this you get along much better with your patron.

Cleanliness comes next and it is just as important as the preceding. Always clean up every mare brought to your barn to be bred, before making an internal examination, have your hands and tools absolutely clean. Use only sterilized water to rins off the hands and clean up the mare; boil all water used in cleaning your breeding appliances. Use a tail cord to keep the tail up out of your way. If the mare is to be bred with natural service, bandage the tail and you have nothing to bother you then when the horse mounts. Encourage the horse to stay on a long time so that the penis is fully retracted before he dismounts. You will have less trouble with your horse drawing back the discharge and wasting it on the ground. A little patience used at this particular time with a young horse will develop him into a good server. I like a breeding stall for several reasons. First, your horse is not as liable to get kicked at time of service; second, the mare always stands better, therefore you get better service; third, the mare will hold up more weight than in the open and the groom has a better chance to catch the semen when artificial impregnation is practiced. You can also put the mare on a higher level by using an extra floor to stand her on, in case you are serving a small mare with a large horse.

I consider artificial breeding a big help. In fact, I would not go back to the old way. It is the only way to even up when you have several thousand dollars invested in a horse. It stands a man in hand to see where he can make enough to pull even. With the capsule system he not only breeds more mares but can breed them cheaper and by using the stallion but once a day, you get a much stronger service. If you have any doubtful mares they can be bred with a capsule and no harm done. Shy breeders can be bred more successfully this way than with the natural service. I have bred mares out of heat in this way and have foaled them.

MORE LIVE STOCK NOW THAN A YEAR AGO.

Washington, D. C., Jan. 30.—For the first time in many years, information collected by the U. S. Department of Agriculture shows that all classes of live stock in the United States are increasing in numbers. Thus the real facts contradict, absolutely, sensational reports that prices for meat and shoes would rise to unprecedented figures in the immediate future. It has even been said that a Government statistician predicted meat at 50 cents a pound and shoes at $10.00 a pair within the next two years. Such a prediction, the real Government statisticians say, is quite unwarranted.

On January 1, for example, the number of beef cattle showed an increase of 3.4 per cent over the number a year ago, and an actual increase of 1,212,000 head. Hitherto the number of beef cattle in the United States has declined since 1910. There are also more milch cows in the country than last year, the increase being 2.5 per cent, or in numbers 525,000. Swine, however, showed the greatest increase of all classes—9.6 per cent. On January 1, 1914, there were only 58,933,000 swine in the country, on January 1, 1915, 64,619,000. This is accounted for by the fact that the production of swine can be increased more rapidly than that of other classes of live stock, and consequently an enlarged demand can be met more readily.

The prediction of 50-cent meat and $10 shoes was accompanied by the declaration that France alone has taken from America nearly 300,000 horses within the last five months and that the other countries at war have drawn upon our resources in the same proportion. The facts are that more horses were on the farms of the United States on January 1, 1915, than there were a year before, the increase being 233,000 head or 1.1 per cent. So far from France alone having taken 300,000 horses from us, the total exports since the war began have certainly been much less than 100,000 and very likely not over 75,000. Since there are approximately 25,000,000 horses all together in the United States, the drain on account of the war is scarcely alarming.

It is in fact pointed out by Government statisticians that the market value of farm horses has actually declined to such an extent that the average is now about $6 a head less than a year ago. This decline is most noticeable in the cotton States and in those States which make a business of breeding horses for sale in other sections. Mules have declined even more than horses, their value being now $11.50 per head less than a year ago. The explanation is to be found in the depression on account of the cotton situation in the South, which is the great market for mules. An improvement in this respect will do much to restore the demand for horses, so that Government specialists while ridiculing the notion of a horse famine are convinced that farmers will find it profitable to use good work mares for breeding more stock.

As for hides, the situation is not quite so clear, but even here there has been much gross exaggeration. From two-fifths to less than one-half of the leather used in this country is imported, about 25 per cent of the foreign hides coming from Argentina, 15 per cent from Canada, 11 per cent from Mexico, 8½ per cent from European Russia, and 7½ per cent from France. Since the outbreak of the war, importations have shown a certain falling off, those for September, 1914, for example, being only 34,000,000 pounds, instead of 45,000,000 pounds the year previous. There is, however, little reason to suppose that this decrease will be permanent or of sufficient importance to create any real scarcity. Since the great bulk of the imported hides come from countries that are not at war, shipments are not interfered with in any way, and the only new factor to be considered is the possibility of an increased demand by the warring countries.

It is believed, however, that the United States is now in a better condition to face such a situation than for five years past. The tide, it seems, has turned. Instead of live stock steadily decreasing year after year, this year for the first time, as has been said, all classes show an appreciable increase. Including horses, mules, milch cows, beef cattle, sheep, and swine, there were on January 1, 1915, 7,712,000 more farm animals in the United States than on January 1, 1914. The increase in the total value was $78,024,000, or 1.3 per cent. It is quite true that this increase is not yet proportional to the increase in population, which is approximately 2 per cent; but the fact that there is an increase, that the tide seems definitely to have turned, is regarded as a sufficient answer to alarming exaggerations and misleading figures.

Alhambra Prince (3) 2:27, by Redlac 2:07½ and out of the dam of Alarich 2:09, etc., owned by the Alhambra horseman Charles W. Winter, was awarded the Palace Hotel Cup, first prize, in the New Year's parade at Pasadena, Mr. Winter also annexing the Col. Hogan Cup for the best horse drawn vehicle in that pageant. The Prince has given evidence of his class in other show rings and will probably be among the competitors in the light harness classes at the P.-P. I. E. shows this fall.

MARKEY AND THE MARKET.

In reading numerous articles by men who are supposed to be well posted on the prevailing conditions in the horse business, it makes one sad to note that a somewhat discouraged attitude is often taken. However, it is my sincere opinion that there never was a period when the outlook for breeders of standard horses was higher or more encouraging, notwithstanding the opinion of other writers to the contrary.

I firmly believe that the low-water mark for colts, fillies, brood mares and untrained horses of good breeding was reached in 1914, and that conditions will improve materially this season, and continue to do so right along thereafter. I base this prediction on well-grounded reasoning, which I will attempt to outline.

First of all, the public is not out of conceit with harness racing. On the contrary, 1914 found our sport better patronized than any of the other popular outdoor pastimes. This I pointed out in a recent article. So long as horse racing retains its widespread popularity there will remain a strong demand for racing material, and this demand will result in more horses being bred and a greater percentage of them trained.

Last season I wrote an article entitled, "Prepare for a Horse Famine," and since that time I am more firmly convinced that I was correct in my surmises, and that time will further emphasize the accuracy of my observations.

* * *

The process of elimination has been in progress since the inception of breeding operations, but there have been more culls and undesirable horses weeded out in the last five years than in any other like period. The breed is freer of chaff, sounder as to foundation, with better seed to go ahead with than ever before in the history of the business.

The advent of the automobile eliminated many mares of ordinary breeding and merit, and the European war has taken from us about 100,000 light horses, many of which were trotting or pacing bred, and will take many more.

We may say that we are starting with a clean deck, having rid ourselves of the undesirables and retained the better class of mares and stallions. There is scarcely a section of the United States or Canada in which good stallions are not accessible. For my own enlightenment I took a tab of twenty-five stallions whose names appear in the Breeders' Directory of the Review Racing Guide, and carefully looked up their breeding. They were stallions that I was not familiar with and knew nothing about aside from their records or registered standard numbers. It was really surprising to me to learn the high class pedigrees they carried, and I was struck by the fact that ten years or so ago such breeding could be found only on the best farms or in the great horse centers.

* * *

There are hundreds of young horses that carry the blood of the great sires, of prominent colt trotters and of dams that are producers, and bred in the heighth of fashion. Breeders will make no mistake in patronizing them, and, as a matter of fact, it is these same young horses from which we may expect future progenitors of the type of Baron Wilkes 2:18, Allerton 2:09¼, Moko, Peter the Great 2:07¼, Axtell 2:12, Axworthy 2:15½, Walnut Hall 2:08¼, Bingen 2:06¼, etc. And when those breeders who are fortunate enough to secure a sire of such merit as those named, they will be richly rewarded for many years of breeding efforts.

The tendency to breed only to the most noted sires constitutes a handicap. Give the young horses a chance, and by so doing save large stud fees and much other contingent expense.

Supply and demand in the horse business, as well as in all others, make high or low prices, and just as certain as you and I are alive, the demand will increase because the supply at the present time is short, and keeps on shortening.

There is less chance taken nowadays in breeding than ever before, for the general average of horses produced is more uniformly superior. They are born with more natural speed, and require less time and expense to develop them into racing tools.

* * *

Leaving aside the present great demand for finished race horses — and prices for this sort were never higher—the European war once settled is bound to give our foreign market an additional impetus. They are killing horses over there, not breeding them, and the destruction is largely among light horses, such as are used for cavalry and artillery purposes, and in peace for every sort of use. After peace is declared there will come a period of readjustment in each country's affairs. In order to replenish their horse stock and rehabilitate breeding, they must look to America for stallions and mares. No other country will be in position to fill the depleted ranks of horses in practically all of Europe and, as we well know, during the past ten years Europe has learned to recognize the true merit of the American trotter. More of the standard breed will be used to restock and breed army horses, to say nothing of the racing side of the proposition.

The way I look at the situation, we should take an encouraging view of the breeding angle, for all elements seem to favor us. It is not a time to wear long faces, but rather one for cheerfulness and action. Horace Greely said, "Go west, young man," and I am going to paraphrase his famous advice by saying, "Breed horses, young man!"—Marque, in the Horse Review.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects
READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

DON PRONTO 2:02¼,

eight years old, pacer, no straps, needs no boots; sound, not a blemish or a puff. Any amateur can drive him as well as a professional; has been in 2:02 with a 230 pound amateur up. This is a matter of record. Don Pronto is the cleverest all-round high class pacer in the country. Has held a world's record and is from the dam of Manrico (3) 2:07¼, a world's record holder. Is bred to be a great sire, being by THE DIRECTOR GENERAL (sire also of Wy-Drad 2:04¼, William O. 2:04¼, Mainsheet 2:05, Deuchester 2:07, etc., 8 in 2:10), and out of SILURIAN, that wonderful producing daughter of Wilton. Don Pronto was the biggest money winning free-for-all pacer in the west both in 1913 and 1914. Can surely beat his record. Is very beautiful, pleasant and a great favorite. Price $1750.00.

ALARICH 2:11¼ (Breeder's mark 2:09),

trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. Price, $650.00.

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. The best buy in California at $1600.

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. Price $1000.00.

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. She has been up from pasture about eight weeks and trialed this week in 2:49 very easily, last eighth in :19¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. Take her at one-third her value, $500.00.

OMAR, gelding,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). A present at $350.00.

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. Price $800.00.

HERMES, brown colt,

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. Price $1500.00.

JOHNNY DUGAN,
3-yr.-old breeder's record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. A great buy at $350.00.

OLD FOLKS,

bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is ready to begin fast work, having been jogged all winter. Price $1000.00.

CARINA,

bay filly, trotter, two years old, by CARLOKIN, dam ATHERINE (dam of Copa de Oro 1:59, Rags 2:09¼ and Nicola B. (2) 2:23¼, tr. 2:17, winner of the Oregon Futurity and second in the P. C. T. H. B. A. stakes for two-year-old trotters). Carina is entered and paid up in the same stakes as Carleta. She is a grand looking, well developed filly, showed a :40 gait at eleven months old. Is good gaited and good headed, is in training and promises to make a high class trotter. Trialed this week in 2:46, last half in 1:12½. Price $600.00.

AND ONE FOR THE $20,000 P.-P. I. E. TROTS — RAGS 2:09¼, winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old — in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. Price $2000.

In addition to the ones above mentioned I will offer to intending buyers NICOLA B. (2) 2:23¼, JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), a YEARLING BROTHER TO ESPERANZA 2:09, engaged in all of the Stakes, the phenomenal two-year-old pacer SANDY McNABB (staked), MISS QUEALY (full sister to Manrico), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

THE FARM

THE SHIRE HORSE.

The Shire, or as he was formerly called, the English Cart Horse, is the survival of the British war horse, whose strength, courage and activity so surprised the Romans when they invaded Britain.

Since the foundation of the Shire Horse Society, the breed has been much improved by careful selection, and very strict veterinary examination at the society's show has helped to reduce the percentage of unsoundness, and last year they took another step forward by issuing board of trade certificates, which are an absolute guarantee of soundness.

The policy of the Shire Horse Society of England is guided by men of the very highest repute, and they will not tolerate anything but absolute honesty in the pedigrees registered.

This endeavor to eliminate the unsound, and the honesty of all registrations has helped materially to place the Shire horse in the proud position which he occupies today—the king of heavy draft horses.

However, he does not occupy this position simply on the strength of his soundness; it is his enormous bulk and great muscular development, combined with activity and a disposition well suited to the heavy work for which he is largely used which is most responsible for his excellent standing.

There seems to be an impression in this part of the world that the Shire is not an active horse, but any one who has stood by the barrier at the Shire Horse Society's Show and seen stallions weighing 2,500 or 2,600 pounds come down the ring like a steam engine (no whips are allowed in the ring there), knows that this is a wrong impression. Even at our own State fairs Shires have always excelled in this particular.

The type of the Shire horse is now so firmly fixed that he transmits his character with great regularity to his offspring, and for this reason grading up may be accomplished to a greater size more quickly with a Shire than with any other breed. Evidence of this is to be seen on the streets of San Francisco, where about 80 per cent of the heavy drafters show a preponderance of Shire blood, while probably not 10 per cent of the stallions of the State are Shires.

In conclusion let me say that there is good and bad in every breed, and a horseman to be successful must be a good enough judge to discard the bad ones and appreciate the value of the good ones.—Henry Wheatley, in Orchard and Farm.

HOG HOUSES.

Under housing, we must consider two things: First, feeding; second, farrowing. In feeding in this country, a closed-in house is necessary. It is advisable to have the north, east and west sides closed, preferably with the walls at least two feet high, removable, so that in the summer there is nothing to obstruct the ground breeze. With very little ingenuity this can be accomplished by leaving off the bottom four boards all around in the summer time and slipping them in place in the winter. These removable boards should be put in place from the inside, so that the frame work will offer resistance against the weight of the hogs crowded against them. The south side should remain open with a small hood in front of it. The floor should be of wood, or cement, from both standpoints of economy and healthfulness. It will be economical because no food will be buried in the dirt and the hogs will not be compelled to swallow dust and germs in eating it. The house should be divided into two compartments to keep the larger hogs apart from the smaller ones. Clean the troughs out every day and clean the floor. Keep the hogs out of feeding house, except at feeding time. At all other times their place is on the pasture. Don't forget this item.

The University of California is conducting a correspondence course in swine husbandry. Every one interested in hogs should enroll. All that is necessary to do is to send a card to University of California, West Berkeley, Cal., Animal Husbandry Department, requesting them to enroll you for a course in swine husbandry.

HORSE OWNERS! USE
GOMBAULT'S
CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from Horses. Impossible to produce scar or blemish. Send for descriptive circulars.

F. GOMMET,
2053 Sutter St., San Francisco, Cal.

FOR SALE — STOCK RANCH.

900 acres, hilly land, 30 miles from Oakland, Alameda county; 2 miles from railroad station and summer resort. Enough good hay land for winter feed. Good pasture land. Enough oak wood to pay for half of land. Water all year. Entirely fenced. No snow. Old hay loft on ranch. Good title, free from all incumbrances given. Surrounding land on sale at $40 per acre, though not as desirable and accessible. Price $27,000. One-half cash, balance on mortgage or deed of trust. For further information address C. W. PETERSEN, First National Bank, Pleasanton, California.

FOR SALE.

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great procer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

FRED W. KELLEY,
366 Pacific Bldg. San Francisco.

COPA DE ORO 1:59
WINNING PERFORMANCE

○ DURFEE'S STALLIONS ○

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1298

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼	De Ora (3) 2:17
2-yr.-old record 2:13½.	2-yr.-old record 2:27¼.
Trial (3) 2:09	Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¾, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1297.

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11	Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16	Nicola B. (2).....2:23½
John Warwick (2) 2:17	Santiago (3) 2:24¼
The Lark (3).....2:18½	May Marian p (3)..2:24¼
Carl (2) 2:19¾	Santiago p (2) 2:24½
Miss Carlokin p 2:20	El Carbine (2).....2:27½
Carsto (2) 2:22½	Eileen C. (3) 2:29
Carlschen (2) 2:23	Carlos (2) 2:29¼
Fulton G. (2).....2:30	

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

Pleasanton, California

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10.

Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

A. T. R. No. 51518.

AXWORTHY* ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10.

Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Vernon McKinney 2:01½

A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes.

Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

WILBUR LOU 2:10¼

Sired by KINNEY LOU 2:07 3-4

Sire of Wilbur Lou 2:10¼, True Kinney (2) 2:19, 21 Standard Performers

Son of McKinney 2:11¼ and Mary Lou 2:17

Dam LOUISE CARTER 3, 2:24

Dam of Wilbur Lou (3) 2:10¼, Mamie Alwin 2:12, Martin Carter (3) 2:29¼

Daughter of Chestnut Tom 2:15 by Nutwood Wilkes 2:16½

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910

Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU,	record 2:25,	half-mile track, ½ mile—1:08¾
SELMA PALEY,	trotted ½	mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU	"	¼ mile :35½
GERTRUDE RIVES	"	¼ mile :36¾
BILLIE BOYD	"	¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23,

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912; (5)2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast. All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $4 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

PARKER GUN VICTORIES 1914

Look, Read, Remember!!!

Following is a list of some of the most important victories won by contestants shooting the old Reliable

PARAMOUNT PARKER GUN

Modesto, Cal., May 6.—The California-Nevada Handicap. MR. TONY PRIOR.
Portland, Ore., July 22.—The Pacific Coast Handicap. MR. ED. O'BRIEN.
Dayton, Ohio, Sept. 8 to 11.—The National Championship of America at Singles; the National Championship of America at Doubles, and

THE GRAND AMERICAN HANDICAP,

by MR. WOOLFOLK HENDERSON, with greatest scores ever made in these events.
Dayton, Ohio, Sept. 8-11.—The Consolation Handicap, by MR. TONY PRIOR.
San Diego, Cal., May 12 to 14—MR. E. L. MITCHELL made highest professional average, 467x500.
Los Angeles, Cal., May 15-17.—Same man, same gun, highest over all 590x630.
Salt Lake City, Utah, May 28-30—MR. S. A. HUNTLEY with phenomenal score, 521x525, highest average; and at
Dayton, Ohio, Sept. 8-11—Mr. Huntley was high over all, scoring 565x600 at all distances.
At Phoenix, Ariz., MR. E. L. MITCHELL made highest average of tournament, scoring 509x520.

The Highest YEARLY AVERAGE Was Made By

MR. WOOLFOLK HENDERSON, scoring 1981x2050 targets—96.63%; and second by MR. SAM A. HUNTLEY, scoring 7548x7820 targets—96.52%.

Follow the pace set by the champions and winners, and for either single or double target shooting fall in line with the leaders, who use 34-inch barrel Long Toms.

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America.

San Jose, Cal.

MAKE BETTER SCORES

Most every shooter has his "dead easy" target. It may be a straightaway or an angle "bird." His "losts" are his hard targets,—those he should practice on until he can smash them as he does his "cinches." There is a short and sure way to become a better shot. It is by

USING THE

DU PONT

Hand Trap

to throw the kind of target you miss so often at the club. This trap is adjustable. The shooter gets a 35 or 70-yard straightaway, fast or slow, high or low, "jack rabbit," curvers and skimmers,—whichever flight he desires for improving his shooting. Such practice methods will surely result in better scores.

No shooter or club should be without the Du Pont Hand Trap. For training new members, or staging novelty events for experienced shooters, club officials will find this target-thrower the most practical device available.

If your dealer hasn't it, send us $4.00 and the Hand Trap will be shipped postpaid.

WINCHESTER

FACTORY LOADED SHELLS

Generals Huntley, Platt and Hawkins The Heroes—

—S. A. Huntley, of Vancouver; J. D. Platt, Jr., of Dayton, O.; and J. M. Hawkins, of Baltimore, Md; were the 42 centimeter guns of the Mid-Winter Handicap campaign, held January 17-23.

Mr. Huntley shooting Winchester Factory Loaded "Leader" Shells, captured the Mid Winter Handicap, with the phenomenal score of 95x100 from 23 Yds.; tied in the Preliminary Handicap with 89x100 from 22 Yds; won High Average on 16-Yd. Targets with a score of 759x800.—

Mr. Platt, shooting Winchester Factory Loaded "Leader" Shells, captured the Preliminary Handicap, breaking 89x100 targets and 20 targets straight from 18 yards in the shoot-off.

Mr. Hawkins, shooting a Winchester Model 1912 Repeating Shotgun and Winchester Factory Loaded Shells, captured the High Professional Average on all targets, breaking 736x800.

FOR A HARD CAMPAIGN THE W BRAND IS THE ONE

The Figures AGAIN, Mr. Trapshooter!

They Show 1915's Way to Winning Town

At Registered Shoots in 1914:

Over **475** more Trapshooters used Remington-UMC Guns than used any other one make.

Over **600** more Trapshooters used Remington-UMC ammunition than used any other one make.

At Non-Registered Shoots:

Over **1600** more Trapshooters used Remington-UMC Guns than used any other one make.

Over **4000** Trapshooters used Remington-UMC Ammunition than used any other one make.

These Wise Choosers Won 24 Out of 39 State Championships:

the Western Handicap, the South Western Handicap, the Amateur Trap Shooting Championship of the United States, the Pinehurst Mid-winter Handicap, and many other enviable Triumphs.—

And Just to Start 1915 Aright—

Amateur Championship of Long Island Sound won by Geo. L. Lyon, 89x100, shooting Remington-UMC Pump Gun and Nitro Club Steel Lined Speed Shells.

2nd, R. L. Spotts, 88x100, shooting Remington-UMC Nitro Club Steel Lined Speed Shells. Conditions extremely hard.

VICTORIES OF PARAMOUNT PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

ONE WAY for your senator or assemblyman to learn that you want the district fair bill passed is for you to tell him so—quickly and emphatically.

CATALOG COPY for the sale of the California Draft Horse Breeders' Association to be held February 24th at the University Farm, Davis, is in the hands of the printer, and the list of high class offerings will be ready for distribution early next week. The consignments are varied and excellent and the sale presents a most advantageous opportunity for the purchase of pure bred draft stock for breeding purposes. Catalogs may be obtained from Secretary J. I. Thompson, Davis.

THE DAY WE HAVE LONG AWAITED.

With the final stroke of twelve on next Friday night there will be ushered in the day to which the country at large—and especially California and her sister coast states—has looked forward to with poorly restrained eagerness for many, many months—February twentieth, the day of the official opening of the great Panama-Pacific International Exposition.

Everything is in readiness for the big event, and indications point to an opening attendance unrivaled in the history of similar occasions. Visitors from "the outside" are arriving in California in large numbers, and nearly every city or town of any pretentions within her boundaries is preparing to send a big delegation to join in the celebration. The day has been declared a holiday by Governor Johnson, and as Monday also is a day observed by patriotic Americans as a holiday—Washington's birth anniversary—visitors will find the opportunity for their initial trip to the fair most excellent.

The following week the big track will get its initiation at the hands of the auto race drivers, polo is scheduled for the infield in March, and almost before we know it the starter will be calling the horses for the first race at the June meeting.

FOR GENERAL CONSIDERATION.

With everything apparently oiled for the passing of Nevada's racing commission and pari-mutuel bills, and with similar bills under consideration by the legislatures of Arkansas and Indiana, and in fact already successfully through the branches of the assembly in which they originated, there is a widespread interest being taken in this sort of legislation.

California solons have no measures up for their consideration that countenance the laying of wagers in any form, but a local friend of both great equine families, the trotter and the thoroughbred, has submitted for the consideration of our readers in all states a draft of a racing bill that he believes to be acceptable to all parties concerned in reviving racing, and to the general public as well. Much time and care has been given to its preparation, and we recommend a careful study of its provisions to all persons interested in such matters, and especially to horsemen in states where the future introduction of such measures is contemplated. Briefly, it creates a state racing commission supreme in authority and compels racing associations to conduct their racing in such manner as to win approbation from the general public and derive their revenue for expenses and profits from gate receipts, since it eliminates the "kitty" or gambler's percentage. Moreover, state and county fairs or any meetings at which betting is not conducted or allowed will not be under the control of or subject to the regulations prescribed by the state racing commission. Here is the measure in full:

An act to prohibit bookmaking and pool-selling, and to provide for the appointment of a State Racing Commission to grant licenses for horse racing for a limited period, and permit of wagering upon such races by the Pari Mutuel and Auction Pool Systems only, with no charge or commission to be made or accepted, either directly or indirectly, by any person, association or corporation on wagers made or to be made at any race or race meeting provided for by this act.

Section 1. Any association or corporation formed for the purpose of racing and breeding or improving or encouraging the breed of horses and conducting races and contests of speed between horses, shall have the right and power, subject to the provisions of this act, to hold one or more race meetings in each year, and to hold, maintain and conduct horse races at such meetings. At such meetings the corporation or association or the owners of the horses engaged in such races, or others who are not participants in the racing, may contribute purses, prizes, premiums or stakes to be contested for, but no person or persons other than the owners of a horse or horses contesting in a race, and the owners of sires and dams who have nominated in futurity stakes such contesting horses, shall have any pecuniary interest in a purse, prize, premium or stakes contested for in such races or be entitled to or receive any portion thereof after such races shall have been finished.

Section 2. A State Racing Commission is hereby established to consist of five persons to be appointed by the Governor within twenty days after this law shall be in force, all of whom shall have been breeders and raisers of horses for five years preceding their appointment, none of whom shall be an officer in any corporation or association or race track engaged in giving race meetings. The members of said Commission shall hold their offices for four years.

Section 3. Such Commission shall appoint a secretary, who shall hold such office during the pleasure of the Commission. The duty of such secretary shall be to keep a full and faithful record of the proceedings of the Commission and preserve at its general office all books, maps, documents and papers entrusted to its care, and perform such other duties as the Commission shall prescribe. He shall be paid a salary to be fixed by the Commission at a rate not exceeding eighteen hundred dollars per annum, which shall be paid by such racing corporations or associations who shall obtain licenses from said Commission, the amounts to be paid by each to be apportioned by the Commission, which shall on or before the first day of January of each year assess upon each of said corporations or associations its proportion of such salary, the amount or proportion to be paid by each racing association or corporation to be designated by said State Racing Commission. The Commission shall biennially make a full report to the Governor of its proceedings for the two-year period ending with the first day of January preceding the meeting of the legislature. All other expenses of the said Racing Commission shall be paid by the racing corporations or associations obtaining licenses under this act, and shall be apportioned in amount in the same manner by the State Racing Commission. Said Commission shall have the power to make rules, regulations and conditions which shall govern and control in all matters pertaining to racing and for the actual trotting, pacing and running races held upon the track of any corporation or association who shall obtain a license under the provisions of this act, and in all matters pertaining to the conduct of betting and racing on said tracks or on any tracks during any race meeting at which betting is conducted or allowed.

Section 4. Any association or corporation formed for the purpose of raising and breeding or improving or encouraging the breed of horses and conducting races and contests of speed, shall have the power and right, subject to the provisions of this act, to hold one or more race meetings in each year, and to hold, maintain and conduct pacing, trotting and running races at such meetings.

Section 5. No such races or race meetings at which betting occurs, except at State and County Fairs, shall be conducted by a corporation or association not duly licensed by said Commission as herein provided. Licenses shall be granted by said Commission to such corporations and associations to hold races or race meetings at such time and place and for such a period of time as said State Racing Commission shall designate.

In the event that the said Commission should refuse any such license, the said Commission shall publicly state its reasons for so doing, and said reasons shall be written in full in the minute book of said Commission, which shall at all times be subject to inspection upon application by any one desiring so to do, and said finding of said Commission shall be subject to review by courts of general jurisdiction of this State, and the revocation of any license and any ruling by said Commission shall likewise be subject to the review of the courts of this State. No association or corporation shall be entitled to a license who shall violate any of the provisions of this act, and the said Commission may, by a majority vote, rescind and revoke any license granted to any association or corporation who shall violate the provisions of this act, after a fair and impartial hearing.

Section 6. Every race meeting held or conducted at which betting is conducted or allowed, except as provided for by this act, is hereby declared to be a public nuisance, and every person acting or aiding therein is punishable by imprisonment in the county jail or in the State prison for a period of not less than thirty days, and not exceeding one year, and in addition thereto in a suit brought for that purpose by the said Racing Commission in the Superior Court of the county where it may be proposed to conduct such unauthorized racing, an injunction may be obtained against the same.

Section 7. The provisions of this act relative to the payment to the said Racing Commission of proportionate moneys to pay the entire expenses of conducting said Commission shall not apply to race meetings conducted by any State Fair Association, or Agricultural Society, or County Fair, or any association to which State aid is given, or to race meetings at which no betting is conducted or permitted.

Section 8. Every person,

1. Who engages in pool-selling or bookmaking, with or without writing, at any time or place; or

2. Who, whether for gain, hire, reward, or gratuitously, or otherwise, keeps or occupies, for any period of time whatsoever, any room, shed, tenement, tent, booth, building, float, vessel, place, stand or enclosure, of any kind, or any part thereof, with a book or books, paper or papers, apparatus, device or paraphernalia, for the purpose of recording or registering any bet or bets, or any purported bet or bets, or wager or wagers, or any purported wager or wagers, or of selling pools, or purported pools, upon the result, or purported result, of any trial, or purported trial, or contest, or purported contest, of skill, speed or power of endurance of man or beast, or between men, beasts or mechanical apparatus, or upon the result, or purported result, of any lot, chance, casualty, unknown or contingent event whatsoever, occurring within or without this state; or

3. Who, whether for gain, hire, reward, or gratuitously, or otherwise, receives, holds, or forwards, or purports or pretends to receive, hold, or forward, in any manner whatsoever, any money, thing or consideration of value, or the equivalent or memorandum thereof, staked, pledged, bet or wagered, or to be staked, pledged, bet or wagered, or offered for the purpose of being staked, pledged, bet or wagered, upon the result, or purported result, of any trial, or purported trial, or contest, or purported contest, of skill, speed or power of endurance of man or beast, or between men, beasts, or mechanical apparatus, or upon the result, or purported result, of any lot, chance, casualty, unknown or contingent whatsoever, occurring within or without this state; or

4. Who, whether for gain, hire, reward, or gratuitously, or otherwise, at any time or place, records, or registers any bet or bets, wager or wagers, upon the result, or purported result, of any trial, or purported trial, or contest, or purported contest, of skill, speed or power of endurance of man or beast, or between men, beasts or mechanical apparatus, or upon the result, or purported result, of any lot, chance, casualty, unknown or contingent event whatsoever, occurring within or without this state; or

5. Who, being the owner, lessee or occupant of any room, shed, tenement, tent, booth, building, float, vessel, place, stand, enclosure or grounds, or any part thereof, whether for gain, hire, reward, or gratuitously, or otherwise, permits the same to be used or occupied for any purpose, or in any manner prohibited by subdivisions one, two, three or four of this section; or

6. Who lays, makes, offers or accepts any bet or bets, or wager or wagers, upon the result, or purported result, of any trial, or purported trial, or contest, or purported contest, of skill, speed or power of endurance of man or beast, or between men, beasts or mechanical apparatus, occurring within or without this state, is punishable by imprisonment in a county jail or State prison for a period of not less than thirty days and not exceeding one year.

This section shall apply, not only to persons who may commit any of the acts designated in subdivisions one to six inclusive of this section, as a business or occupation, but shall also apply to every person or persons who may do in a single instance any one of the acts specified in said subdivisions one to six, inclusive, save and except that any and all racing associations and corporations which shall obtain licenses to conduct race meetings in the State of California pursuant to and under this Act, may conduct and carry on and permit within the enclosure where horse racing is held betting upon the races conducted within said enclosure by and through the Pari Mutuel and Auction Pool Systems of betting, subject to control by said State Racing Commission in all matters pertaining to the conduct of racing and betting on races, with no charge or commission to be made or accepted, either directly or indirectly, on wagers made or to be made or any portion of the money or evidences of value used in betting to be retained by those engaged in conducting the betting.

7. All persons acting in any official capacity in connection with racing at racing meetings at which betting is conducted or permitted, and such other persons, as trainers, drivers, jockeys and others whom the State Racing Commission shall designate, shall obtain a license from the State Racing Commission.

8. No officials connected with the conduct of racing at meetings provided for by this act shall be allowed to make any ruling whereby any person's racing privileges shall be abridged or taken away from him for longer than one day, and all rulings affecting more than a temporary abridgment of any person's racing privileges shall be made only by the State Racing Commission.

9. A charge for misconduct or fraud in connection with racing against any person or racing association participating in racing or in the conduct of races at any race meeting at which betting occurs may be made by any person or persons who may wish to make such charge or accusation and it shall be the duty of the State Racing Commission to consider and investigate as to the truth of such charges.

10. Each racing association, during the conduct of any racing meeting allowed or provided for by this act, shall make a complete report daily to the State Racing Commission of all money received and business transacted in connection with the conduct of each day's racing, and the books and accounts and memoranda pertaining to the conducting of the race meetings shall be at all times subject to inspection by the State Racing Commission.

11. All expenses of the State Racing Commission, pertaining to the conduct of any racing meeting, shall be paid or repaid as the meeting progresses to the said State Racing Commission, by the person, association or corporation conducting said racing meeting.

12. No charges or fines or license fees, or charges for racing or other privileges, shall be made by a racing association to or against owners, trainers, jockeys, or any one participating in the racing of a particular meeting, licensed by the State Racing Commission, unless all money so collected be used directly and exclusively in payment of purses at that meeting.

13. No charge shall be made at any meeting authorized by the State Racing Commission to owners for entering a horse in any race other than a future stake event, and all charges made for entry of horses in stake events shall go to owners of contesting horses in that race and, if so provided by conditions of such stake event, persons making entries of sires and dams of winning horses in such stake event.

14. All run-up money collected in any selling race at a meeting authorized by the State Racing Commission shall be paid to owners of contending horses in that race, neither the racing association nor any one else retaining any portion of such run-up money.

15. Any person or association or corporation conducting a racing meeting allowed by the State Racing Commission shall submit for approval to a committee or proper person appointed by the State Racing Commission a copy of the races and their conditions to be contested for before entries to such races are made by horse owners, and until such races to be contested for and their conditions have been approved by a person appointed by said State Racing Commission, no entries to such races shall be accepted.

16. At any meeting licensed by the said State Racing Commission no charge shall be made for admission to a betting enclosure or for betting privileges in addition to the charge for general admission to the race track enclosure.

Section 9. All acts and parts of acts in conflict with this act are hereby repealed or amended by this act, in so far as they conflict with this act or portions of this act.

Down Among the Vineyards

About three weeks ago I started to make a trip "down the valley" with Fresno as my objective point, being a little curious to find out what horses and horsemen were doing in the winter time in the raisin belt, and Friday night I "made it" at last, the original start having proven a false alarm.

Like other sections of the state that I have gotten around to in week end trips this winter, the interior has been blessed of late with a most emphatic abundance of rainfall and speed making is not progressing overly rapidly. Up in the Fraser river country in British Columbia where the snow gets neck deep to a skyscraper there is an old time lumber jack chanty that runs in part:

"Weenter-tam een Caribou,
Nossing else to do—
But file an' saw
An' weesh for thaw,
An' cut dem beeg pine log een two!"

and the present situation in California can be reduced to doggerel almost as expressively something like this:

From Mexico to Siskiyou
Nothin' for a trottin' hoss man to do—
But fight th' mud an' jog a bit
An' wait for th'
gosh blamed
rain to quit!

However, if it wasn't for the rain during a few months of the year, California would be one allmighty poor place to live for the balance of the time, and the weather that is keeping the colts in the barn or on the road right now is laying up a whole heap of dollars for everybody to spend later on.

Fresno is one point in California where the fair has been made a success regardless of a lack of state appropriation or the absence of betting, and the plans under way for this year are of a nature that mean a better fair than ever. The plant is being improved annually until it is reaching a very high point of efficiency and excellence, and a number of recently made additions to the builldings and their equipment will be in evidence when the gates swing open on October 5 for the county's one big week for 1915.

While the raisin belt metropolis is in the heart of an "automobile paradise," with a network of excellent roads stretching in all directions in the level valley country surrounding it, and the breeding and racing of the trotter has suffered from that and other adverse circumstances just as it has in other portions of the state, the present outlook is better than for some seasons past and the game there is far from dead. Brood mare owners are making more and earlier inquiries and bookings and there are more horses in training at the fair grounds than for several winters, indications at present pointing to a fair season's business for the district's well bred trotting sires, and to a well filled row of barns in the training quarters at the fair grounds before the time for real speed making rolls around. There are now a good many horses at the track of more than ordinary merit, including untried youngsters entered in the coast classics, green ones of more age for the slow classes at both ways of going, and a number that are already known to the public through past performances, with more of all three descriptions yet to come that are definitely known of.

* * *

Charley Clark, still showing in his gait and general actions the ill effects of Miss Gailey's onslaught at Sacramento last fall, is handling seven head at present, with one exception the property of his principal patron, M. L. Woy, the only "odd" member of his stable being the six-year-old bay trotting mare owned by Nelson & Gustafson. This girl is an Expressive Mac, out of a daughter of Altimont 935, and was the heroine of many a road race to a buggy before she came to Charley's hands, bearing the signs of hard knocks and little care. Under his care the road brands have pretty well disappeared and she is developing into a right good sort of a trotter, with a good way of going and plenty of sizz and spunk. She tangles it up going slow, but knows nothing but trot when she gets strung out. Last year she turned the trick between seventeen and eighteen, and is coming as fast now as the weather will permit.

The Woy horses are headed by the black trotter Pavana 2:10¼, the fastest son of Stanford McKinney and out of the double producing matron Strathalie by Strathway, sire of the good campaigning trotters John Caldwell and Toggles, with marks of 2:08½, and the pacer Cuckoo 2:09¼. Pavana is a horse with an exceptional flight of speed, but has a bundle of nerves that get off wrong quite often and cause him to be penalized in the standing by reason of his behavior, but toward the close of 1914 he was improving greatly. At Pleasanton he won both his starts, trotting his winning heats right at the ten mark, and if he continues to improve in manners this season he will prove a formidable horse in his class. I was better pleased with his full sister, Miss Macklie, now apparently entirely recovered from the trouble that overtook her last season at Santa Rosa. She is one of the "biggest things of her size" in the state, and her last year's work not far from the 2:10 circle gave pretty good evidence of her trotting qualities. Another trotter past colthood is the four-year-old bay gelding Comet W. by Tom Smith 2:13¼ out of a daughter of Junio—a nice bodied boy with a good set of underpinning and a very good way of going.

The balance of the Woy stable are youngsters of the "B" family—the produce of Loma B., the dam of Albaloma 2:08¼, etc. Florence B., the oldest of the band, is a three-year-old filly by Bon Voyage that Loma B. was suckling at the time of her purchase by Mr. Woy, and was just broken last fall, owing to the facts that she was not staked and had also met with a slight accident in the pasture. Lulu B., two years old, is by The Bondsman and is growing into quite a trotter, as she had standard speed as a yearling and is improving steadily. The baby of the stable, Expressive B., is a ten-month-old daughter of Expressive Mac, and she is the boss of the barn right now. She was broken last fall at weaning time and the way she is growing and learning both speed and manners form a very pleasing combination. She is nicely finished and will make a larger mare than either of her sisters. The Loma B. foals are a highly promising and interesting bunch, and will soon receive an addition to their ranks, their dam being now heavy with foal to Stanford McKinney.

* * *

Will Best, who made such a good trotter out of Mabel Van 2:11½ last season, has only two head in training at present but has some more to come a bit later on when the weather conditions improve for speed making. One of them he brought from San Bernardino when he came up early in the winter, a six-year-old full brother to Sherlock Holmes 2:06, owned by E. B. Courtwright and labeled Santa Fe. He is a pretty well put together fellow but has had little done with him to date, his fastest work this winter being a mile in 2:30 at the pace. The other member of Best's stable, also a sidewheeler, is a four-year-old black mare that had a fair kind of a start last year, having gotten as far along as a mile in 2:18 as a three-year-old. She is a nice trim trick with a good lick of speed and a fair inheritance, being by California Guide and out of the dam of Margaret Derby 2:09—Maggie by Abbotsford Jr. Will has them in nice shape to move up a notch when the footing permits.

* * *

Jake Brolliar has three trotters of the "female persuasion" that have all the appearance of being the genuine article in their line. Las Palmas Belle, owned by L. R. Rogers, is his candidate for the three-year-old trotting divisions of the Coast classics, and is a daughter of The Bondsman and Sallie Rogers by Charles Derby 2:20. She is a big growthy lass, one of the huskiest Bondsmans that I have seen, and her education is pretty well under way. She trotted in 2:28 as a two-year-old and in her winter work has been eighths in :16½, a good clip for the time of year. Charles Schweitzer's Stamboulet trotter, Little Bow, out of a daughter of Strathway, is another one of Jake's stable that has had previous work, as she has turned the Fresno track in 2:12 with quarters in :31 with her owner up. Last year she developed trouble and was fired with beneficial results, and if she stands the gaff in her prep she will make a right good green trotter.

Jake's especial pride, however, is his own mare, now five years old, Rozales by name and a real trotter by nature—a daughter of Best Policy and Lady Stoneway by Stoneway 2:23¾, sire of the dam of Zonelita 2:09¼, the good pacer campaigned by Jake in 1913. Rozales has the "bull-doggy" Allerton build and a fine turn of speed that speaks well for her future renown. She has been brought along carefully since last season when she showed her owner a mile in 2:14 and a quarter in :30, and right now she is looking for more territory. She has a lot of steam on tap and is ripe for faster work and will get it, as Jake intends sampling her pretty well before leaving home, and at present she is probably farther along in her work than anything at the track.

* * *

Harry Brown has three of "working age," all trotters, and one mighty nice yearling that he is just breaking, the oldest being Laura Keyes by Alconda Jay, out of Helen Keyes by Sidney Dillon. Harry developed Helen Keyes into a great prospect several years ago but her subsequent handlers failed to have the "key to the combination," and after various vicissitudes she came back to California and as a brood mare gave further evidence of her quality, as her foal to the cover of Bon McKinney, Bon Courage (2) 2:12¾, is admittedly one of the very fastest youngsters ever bred in California. Laura Keyes herself has always had a good turn of speed, with three-year-old work in 2:18, 1:06, :31, but has had a let up owing to becoming with foal while on pasturage at Pleasanton to a two-year-old son of Birdman, out of a mare by San Francisco, the resultant colt being the one now in Harry's stable. Laura was getting a bit of a repeat Saturday morning in the soft footing, and seems to have plenty of natural quality to make a trotter. A three-year-old brown filly by Black Hall, and out of a daughter of California Guide, worked around 2:40 in easy two-year-old training and is doing nicely at present; she is an entry in a number of this year's stakes. Just Right, the four-year-old black stallion owned by John Suglian, appears to be Harry's long suit and he is bred to be as good as anybody's horse—by Tom Smith and from a Director mare. The crossing of the blood of McKinney and Director has produced a number of good performers, including such notable ones as Sterling McKinney 2:06¼ and Lady Jones 2:07¼, and both Brown and Suglian are optimistic as to this fellow's future. He is a sturdy built fellow, with an "old fashioned" head reminiscent of his dam's family, and is taking his winter work in fine shape.

* * *

Abe Reynolds, who is quartered in the far barn with Jake Brolliar, has several head of good youngsters owned by local parties, two of them by Athasham 2:09¼. The oldest is a three-year-old bay filly out of a mare by McKinley — son of McKinney 2:11¼ — that has quite a brush at the pace, and the other is the Stockdale-Reynolds entry for the two-year-old P.-P. I. E. pace and the like divisions of the Pacific Breeders and Pleasanton futurities, May May, a clean going pacer out of a daughter of California Guide. Bert Meigs of the S. P. owns the three-year-old. Abe also has a trotting youngster by Black Hall, from a McKinney mare belonging to the Borton Vineyards, and a weanling bay filly by Best Policy, dam by Star Pointer, that he is breaking for F. B. Stockdale. The Athashams are the only ones that have had more than mere breaking and mannering, and they both are making a nice showing.

* * *

Fresno wouldn't be Fresno without Schuyler Walton on deck with a few head of likely youngsters, and old frequenters of the raisin belt track can go out with every assurance of feeling at home so far as this particular instance is concerned, as Schuyler is in the same old stand with the same kind of goods that he has been delivering pretty regularly for a good many seasons. Two staked youngsters from the establishment that has turned out so many of the California good ones—the ranch of George L. Warlow—are getting the "prelim" for their engagements at present, both fillies, one the two-year-old Ludie McKinney by Stanford McKinney, dam Gadsky by Athablo, and the other the three-year-old Tewana by E. G. Diablo, out of famous old Cora Wickersham. Their real work has hardly begun but they are both well set up and promising. Schuyler has two of his own, a nice four-year-old pacing gelding by Black Hall, out of Narcola by Athadon, that has been asked to do little more than negotiate an eighth in :17, and a chestnut trotting mare by Diablo, dam by Algona. This lass is quite a nice trotter and showed in 2:17 last season, with a half in 1:04. About the farthest developed member of the string is the black daughter of Robert Direct, from a Stoneway mare, owned by C. J. Snyder of Hanford. C. D. King had her last season, and while she was never searched very minutely for the full route, a mile around 2:12 or 2:13 being about as fast as was required of her, she has shown a great flight of speed for fractional distances, with a half in 1:03½ and a quarter in :28½. She is working fine at present and looks like a "real" green pacer. Walton expects some other youngsters poco pronto; one a two-year-old by Black Hall and the other two of the same age owned by J. S. Maben of Visalia, one a brother to El Carbine.

* * *

Joining Schuyler's string and getting its work under his observing eye is the stable of horses owned by I. N. Lipson of Tulare and J. I. Bullock of Hanford, one of the first of the Kings county ranchers to bring in imported draft stallions and for some time a good friend of the light harness horse. With the exception of one horse, the members of the stable are youngsters untried in company, the majority just getting their first taste of real track work. Mr. Lipson has always been a patron of the coast futurities, and the present string includes an entry for both the two- and three-year-old divisions of the local classics for this year, the former being Stewart S., a nice turned chestnut gelding by Chestnut Tom 2:17¼, out of Myrtle Ragan by Colonel K. R. 2:19½, and the latter the brown gelding Palanada by Best Policy, out of Alta Almont by Prince Almont, sire of the dam of Motor Jr. 2:08¼, etc. Policia, the four-year-old sister to Palanada, is doing nicely in her work this winter, and showed well enough at the trot last year to convince her owner that she was worth going on with. As a three-year-old she worked for Lipson in 2:17, halves in 1:04, but as she hardly looked equal to handling Esperanza and Bon Courage he let up on her and held her over.

For the pacing classes the stable has two prospects, one a green one and the other a record horse that was put out of the game in 1910 through an accident in racing. The green one is the six-year-old bay horse Uganda by Nutwood Wilkes 2:16½, out of that good producing daughter of Grosvenor, Ida May, dam of Homeward 2:13¼, Albert Diredo 2:14½, etc., and he is yet "as green as green," as he has had almost no work and his fastest brush has been an eighth in :17. He is good gaited and promising and looks like he ought to make a pacer. The other sidewheeler is the gray horse Athol R. 2:07¼, the fastest of the get of Athablo 2:24½, his dam being Edith R. by Milton R. This boy made two starts at Lexington in 1910, getting his record in the second heat of the race which put him on the shelf. The bike broke in the arch, causing a dirty

mixup from which the horse emerged with two badly battered front legs which now appear to be in pretty fair shape, though whether they will carry him at his old time lick and repeat remains to be seen. If he stands the work and "comes back" he will be a pacer good enough for anybody, as he has worked in 2:04, with halves well under the minute mark.

Mr. Lipson is with the stable in person, but Schuyler Walton will put the finishing touches on the ones that go to the races, and will drive them in their engagements.

* * *

Frank Malcolm, as usual, has the major portion of his horses at Pleasanton, but he always keeps a few at home at the Calwa Winery for his personal enjoyment, having up a couple of pacing prospects at present, one of which is getting several miles daily on the road in anticipation of more strenuous work on the track a bit later. She is an eight-year-old "picture mare," so far as appearance and individuality are concerned, finely turned and beautifully colored, and, withal, a pacer of some proven quality, having worked a two-lap track in 2:13½. She is a daughter of Diablo 2:09¼ and out of a mare by Palo Alto 2:08¾, Frank's understanding being that her second dam was by Gratt, though he could not vouch for that part of it. At any rate she traces to that line, and if not directly to Gratt, probably to Prompter, sire of his dam, who figures through his daughters in numerous California pedigrees. If Frank decides that she will "do" she will probably go to some of the local trainers for "investigation."

The other member of Malcolm's home guards is a two-year-old filly, being held over a while since she is not staked, heralded as the fastest yearling that ever hit the raisin belt. She was brought to the local tracks last year by C. D. King, who bred her, and when she was barely a full twelve months of age worked in 2:38, with a quarter in :33. Malcolm made a dicker for her and had her eased up on a bit, but before he laid her away she worked a half in 1:10, quarter in :33 and eighth in :16, repeatedly brushing short stretches right up with her elders. She is a husky made lass and is bred in speedy lines, being by Major's By Guy 2:19¼, out of a daughter of Robert Basler 2:20, second dam by Dexter Prince, third dam by Alexander Button. Too bad she isn't staked.

Running in a paddock at the winery I also noticed a familiar looking strip faced, white legged yearling, the Woodland Stock Farm youngster bought at the DeRyder sale by J. R. McKay of Fresno. The lad is a bright little scamp and Mr. McKay is keeping him paid up in his engagements in the hope that he will live up to his pedigree, which runs direct to futurity families on both sides. His sire is Quintell 2:12¼ and his dam is Josie Ansel by Prince Ansel (2) 2:20¼, second dam Josie D. (dam of Joseph Ansel (3) 2:12¾) by Nutwood Wilkes 2:16½.

* * *

J. W. Zibbell is jogging a little band of well bred ones on the roads about his farm in the Calwa neighborhood and will move them to the track in the near future and set about making his speed for this season in earnest. Three of the band are full brother or sister to Baby Doll 2:10¼—Ella Mac 2:11½, Eddie G. (2) 2:30, now pacing and pacing fast, and Z. Belle—being by Tom Smith 2:13¼ and out of Kate Lumry 2:20½ by Shadeland Onward. Raisin Girl, a rugged bay mare by Tom Smith that has trotted around 2:12, and a three-year-old gelding by Expressive Mac, out of Kate Lumry, round out the stable, all of them looking in good winter shape and taking very kindly to their winter work.

* * *

I had never seen Expressive Mac 2:25½, but through the courtesy of Frank Malcolm and the efficiency of his Studebaker I was enabled to make a trip to the Nelson establishment near Selma and spend several hours very pleasantly with Harry and his horses. The son of McKinney 2:11¼ and Expressive 2:12½ by Electioneer is a finer specimen of a big horse than I had expected to see, as he is far and away a better individual than most trotting stallions of his weight—which in ordinary flesh is well along toward 1265 or 1275. His stud opportunities have been very meager, and his true qualities are well evidenced in the fact that his two fastest performers, Clara Mac 2:04½ and Vera Hal 2:05, are out of mares who would receive scant consideration from a "pedigree shark" of "fashionable" leanings. This year, however, he is getting a better class of mares booked to him, and Nelson himself is gradually acquiring a nicely bred band of mares of which these few may be taken as samples: Guy's Guycara by Guy Dillon 2:21¼, dam Guycara 2:18¾ by Guy Wilkes; Narcola (dam of Alessandro 2:23½, etc) by Athadon 2:27, dam Lustrine by Onward 2:25¼; Zypress by Zombro, out of a daughter of Stoneway, second dam Dewdrop Basler by Robert Basler; Selma Rose, by Major Dillon 2:18½, out of Russie Russell (dam of Ruth Dillon 2:06½, etc) by Bay Rose. Two of these mares have youngsters on the farm at present and all will be bred to him this year. Two nice youngsters that will be handled this season under Harry's ownership are the three-year-old sister to Eddy Mac (3) 2:29¼ and the two-year-old Ideal Mac, out of Lou Mildred by Major Dillon, second dam Mildred Russell by L. W. Russell, third dam Lou Milton (dam of Lou Dillon 1:58½, etc.) by Milton Medium, both of them having everything in their favor for the making of great performers. Harry does a general breeding business and has a young shire stallion as big as a barn—apparently—and the mares and youngsters about the place of both trotting and draft stock are as good as you find in California. I always liked what Expressive Macs I knew, and now that I have seen their sire I like 'em better—and so will lots of other folks as the seasons roll by.—[Neal.]

HARTFORD'S SIDE OF THE STORY.

While horsemen in general were aware of the friction that existed in Grand Circuit circles last year, especially in the cases of Hartford and the Michigan State Fair, it was thought after the meeting of the stewards at Detroit last month that everything had been smoothed over for the coming season—a feeling that was very "rudely shattered" by the announcement made some days ago of Hartford's withdrawal from the circuit. This action was taken at a recent meeting of the executive committee of the Connecticut State Fair Association, Andy Welch being the only member of the committee to vote to the contrary, and the following explanation of that course was issued after the session by President J. L. Dower:

"The Connecticut Fair Association was made to suffer very heavily last year, not only in prestige, but financially, by the unfair tacticss of the Grand Circuit and their inability to cope with the situation that presented itself when the Michigan State Fair Association, led by Fred Postal, of Detroit, attempted to compete with the Charter Oak meeting. It was not to show spite that the Connecticut State Fair Association withdrew this year, but it was to keep faith with the public, show the followers of racing here that Charter Oak intends to play fair with them, and provide a means whereby the fair association might give its patrons their money's worth.

"There was no hope that the conditions surrounding the Grand Circuit would be any better the coming year than last year after that body, at its recent meeting, elected Fred Postal vice-president. He was the man mainly responsible for the Connecticut Fair Association's poor showing in its race meeting last year, and the failure of the Grand Circuit to even revoke that 500-mile rule, which led Postal to think that he could evade the spirit of the rules of the circuit, meant nothing more than that Hartford could expect little consideration unless it forced their hands.

"The Connecticut Fair Association wants to be in a position where it is not controlled by anyone, and it did not occupy that position last fall when it had to sit tight while the stewards of the Grand Circuit failed to give the Charter Oak track the protection it thought it had paid for. Now, however, we control our own actions this time, and we stand ready to furnish the public the best we can get in horse racing, and are willing to stand or fall on that basis, for we can go out and work to the end that we will succeed rather than be hampered by a body that will not assist us.

"We expect to give a good card of races, far better than any card that we could get by being connected with the Grand Circuit, as that body is ruled today. More than that, we have plans made for a mammoth horse show, patterned after that successful event given last year at the Brockton Fair, and have already had promises that, if we put on this horse show, we will receive entries from the biggest owners and breeders in the country, chief among which is the stable of Alfred G. Vanderbilt, of New York."

The Charity Horse Show is "on" at the Riding and Driving School.

Some Views of the Future

THE AWAKENING.

On several occasions since the outbreak of the present war, we have called the attention of our readers to the opportunities before them in the breeding field. We have urged that every standard bred mare be bred in 1915 to a first-class stallion, pointing out that, since the foreign countries are drawing heavily upon our supply of horses and will continue to take large quantities of the trotting breed from our shores until hostilities cease, there is bound to be a shortage at an early date, which will result in considerably higher prices being secured by breeders.

For several years prior to a few months ago, the demand for the light harness horse of ordinary speed, such as was in general use before the automobile came into universal favor, had been constantly growing less, until, figuratively speaking, this class of stock was a drug on the market. But, since the demand from abroad sprang up late last summer, these horses have found ready sale for cavalry purposes, and it is estimated that one hundred thousand head have been shipped abroad and that several times that number will be exported by the close of the present year. A recent dispatch from Europe announced that more than a million horses had been destroyed in battle or by sickness since the outbreak of the war.

It is the belief of many who have studied the situation closely that the world will soon suffer the greatest horse famine that has ever been known, and the prices for all kinds of equines will, within the next few years, reach prices heretofore unheard of.

That we are not alone in the belief that the future has considerable prosperity in store for breeders who grasp the present opportunity is illustrated by the fact that The Pennsylvania Live Stock Commission recently issued a letter to the farmers of the Keystone State, advising them to breed every available mare to pure bred stallions the coming spring. The advice offered by the Pennsylvania authorities could well be followed by breeders in all parts of America, and, for this reason, we append the letter, trusting that it will aid the Breeder in its efforts to awaken the interest in the production of the trotting bred horse, which, especially in the Eastern states, has been allowed to languish of late years. The letter follows:

"Horse market events have taken such a definite turn that there can no longer be any question of the outcome of horse breeding in the United States; hence we feel fully warranted in bringing the production of market horses to the attention of every farmer. The following recommendations are, therefore, made to Pennsylvania horse breeders:—

"1. Do not take advantage of the present war demand to sacrifice horses which will have a greater value in the spring trade.

"2. Thin geldings and mares of the right type should make good profit on present cost when fit for market later in the year.

"3. Anticipate the market rise by buying required horses now.

"4. Breed your mares, but to pure bred stallions of merit and proven worth as sires. We hope there will never be another war to absorb the product of our errors and shortsighted policy in the patronage of cheap sires.

"5. Study the markets; know what your colts are worth and secure full value for them.

"6. Hold well selected breeding stock in highest regard in view of the responsibility imposed upon American breeders by the suspension of importations and the destruction of stock abroad.

"7. Sit tight; do not get panic stricken, but restore your confidence in the horse business; proceed intelligently; aim high."

Coming, as does the above, from the live stock commission of one of our greatest states, the suggestions made should have considerable weight with the horse breeding industry, and we look forward to a general revival of interest in the production of the trotter during the year 1915.—American Horse Breeder.

* * *

RAISE HORSES NOW.

Horse breeding presents unusual opportunities to the Eastern farmers who, for several years now, have been depending on the open market for horses to do the work on their own farms. Not only does the European war mean a continual drain on the horse stock of this country as long as the fighting continues, but when it is over Russia will be the only country engaged in the war that will not have to depend on the United States for horses for industrial and breeding purposes. This foregone conclusion means that, under any conditions, the European countries will be coming to this country for horses in large numbers for three or four years to come. That means that horses will advance in value and the farmer who depends upon the market for his supply will find it necessary to pay more money for them than ever before. It also means that the farmer who keeps a couple, or more, brood mares and raises a colt each year will not only be independent of the rising market for his work horses, but he will also be in a position to supply to those who must buy and take advantage of the good prices which are sure to mark the next several years in this branch of the live stock market. Just now there is no better form of insurance for the farmer to take out than is presented in a couple of good brood mares. Bred with good judgment they insure the owner against the necessity of paying big prices to keep up his working stock and they also insure him a profitable income from the investment they and their breeding represent. There was never a better time for the farmer to breed horses than the present.—Horse World.

* * *

LOOKING UP.

Judged from our correspondence, there is every indication that this year will be a big one in all angles of the light harness horse industry. From all quarters of the country there are coming the most optimistic letters. Especially is this true of the breeders' business. Stallion owners invariably state that inquiries are much more frequent than any recent year, and in many instances bookings are being made rapidly. The effect of the European war has been to merely hasten the approaching scarcity of this variety of horses, so that the year 1915 is likely to mark the greatest upward trend in values that has characterized any year in this decade.—Western Horseman.

NOTES and NEWS

Do you think it will rain?

◈ ◈ ◈

A ticket in the affirmative would get our money this winter.

◈ ◈ ◈

Mr. Brood Mare Man, don't overlook the constantly growing number of stallion announcements appearing in the "Breeder."

◈ ◈ ◈

Gold Lily (2) 2:24½ by Copa de Oro 2:01, dam Lilly Mac 2:24¼ by McKinney 2:11¼, is at the Nelson ranch to be bred this season to Expressive Mac 2:25½.

◈ ◈ ◈

A better meeting than ever is guaranteed at Woodland if the district fair bill goes through, and the customary program will probably be given, "fair or no fair."

◈ ◈ ◈

The announcement of the new combination stake for the State Fair, called the Stanford-Occident Number One, appears in our business pages and the conditions are very attractive.

◈ ◈ ◈

Owing to newly discovered symptoms of the foot and mouth disease, Kansas and Oklahoma have been added to the list of states against which California is maintaining a rigid quarantine.

◈ ◈ ◈

John W. Considine of the Woodland Stock Farm, recognized all over the land as an authority on his favorite families of livestock, is officiating as one of the judges at the Charity Horse Show this week.

◈ ◈ ◈

And now it looks like Indiana had a good chance for pari-mutuel pools, as the bill providing for a racing commission and the square deal system of wagers went through the upper house of the legislature with a whoop.

◈ ◈ ◈

Woodland Stock Farm's first foal for the year is a bay colt by Prince Ansel (2) 2:20½, out of Mista Lockheart by Lockheart 2:08½, second dam Madam Headley (dam of Expert Prince 2:13½) by Edwin Forrest 49.

◈ ◈ ◈

Secretary Eberhart of the Fresno County Agricultural Society announces that the fair at that point will be given this year on October 5, 6, 7, 8 and 9, and that it will be on a more comprehensive scale than ever. Who will be the next to claim dates?

◈ ◈ ◈

Athol R. 2:07¼, the fast gray pacer that was crippled in a wreck at Lexington in 1910, is again in training, being a member of the stable of Lipson & Bullock at Fresno. He was a regular "gray ghost" before his mishap and will be hard to beat if he "comes back" to where he was.

◈ ◈ ◈

Niquee 2:13¾ by Joe Patchen 2:01¼, the favorite brood mare of C. A. Harrison, lost her foal by True Kinney 2:12¼ Sunday, owing to a rupture. The loss will be quite a jolt to Mr. Harrison, as her yearling by the same stallion is one of the nicest youngsters foaled at Woodland Stock Farm last season.

◈ ◈ ◈

Owing to his numerous engagements as starter and presiding judge, Magnus Flaws has resigned the secretaryship of the Chicago Driving Club. He will this year start at the principal meets of the Interurban circuit, the South Dakota state fair, the Northern Wisconsin fair at Chippewa and preside at the Iowa and Minnesota state fairs.

◈ ◈ ◈

M. L. Woy of Fresno has booked Loma B., dam of Albaloma 2:08¼, to Stanford McKinney, and Strathalie, dam of Pavana 2:10¼, to Expressive Mac 2:25½. Both mares are now soon due to foal, the former to the cover of Stanford McKinney and the latter from service by Black Hall, the stallions owned by George L. Warlow.

◈ ◈ ◈

Messrs. V. L. and Lawrence Shuler—sire and son—of Indianapolis, arrived at Pleasanton Thursday morning of last week after a quick trip with their horses from the Hoosier metropolis, having made their start from that point on Sunday. Other parties who were expected to send a number of horses in the same shipment backed out at the last moment, but as Mr. Shuler had already delayed his trip long past the time he had originally set upon he bundled up his horses and tackle and came ahead. The horses brought out are Peter McCormick 2:08¾ (eligible to the 2:10 class on time allowance) by Peter the Great 2:07¼, dam Pearl Cecil by Cecil W. 2:28½; Fleeta Dillon 2:08¾ by Sidney Dillon, dam Lady Hilda Hills by Wilkes Boy, and Twinkling Dan 2:06¼ by Dan Patch 1:55¼, dam Twinkle 2:05¼ by Mercury 2:21. The Dan Patch pacer, one of the original entries in the 2:06 pace, is owned by Gen. C. C. Watts and comes out to be handled by Charley deRyder. Both of the newcomers to the Pleasanton colony are highly pleased with the MacKenzie plant and with the way they made the trip, as they had a good run and the horses unloaded in the best kind of shape. Mr. Shuler has rented a house in the Livermore valley town, and will be joined shortly by his wife, so the family looks forward to a pleasant time during the months intervening before the June meeting at the Golden Gate.

The eastern horses pointed for the P.-P. I. E. meetings are beginning to put in their appearance.

◈ ◈ ◈

That Juarez track is some strip of dirt. On Wednesday in a match race against Joe Blair at five furlongs, Pan Zaretta reeled off that distance in :57 1-5, clipping four-fifths of a second from the world's record made five years ago at Emeryville by Turn Trick. Wednesday's performance was the Texas mare's farewell to the turf as a performer, as she goes into the stud this season.

◈ ◈ ◈

Fifty-two three-year-olds are paid up to date in Stake Number Twelve of the Pacific Breeders series of futurities, the final classes of which are to be trotted and paced at the fall meeting at the P.-P. I. E. In comparison with former events the number of eligibles represents a larger per cent of the original nominations than usual, and "Esperanzas" are bobbing up at almost every wintering ground in the state.

◈ ◈ ◈

The latest arrival at Hemet Stock Farm is an aristocratic little bay lass owned by President A. L. Scott of the California State Agricultural Society. She made her debut to a circle of admiring friends on February first, and is a daughter of Wilbur Lou (3) 2:10¼, the champion three-year-old trotting stallion of the coast, and out of Rosie Woodburn by Easter W., second dam Lady Beth by Goldnut. She is in all the California colt stakes.

◈ ◈ ◈

The recent storms gave every track in the state a thorough soaking and then soaked 'em again and some more. However, they are invariably good drying ovals and work was going on as usual by the middle of the week. Woodland caught it harder than any other point reported, as the torrents that spilled from the clouds there put water over a good part of the infield and both stretches—no permanent damage resulted, however, and the last word from the farm was that everything was going fine.

◈ ◈ ◈

The Charity Horse Show for the benefit of the People's Place opened most auspiciously at the Riding and Driving Club Thursday evening, with a good crowd in attendance and the various classes well filled. John W. Considine of Woodland Stock Farm, Dr. Godfrey Preece of New York, and Captain Louis R. Ball of the army made the awards, "picking 'em" just about as did the spectators. As our last forms go to press before the show is more than merely under way, all awards are carried over until next week.

◈ ◈ ◈

John Francis Heenan, known widely through California under the sobriquet of "Brick," died Thursday, Feb. 4, in Sacramento, of which city he had been a resident for some years. In the days before the advent of gasoline into overland transportation "Brick" Heenan was one of the best known cabmen in San Francisco and many are the tales that the "older heads" relate with gusto with him as one of the central figures. He was the proprietor of a popular cafe in the capital city at the time of his death, and a growing power in local politics. He never lost his love for the light harness horse, of which he had at various times owned quite a number. Delilah 2:06½ was one of his former "standbys," and one of the good ones in which he was last interested is the Demonio pacer Oro Mo 2:09¼ now owned by Charles Silva. He was a prominent figure in amateur circles and never missed an opportunity to be present or take part in a matinee. The remains were brought to this city for interment, and members of the local clubs joined with those of the Sacramento organizations in paying proper tribute to the memory of a good friend, gone from them.

◈ ◈ ◈

Mr. W. F. Whittier returned early in the week from an extended visit in southern California, and is more than pleased with the outlook at Hemet Stock Farm, reporting that everything at the establishment, including the "Redoubtable Doble," had wintered in the pink of condition. The farm's former glory winners, Wilbur Lou (3) 2:10¼ and Hemet (3) 2:08, are full of snap and speed and promise to make their bow in fast company again when the starter calls the fields for the twenty-thousand dollar 2:10 trot and 2:06 pace at the June meeting at the exposition, the pair having been held over for this special occasion since their three-year-old form. They were great favorites with the public then, and will get many a welcoming "hand" when they appear in June. The class horses and their youngsters for the various two- and three-year-old events, both the exposition stakes and the regular classics, are training equally well and promising much in the way of winning form, while everyone is enthusiastic over the yearling crop, prominent among which may be noted a filly by Kinney de Lopez 2:23, out of Louise Carter (3) 2:24 (dam of the farm's premier), and a daughter of Wilbur Lou and Zeta W. by Nutwood Wilkes 2:16½. During Mr. Whittier's stay at Hemet a party including Mr. and Mrs. Alonzo McDonald, Miss McDonald and Mr. John Sheppard of Boston and California paid a visit to the farm and were very much pleased not only with the horses but with the "setting" that Mr. Whittier and his associates have provided for them. Mr. Sheppard is an old-time and enthusiastic friend of the establishment, and the McDonald party's opinion was entirely in accord with that of the many others whose names appear in the visitors' book in the office—that Hemet Stock Farm is in a class all by itself among establishments of the kind.

A payment of five dollars is due on Monday, March first, on entries in Pacific Breeders Futurity Stake Number Fifteen, for the foals of mares bred in 1914.

◈ ◈ ◈

J. H. Nelson has sold to Ira Owens of Selma a two-year-old filly by Expressive Mac 2:25½ out of Guy's Guycara by Guy Dillon, second dam Guycara 2:18¾ by Guy Wilkes 2:15½, etc. The lass has a blood inheritance of great prolificacy from both sides of the house and is probably the making of another good performer for her sire.

WILL RACE AS USUAL ON CANADIAN PRAIRIES.

The executive committee of the Western Canada Fair and Racing Circuit met at Regina, Sask., on January 26th and 27th, for the purpose of arranging details for the circuit meets of 1915.

It was the unanimous opinion of the representatives that the exhibitions and race meets should go on as usual this year with possibly a slight reduction in the amount offered. The new running rules to control the running races over the circuit were adopted and are along the same lines as the rules of the Kentucky Racing Commission. The only meet which at present is in doubt is the meet at Winnipeg, but it is fully expected that if for any reason the exhibition should not be held at Winnipeg this year, a splendid racing program will be put on on the exhibition dates.

The programs will be ready for distribution about the latter part of February, and can be had on application to any of the secretaries or to E. L. Richardson, secretary of the Western Canada Fair and Racing Circuit, Calgary, Alberta.

NORTH PACIFIC FAIR ASSOCIATION MEETS.

Representatives of the various points included in the above organization were summoned to convene at Vancouver for a two-day session early in the month for the consideration of many matters of vital importance to their interests, the meetings being well attended and the discussions interesting and enlightening. To Mr. George A. Westgate of Portland we acknowledge thanks for the following newsy notes of the convention:

* * *

Members of the North Pacific Fair Association met in annual convention at Vancouver, Wash., February 4th and 5th, with representatives present from Salem, Spokane, Vancouver, B. C., Vancouver, Wash., Chehalis-Centralia, Walla Walla, New Westminster, B. C., Helena, Salt Lake City and Wenatchee.

Dates allotted to organizations holding racing meets are, opening days: Calgary, June 28; Portland, Aug. 2; Seattle, Aug. 9; Vancouver, B. C., Aug. 13; Chehalis-Centralia, Aug. 23; Vancouver, Wash., Sept 6; Spokane, Sept. 13; Helena, Sept. 20; Walla Walla, Sept. 20; Victoria, B. C., Sept. 20; Salt Lake City, Sept. 27; Missoula, Sept. 28; Salem, Sept. 27; North Yakima, Oct. 4.

It will be noted that Portland and Seattle plan race meetings this year while the Washington State Fair again asks for dates in the association apportionment.

The three heat plan was endorsed by the association, also the plan for a starter to go through the circuit, except of course where dates conflict.

It was determined to make classes through the circuit as nearly uniform as possible and the following racing classes were suggested: seven to enter and five to start:

Trotting—2:25, 2:15, 2:12 or free for all, 2:30 and classes for two- and three-year-olds.

Pacing—2:25, 2:15, 2:11, 2:08 or free for all and classes for two- and three-year-olds.

The colt races are for local youngsters.

Early closing dates were fixed for June 1.

Officers-elect for the coming year are, Frank Meredith, Salem, president; Thos. S. Griffith, Spokane, vice-president; John W. Pace, Seattle, circuit secretary, and the next meeting is to be held at Seattle.

* * *

Vancouver, Wash., was an especially appropriate meeting place for the racing end of the fair interests. Here Altamont 3600 held court and founded the greatest family of the north. Here Tecora, the Beautiful Bells of the Oregon region, brought up her foals. Here Chehalis 2:04¼, fastest of Northwest performers, was born.

* * *

John R. Sawyer, Fred Woodcock and other trainers were in attendance at the meeting. Mr. Sawyer was in reminiscent mood and recalled a visit to the old prune orchard track years ago. As he entered the place he noticed a two-year-old black colt with bitting harness on dashing out of the grounds. It was Del Norte 2:08.

* * *

The program presented at the meeting was well prepared and showed thoughtful study of fair and racing problems. The disposition of the various associations is to work together for the common good, and not the least encouraging sign was the presence of railroad officials who promised continued co-operation on the part of transportation interests for the good of the fairs.

* * *

The banquet given the delegates on Thursday evening was a masterpiece of its kind and the Vancouver Commercial Club at once rose to approximate Grid Iron Club rank.

Drink Jackson's Napa Soda.

C. A. HARRISON AND MAGGIE HALL.

Editor Breeder and Sportsman:

The recent death of Mr. Harkness, owner of Walnut Hall Stock Farm, has brought out much comment favorable to Mr. Harkness and his great breeding establishment. I think I may safely say that Walnut Hall is the greatest standard bred horse farm, taken all in all, that has ever existed. An article by Mr. A. L. Thomas in the last issue of the Horseman attracted my attention; this article tells about how Mr. Harkness came to buy the stallion Walnut Hall, whose dam was the great brood mare, Maggie Yeazer, by Red Wilkes. Inasmuch as I bought the brood mare Maggie Hall by Moko, dam Maggie Yeazer, at the Schmulbaugh dispersal sale, held in New York some two years ago, the article was most interesting to me.

I was interested when I first saw the catalog of sale, the first mare to attract my attention in that catalog being Maggie Hall, by Moko, dam Maggie Yeazer, dam of Walnut Hall, sire of the Harvester 2:01, and, strange to say, the first horse I saw when I started to go down the runway in Madison Square Garden was Maggie Hall. I had her in my mind's eye before I ever saw her. I was in love with her, but believe me, when I saw her I was not disappointed, for Maggie Hall is one of the grandest individuals I ever saw and is a direct counterpart of the illustrious horse Walnut Hall.

Well, I bought Maggie Hall. She was the second mare I bought, the first being Ila Moko by Moko, dam Dictator's Last by Dictator. Maggie Hall was in foal to that great young sire Directum Spier 2:11¼ and, take it from me, I gave Maggie Hall some close watching on the long journey from New York to California, and I was pleased when I turned her over safely to John W. Considine on his Woodland Stock Farm. Well, Maggie Hall's first foal at the Woodland Stock Farm was a most beautiful brown filly, and I was a sore Irishman when my friend Considine traded the Directum Spier—Maggie Hall filly off as part payment for Clara Mac. I don't believe my friend John appreciates Maggie Hall fully as a brood mare. Her second foal at Woodland is the yearling filly Maggie Ansel, now in Hunter C. Moody's stable at Lexington, and from all accounts a good prospect.

If any expert on pedigree in California can find fault with Maggie Hall by Moko, dam Maggie Yeazer by Red Wilkes, second dam Docia Payne by Almont 33, third dam Maggie Gaines by Blood's Black Hawk, all great mares, then I will say I am a dead one. I hope some fancier in California will be lucky enough to buy Maggie Hall's 1915 foal. I believe this prospective foal is by Robert Bingen 2:11¼, the very best bred son of Bingen, living or dead. Somehow or other I always have Maggie Hall and her wondrous blood lines in my mind's eye, and some day California harness horse historians will be writing pages about the offspring of Maggie Hall, that is, barring accidents.

I ask your pardon for my long story on the assumption that I am in love with Maggie Hall.

Yours very truly,

C. A. HARRISON.

(Mr. Harrison's "long story" is not merely "pardoned," but welcomed, not only by ourselves but by our readers, because it is from genuine lovers of the trotter that we are always glad to hear. Certain it is that in both Maggie Hall and Ila Moko he selected two of the choicest matrons now at Woodland, and two of the most highly prized. The story by Al Thomas referred to in the foregoing appears elsewhere in this issue, as we had already landed on it as of interest to most of our readers before this communication reached us. The Pacific coast can use more men in the horse business like Clint Harrison, and the Breeder and Sportsman can use a letter from him whenever he is in the humor to write it—or oftener.—Ed.)

PACIFIC BREEDERS FUTURITY STAKE No. 12.

The following is a list of fifty-two sixth payments made in the Pacific Breeders Futurity Stake No. 12, for foals of 1912,—now three-year-olds. The three-year-old divisions of the stake will take place at the Fall meeting of the Panama-Pacific Exposition, Oct. 30th to Nov. 13th, the three-year-old pace on Saturday, Nov. 6th, and the three-year-old trot on Saturday, Nov. 13th:

H. G. Angevine's b f Loma Logan by Prince McKinney, dam Berta Logan by Bert Logan.
L. A. Bangs' b f Anita B. by Chestnut Tom, dam Dolly B. by Welcome.
C. J. Berry's bl g Carl by Carlokin, dam My Irene S. by Petigru.
I. L. Borden's s c Sheldon B. by Barney Barnato, dam Ramona by Prince Robert; b f Little Florence by Barney Barnato, dam Hester McKinney by McKinney .
Mrs. L. J. Boyd's br c Carlschen by Carlokin, dam Bonnie Ailse by Faustino.
Chas. Butters' ch c Honey Back by The Bondsman, dam Lottie Lynwood by Lynwood W.
J. J. Campbell's b f Mabel Bond by The Bondsman, dam Kate Kopje by Cresceus.
Eugene Cerciat's br f Greatness by Peter Wilton, dam Abbie McNutward by Guy McKinney.
C. H. Chandler's br f Birdie Bond by The Bondsman, dam Lady Search by Searchlight.
J. M. Clark's b f Lucille Clark by Palo King, dam Mattie J. by Arthur W.
F. W. Cooper's rn f Cal. 1915 by Sir John S., dam Jennie L. by Moses S.
S. H. Cowell's b c Eugene Bond by The Bondsman, dam Winta Rose by Eugeneer.
Mrs. W. G. Durfee's b c Nicolo B. by Carlokin, dam Athcrine by Patron.
W. G. Durfee's b f by Copa de Oro, dam Leonor McKinney by McKinney; b f Helen Belle by Carlokin, dam Carolyn C. by Axtell.
E. L. Fissel's ch c King Diablo by Palo King, dam Babe by Diablo; b f Exposition by Diomax, dam Mabel by Alex. Button.
Chas. A. Graves' s c Juan Elwood by Chas. Elwood, dam Nellie.
Hemet Stock Farm's br f Allie Lou by Kinney Lou, dam Lady Zombro by Zombro; ch c Oro Lou by Kinney Lou, dam Zeta W. by Nutwood Wilkes; ch c Sterling Lou by Kinney Lou, dam Louise R. by Sterling McKinney.
H. S. Hogoboom's b f Little Express by Alto Express, dam Diwalda by Diablo.
Ed. O. Johnston's b c William Ervis by Copa de Oro, dam California Girl by Zombro.
Mrs. Mabel Lipson's b c Palanada by Best Policy, dam Alta Almont by Prince Almont.
Wm. Loftus' bl g Byron by Tom Moko, dam Reta H. by McKinney.
Leo Lynch's b f Gleaming by Wonder Light, dam Lena Thorup by Prince Charles.
J. W. Marshall's b c by The Patchen Boy, dam Leota by Diablo.
Estate of W. J. Miller's b c Bondalean by The Bondsman, dam Katalina by Tom Smith.
W. J. Miller's b f Maude Bond by The Bondsman, dam Nusta by Nushagak.
Nichols & Holaday's b f Alma Bond by The Bondsman, dam Alma Dexter by Dexter Prince.
J. S. Nickerson's ch c Raya de Oro by Copa de Oro, dam Easter D. by Diablo.
K. O'Grady's b c Joe Geary by Aerolite, dam Helen Boswell by Hart Boswell.
C. S. Ramsay's b f Dona Lee by Donasham, dam Bay Leaf by Telephone.
Rodman & Hoy's b f May Alto by Alto Express, dam Maymonio by Demonio.
L. R. Rogers' b f Las Palmas Bell by The Bondsman, dam Sallie Rogers by Chas. Derby.
F. J. Ruhstaller's br f Tennie Hall by Moko Hall, dam Tennie by Temescal.
Homer Rutherford's br c Geo. N. Patterson by OnVoyage, dam Yu Tu by R. Ambush.
W. L. Selman's b f Miss Emily by Knight of Strathmore, dam Dulce Yedral by Milo McKinney.
J. E. Short's b c Blue Beard by Skido Wilkes, dam Honda Girl.
Shreve & Jaggar's b c Ben Bond by The Bondsman, dam Silver Haw by Silver Bow.
L. H. Todhunter's f Janette Bondsman by The Bondsman, dam Sweet Bow by Bon Voyage.
Dr. I. L. Tucker's b c Oro Bond by The Bondsman, dam Babe T. by Rajah.
Valencia Stock Farm's br c Direct Heir Jr. by Direct Heir, dam La Belle by Sidney.
D. W. Wallis' b c Bondholder by The Bondsman, dam Corinne Sidmore by Sidmore.
F. E. Ward's b c Beirne by Beirne Holt, dam Frecklebird by Red Freckles.
Geo. L. Warlow's b f Tewana by E. G. Diablo, dam Cora Wickersham by Junio.
Bert Webster's b c Rodney Patchen by Joe Patchen II, dam Miss Harris by Sidney Dillon.
Dr. E. J. Weldon's b f Banostine Belle by Lijero, dam Mater Expedio by Knight.
Woodland Stock Farm's b f Ruth Ansel by Prince Ansel, dam Lottie by San Diego; s c Prince Majella by Prince Ansel, dam Majella B. by Nushagak; b c Yolo King by Palo King, dam Viola by Prince Ansel.

KENTUCKY FUTURITY ELIGIBLES.

Secretary J. W. Williams, of the Kentucky Trotting Horse Breeders' Association, announces that 698 weanlings were kept good on second payment date, Jan. 1, in the Kentucky futurity for foals of 1914, value $21,000. While this is the smallest number received in many years, when one considers the great decrease in number of mares in foal the past season (as evidenced by the falling off in entries received in all colt stakes), and the fact that only 928 mares were nominated in the first place, it will be observed that the number of weanlings represents a fraction over 75 per cent of the original entry, which, to the association, is a very satisfactory showing.

The largest individual nominator is Walnut Hall Farm, of the late L. V. Harkness, Donerail, Ky., which kept good 40 of its royally bred youngsters, mostly by the farm's trio of stallions, Moko, Walnut Hall and San Francisco. The second largest group comes from Allen Farm, Pittsfield, Mass., the big majority of which is by Bingara, son of Bingen. W. E. D. Stokes' Patchen Wilkes Farm, which, for several years, headed the list, and has not ranked less than second for many years, is third with 26, due to the fact that it nominated only mares bred to Peter the Great and his son Peter O'Donna, many of which changed hands prior to Jan. 1, and were kept good by their new owners. J. R. Magowan, of Mt. Sterling, Ky., is again becoming interested in breeding on a larger scale, and has entered 21 foals by J. Malcolm Forbes and Mainleaf, both of which were fast colt trotters, and are highly and fashionably bred. David M. Look's 16 youngsters are sired by no less than 11 stallions. An idea of their blood lines may be had when it is stated that such as The Harvester, Bingen, Axworthy, Peter the Great and others of that class are among the 11, taken in conjunction with the known quality and breeding of the brood mares at Castleton Farm. The same is true of C. K. G. Billings' Curles Neck Farm, which comes next with 14 aristocratic yearlings, 9 being by the trotting stallion king, The Harvester 2:01, the dams of all of which are of the bluest blood. The following includes nominators of five or more mares. It will be noticed that the 32 included named 389, and that the remainder of 309 have been made by small breeders of from one to four mares:

Walnut Hall Farm, 59; Allen Farm, 31; Patchen Wilkes Farm, 26; J. R. Magowan, 21; David M. Look, 16; Curles Neck Farm, 14; Hudson River Farm, 14; Empire City Farms, 13; J. E. Madden, 13; A. B. Coxe, 12; H. J. Schlesinger, 12; Hillanddale Farm, 11; B. O. Shank, 11; John R. Thompson, 11; L. E. Brown, 10; W. H. Davis, 10; Forest Park Farm, 10; C. C. Watts, 10; Woodland Stock Farm, 8; John L. Snyder, 8; J. G. Cecil, 8; George H. Estabrook, 8; C. W. Lasell, 6; Hemet Stock Farm, 6; Hart Bros., 6; M. Bowerman, 5; W. T. Deatherage, 5; J. B. Elliott, 5; H. R. Elliott, 5; Chas. W. Leonard, 5; J. C. Small, 5; Cobb Bros. 5.

It is always of greatest interest to breeders to study the popularity of various sires, as evidenced by the number of their get entered in the big futurities, for someone's confidence in the get of that sire is thus represented. The following list of 22 sires with 10 or more mares to their credit has therefore been compiled, and it furnishes an interesting study. Peter the Great heads the list with 42, and the coming sire, The Harvester, is second with 34. The showing of this great stallion is quite remarkable when it is considered that his oldest colts were two-year-olds last season, and only a very few were in existence. Bingara is third with 26, and Guy Axworthy fourth with 24. Manrico, the sensational winner of the three-year-old futurity in 1912, is next with 23, being the first of the Walnut Hall stallions to show, which is accounted for by the fact that the mares nominated by it were divided among seven different sires. Thirteen have records of better than 2:10, 17 better than 2:15, and only three are without records.

Peter the Great 2:07¼, 42; The Harvester 2:01, 34; Bingara, 26; Guy Axworthy 2:08½, 24; Manrico 2:07¼, 23; J. Malcolm Forbes 2:08, 22; The Northern Man 2:06½, 22; San Francisco 2:07¾, 20; Siliko 2:11¼, 19; Axworthy 2:15½, 18; Peter O'Donna 2:08, 17; General Watts 2:06¾, 17; McKinney 2:11¼, 13; Azoff 2:14¼, 13; Tregantle 2:09¼, 12; Moko, 11; The Exponent 2:11¾, 11; Morgan Axworthy 2:17, 11; High Admiral 2:07¾, 11; The De Forest 2:22¼, 10; Walnut Hall 2:08¼, 10; Colorado E. 2:03¾, 10.

Below is given a list of the entries by states. It is headed by Kentucky, as usual, which furnishes 225, or nearly one-third of the entire list. New York is second with 101, then follows Massachusetts, Ohio and Pennsylvania, each having less than 100 to its credit. The entries have been received from 30 states and Canada, reaching from the Atlantic to the Pacific, and from the Gulf to the Great Lakes. In fact, they are distributed over the entire continent, as follows:

Kentucky, 225; New York, 101; Massachusetts, 60; Ohio, 49; Pennsylvania, 48; Illinois, 40; Indiana, 23; California, 19; Virginia, 15; West Virginia, 15; Wisconsin, 13; Colorado, 10; New Jersey, 9; Nebraska, 9; Canada, 8; Minnesota, 7; Tennessee, 7; Iowa, 6; Missouri, 6; Alabama, 6; New Hampshire, 4; Michigan, 4; Connecticut, 3; Louisiana, 2; Oklahoma, 2; Georgia, 2; Maryland, 1; Kansas, 1; Mississippi, 1; Arizona, 1; Arkansas, 1.

The weanling list will be published in book form in the early spring in conjunction with the mares that will be nominated in the $21,000 Kentucky futurity for foals of 1915, which will close April 1, at a nomination fee of $5 per mare. Nominators will be mailed copies, as will also all applicants desiring one.

ENTRIES FOR WINNIPEG CLASSICS.

Just too late for our issue of February sixth we received from Acting Secretary G. H. Grieg, of the Canadian Industrial Exhibition Association, Winnipeg, the nominations made by Dominion breeders to the Selkirk Futurity and Fort Garry Derby for foals of 1914 to race as three-year-olds. The harness event drew a total of forty-one entries, several of them from this side the line, while the running event has seventeen nominations, as follows:

SELKIRK FUTURITY.

I. M. Baldwin, Killarney, Man. (not named). N. Bartholomew, Des Moines, Iowa, ch f by Albingen, dam Amare; br f by Albingen, dam Loga's Best; b f by Albingen, dam Lucy Stoner; b f by Albingen, dam Rapid Brook; b f by Albingen, dam Miss Lina; b f by Albingen, dam Chiming Rex; b c by Peter Watson, dam Starlina; b c by Peter Watson, dam Igo Bingen. Alf. Yeandle, Birtle, Man., b c by Gearholm, dam Tacita. T. Evans, Waseca, Sask., bl f by Tynedale, dam Sheila.

SOME INTIMATE HISTORY OF WALNUT HALL

Editor of "The Horseman":

Reading in your last issue "The History of Walnut Hall Farm" reminds me of the facts in connection with Maggie Yeazer (the dam of Walnut Hall 2:08¼) and how Mr. Harkness obtained her. These may be of interest at this time.

In the fall of 1894 The Sangamon Stock Farm of Springfield, Ill., engaged me to come to their farm and prepare all their horses for the Tattersall sale. For reasons that would make another story they changed their minds and engaged me as trainer for one year. They sent all the young stock to the sale that was fit, with me in charge.

At this sale there was a consignment of mares mostly in foal to Norris 2:22¼. My recollections are the stock was consigned by a Mr. Cook of Kentucky, the owner of General Wilkes, Mr. Appel of Rochester , N. Y., holding the mortgage. The bottom had dropped out of the business. I decided to buy two brood mares to breed to Conductor 2:14¼, then owned at Sangamon Farm. I picked Maggie Yeazer for the reason that she was by Red Wilkes. She was the ideal type, could trot herself, although injured, and I had been racing with her brother (Ruby 2:22½), a fair trotter. Her blood lines also suited for the cross. The second mare I purchased was Esmerelda, who also produced to Conductor.

I see in my mind the late "Bennie" Fasig standing in the sale box extolling the good points of the mare when she was hanging at the enormous price of $60. I made one bid, five dollars, and got her. Fasig turned to the auctioneer and asked who had bought her. When he learned it was your humble servant he said: "Bought by a judge, and put it on the book that there is something about this mare that impresses me. She will sometime become famous." Some prophet!

I shipped my two mares to Springfield, Ill. Both proved in foal to Norris, Maggie Yeazer's produce being Noretta (dam of Hedgewood Boy 2:01 and Lady Maud C. 2:00½).

The following fall we had a sale at the Sangamon Stock Farm and sold all of the young things, weanlings and all, but kept Conductor and about twenty mares. I also sold my two weanlings by Norris. I expected to ship my two Red Wilkes mares to my own farm in Marion Co., Ill. The late Chas. Ridgely, seeing the two foals by a grandson of Electioneer out of my mares and noting they could show some weanlings said to his son: "We have no mares by Red Wilkes, buy them of Thomas." And his son did, giving $500 for the two mares that cost me $165.

After the dispersal of their training stable I went to Michigan to train and then to New Jersey.

In 1897 I saw by the papers that the Sangamon Stock Farm had consigned all its horses to a John Splan sale at Chicago, Ill. I was then located at the Bellemead Stock Farm in New Jersey. I attended the sale to buy Conductor for the farm and did. While there Mr. Splan came to me and said, "Al, you know all Ridgely's mares. I have an order to buy some mares for Mr. Harkness. Mark what you think will do and what you consider the best."

I marked a number and said: "John, there is one mare there that will not bring anything. She is injured—some will say she has a ringbone—that I consider worth more than any other mare in Ridgely's consignment."

Splan said, "Give me that book." When she was offered he bought her, I think for about $135, and had her charged to the Walnut Hall Stock Farm.

The following summer at the Charter Oak Park meeting I met Vance Nuckols and he said, "Boss, you put Splan in bad with one of his best patrons. That ringboned mare you got him to buy Harkness refuses to pay for, saying that the Walnut Hall Farm will not be the dumping ground for Splan's sale. We have been trying to sell her to C. W. Williams (who then had his stallions in Kentucky) and others, for what she cost but they don't want her."

I said: "Vance, what is the sex of her foal?" He answered, "I don't know." My answer was: "I will take the mare at what she cost provided the foal is sound." A week or two after I met Mr. Splan and inquired about Maggie Yeazer. He said: "Mr. Harkness has paid for her." The foal was Walnut Hall 2:08¼.

I have had the story from Mr. Burgoyne as to how Mr. Harkness changed his mind. If you wish you can cut out the rest of my letter and get him to tell it.

I asked Harry, after Walnut Hall 2:08¼ became famous, how Mr. Harkness came to change his mind. He said: "When Mr. Harkness first saw the mare he condemned her because she was not sound. That fall Mr. Harkness, on one of his visits to the farm, inspected all the weanlings. Towards evening we came home by way of the half mile track. In the center field was Maggie Yeazer and two or three other colts, her colt lying down on the grass. When we approached the colt jumped up and started away on a fast trot. Mr. Harkness said, 'What colt is that?' I answered: 'That colt belongs to the mare that Splan bought and you refused to pay for.'" Nothing more was said. The next morning when I came to the barn, to my surprise Mr. Harkness came from the center-field. He had been looking at Maggie Yeazer's colt once more. When he saw me he said: 'Have the bookkeeper send Splan a check for that mare.'"

That is the story of how Mr. Harkness became the owner of Walnut Hall 2:08¼.—A. L. Thomas, in the Horseman.

The Breeds of Beef Cattle

[By W. F. Ward, Senior Husbandman in Beef Cattle Investigations, Animal Husbandry Division.]

The decrease in the number of beef animals in the United States, with the resulting high prices which have prevailed during recent years, has caused greater interest to be taken in this industry, and many men who have never raised beef cattle in the past are taking up this line of work.

The question most frequently asked about cattle usually pertains to the breed which should be used in a certain community or under certain conditions. All breeds are not similar; some have superior points to others, and a certain breed may be better suited to conditions existing in one locality or one State than any other breed. For this reason it is well to find out which breed is best suited to local conditions, and to induce as many farmers as possible to raise that breed, because of the better prices which may be secured from the sale of a uniform product and the ease with which suitable breeding stock may be obtained near home. Some information is presented herewith which will help to answer some of the questions which arise as to the value of the various breeds of cattle.

Cattle which are used for the production of beef are divided into two general classes, the strictly beef breeds and the dual-purpose breeds. The former are, as the name implies, valuable mainly for the production of meat, and have been carefully bred and developed in order to produce a maximum amount of beef of high quality. Care has been taken to develop to the greatest extent those portions of the body from which are secured the high-priced cuts of beef. The cows give milk enough for their calves, but not much more. The dual-purpose breeds are a class of cattle which have been developed to produce a fair to good quality of beef, and at the same time the females should give a good flow of milk.

The breeds of beef cattle in the United States are the Shorthorn (sometimes called Durham), Polled Durham, Hereford, Aberdeen-Angus, and Galloway. Each of these breeds has been carefully developed for a long period of years, with the result that individuals transmit their characteristics very readily when bred to native or scrub cattle. With somewhat frequent exceptions in the case of Shorthorns, the cows of these breeds are not heavy milkers, and in this point lies their success as beef cattle, for the milking tendency is associated with a conformation of body which prevents the animal from yielding the greatest quantity and the best quality of beef. The beef breeds have been bred for the maximum production of beef, and only enough milk is desired to nourish and product a good, thrifty calf. They are most popular with farmers or ranchers who raise a considerable number of cattle.

SHORTHORN.

The Shorthorn is the most popular of the beef breeds in the United States, as shown by their numbers and by their general distribution over all parts of the country. They have a great range of adaptability and do well everywhere. The milking qualities, combined with the high standard as a beef animal and the gentle disposition, have caused the Shorthorn cow to be termed "the farmer's cow." The merit of the breed has been proved on the ranges of the West, where the bulls have been used for grading up the scrub cattle of the plains. The Shorthorn crosses well with other breeds or with the scrub cattle, producing from scrub cows calves which develop into fairly desirable beef cattle. The grazing ability of the Shorthorn is not so good as that of some of the other breeds, but where grasses are abundant and feeds are plentiful there is no breed which will surpass it for beef production. The large milk flow insures a good calf. However, the cows have been criticized to a certain extent by western ranchmen because the large milk flow causes many of them to lose a teat or a portion of the udder, as the calves can not always take all of the milk. The Shorthorn is early maturing, growthy, and fattens readily. The steers sell readily as feeders, and although they have not won as readily as the Aberdeen-Angus in the show ring, they produce very high-class beef, with the thick loin and full hind quarter which furnish profitable cuts.

The three important strains of Shorthorn cattle have been the Booth, the Bates, and the Scotch tribes. The Booth and Scotch strains represent the true beef type of Shorthorns, while the Bates approaches the dual-purpose type. The Shorthorn is the largest breed of beef cattle. The bulls attain a weight of 1,800 to 2,200 pounds or more, while the mature cows usually weigh from 1,300 to 1,600 pounds when raised under favorable conditions. Greater weight in both cows and bulls is not rare, but extremely heavy animals are not especially desired.

The color of this breed may be red, red and white, pure white, or roan. No other breed of cattle has the roan color, therefore this color in any other cattle usually signifies the presence of some Shorthorn blood.

In conformation, the Shorthorn is of the true beef type, being wide, deep, lengthy, and thickly fleshed. The great width of the Shorthorns, combined with their depth, gives them a more rectangular form than any of the other breeds, while the wide variation in the distribution of the breed has caused a slightly greater difference in type to be recognized than in other beef breeds. In the cow the following points should be noted: The horn is usually small and curved forward, with the tips pointing inward, upward, or sometimes downward, and they should be of a waxy, yellowish color. The head should be shapely, with great width between the eyes, short from the eyes to the muzzle, which should be large and flesh-colored, with large nostrils; a black muzzle is objectionable to most breeders. The neck should be short and full, blending well into head and shoulder. The shoulders should be smooth and well covered with flesh, the crops should be full, the heart girth should be large, and the fore flank low. The chest should be wide and deep, with the brisket thick and well to the front. The ribs are usually well sprung and the barrel well developed. In good individuals, the back is broad and the loin is wide, deep, and thickly fleshed. The hips are wide and should be well covered with flesh; the rump is long, wide, and level, carrying an abundance of flesh. The hind quarter is better developed in the Shorthorn than in any other breed; it is characteristic in that it is almost straight from the root of the tail to the hocks, and is wide and thick, carrying the flesh well down, thus giving a maximum amount of flesh. The flank is low, the udder is usually well developed, extending well forward, with prominent milk veins. The teats are of medium size.

The bull should possess the same desirable features as the female, without her feminine qualities. He should show masculinity by developing a heavier horn, a larger and thicker neck, a heavier bone throughout, and greater depth, thickness, and scale. His horns are straighter and heavier than the cow's, but they should not show coarseness.

The Shorthorn has sometimes been criticized because of poor development or lack of fullness in the crops, a high fore flank, and a poorly developed heart girth. They are sometimes rather leggy, although animals of Scotch breeding are usually thick fleshed and low set. There has been a tendency to patchiness near the root of the tail and to rolls on the sides, but the breed is improving in this respect in that the animals are becoming more smooth.

For the benefit of persons desiring information as to the principal lines of breeding in this country, the following has been furnished by the American Shorthorn Breeders' Association:

The ten bulls which have probably done most for the improvement of Shorthorn cattle as a breed in the last fifteen years are as follows: Whitehall Sultan 163573, Choice Goods 186802, Cumberland's Last 229822, Avondale 245144, March Knight 188105, Villager 295884, Cumberland 118578, Merry Hampton 132572, Lord Banff 150718, and Whitehall Marshal 209776. The most popular families of Shorthorns in this country at the present time are Augustas, Missies, Victorias, Duchess of Glosters, and Orange Blossoms.

The secretary of the American Shorthorn Breeders' Association is Mr. Frank W. Harding, Union Stock Yards, Chicago, Ill.

POLLED DURHAM.

The Polled Durham is a polled Shorthorn. There are two general divisions of this breed, the "single standard" and the "double standard." The single-standard Polled Durhams were produced by breeding "muley" cows to Shorthorn bulls, selecting the polled offspring and breeding these to other Shorthorn bulls. This grading up was continued until the polled offspring was brought to the fifth cross, which contained 96⅞ per cent or more of Shorthorn blood, and which qualified for entry in the Polled Durham herdbook. The resulting progeny resembled the Shorthorns, but were rather leggy, lacked a thick smooth covering of flesh, and inclined more to the dual-purpose type of animals. These cattle could be registered in the Polled Durham herdbook, but were not eligible for registration in the American Shorthorn herdbook.

The double-standard Polled Durhams were secured by using purebred Shorthorn cows that were either natural muleys or had undeveloped horns, for breeding to Shorthorn bulls. The double-standard Polled Durhams are purebred Shorthorns and can be registered in either the Shorthorn or the Polled Durham herdbooks. The double-standard Polled Durhams were bred chiefly from the Gwynne, White Rose, and Young Phyllis families of Shorthorns.

This breed is similar to the Shorthorn in every way except that it is hornless. It is a comparatively new breed of cattle, and has not become so popular as the older breeds, but it is increasing in popularity. They will do well under the same conditions which favor the production of good Shorthorns. Some breeders have developed the dual-purpose qualities in the animals with the result that there is considerable variation in type.

According to the Polled Durham Breeders' Association, the following bulls have proved to be of great

(Concluded on page 12.)

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

STRIPED BASS REMINISCENCES.

[By Texas Bob.]

My attempts to catch bass began a number of years before the anglers of California learned how and where to catch them. In 1895-6 Al Wilson, Dr. Dean, the late Patrick Boland and the late Wm. Ward, visited a small slough which empties into the ocean a short distance above Tomales bay, and caught a few fish; some days later the same parties went to the same slough, and upon this occasion Dr. Dean, after having ineffectually tried every bait and lure he had, cut a strip from one of his business cards and stuck it on a bait hook, and casting into the current had the felicity to hook and land a nice bass. Up to this time the writer had never known of clams being used as bait for striped bass and no fish were caught on clams that trip. In fact, the only other fish caught by any of the party was one of two or three pounds taken by the writer on a long abalone shell spoon, and the strange thing was that the fish took the spoon when it was lying still upon the bottom. I had become tired of whipping the spoon, and casting into the creek allowed it to settle upon the bottom, placing the rod on top of a fence at the water's edge, I proceeded to rest a spell. Fully ten minutes afterward the fish picked up the spoon and was safely landed. But I have never heard of another fish being caught on a piece of cardboard, nor of one picking up a "dead" spoon.

In 1897 striped bass were noticed in San Leandro bay and a twelve-pound fish was taken by an Alameda gentleman on an old-fashioned brass and feathered spoon; but during the whole of that summer, and the following one, the writer and a few others trolled those waters industriously with every kind of trolling appliance then at hand (the Wilson bass spoon had not then been created), without striking a fish. In the fall of 1898 bass was discovered in Oakland estuary, and during October of that year a few anglers had some fine sport there, taking a number of large fish, all on the juicy clam. And it was during that time that we observed the disposition of the bass to quickly eject from his mouth a bait the instant he felt the slightest weight on the line, and it was this that caused Wilson to suggest the adoption of the old perforated sinker, which allows the line to slip through without resistance when the bait is taken.

In the following year, 1899, bass were discovered by some of the members of the Petaluma Gun Club in the waters of San Antone creek, and in November of that year the writer and the late Henry E. Skinner were the guests, at the club house, of that genial veteran sportsman, Mr. W. S. Shattuck, upon which occasion a few nice fish were taken. And from that time on and up to recent years San Antone creek has produced more bass to the rods of the anglers than any other California waters.

In the main Petaluma creek, off the "twin houses," "wineries" and near the mouth of Schultz slough in the past few seasons some good catches have been made. Anglers who have fished in the creeks and sloughs in the vicinity of Wingo station, particularly in Appleby bay, and also near the railroad drawbridge across Napa creek have also made good catches of large sized bass, but on the whole the general high average should, I think, stay with the San Antone.

As soon as the Wilson spoon was created, it proved the best lure in San Antone creek for several years, but strange to say during a spell of three years, up to 1907, it was almost impossible to get the fish to take a spoon in San Antone creek; and yet in San Pablo bay and elsewhere they took it as usual. Will some brother angler suggest the reason for this? Again, until nearly ten years ago that creek furnished fine summer fishing, the fish running from three to five pounds. Now one can scarcely ever catch a bass there in summer.

Some of the catches made in this creek have been phenomenal. Many an angler has taken in a day eight to twenty bass, averaging from six to ten pounds each.

On a certain Sunday, several seasons ago, when the anglers who had fished that day met at San Antone station to take the train home, it was found that about twenty persons had fished, and had taken one hundred fish that weighed one thousand pounds. In the month of November, 1905, the writer fished thirteen times in San Antone creek and took twenty-seven bass which weighed three hundred pounds, an average of over eleven pounds each, and there have been many others who have beaten that record. For several years the record big bass of the Pacific Coast was one taken in San Antone creek by the late Fred Bushnell, which weighed twenty-nine and a half pounds; but that record was beaten in San Antone by Mr. Will Burlingame on November 14, 1906, his fish weighing just one pound more. Several years ago Chas. Bond landed a San Antone bass that scaled a fraction over 55 pounds and is the record weight for the creek up to the present time. So far as I can learn my old friend, the late Louis Boutillier, is far and away ahead of all others in the record of big fish; his best catches having been made in the summer of 1905, in Russian river, trolling with a minnow, and I regret very much that he never kept a record, for I would like to see it published. One fish which he sent to the city weighed a little over forty pounds after arrival, and Mr. Boutillier told me that he caught a number of fish weighing over thirty pounds each.

It is curious that in the great army of striped bass anglers of the Pacific Coast, no one has been able to catch the "big fellows." Bass are brought to the market weighing as much as sixty pounds, and usually in the months of February and March many can be seen in the markets of thirty to fifty pounds in weight, but the anglers do not catch many of over twenty pounds.

A great deal has been said and written about the habits of striped bass on this Coast, but I am convinced that there is still as much to be learned about them as we already know. I think every observing angler will bear me out in the statement that he is a very uncertain quantity.

We first began to catch bass with claims for bait and that is still the surest and most reliable all around bait, and yet a bass is not a clam digger, nor is he provided with the grinders for smashing shell fish possessed by some other fish; and he never gets a clam except when he finds one specially provided for him by some angler. The best reason I have ever heard given for the fondness of these basses for clams, was given by a Chinese clam merchant, who said "clam make heap light in water, fish see light; come quick catch um clam"—his idea evidently being that the phosphorescence given off by a fresh opened clam attracted the fish. I have known anglers who argued that the neck of the clam alone was just as good as the whole clam; and again others who argued that clams stale to malodorousness, were just as good; but I have observed that the angler who provided large fat clams, and opened them himself as they were needed, were the men who got the most and best fish.

Recently there has been a number of bass caught with "bullheads," as the common bay mud catfish is called. Other bass have been taken on herrings and "splittails." Duck and mudhen entrails have also been a good bait, but with all that the claim still holds.

Although the bass feed upon every variety of young fish, it seems to be difficult to catch them here on live bait, so that anglers generally depend upon the spoons or clams. In 1901 Al Wilson invented his bass spoon, the first successful lure of that kind ever used in Pacific waters for the taking of striped bass, and in October of that year the writer and a friend tried the new spoon in Raccoon Straits. It was the first time it had been used in those waters; and that day we took nine bass weighing 87½ pounds, and during that fall and winter and also during the following two years, many fine catches were made in Raccoon Straits, trolling with a spoon. But finally the fishing there became very poor, and for the last few years so poor that it has been almost abandoned. And this is much to be regretted, for of all the bass fishing we have had in California waters, that of trolling in the clear deep waters of Raccoon straits has been the finest.

As before mentioned, when bass fishing first began in San Antone creek the Wilson spoon was the most effective lure used, but for some time past it has been almost impossible to get a bass on a spoon in those waters, and the writer has put in many hours trying, after every one else had abandoned the spoon. What is the reason for this change of heart on the part of Mr. Bass? On December 23, 1902, a friend and myself, trolling in the same boat in San Antone creek with a Wilson spoon, took eighteen fish weighing 148 pounds in a forenoon's fishing, and without changing spoons; and besides perhaps half as many more were lost. The same day "Billy" Goodwin alone got eighteen, averaging as well as ours. And generally for two or three years the best catches were made on the spoon, whereas for some time past few fish have been taken in San Antone creek on a spoon. Why is this? Have the old fish got wise to the spoon and advised the youngsters to steer clear of the glittering, alluring thing?

Upon one occasion, when trolling alone in San Antone creek, I hooked and lost a large fish; rowing back over the same spot, a fish again struck, and was again lost, but a third strike in the same place secured a splendid sixteen-pounder which, upon examination, showed the two cuts where the hook had torn out after the first two strikes. This fish had struck the third time after a hook had been torn out of his mouth twice; and yet a bass is considered one of the most easily frightened fishes inhabiting the waters. And I think he is justly so considered, and yet I have seen times when a dozen to twenty boats were splashing around in such close proximity to each other that is was often difficult to make a cast without fouling your neighbor's line, and everybody catching fish, and everybody laughing and shouting all the time, clanging oars, moving from one place to another continually. But I trust no one will think that I recommend noise and confusion when fishing for striped bass. On the contrary, I think that usually the quieter one can be the better luck he will have.

It is claimed by some that striped bass are as numerous in our waters now as they ever were; to such I would say, make a close observation of the markets; also note the prevailing price for those fish in the market. Then interview the anglers who go to all points where there seems to be a chance to catch bass. It has been claimed that the bass are spreading out into larger territories, and that is the cause of their apparent scarcity in this immediate vicinity. Well, about fifteen years ago two or three specimens were taken from the Columbia river, but they have never, so far as I know, been seen there since. About the same time two were taken just below San Pedro in Los Angeles county, but no more have been seen there. About twenty years ago they were to be found in Russian river, and in the Sacramento as far as Redding, but as far as I have been able to learn they have not been observed in new locations for years. They were introduced in Pacific waters in 1879 and 1881, and in that lapse of time they certainly would long since have spread out into larger territories, if their surroundings and conditions had made it necessary.

FISH LINES.

In accordance with a long established custom, the San Francisco Fly Casting Club will hold a casting tournament at Stow lake on Washington's birthday. The program of twelve events will consist of both light and heavy tackle contests and with several novelty events added. Medals will be awarded the winning rod manipulators.

* * *

Reports from angling enthusiasts who have paid attention to coast stream conditions are that the outlook for good steelhead fishing the coming season never was better. The ocean trout have made their appearance plentifully in the near-by favorite fishing streams. The recent runs of steelhead will, in all probability, finish spawning in the near future and gradually drop down stream into salt water again. Other runs, however, will continue up stream while the waters are high enough for the fish to reach the upper tributaries where the spawning beds are located, which means that steelhead fishing should be excellent in April when the season opens.

In this connection, numerous experienced steelhead anglers are in favor of having the coast streams open as early as the middle of March and closing them, above tidewater, September 1 or August 1. The claim is made that most of the coast fishing waters have run low by that time, if not before, and all of the large sized fish have gone down to tidewater or into the ocean.

This late in the season, above tidewater, the large trout have been pretty well cleaned out, or as above stated gone to sea or lying up in the lower tidewater stretches or lagoons. The trout left in the upper watters are small sized or fingerlings. To leave these latter fish unmolested until the following season would be, it is argued, providing a crop of decent sized fish for the angler during the first days of the following season and also go far towards a bit of natural restocking.

Operations for taking steelhead eggs will soon be started at the Snow Mountain station on Eel river. Frank A. Shebley will have charge of that station and also the hatchery at Ukiah, which will be run this season to full capacity, the main hatching plant at Sisson will get the surplus stock of future troutlets.

A new rainbow trout egg taking depot has been opened on Burney creek, a tributary of Pitt river, in Shasta county. A hatchery was operated at that point about twenty-seven years ago by the Fish and Game Commission but later abandoned. The Camp and Bogus creek hatcheries in Shasta county will also be in operation soon.

The Sisson hatchery now is equipped with five hatchery buildings; the latest erected is 195 feet long by 45 feet wide. This plant is claimed to be one of the largest trout breeding establishments in the world—with an ample salmon hatching annex.

The reopening of the Burney creek hatchery is worthy of notice from another view. A big run of salmon has already reached that point. This run of fish came in through the Golden Gate, swam up the Sacramento river to the Pitt practically without being detected. The net fishermen on the Sacramento collected but scant toll in their drift nets and further up stream but few fish were taken, not enough anywhere on the up river journey to indicate such a large run. The schools of salmon slipped by underneath the drift nets with but small loss, the discolored river waters all the way up stream probably aided in hiding them from observation.

Another matter of future importance to both coast stream and Sierra anglers was the mission of Superintendent W. H. Shebley of the Sisson Hatchery and Lake Tahoe Hatchery, who closed negotiations with the Santa Cruz county Supervisors for the purpose of taking over and placing the Brookdale Hatchery and also the Scott creek egg taking station, near Swanton, under the administration of the Fish and Game Commissioners. The Brookdale Hatchery has a capacity of 500,000 steelhead and rainbow trout. The surplus of eggs taken at Scott creek will be sent to the Sisson hatching station.

The striped bass fishing sportsmen are elated over prospects for a fishing season of apparently good promise. Many among them devote a day regularly to this pastime for at least nine months throughout the year. Nor will strenuous weather conditions deter some of the striped bass chasers from following the bent of their particular fancy.

Among the San Antone creek regulars recently were Jake Christianson and Bob Sangster, two experts in the game. They landed four fish, weighing 22, 17, 14 and 12 pounds respectively. The 17-pound fish was given to Sam Wells. When he dressed the fish he was surprised to find two 10-inch "splittails," as this small fish is called, in the stomach of the big bass. This find goes to show that striped bass fishermen can bait their hooks with pretty large baits—bullheads, herrings or splittails. Two nine-inch lobes of roe were also found in this bass.

Other San Antoners stayed aboard their arks during that day, not caring to go out in the stormy weather. The heavy wind Monday and Tuesday two weeks ago played hob with the moorings of several arks on the creek.

The prize bass reported for the day was caught by Frank Messager, a 33-pounder, taken near the Napa drawbridge. Louis Gotthelf fishing there was also in good luck, three bass weighing 15, 10 and 7 pounds made up his catch. Near Wingo Harry Palmer picked up two nice sized bass.

Gotthelf tried his luck at that resort again last Sunday and made a big catch, four striped bass, the largest over 55 pounds, is a day's record that promises to be high hook for some time.

* * *

The outlook for both striped and black bass fishing, according to Fish and Game Warden George V. Neale, in Cache, Prospect, Lindsay and the other sloughs of the Yolo basin above Rio Vista, for the coming year is most excellent. High water in the Sacramento river will create the good fishing conditions later on. Whenever the river rises over the 21 foot mark, the high waters spread out over the tule sections. Running through miles of tules the water is filtered and cleared and when the current strikes the Cache creek basin it is clear as crystal. This is the water both the black and striped bass like. And there they find different kinds of small fry in plenty to feed upon.

The striped bass when they come up from the bay waters always work over to the San Joaquin side when low water conditions have prevailed in the Yolo basin. In such seasons both varieties of the bass are not very plentiful in the Cache creek waters and its confluents.

The proof of this is indicated, to a certain extent, by the excellent black and striped bass fishing that prevailed in Middle river and in the San Joaquin for several months past. One net haul of 6,000 pounds of striped bass was made recently by a Stockton fisherman.

* * *

East of Sebastopol, in Sonoma county, there is a marshy creek called the Laguna. It meanders through two large clear water lakes that are well stocked with striped bass, affording excellent fishing in season, as well as good duck shooting in the winter. The Laguna is about 12 miles in length, so states the Santa Rosa Press, follows a north course and empties into Mark West creek near the junction with Russian river. It is more than probable that but few local fishermen have tried Laguna creek for striped bass. Russian river, however, is known to be well stocked with both striped and black bass and there is no reason to doubt the above story relative to striped bass possibilities in Laguna creek.

HUNTING NOTES.

For the past week flocks of canvasback and other ducks have taken matters easy across the bay along the Berkeley and San Pablo shores. The birds seem to understand that the bombarding days ars over and venture close to the shores and the wharves that they persistently avoided a few weeks ago.

The last day of the duck season tempted quite a number of city shooters to hunt ducks near Alviso, close to the drawbridges, a popular shooting ground for many years. Wind and rain, however, kept a majority of the powder burners indoors. It was out of the question to work a duck boat or skiff in the sloughs or along the bay shore. Al Stevenson was located in a good blind and managed to pick up 18 bluebills. Al Baker, who shot near Newark, had to be content with 8 birds. Miles of canvasback, bluebills, sprig, teal and spoonbills have frequented the south bay waters for the past two weeks. The season in the lower Alameda marshes did not end as good as it began, rather indifferent shooting generally being the rule for about a month past.

At nearly all of the bay counties marsh resorts of the gunners a heavy rain prevailed from early morn until night.

The Suisun marsh gun club sportsmen had a poor closing day's shoot, the whole marsh expanse being well flooded.

A large crowd of hunters gathered in the West Side and Los Banos country, down the San Joaquin valley, where it rained more or less heavily, according to location. One hunter found himself isolated in his blind on an island. The water rose and left him out in the middle of a big pond. He waded ashore in water waist deep.

Geese were reported to be flocking by the thousands into the open country down that way to feed upon the sprouting young grass.

Temple Gun Club members, nearly fifty of them, indulged in a combined duck and mudhen shoot Sunday, over 1000 mudhens being killed at the West Side preserve.

The Raisin City Gun Club, composed of Fresno sportsmen, also had a big closing day shoot.

Good canvasback shooting has been the rule near Point San Quentin within the closing weeks. Friday Leo Weinand shot a "can" limit from one flock that came into his blind.

Dr. Henry La Coste and Dr. M. E. Simon spent two days near Colusa for limits of geese, sprig and mallard. E. N. Cuthbert and Captain A. W. Du Bray put in the last day at Willows in quest of geese. Captain Du Bray has a fancy for small-bore shotguns and used a twenty-eight-gauge gun. The "pipestem" bore seems to work well on geese, for out of three chances offered the Captain grassed two birds.

* * *

The shotgun devotees may have a day on valley quail until the 15th inst., when the season closes. For the past fortnight quail shooting conditions have not been good, the rains having soaked ground and cover so that upland shooting has not been what is desirable. Fair weather, however, may offer a bit of decent sport for the closing days.

Quail have been more plentiful this season than last year, especially down in the Santa Clara valley, San Benito and Monterey country. In nearly every district the birds divided into smaller flocks than in previous years. It was not an unusual thing, several years ago, to come across a covey of quail that numbered over 500 birds. The gradual diminishing of the birds in recent years has been attributed by some sportsmen to the dry seasons of 1911 and 1912. Recent observation, it is claimed, has traced the shortage of birds in marked degree to districts where poisoned wheat has been put out for the destruction of ground squirrels. This way of placing the poison, out on the top of the ground instead of in the rodent's holes, is not the system advocated by government officials.

Another great factor in producing a shortage of the quail crop is the automobile party. Hunting parties can go far or near in a machine and almost over any kind of ground. If one section does not provide birds the gunners can select another ground miles away in short order. The whole coast country from Monterey down to Santa Barbara was once noted for quail hunting—the machine gunner has made enormous inroads on the parent stock of birds. Even the Mojave desert and other barren districts of Southern California have been depleted and the big flocks of desert quail, so called, to be found in the arid regions years ago, have been cut down materially. It is extremely difficult nowadays for a sportsman to find ground where there is quail enough to give a young pointer or English setter a bit of training. Even the famed field trials country near Bakersfield, a district supposed to have been well patroled, failed to produce enough birds last month to give the dogs running in the Pacific Coast Field Trials enough birds to work on.

WILD CAT CHASING.

(Concluded from last week.)

To the pack the sprawling roots of the tree present such a tangled face that they can not scale it, though they try manfully, and we lift the smallest of them up so that she can get a foothold on the slippery trunk.

Failing in this, though why we had not thought of it before seems almost a mystery, we glanced along the cliff. There, crouched on a ledge some two or three feet above the highest limb of the tree lies the cat, a little red lynx, so small he seems hardly worth so long a chose.

The dogs are useless now; they have done their work and brought us to the cat; now it is up to the men on the horses to kill it, or to bring it down to where the dogs can finish the task they had set out upon. The little .25-30 carbine, without which the man who happens to head this particular hunt seldom goes out either on horseback or afoot, cracks and the cat falls, quite dead ere he reaches the ground, among the dogs. For a moment they worry it, then go on, down to the little stream where they wallow and roll; but they drink very little despite the fact that they are very thirsty from so long a run after a wild cat. Coyote chases are more gruelling, and there are few fox-hounds who can stand the game. Most of them drop out in the first three miles, so stiff is the gait the little wolf is wont to set for them.

But this is one of the longest, if not quite the longest run after a wild cat in which I have ever participated, and the little lynx which made it must have been in prime condition, else he never could have covered that mile and a half or two miles which he did before becoming so short winded that he had to take to a tree and then to the cliff. In this chase, though, it should be remembered that there are no trees handy which the cat could climb. The country is practically bare except for boulders and ledges, most of the former low, and most of the latter in such shape that the dogs can walk up to them or at best drop down from the top.

A wild cat which has been chased once or twice becomes very wise in the ways of hounds and knows to an inch how high a dog can jump or how far he can climb to reach a limb or a shelf on some cliff. Frequently a cat will pass by a tree which looks good to the human hunter following him, but which when measured shows that there was a fatal defect somewhere which would have let the dogs or the men too close to the hunted.

There is, however, one factor which the lynx never takes into consideration, and that is the carrying power of a rifle ball. The coyote and the fox know this to a fraction of a foot, and can keep just out of range, but the wild cat, if he knew as much as either the wolf or the fox, would keep on running, instead of climbing some convenient tree to be made the target for the hunter's bullets.

I have no doubt that a wild cat—and some mountain lions, though the lion is not so good a distance runner as the lynx—could distance a dog in an ordinary run if they would but stay with the ground, though I have never seen one try it. Hounds occasionally run down coyotes, but they do not get one in ten of those they chase, and the wild cat is a better trickster than is the coyote, though not so good as the fox.

The average dweller in the Southwest has no idea of the number of wild cats which are to be found even in settled parts of California. While hunting the nest and eggs of a certain warbler in the swamps of Orange county for an eastern museum a few years ago, I saw in one day three of the little red cats, getting of course only fleeting glimpses of them among the willows, where they are not usually supposed to be plentiful and where they frequent only such willow grown lands as border the dairy and beet ranches.

Every one of these cats saw me first, as is their business to do, and all I saw of each one was such a section of red flank as could be framed between two of the close grown willows. These lowland cats seem to be slightly redder and darker than those of the same species which are found in the hills, presumably for the same reason that the lowlands have produced the so-called "black rattlesnake" and the hills the "diamond-back."

Song sparrows of the coastwise marshes also are darker than those which frequent the occasional pools and swamps in the hills; those which I have seen at Elizabeth Lake and similar places being noticeably lighter than those around Wilmington, San Pedro and Alamitos, though all are, I believe, supposed to be of the same species.

At Saratoga Springs, Coyote Holes, Owl Holes, and other desert watering places, where there are always song sparrows, the birds are lighter colored even than those at Elizabeth Lake. There evidently is a wide field for the study, not so much of protective coloration as of adaptive feather growth, between the desert and the coastal region in the bird world. There is not less a similar field among the mammals, and one which is even less well known.

Smith mountain, in San Diego county, which locality I believe I have mentioned before in these chronicles, is one of the best places to hunt wild cats in California, as it is the home of so many a lang mountain lion. But the low brush-covered foothills of Orange, Riverside, Los Angeles and Ventura counties also are good grounds for the chase of the lynxes, both gray and red, so that the man who likes riding to hounds has no need to miss his favorite sport out here in the West, only it will be more strenuous, longer drawn out and infinitely more exciting when he really does hit the trail of a stayer among the wild cat tribe. These cats, however, are a good deal like humans; some of them are bound to stick to whatever they start through thick or thin, and others are quitters from the start, so that it depends not alone on the hunter but on the hunted as well for the amount of sport one gets out of the game.

TRAP AND TARGET.

Premier Coast Tournament—Elmer E. Shaner, Treasurer and Manager, requests announcement that the Interstate Association's tenth Pacific Coast Handicap tournament will be held at San Diego, Cal., on July 5, 6, 7, 1915, under the auspices of the Pastime Gun Club. There will be $1,000 added money. The winner of first place in the Pacific Coast Handicap will be guaranteed $100 and a trophy; the winner of second place will be guaranteed $75 and a trophy, and the winner of third place will be guaranteed $50 and a trophy. Several other trophies will also be awarded.

* * *

Golden Gate Gun Club.—The "Gaters" will start the local trapshooting season with a big merchandise shoot, Sunday, February 21, a day after the opening of the Panama-Pacific International Exposition. This historical event and the Vanderbilt Cup auto races at the Exposition grounds on Monday will no doubt prompt a large entry of shooters from many points—for there will be a host of people here on those days. The local entry will also be a large one. As for prizes there will be enough, and good ones too, to give every shooter, however ordinary, a prize.

The program calls for two 25 bird sections—50 singles. Forenoon race, 25 birds. Grub race, 10 birds—winning team 25 cents, losing team 50 cents per man. Afternoon race, 25 birds. Entrance $2.00, high guns on total of 50 targets have choice of prizes. Grounds open for practice at 9 a. m. Regular events start 10:30 a. m. Loaded shells can be purchased on the grounds.

* * *

Garden City Traps.—San Jose Blue Rock Club shooters cracked out some good practice scores the 7th inst., despite inclement weather. The scores shot were: O. N. Ford 56x60, J. T. Downs 54x60, Ada Schilling 52x60, Carl Schilling 51x60, C. H. Smith

50x60, A. E. Sando 30x50. This occasion was Sando's initial trap shoot and a very good score he made.

Special matches at 20 blue rocks: Ada Schilling and J. T. Downs 16-20. Smith and Carl Schilling 15-20.

Scored match at 30 blue rocks: Ada Schilling and Downs 26-30. C. H. Smith and Carl Schilling 25-30.

The club's regular February shoot will take place tomorrow—100 singles, 15 pairs and also the San Jose handicap, 5 to 25 birds added. The club will send a squad or two of blue rock talent to take part in the Goldne Gate shoot on the 21st inst. The "grand" opening shoot for this season will come off either March 7 or 21, and will be announced positively later on.

* * *

Washington Trigger Pullers—The Tacoma Gun Club extended a smokeless powder welcome to Pete Holohan January 17. Despite foggy and smoky atmospheric conditions a fine shoot was held topped off by a jolly supper and social evening at the home of H. A. Sullivan. During the day a number of ladies were interested observers of the shooting.

J. A. Dague was high amateur for the day with 93 out of 100, F. C. Riehl* 97, P. J. Holohan* 92, H. A. Sullivan 83, J. Brady 84, Reelings 85, J. Cooper 86, E. W. Cooper 84, J. C. Jennings 83, a Riehl 75, J. McAleer 74, A. Barlow 74, Coon 72. A seven man team shoot was the feature event of the day.

* * *

Citrus Belt and San Dunes.—Los Angeles and Pastime Gun Club shooters have been busy as bees at the club grounds recently and with a good attendance at each club's trap ground. F. Coutts Jr. recently made a Du Pont fob run, 98x100, Dodds 96, Toews and Barber 94 each, Charley Julian 91.

Bob Bungay cracked out a 47 on 50 birds from the 21 yard slat. C. H. Knight (21 yards) 41; Knight and H. Phirrmann were top scores, 94x100 at 16 yards rise. Clarence A. Haight, of this city, also participated in a number of events at the Venice trap grounds.

* * *

Coming Powder Puffs.—The Rodeo Gun Club members are preparing for an active campaign at the Salinas traps. The opening function will take place Sunday, March 21. A $100 purse and numerous merchandise prizes will be the inducements for proper gun pointing.

* * *

A New Rifle Club.—The Fowler Rifle Club is now before the executive committee of the National Rifle Association for formal acceptance. The club was recently passed by the State secretary and the adjutant-general and has about twenty-five active members. As soon as the club is fully accepted it will hold shoots at the Laton range, which is now used by other organizations and especially by the National Guard companies of Fresno and vicinity.

* * *

A Three Time Winner.—Lon Hawxhurst, of this city, is not only a clever operator at the blue rock traps but also some rifle shooter.

The indoor rifle tournament for the championship of the Pacific Coast, the most important event of the year in local shooting circles, was completed late last Sunday night. The shots after being measured and tabulated proved that L. S. Hawxhurst is again the champion for the third consecutive year, an honor very rarely falling to the competitor in a trial between the master-shots of the range.

Hawxhurst's winning score counted up 2447, eleven points better than his score of 1913, four points less than the winning score of 1914. Hawxhurst also won first prize for the best three targets in the three-shot re-entry event on the one-eighth inch ring target, making a 75 possible. He also won second place for the best center in the bullseye event.

George A. Pattberg was the winner's closest competitor in the three-shot re-entry event until, almost the last shot, when Hawxhurst scored a possible and carried off championship honors. George Armstrong, champion of numerous shooting contests, landed second in the 100-shot event, with a score of 2423, made a 75 possible in the re-entry match, winning third place, and won first prize in the bullseye shoot. W. A. Siebe has the honor of having made the first 75 shot possible in the Pacific Coast tournament.

PROPOSED MONEY DIVISION SYSTEM.

The schedule of a proposed money division system given below has been worked out by a prominent Eastern trap shooter, who is well known to Coast shooters. The system has gained considerable attention among Eastern sportsmen and presents some novel points worthy of consideration. The claim has been made that this plan provides clear sailing for practical class shooting. When the document was presented at The Interstate Association meeting last December it was discussed at such length that it would not be far fetched to hint that this system may find a place with other trap shooting divisions of purses, particularly when applied to big tournaments.

Views and suggestions of Coast shooters herewith are invited and will be given publicity.

The records show that in the last Grand American Handicap event, the purse consisted of $4268 entrance money, and $500 contributed by The Interstate Association. The records also show that but 55 men participated in division of this sum. The first eight men won $2502.35, while the next 47 men won $2289.

A suggestion has been made to this effect, which can be varied in one or more principles, without affecting the practical working of the plan: At future Grand Americans, charge same entrance money as at 1914 event, but divide it according to classes.

Compose the different classes as follows:—Class A to consist of 22-yard men; Class B to consist of 21-yard men; Class C to consist of 20-yard men; Class D to consist of 19-yard men; Class E to consist of 18-yard men; Class F to consist of 17-yard men; Class G to consist of 16-yard men.

Then divide the purses proportionate to the number of entries in each of the various classes—the proportion for each class to be determined later.

Taking for a basis the same entries, scores and purse of the 1914 Grand American Handicap event, this plan worked out, with very interesting results. Interstate contribution of $500 awarded as follows: First place in Grand American Handicap, $200; second place, $150; third place, $100; fourth place, $50; total, $500.

The entrance money from each class was allotted to each class, so that the 22-yard men would be shooting for their own entrance money, but not the entrance money of any other class, but still have an opportunity of competing for the $500 Interstate Association guaranteed to the first four high guns. Here would be the amount of money competed for in each class as compared with the amount competed for by the same men, if classified in 1914, Interstate's $500 counted in as won in 1914.

Class A, 16 entries, 3.3 per cent of total. Purse, $341.00; 1914 purse $653.25.

Class B, 20 entries, 4.1 per cent of total. Purse, $175; 1914 purse, $178.80.

Class C, 26 entries, 5.4 per cent of total. Purse, $230; 1914 purse, $141.20.

Class D, 62 entries, 12.8 per cent of total. Purse, $546; 1914 purse, $522.60.

Class E, 105 entries, 21.5 per cent of total. Purse, $918; 1914 purse, $880.25.

Class F, 55 entries, 11.4 per cent of total. Purse, $487; 1914 purse, $244.85.

Class G, 200 entries, 41.5 per cent of total. Purse, $2071; 1914 purse, $2170.60.

The number of shooters participating in the money division under the two systems is interesting.

	Old.	New.		Old.	New.
Class A	4	4	Class F	4	13
Class B	2	4	Class G.	24	43
Class C.	3	6			
Class D	9	14	Totals	55	109
Class E	9	25			

A comparison of the winnings, using the 1914 Grand American Handicap as a basis for calculation, of the first eight men shows:

	1914	New System
Woolfolk Henderson	$500.00	$256.40
O. P. Goode	429.10	327.10
A. C. Blair	381.45	259.39
J. D. Parker	333.75	169.34
A. C. Flickinger	286.10	141.68
M. P. G. Hillman	238.40	100.98
I. Galbraith	190.70	98.28
J. F. Couts, Jr.	143.05	70.00
	$2,502.55	$1,423.37

Under this proposed system, $1079.28 would have been taken from the eight high men, and more evenly distributed, at the same time the eight men could not complain of their winnings. The contention is that $500 is too much to put up as a prize for shooting 100 targets, especially when a medal goes with it which is emblematic of the Championship of America. None of the shooters, probably, who shot in this event, ever made $500 in one day in their lives, and the chances are that few of them ever will. Under the proposed system, as compared with the old system, the next 47 men would have received: Old, $2289; New, $2309.56; which under the old system, used up the entire purse, when added to the winnings of the first eight men, while under the proposed system there would be remaining $1036 to be divided among the next 54 men.

Under this system it is also suggested that medals be given to the first four or more places in the Grand American Handicap event, as well as a medal to the high man in each class.

Some of the advantages of the suggestion are: It makes for a more even distribution of the purse, and about doubles the number of money winners, and increases the number of trophy winners; it should be a great forward step in creating a demand for trophies, and the elimination of money shooting; it should increase the number of entries in the big event; it would eliminate much of the dissatisfaction if the event were again won under the same conditions as in 1914. It would advance the cause of "class shooting" and shooting for trophies; and should, at least, be worthy of thoughtful consideration, before another Grand American is run on the old plan; it provides two moneys for every ten entries or fraction thereof, which is impossible, although desirable, under the present method; and it should increase entries for the consolation event. Now, when some shooters make a bad start in the Preliminary and G. A. H. events, they drop out and "lay" for the consolation. The proposed system would keep them in those events to the end.

16-yard contestants in 1914 Grand American Handicap, 100 singles—1. Score. 2. Did win. 3. Would have won under proposed system. 4. Distribution of Interstate money guarantee. 5. Amount in favor of present system. 6. Amount in favor of proposed system:

Sam Leever	92	.....	25.25	.....	26.25	.....

Twenty men competed from the 21-yard mark. Under the old system two men in this class won $178.80, while under the proposed system four men would have won $175.

22-yard contestants—

W. Henderson	98	$500.00	$56.40	$200.00	$243.60	.....
S. A. Huntley	95	69.70	42.30	.....	27.40	.....
F. Wright	94	47.70	28.20	.....	19.50	.....
Mark Arie	93	35.75	14.40	.....	21.35	.....

Sixteen contestants competed from the 22-yard mark. Under the old system four men in this class would have won $653.25, while under the proposed system four men would win $341. Compare the "Did Win" column against the "Would Have Won" column and you will see just how the proposed system would affect each contestant.

BREEDS OF BEEF CATTLE.

(Concluded from page 8.)

importance in the improvement of the breed in recent years: Golden Gauntlet X 1140, Cambridge Lad 3d X 1300, Golden Hero X 2847, Roan Hero X 3613, Tippecanoe 44th 1698, Field Marshall X 1758, Grover Abbotsburn X 3938, The Confessor X 5985, Windermere Tip X 3094, and Orange King X 3242. The following cows played a most important part in establishing the Polled Durham breed, and their names are found more frequently in pedigrees than any others: Imp. Young Mary by Jupiter, Imp. Rose of Sharon by Belvedere, Imp. Young Phyllis by Fairfax, Imp. Ruby by Young Dimple, and Imp. Rosemary by Flash. At the present time the following cows are of families which are most prized by the leading breeders: Imp. Victoria 51st by Royal Duke of Gloster (29864), Imp. Windermere 3d by Grand Duke 31st (38374), Imp. Princess Royal 64th by Scottish Archer (59893), Imp. Lady of the Meadow by Chancellor (68693), and Imp. 12th Duchess of Gloster by Champion of England (17526).

The secretary of the Polled Durham Breeders' Association is Mr. J. H. Martz, Greenville, Ohio.

HEREFORD.

The Hereford ranks next to the Shorthorn in numbers in the United States. Their popularity is constantly increasing, especially where cattle are raised under range or adverse conditions. As a "rustler" the Hereford is surpassed by no breed of beef cattle, and they excel the Shorthorns in this respect. They have been recognized as a breed which responds readily to a favorable environment as well as being able to thrive under adverse conditions where other breeds would not do well. On scant pastures and on the range where water holes are far apart the Hereford has shown its merit. The bulls are active, vigorous, prepotent, and very sure breeders.

Formerly the Hereford was severely criticized because of a light hind quarter, but the breed has improved wonderfully in overcoming this defect during the last two decades. The breed is somewhat less rangy, more compact, and heavier fleshed than formerly. While the Hereford cows have been criticized because of their scanty milk flow, they usually produce enough to raise a good calf. As a breed they have a better heart girth, stronger constitution, and can withstand adverse conditions better than the Shorhorns. They are early maturing and fatten readily in the feed lots.

The weight of Hereford cattle is practically the same as that of the Shorthorn. Mature bulls weigh from 1,800 to 2,200 pounds or more, while good cows weigh from 1,200 to 1,600 pounds. It is not unusual for mature animals of either sex to weigh more than stated here. The conformation of the Hereford is such that he looks smaller than a Shorthorn of equal weight.

In color the Hereford is red with white markings. The white markings usually consist of a white face and head, the white extending along the top of the neck and shoulders, a white throat and dewlap, and white on the underline. Frequently, however, no white is found on the neck or top of shoulders. White is sometimes found on other parts of the body; and, while it is permissible, it is not desirable. A pure-white face is usually preferred, although many pure-bred animals show spots about the face and especially some red around the eyes. The red color of the body varies from a light red approaching yellow in color to a very dark red approaching black. Neither the light-red nor the blackish-red color is desirable, a rich deep red being the most popular. The hair is usually of medium length with a curly tendency, although short-haired animals are common.

The general conformation of the Hereford is the same as that of the Shorthorn, except that the rectangular form is not quite so pronounced and the prominent bones are more smoothly covered. The form is low, compact, and blocky, with well-sprung ribs, broad loin, and wide hips, without the prominent hip bones of the Shorthorn, and with a more rounded and bulging quarter, although developed to a lesser degree in this respect than the Aberdeen-Angus. The head is broad and short with large nostrils, and large muzzle and mouth, which are indications of a good feeder. The horn is longer and somewhat coarser than the Shorthorn, white in color with waxy tips, and curves outward, upward, and backward, or outward and forward, and occasionally are drooping. The horns of the bull are straighter and heavier, and usually grow outward, frequently growing forward, backward, or downward, but seldom growing upward. The neck is short, thick, and blends well with the shoulder. Great width, depth, and length of chest and a fullness of the crops give the Herefords their constitution and endurance, which the breeders have been careful to preserve. The loin is full and deep and the rump and hind quarter are usually well developed, carrying a large amount of flesh. This portion of the body has been greatly improved within recent years, and the tendency to roughness and patchiness has been reduced until the breed now stands out as one showing extreme beef type, with smoothness of form and much quality. For these reasons, combined with their rustling abilities, the Hereford has become the most popular breed for improving range stock. The effects of using Hereford bulls for this purpose has had a great attraction for cattlemen in the Southwest, especially in the Panhandle region of Texas.

The Herefords do well in the South, as the heat there seems to bother them no more than it does in the corn belt. They seem to be especially dapted for use on the larger plantations, where animals are not given extremely good care, and where the production of beef alone is desired. Two or three crosses on the native stock of the South produce a good beef animal that matures early and fattens out well. On plantations especially or on farms with only fairly good pastures the Hereford will give better results than the Shorthorn.

The American Hereford Cattle Breeders' Association mentions the following as some of the bulls which have been most influential in improving the Hereford breed in the last 15 years; Perfection Fairfax, Beau Donald, Beau Brummel, Corrector, Disturber, Bonnie Brae 8th, Perfection, March On 6th, Prime Lad, and Repeater. At the present time the Anxieties, Perfection Fairfaxes, Beau Donalds, and Belle Donalds are the most popular families.

Further information concerning this breed of cattle may be secured from Mr. R. J. Kinzer, secretary of the American Hereford Cattle Breeders' Association, 1012 Baltimore Avenue, Kansas City, Mo.

POLLED HEREFORD.

The Polled Hereford is a new breed developed by selecting and breeding Herefords which showed polled characteristics. The double-standard Polled Herefords are purebred Herefords which are hornless and are eligible to registry in either the American Hereford herdbook or the American Polled Hereford record. They differ in no way from the Hereford except that they have no horns. The polled feature has been well fixed and the bulls when mated with native cattle sire few calves having either long scurs or horns.

The secretary of the American Polled Hereford Cattle Breeders' Association is Mr. B. O. Gammon, Des Moines, Iowa.

ABERDEEN-ANGUS.

Aberdeen-Angus cattle are solid black in color and have no horns. These characteristics are so strongly developed that a bull, when bred to horned cows of various colors, will usually produce calves of which 85 per cent or more are black in color and hornless. Occasionally a red animal is found in this breed, but the color is not popular among breeders. While the Aberdeen-Angus is an old breed, it is only within recent years that it has been so popular in the United States. They are good rustlers, they have never been as popular on the ranges of the West as either the Hereford or the Shorthorn. They stand next to the Hereford and above the Shorthorn as grazers on scanty pastures. This breed is extremely valuable for grading up native cattle, but they have been criticized to a certain extent by rangemen because they do not get a greater percentage of calves. This has usually been true where they have been in a herd with horned bulls. If all the bulls were either polled or dehorned there would doubtless be less ground for this claim. The milking qualities of the cows are only fair; they give more milk than the Hereford, but not as much as the Shorthorn. A suffcient quantity of milk is produced to raise a good calf.

This breed is very early maturing, and has a tendency to fatten well at any age, hence their popularity for producing baby beef. In general form they are different from the Shorthorn and Hereford. The body is more cylindrical in shape, and they are smoother throughout than either of the breeds named. The Angus responds quickly to good treatment, and, because of their readiness to fatten, early maturity, exceptional vigor, high quality, general smoothness and uniformity, and the high percentage of valuable meat produced, it is the most popular of all beef breeds among cattle feeders. They usually dress out a higher percentage of marketable meat than any other breed, and their merit has been shown by the repeated winnings they have made in the show ring and on the block.

They stand either heat or cold well, and are popular in the South as well as in the corn belt. Because of their reputation for finishing smoothly and killing out well they are very popular in the corn belt and neighboring States where much feeding is done. They are becoming more popular in the South, and rank next to the Hereford and above the Shorthorn in their general adaptability to average southern conditions.

The head of the Angus shows a sharp tapered poll, great breadth between the eyes, a prominent forehead, prominent eyes, a nose of medium length, a large mouth and muzzle, and large nostrils. They are more restless or nervous than the Shorthorn. The neck is short, full, and has a well-developed crest in the bull, but it does not always blend smoothly with the shoulders, which are sometimes a little prominent. The chest shows great depth, width, and length. The body is cylindrical in shape and does not show the squareness or blockiness of the Shorthorn and the Hereford, but is noted for its compactness and good covering of flesh. The ribs are well sprung, curved, and long, giving the cylindrical form to the body. The loin and rump are well fleshed and deeply covered, but entirely different in shape from the Shorthorn, as the great width and squareness are absent. The deep covering of flesh of the rump, the smallness of bone and the deep, rounding, bulging hindquarter gives a maximum amount of meat. Note the difference in the hindquarter of the Angus and the Shorthorn. The latter is broad and straight from pin bones to the hock, while the Aberdeen-Angus has less breadth and a very rounded bulging quarter with a deep twist. The Angus is not so low in the flank as the Shorthorn and some individuals are light in the hindquarter.

The quality of the animal is unsurpassed, as shown by the soft, pliable, mellow skin and fine hair. The meat is fine-grained and of the highest quality. The constitution and vigor of this breed as indicated by well-developed chest and good heart girth are worthy of mention. For grading up native stock and for crossing, they hold an enviable record.

We are informed by the breeders' association that some of the bulls which have been most prominent in improving the Aberdeen-Angus breed during the last fifteen years are Heather Lad of Emerson 2d 19049, Black Monarch of Emerson 30331, Black Woodlawn 42088, Lucy's Prince 46181, Prince Ito 50006, Baden Lad 61883, Blackbird Ito 64116, Star of Denison 82426, Sir Blackbird 98347, Earl Eric of Ballindalloch 100422, and Undulata Blackcap Ito 2d 116275. The leading families in this country at the present time are Blackbirds, Trojan Erica, Pride of Aberdeen, Queen Mother, and Heather Bloom.

The secretary of the American Aberdeen-Angus Breeders' Association is Mr. Charles Gray, Union Stock Yards, Chicago, Ill.

GALLOWAY.

The Galloway is one of the oldest breeds of cattle. They are polled, solid black in color, though occasionally some brown is shown, and have a long, curly, silky coat. This breed is very prepotent and transmits the black color and polled characteristics readily to offspring from cows of any color. As high as 90 per cent of the calves from various-colored cows are black, and from 95 to 99 per cent of the offspring from horned cows are polled. This breed is slow maturing when compared to the Aberdeen-Angus or the Hereford. In size they are smaller than any of the other beef breeds. Mature bulls usually weigh from 1,700 to 1,900 pounds, while the mature cows weigh from 1,000 to 1,300 pounds each.

These cattle are exceedingly good rustlers, not being excelled by any other beef breed in this respect, and their long, silky coat of hair enables them to stand severe weather with little discomfort. For these reasons they have proved to be very valuable on some of the ranges of the Northwest and of Canada. They do not respond so readily to good treatment and to plenty of feed as do the other breeds, and have therefore not become popular in the corn-belt States.

In form they are low set and deep, but are proportionately longer than the Aberdeen-Angus and flatter of rib. The head is somewhat similar to that of the Angus, except that the poll is not as sharp. The head is covered with long wavy hair and the ear is set farther back from the forehead. The body is long and of medium depth. The rump is long and well filled, although the tail head is usually set rather high. The hind quarter is usually good, being full, similar to that of the Angus. The bone is fine, the skin mellow, the hair soft and silky, and the grain of the meat is fine and high in quality. Little attention has been devoted to the milking qualities of Galloway cows, but they give enough milk to raise a good calf. The milk is regarded as ranking high in butterfat and having good quality. The Galloways have commanded especial attention because of their prepotency and the uniformity of the offspring when the bulls are used for grading up or for crossing.

This breed will probably never be very popular in the United States except in the Northwest, where climatic conditions are severe and the range grasses are often scant. In that section, however, the bulls could be used advantageously for grading up native stock.

According to the American Galloway Breeders' Association, the following bulls have played a most important part in the improvement of this breed of cattle during recent years: Worthy 3d 21228 (7762), Scottish Standard 15221 (6488), Druid of Castlemilk 17054 (6159),Captain 4th of Tarbreoch 30933 (9701), Great Scot (6489), Bondsman (7306), Excelsior (7702), The Pathfinder 3d (5991), Keystone (9689), and Sweepstakes (10001). The most popular families, ranking in the order named, are: Maggie, tracing to Maggie of Blackjark (6046); Alice, tracing to Alice of Castlemilk (14282); Nancy Lee, tracing to Nancy Lee of Castlemilk (11971); Lizzie, tracing to Lizzie of Breckonhill (3366); Dora, tracing to Dora of Priesthaugh (7008); and Lady Stanley, tracing to Lady Stanley (1670).

Specific information concerning the Galloway cattle can be secured from Mr. R. W. Brown, secretary, American Galloway Breeders' Association, Carrollton, Mo.

MARKET OUTLOOK AT CHICAGO.

Closure of the shipping outlet to eastern slaughterers at Chicago has restored the same unsatisfactory conditions that existed last November. Nothing that walks on four feet has a stable value. Late last week, following the embargo, declines of 25@50 cents occurred, but as the country promptly reduced supply to meager proportions recovery has occurred. Wide swings are the rule, however, and as it is a packer market congestion is easily created. Horse trade is under the bullish influence of European army demand, grain values are steadily soaring and even fine wools are feeling the uplifting influence of scarcity of everything needed for fabric making. Export demand for wheat is unappeasable, but European purchasing of corn is still deferred, although the trade is confident that growing scarcity of wheat will necessitate the use of that grain in large quantities.—Breeder's Gazette.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects
READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

DON PRONTO 2:02¼,

eight years old, pacer, no straps, needs no boots; sound, not a blemish or a puff. Any amateur can drive him as well as a professional; has been in 2:02 with a 230 pound amateur up. This is a matter of record. Don Pronto is the cleverest all-round high class pacer in the country. Has held a world's record and is from the dam of Manrico (3) 2:07¼, a world's record holder. Is bred to be a great sire, being by THE DIRECTOR GENERAL (sire also of Wy-Drad 2:04¼, William O. 2:04¼, Mainsheet 2:05, Deuchester 2:07, etc., 8 in 2:10), and out of SILURIAN, that wonderful producing daughter of Wilton. Don Pronto was the biggest money winning free-for-all pacer in the west both in 1913 and 1914. Can surely beat his record. Is very beautiful, pleasant and a great favorite. **Price $1750.00.**

ALARICH 2:11¼ (Breeder's mark 2:09),

trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. **Price, $650.00.**

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. **The best buy in California at $1600.**

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. **Price $1000.00.**

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. She has been up from pasture about eight weeks and trialed this week in 2:49 very easily, last eighth in :19¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. **Take her at one-third her value, $650.00.**

O M A R, gelding,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). **A present at $350.00.**

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. **Price $800.00.**

HERMES, brown colt,

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. **Price $1500.00.**

JOHNNY DUGAN,
3-yr.-old breeder's record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. **A great buy at $350.00.**

OLD FOLKS,

bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is ready to begin fast work, having been jogged all winter. **Price $1000.00.**

CARINA,

bay filly, trotter, two years old, by CARLOKIN, dam ATHERINE (dam of Copa de Oro 1:59, Rags 2:09¼ and Nicola B. (2) 2:23¼, tr. 2:17, winner of the Oregon Futurity and second in the P. C. T. H. B. A. stakes for two-year-old trotters).

Carina is entered and paid up in the same stakes as Carleta. She is a grand looking, well developed filly, showed a :40 gait at eleven months old. Is good gaited and good headed, is in training and promises to make a high class trotter. Trialed this week in 2:46, last half in 1:12½. **Price $600.00.**

AND ONE FOR THE $20,000 P.-P. I. E. TROTS — RAGS 2:09¼, winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old — in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. **Price $2000.**

In addition to the ones above mentioned I will offer to intending buyers NICOLA B. (2) 2:23¼, JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), a YEARLING BROTHER TO ESPERANZA 2:09, engaged in all of the Stakes, the phenomenal two-year-old pacer SANDY McNABB (staked), MISS QUEALY (full sister to Manrico), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

THE FARM

The great Natomas reclaimed area on the Sacramento river is to be sown in barley and wheat and it is estimated that this season's yield will be 750,000 sacks.

A permanent farmers' club has been organized at Hemet, Riverside county, and will hereafter hold regular monthly meetings to discuss the various problems which come up in farm work.

Some very heavy plantings of spineless cactus have been made around Turlock and with such success, that the growers state that the spineless cactus industry promises to become one of great importance in that section.

HORSE OWNERS! USE GOMBAULT'S

THE LAWRENCE-WILLIAMS CO., Cleveland, O.

SAVE-THE-HORSE
(Trade Mark Registered.)

THE TIME, NOW!

All the winter long, the troubled owner of a lame horse reads our advertisements. Then, day after day slips away, while he talks, laments, listens, takes advice and hesitating—**FAILS TO ACT**—till the Springtime is on him and his horse is not yet able to work. Meantime the thrifty, prosperous, resolute man, reads, considers the evidence carefully—**Decides Promptly**—and his horse is quickly cured, worked, too, if needed. That's exactly what happens every year.

D. M. Clark, Arlington, Cal., writes: This is to inform you that my filly has quite recovered. I did not expect I could work her any more this winter, but she is working every day for four days now, and the joint on which I used Save-The-Horse is as strong as ever.

Another Lesson From Experience. J. A. Jones, Southampton, Mass., writes: "Send bottle of Save-the-Horse. Just counting up the different horses—nine before this and on all it did the trick. I think it the best remedy on earth."

19 YEARS A SUCCESS

Every bottle of Save-the-Horse is sold with signed contract bond to return money if remedy fails on ringbone, thoropin, SPAVIN or ANY shoulder, knee, ankle or tendon disease. NO blistering or loss of hair. Horse works as usual. —Any season.

$5 at druggists', WITH CONTRACT, or we send by Parcel Post or Express paid.

F. O. GARDINER,
Secretary.

FOR SALE.

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great procer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

FRED W. KELLEY,
366 Pacific Bldg. San Francisco.

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1298

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ De Ora (3) 2:17
2-yr.-old record 2:13½. 2-yr.-old record 2:27¼.
Trial (3) .....2:09 Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1297.

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 Nicola B. (2).....2:23½
John Warwick (2) 2:17 Santiago (3) 2:24¼

Carl (2) .....2:19¾ Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 El Carbine (2).....2:27½
Carsto (2) .....2:22½ Eileen C. (3) 2:29
Carlschen (2) .....2:23 Carlos (2) 2:29¼
Fulton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

Pleasanton, California

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10.

Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10.

Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Vernon McKinney 2:01½

A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes.

Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance — 16 hands, 1200 pounds — bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation — an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars CHAS. L. DeRYDER, Superintendent PLEASANTON, CAL.

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910

Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25, half-mile track, ½ mile—1:08¾
SELMA PALEY, trotted ½ mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU " ¼ mile :35½
GERTRUDE RIVES " ¼ mile :36¾
BILLIE BOYD " ¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23,

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912; (5)2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast. All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $4 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. His qualities as a sire are fully proven and breeders sending mares to his court have every assurance that the resultant foals will possess soundness, high individual excellence, and early and extreme speed. None better bred—none more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlan 1:58; 14 in 2:10
First dam Episode 2:18 half sister to Peter the Great 2:07¼
Second dam Santos, dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. His inheritance is of the kind that is breeding on most spectacularly and that he will found for himself a remarkable trotting dynasty seems inevitable. Bred right, built right, gaited right, and his few foals show that he breeds right. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address

EXPRESSIVE MAC 2:25 1-2

Sire of

Clara Mac 2:04½ **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of McKINNEY 2:11¼ and the great brood mare EXPRESSIVE 2:12½ by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at $25 the season, usual return privilege, or $35 to insure. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

Second Payments $5 Due

Monday, March 1st, 1915

Pacific Breeders Futurity Stake No. 15

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1914 to Trot and Pace at Two and Three Years Old

$2800 FOR TROTTING FOALS

$300 TO NOMINATORS OF DAMS OF WINNERS

$2100 for Three-Year-Old Trotters.
100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Trot.
800 for Two-Year-Old Trotters.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1800 FOR PACING FOALS

$250 TO OWNERS OF STALLIONS

$1200 for Three-Year-Old Pacers.
100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.
500 for Two-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-year-olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

SUBSTITUTIONS.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before May 1, 1916, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1914.

Address all communications to the Secretary,

E. P. HEALD, President

F. W. KELLEY, Secretary, Post Office Drawer 447, San Francisco, Cal.

$5,000.00 GUARANTEED — $5,000.00 GUARANTEED

Stanford-Occident Stake No. 1

To Trot and Pace at Three Years Old.

$3,000.00 to Trotters To be Given by the **$2,000.00 to Pacers**

California State Agricultural Society, 1917

ENTRIES TO CLOSE MARCH 1st, 1915

TROTTING DIVISION

$900.00 to 1st heat.
$900.00 to 2nd heat.
$900.00 to 3rd heat.
$300.00 to horse standing highest in summary.

PACING DIVISION

$600.00 to 1st heat.
$600.00 to 2nd heat.
$600.00 to 3rd heat.
$200.00 to horse standing highest in summary.

ENTRANCE AND PAYMENTS—$5 to nominate colt on March 1st, 1915; when name, sex, color and description of colt must be given; $10 Sept. 1st, 1915; $10 March 1st, 1916; $10 Sept. 1st, 1916; $15 March 1st, 1917.

STARTING PAYMENTS—$100 to start in trotting division; $50 to start in pacing division. All starting payments to be made ten days before the State Fair of 1917, at which the race is to take place. Nominators when making payments to start must designate whether the horse entered is a trotter or pacer.

CONDITIONS.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race, all other horses to go to the barn.

Heat purses divided 50, 25, 15 and 10%; the extra $300 for trotters, $200 for pacers in each division goes to the horse standing highest in summary. The Stanford-Occident Cup to be awarded to the colt standing highest in summary.

Distance 100 yards. A distanced horse shall be entitled to money already won. A horse distancing field or any part thereof is entitled to first money only. There will be no more moneys in each division or heat than there are starters.

Deductions from money winners — 1st 10%; 2nd 7½%; 3rd 5%; 4th 2½%.

Entries must be accompanied by the entrance fee.

Nominators are liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $5000, the amount of the guarantee, only.

Hobbles will be barred in trotting and pacing divisions.

Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

"LEADER" and "REPEATER" FACTORY LOADED SHELLS

A canvasback flies about 150 feet a second; a bluewing teal 130 feet; and other ducks, geese and brant from 75 to 115 feet a second. This means that the quickest shot needs a fast load, even when shooting the slowest-flying wild fowl. Winchester "Leader" and "Repeater" Factory Loaded Shells are the get-there-quick, hit-hard kind. They have the velocity and penetration to bag the swiftest-flying wild fowl. Their primers are quick and sure and they are loaded with the best of powder, shot and wadding. That's the reason experienced and successful wild-fowl shooters prefer Winchester "Leader" and "Repeater" Factory Loaded Shells to any other make. In any make of gun they give the fullest measure of shooting satisfaction. Dealers everywhere sell them. They are

MAKE BETTER SCORES

Most every shooter has his "dead easy" target. It may be a straightaway or an angle "bird." His "losts" are his hard targets,—those he should practice on until he can smash them as he does his "cinches." There is a short and sure way to become a better shot. It is by

USING THE

DU PONT

Hand Trap

to throw the kind of target you miss so often at the club. This trap is adjustable. The shooter gets a 35 or 70-yard straightaway, fast or slow, high or low, "jack rabbit," curvers and skimmers,—whichever flight he desires for improving his shooting. Such practice methods will surely result in better scores.

No shooter or club should be without the Du Pont Hand Trap. For training new members, or staging novelty events for experienced shooters, club officials will find this target-thrower the most practical device available.

If your dealer hasn't it, send us $4.00 and the Hand Trap will be shipped postpaid.

THE OUTLOOK FOR JUNE.

Midwinter interest in the forthcoming trotting meetings to be held in connection with the Panama-Pacific International Exposition is growing steadily throughout the country, as evidenced by correspondence daily handled by the committee in charge, and every indication points to the holding of meetings both in June and November of the very highest order—meetings that will be truly in keeping with the other features of the exposition of which they form such an important part, meetings that will in every way fulfill the fondest hopes of those who have labored so long and faithfully for their success.

An attractive folder has been prepared for early distribution to horsemen in every locality, the matter contained in it including the complete program for each meeting with the detailed conditions governing the events closing April first, as well as a resume of the conditions governing the colt stakes previously closed, and the twenty-thousand dollar stakes for which final entry may be made on June first. Incorporated in the folder are detachable entry blanks for both meetings, with a "stub" for a memorandum of entries made, so that horsemen will always have at hand a permanent record of their entries and all conditions governing the same. These folders will go in the mail next week and as the mailing lists are most comprehensive every horseman in the country should find himself in possession of one of them before many days go by. Parties desiring same and not receiving them may apply to the secretary, who will take pleasure in seeing that their wants are supplied.

Adverse weather conditions have contributed delays to the completion of the big track, but everything now is in readiness for the automobile races on Washington's birthday, barring rain in copious quantities in the intervening hours. The unusually heavy storms of February did some damage that had to be repaired under emergency pressure, but before our most recent showers fell Superintendent Maxwell had everything ready for use by either horses or autos—and a most inviting course it is. The top dressing is the same as that used on the three-quarter-mile track at the Stadium, which insures not only good drying qualities after rain but footing of the safest and fastest kind. Mr. Maxwell is a track builder of long experience, and horsemen who have paid recent visits to the grounds agree with him that he has never laid a faster, safer course than this one. With the conclusion of the auto races the latter part of next week the track will be turned over to horsemen who wish to take up their quarters there for the training season, and everything will be kept in the pink of condition for them until the close of the racing year. The stalls in the speed barns are in readiness for occupants, and many have been engaged by local horsemen for March first.

Night and day work has brought the big grandstand to completion, and its seating capacity promises to be taxed at its initiation on Monday next when the starters for the Vanderbilt Cup are called. The cup course utilizes all except the turn nearest the livestock buildings, the balance of the three mile and a fraction lap lying inside the grounds proper. The start and finish is "at the wire" on the homestretch, as in the harness events.

With the passing of the auto races and the first week of the exposition and the commencing of jogging on the part of local horsemen and the early arrivals of the visitors, the grounds of the P.-P. I. E. plant will have assumed the completed air of an old establishment. Before many weeks have gone by fast miles will begin to be in evidence; early in May it is probable that a joint matinee program will be staged by members of the California and San Francisco Driving Clubs, and from that time on the fun will be hot and heavy.

Don't let the opportunity for joining in get by you.

THAT FAIR BILL AGAIN.

With the re-convening of the legislature, which takes place in the near future, it should be a matter of comparatively few days until the fate of the district fair bill is made known and secretaries in California can set about their definite plans of operation for the season that is fast approaching—a course of procedure in which we are far behind our sister states to the north of us, their schedules for the year having been arranged some weeks ago.

We are inclined to the firm belief in the passage of the bill as it now stands and in its acceptance and signature by Governor Johnson if horsemen, stockmen, farmers and others directly and vitally interested in seeing it become a reality will unite in advising their senators and assemblymen of their wishes in the matter.

The amending of the bill to provide for seven instead of fourteen fairs, and the cutting down of the appropriation to a figure that will enable the fairs to become well established and at the same time make no serious inroad upon the state's treasury, were two steps that augur well for the future of the bill, another pleasing feature being that Assemblyman Judson, sponsor of the measure, acquiesced in these courses. It remains to be seen whether or not certain solons will be willing to "leave well enough alone" when it again comes up for consideration, for the fairs are too few in number to bring consolation to all ambitious localities that feel themselves entitled to recognition as district fair sites.

It is in preparing for this impending moment that we bespeak the united action of all interested parties. If the bill is left in its present form there is every reason to believe that it will meet with favor when presented to His Excellency, while if it is bolstered up to provide more fairs and larger appropriations there is absolutely no basis for the hope of it becoming an enactment. This is our ground for requesting that those most directly benefitted by its provisions acquaint their representative with their needs and their desires. It is a matter that requires but a few moments' time, and the horseman or breeder who stands idly by and makes no move to help himself on an occasion of this kind has absolutely no grounds for fault finding or "belly-aching" if the bill fails of the needed support.

We would suggest, too, that in your verbal or written message to your legislators, you make a plea for an early consideration of the measure by both senate and assembly, as much that should already have been done in making preparations for the season's fairs and race meetings is "hanging fire" pending their action. The success of the bill will remove many obstacles in the path of such enterprises that must otherwise remain, either to be overcome by private enterprise or to operate as a positive bar to the holding of fairs or race meets, singly or in conjunction.

Accept these statements which we have so often emphasized of late—that district fairs can come back only in a most modest and unpretentious manner, and that the successful establishment and administration of a mere handful of them means the ultimate coming of such an event to every section of California that can and will support one. The lazy acceptance of the theory that "I might as well be broke as the way I am" has kept many a poor man poor, while a belief to the opposite has enabled many a resourceful rustler to run a "shoestring" into a goodly stake. Let's take a long pull, a strong pull, and a pull all together and see if we cannot acquire the "shoestring" of district fairs upon which to base some future hustling operations in boosting them to a really creditable number.

FASTER STAKE CLASSES.

There is an ever increasing tendency to lower the classification for the major events of the American trotting turf—a tendency which we greet with pleasure as a step forward in racing conditions. The latest of the old established stakes to fall in line is the historic M. & M. at Detroit, one of the most highly esteemed of all trotting classics. For many years it was made for 2:24 trotters, the classification being advanced within recent seasons to 2:14. It was known in some circles that the Detroit Driving Club, its sponsors, were considering making it for a still faster class, and on Tuesday of this week came the definite announcement that for this season the main event of the blue ribbon meeting will be contested by 2:08 trotters. As the Detroit Driving Club occupies a position of prestige as the "bell cow" of the Grand Circuit it is highly probable that other points along the line will follow the fashion, and eventually all the greatest stakes, with the exception of the futurities, will be made for fast classes. The committee in charge of the Panama-Pacific meetings made the right kind of a move in establishing fast classes for their largest stakes, as the country is now fast learning.

Of all the things that have contributed to "laying up," "holding over," "educative campaigns" in which owners and drivers used every bit of cunning to stay in the money and at the same time avoid a mark and a "derricking," nothing has exerted a greater influence in encouraging these practices than the slow classes for which the great stakes have been made. For a horse to have a winning chance he needs must have a bit of racing education, and if he be a horse of genuine stake qualities he can be "educated" and still kept eligible to practically a green class only by the indulgence in the above mentioned systems—all infractions of racing rules and contributory to very unsatisfactory racing. The year book contains too many instances of horses racing pretty consistently in the money though never "out in front" for a season, or a portion of one, in order that the desired education can be obtained without great financial loss. How much better it would be for the man who has paid his dollar and perhaps laid a modest wager on the result of a race, believing that they are all out for every heat, if the horse receiving his campaign of education could step out and go an honest race without the fear of "getting out of the big stakes" by reason of winning a heat in respectably fast time!

Make winning worth while by a proper reward, and as the horse gets faster increase his earning opportunities rather than decrease them. Then will a number of knotty problems have been solved.

MONDAY, MARCH FIRST, is a date that we wish to bring to the attention of breeders in California and other coast states, payments being then due in two important colt stakes. Second payment of $5 must then be made to Secretary Kelley on nominations to Pacific Breeders Futurity Stake Number Fifteen for foals of mares bred in 1914, and entries close for the newly announced Stanford-Occident Stake Number One for foals of 1914, sponsored by the California State Agricultural Society. The conditions governing the Stanford-Occident are a departure from those previously applicable to the independent Occident and Stanford stakes, and are drawn for the express purpose of pleasing horsemen and breeders in general. Full conditions appear elsewhere in this publication, or may be obtained upon application to Secretary C. W. Paine at Sacramento.

HISTORY REPEATS ITSELF and the rise of the jitney bus, unless checked in some manner, means the passing of a certain measure of the automobile's popularity as a strictly "pleasure vehicle" for the idle rich. When one of their playthings descends to a point of plebeian utility for the benefit of the masses, the "plutes" call for a new deal and something more exclusively their own. Unwittingly, the jitney is doing a great service for somebody who can replace the "fallen idol" of the pleasure car—probably the inventor of a fool proof airship or the breeder of horses of really excellent class. See how far we miss it.

Stanford-Occident Stake No. 1

With the close of the racing season of 1916 there will pass from the speed program of the California State Agricultural Society two of the trotting stakes for three-year-olds that have for so very many years been fixtures among the coast classics for youngsters—the Stanford and the Occident stakes. In the form in which they achieved their fame originally we shall know them no more—at least for some years to come—and in their stead the society has announced the new Stanford-Occident Stake Number One, a combination that they hope to see become an even greater feature than were its predecessors.

The history of the Occident stake, which was one of the very oldest fixed events of the trotting turf, runs well back in years to the late seventies, when it was inaugurated by Leland Stanford in memory of the horse that ever ranked high in his esteem and which was the first trotter to bring a world's record to California—Occident 2:16¾, the brown son of Doc 449 and Mater Occidentis. The successes achieved by Occident were prime factors in stimulating the Governor to the subsequent great efforts in breeding which gave him and his their envied rank in trotting annals, and through the naming of the stake for the game gelding his owner judged rightly that the glory of the name would be much enhanced.

Owing to the damage done to our library at the time of the fire and the loss of much data not to be readily replaced, we are not just now in position to state positively the year of the inauguration of the Occident nor its earlier winners. From 1882, however, we have its history intact, and present herewith a condensed summary of the same:

THE OCCIDENT STAKES FOR THREE-YEAR-OLD TROTTERS.

Year.	Placed Horses.	Time.
1882.	Bertha (walkover)	.....
1883.	Sally Benton (walkover)	.....
1884.	Antevolo, Robert Lee, Griselda	2:34½

1901.	Italia, Commander Muckle (field distanced)	2:23½
1902.	Aristo, Cuate, Zombowette	2:17½
1903.	Tuna, Swift B., The Jester	2:18
1904.	Almaden, Marvin Wilkes, Carlokin	2:18
1905.	North Star, Bellemont, Princess Louise	2:15½
1906.	Della Derby, Silver Hunter, Prof. Heald	2:21¾
1907.	Nogi, Lady H., Reina del Norte	2:26
1908.	Cleo Dillon, Katalina, Dr. Lecco	2:15¼
1909.	Volante, Virginia Lee, Complete	2:13¼
1910.	Donasham, Expedio, Bon Guy	2:13¼
1911.	Ella Mac, Matawan (field distanced)	2:14¼
1912.	Albaloma, El Bel Maden, Baby Doll	2:15¼
1913.	Rags, Miss Gailey, Guacho	2:13¼
1914.	Esperanza, Bon Courage, Bon Cress	2:11½

The Stanford is an event of much more recent origin than the Occident, and in its nomenclature is the Agricultural Society's compliment to the gentleman to whom its debt—and that of the state and country at large—is so great, the founder of Palo Alto. Like its older companion it is one of the events eagerly looked forward to by horsemen and the race-going public, and the summary of its history shows it to have afforded some exceptionally good colt racing and to have been the medium of introducing to the trotting turf many performers who have achieved wide fame:

THE STANFORD STAKES FOR THREE-YEAR-OLD TROTTERS.

Year.	Placed Horses.	Time.
1898.	Dos Minutos (field distanced)	2:30
1899.	Dr. Frasse's Sister, Direct Heir, Elevator	2:25½
1900.	The Roman, Ben Liebes, Tom Smith	2:18¾
1901.	Almaretta, Della McCarty, Comm'd'r Muckle	2:26
1902.	Aristo, Zombowette, Gertie H.	2:22
1903.	Tuna, Swift B., The Jester	2:16½
1904.	Marvin Wilkes, Neergard, Carlokin	2:20
1905.	North Star, Athasham, Alto Downs	2:15

1907.	Nogi, Prince Lot, Reina del Norte	2:19½
1908.	Katalina, Dr. Lecco, Siesta	2:16¾
1909.	Easter, All Style, Complete	2:17
1910.	Bon Guy, Donasham, Pal	2:11¾
1911.	Ella Mac, Valentine Girl, Bon Volante	2:14½
1912.	Baby Doll, Wilbur Lou, El Bel Maden	2:11½
1913.	Rags, Miss Gaily (field distanced)	2:12½
1914.	Esperanza, Bon Courage, Nearest Alto McKinney	2:10

The decision to forsake these two great events in their original form and combine them under new conditions has been brought about by a number of circumstances. Primarily, both stakes observed Governor Stanford's well known and pronounced antipathy to the pacer, and were for trotting colts exclusively, working a hardship upon breeders who went to the expense of making nominations and then found themselves in possession of a real high class pacer that had no chance to show speed at an early age—it at all—if forced to trot. Moreover, three stakes for three-year-old trotters at one short meeting, with practically the same fields, is "spreading it thick" for even the best of youngsters, and with the newly inaugurated Stanford-Occident Stake the Society hopes to accomplish three definite objects: Secure a greater entry list, with relatively increased fields of starters, improve the quality of racing, and provide an earning capacity for pacing colts.

The first event of the new series is for foals of 1914 to trot and pace as three-year-olds in 1917 and has a guaranteed value of $5000, divided $3000 to trotters and $2000 to pacers. The conditions are drawn so that the races in no event will be longer than four heats, and the money is awarded on the every heat a race plan so popular with campaigning horsemen. The horse standing highest in the summary is the only one to receive money further than that awarded upon the standing at the close of each heat, further inducement to winning being held out by the presentation to the ranking entry of the coveted Stanford-Occident Cup. As nominators are liable for only such amounts as are paid in at any time they wish to drop their entry, and as colts can be carried until the time of payment of the starting fee at relatively small cost, we bespeak for the new offering a most liberal patronage. All particulars may be learned upon reference to the announcement elsewhere in this issue, or by addressing Secretary Paine at Sacramento for entry blanks.

NEW FOOT-AND-MOUTH OUTBREAK CONFINED TO A NARROW CHANNEL.

Washington, D. C., Feb. 15.—The discovery of foot-and-mouth infection in the stockyards of nine cities—Chicago, Pittsburgh, Indianapolis, Louisville, Buffalo, Cincinnati, Columbus, Jersey City, and Baltimore—which has resulted in the closing of these stockyards until they have been thoroughly disinfected, is regarded by the Federal authorities as undoubtedly a setback in their campaign to eradicate the plague but is considered to be by no means as serious a matter as if the disease had broken out in stock held on the farms. All the cattle affected were destined for immediate slaughter at various points. No stockers or feeders were included among them. The infection therefore has been laid over a trail that runs in straight, easily-traced lines from city to city. The stamping out of it is principally a matter of disinfecting all cars used in these shipments and all yards through which they have passed. On the other hand when the disease first broke out last fall it was spread over the country by a large number of shipments of stockers and feeders which were distributed more or less broadcast to the farms in many states. To trace each one of the animals in these shipments to its ultimate destination was a task of much greater magnitude than the authorities now face.

The new outbreak, however, in the opinion of the Federal authorities emphasizes the necessity of adhering for some time longer to the quarantine regulations that prohibit the shipment of any stock from the quarantined area for any purpose except immediate slaughter, and also prohibit its shipment at all to points in free area. If feeders and stockers were to be sent out from the quarantined areas there would always be the danger of the disease spreading once more among the farms, and the country being thrown back in the condition that it was in in October.

The Government also holds that cattle purchased for slaughter and found to be affected with foot-and-mouth disease shall not be paid for but may be condemned under the Federal meat-inspection law like any other diseased stock. Purchasers of cattle for slaughter in territory where there is reason to suspect the existence of the disease, purchase at their own risk, and there is no reason why the Government should insure them against the possibility of loss. For the Government to do this would be in fact to put a premium upon reckless buying of suspected animals and make the task of ultimately eradicating the disease much harder. Inspectors have also been warned against the possibility that stock ostensibly intended for immediate slaughter might be diverted for sale as feeders and stockers, and they have been instructed to see that all such stock is slaughtered without delay.

The racing and pari-mutuel measures in Nevada are up to the governor.

The Stallions at Hemet

Few horses of his years have been so prominent in public esteem for so long a time as has Wilbur Lou (3) 2:10¼, premier stallion at the Hemet Stock Farm, his career as a champion having begun at the yearling stage when in November, 1910, he established the then world's record for trotting stallions of the age at 2:19½. That he was a real race trotter and not merely an exhibition performer he proved pretty conclusively in his two-year-old form by winning his only engagements, the two-year-old divisions of the Breeders and Stake Fair futurities, without losing a heat and without being compelled to do more than equal the mark made by him as a yearling. As a three-year-old, however, he gained his greatest racing glory when he was returned winner of the senior divisions of the same stakes, earning his record in the third heat of a winning race in which was also established the world's record for a five-heat-race by a three-year-old stallion. He is the fastest colt that has participated in the coast classics, and his mark of 2:10¼ has been beaten by but one coast trotter of like age in the California futurities—Esperanza, whose race record of 2:10 was made this last season in the Stanford Stake.

Wilbur Lou through his blood inheritance has every right to the honors he has earned, as he carries an infusion of the blood of various of the most potent and prolific trotting families. His sire, Kinney Lou 2:07¾, raced a decade ago by Budd Doble, is one of the fastest and best bred sons of McKinney 2:11¼, his dam being the game old California race mare Mary Lou 2:17 by Tom Benton; second dam Brown Jennie (dam of two others with records two to five seconds faster than that of Mary Lou) by David Hill Jr.

Louise Carter (3) 2:24 was regarded by the late Martin Carter as one of the most promising mares for breeding purposes that he had ever owned, and subsequent developments have done much to demonstrate the soundness of Mr. Carter's theory, her produce to date including Wilbur Lou (3) 2:10¼, Mamie Alwin (3) 2:20½ with a later matinee mark of 2:13¼ and a five-year-old record of 2:12, and Martin Carter (3) 2:29¼, while her remaining foals show the same general characteristics as the ones named. She is very strongly bred in lines that have been most highly valued in brood mares, being a daughter of Chestnut Tom 2:17¼ (a son of Nutwood Wilkes 2:16½ and Zeta Carter by Director 2:17, second dam Lida W. 2:18½, the famous producing daughter of Nutwood 2:18¾). Ingar, dam of Louise Carter, is a most noted matron, having produced six performers, including the great sires John A. McKerron 2:04½ and Nearest 2:22½, both of whom are substantially represented in the 2:10 list through the performance of their get. Ingar is by Director 2:17, sire of the dams of five trotters and one pacer with records from 2:04½ to 2:08¼, and her dam is Anna Titus by Echo, sire of the dams of Direct 2:05½, Captain Derby 2:06½, Rex Alto 2:07¾, Loupe 2:09¼, and many others. Four generations of the maternal ancestors of Wilbur Lou have produced standard speed.

Bred to seven mares in the spring of his third year, Wilbur Lou begot seven foals, six of which were handled lightly as yearlings in 1914, every one making a most excellent showing. The Ella J. youngster owned in this city is one of the fastest babies on the coast, and the five handled by the farm showed as follows: Fiesta Lou paced to a record of 2:25 over the half-mile track at Riverside and worked a half there in 1:08¾; over the oval at the farm Selma Paley trotted a half in 1:13¾, with an eighth in :17¾, while Goldsmith Lou, Gertrude Rives and Billie Boyd negotiated the quarter at the trot in :35½, :36¾ and :38 respectively. This is a most encouraging start, and the future will undoubtedly see him obtain an enviable station in the great table of sires, a station in keeping with the youthful renown gained as a race and show horse—to both of which histories there are more chapters yet to be written. Breeders have been prompt in recognizing the genuine merits of the young sire, and he has been popular in the stud from the start. In point of number of nominations in the futurities closed last fall he ranked second in the Breeders and first in the State Fair, a remarkable showing for a stallion of his years.

As a stud mate for the yearling and three-year-old champion the farm maintains another son of Kinney Lou 2:07¾—the chestnut stallion Kinney de Lopez 2:23, whose blood lines on the maternal side are of a slightly different nature, his dam being Betsy Direct 2:25¾ by Direct 2:05½, sire of sixteen in 2:10 and the dams of Maggie Winder (3) 2:06¼, Alice May Direct 2:09¼, John Brydon 2:09¼, Black Badge 2:09¾, etc. Kate Chapman, second dam of Kinney de Lopez, was a famous mare on the road in days gone by, produced two standard trotters, and was a daughter of Naubuc and Kittie Patchen by Geo. M. Patchen Jr. 2:27, tracing on back to sturdy Morgan blood. Naubuc sired the dams of Directly 2:03¼, The Iceman 2:10, etc., and the blood of Geo. M. Patchen Jr. appears in the pedigree of many noted performers and is highly valued wherever found. Kinney de Lopez has had but very few foals, one of which, Don de Lopez, trotted a half as a yearling in 1:13¼, with an eighth in :17½, so that he will sire early and extreme speed is an accepted fact.

Both Wilbur Lou and Kinney de Lopez possess a richness of color and individuality that is most pleasing and attractive, and the best of dispositions and manners. Coupling these qualities with those enumerated above there is apparent every justification for their popularity in the stud—a popularity that will doubtless cause an early closing of their limited books for the breeding season of 1915.

FATHER POWER SUMMONED.

It was with a feeling of deepest regret that men and women of the coast country in all walks of life and of every religious faith learned of the death last week of Father Power at Livermore, for it is seldom given to a man of his position in life to achieve the wide spread respect and affection that was his. For two weeks he had waged a courageous battle against a severe attack of pneumonia, and by all except his physicians steadfast hope in his recovery was maintained until Wednesday afternoon, when the measured tolling of St. Michael's bell carried to those within hearing the sad tidings that the end had come. The heart was simply worn out in the struggle.

The funeral services which were held Monday at St. Michael's church were the most impressive and largest attended known to the valley to which the dead priest had so long been "Father." Following the eleven o'clock mass Sunday the body was carried to the church where it lay in state until the final services, viewed by hundreds of friends of all denominations, for the Father knew no lines of sect demarcation in commanding the friendship and respect of his fellows. On Sunday evening at 7:30 the offices of the dead were chanted over the remains, and at ten o'clock Monday morning was celebrated the solemn requiem high mass for the repose of the soul, the funeral cortege was formed, headed by a large delegation of visiting members of the clergy, and hundreds of people followed the remains to their last resting place in St. Michael's cemetery. All business of the community was suspended for the occasion.

Were the complete story of Father Power's life to be written it would reveal a fund of romance that would be an echo of days long, long gone—of the early church militant, of the crusades, of the days of the tournament and other sports, and of the epic that was "California in the making." He was a revert to generations gone when men were men purely for the satisfaction to be derived from so being.

Patrick Power was born at Carrick-on-Sur, County Tipperary, Ireland, on March 17, 1842, and was educated in the parochial schools in that city, later completing his education and taking holy orders at Carlow College. In 1872, newly ordained in the priesthood, he came to the United States and made his way directly to the Golden Gate, where he was made assistant rector of St. Patrick's church, this city. Two years later he was placed in charge of the church at Jackson, Amador county, remaining there until 1879, when he was sent to the scene of labors that was to be his until death.

The Livermore valley in that day was admirably fitted for the best development of a character such as the energetic young priest—athlete, sportsman, fighter, yet steadfast to the highest and best tenets of his religion. The adjacent territory was largely a cow country, with a population to whom a little "hell-popping" was a mere daily incident, social conditions were rather turbulent, the church new and the parish practically unorganized. In such an environment only a man such as Father Power could command respect and make his church a thing of usefulness in the community. The youngster, an athlete of prowess and a sportsman to the core, threw in with his parishioners in their daily lives—hunted and fished with them, raced with them, wrestled with them and, when occasion arose, fought with them to a finish until he had gained his way. Some of his early battles gained for him the appellation of the "Fighting Father"—a title in which he never took shame, for he was a true disciple of the church militant. Enemies were his in strength and number, but they were far overshadowed by the legions who named him friend, and by friend and foe alike he was accorded the hearty respect that was the secret of his success. He knew no lines of caste, or sect, or politics or wealth or poverty when it came to extending aid and encouragement or in fighting what was wrong in his community, and his ideas of right and wrong were clearly defined and stated without reserve.

Father Power came from a long line of sport loving ancestors, and everything in the way of clean sport found hearty support at his hands. Until coursing in this section fell into disrepute he was one of the foremost devotees of that pastime, while his love for a good horse and a keen, clean race lasted to the end. He was a close and constant friend to the late Monroe Salisbury and other horsemen who have contributed to the fame of the Livermore valley, a profound admirer of the American trotter and, withal, a most excellent judge of one in all respects. He owned the best road horses obtainable, always carrying excellent trotting blood, and was a familiar figure at Pleasanton Driving Park on any and all occasions. Only last December, bearing small evidence of the seventy odd years that he had lived in relentless activity, he was an interested spectator at the Pleasanton sale, and no man in attendance at that event received wider or warmer welcome.

The world could use a countless number of "Father Powers"—and there was but one. It could well do without clergymen of various other stamps whose name is legion. Long will his memory be cherished, and it were superfluous to carve more on his monument than the simple words: "Here lies a priest who was a man."

And Colusa "has gone done an' win a race"! It was a thousand dollar pacing stake over the ice at Ottawa and Harvey Ernest did the teaming.

GEORGE SWANN DIES IN LEXINGTON.

After an illness of fourteen months, George L. Swann, for over twenty-five years an employee of the late James B. Haggin, passed away at the Good Samaritan Hospital in Lexington, January 25 at 8:30 o'clock. He entered the institution October 13, 1913, and since that time has slowly but surely grown worse until the end came last Monday. Mr. Swann was born in 1842 at West Side Lake, near Troy, N. Y., and so far as known had no living relatives.

All of his life had been devoted to horses in various lines of endeavor. He was a most versatile man with equines, as he had driven stage in New York, been a successful trainer and driver of trotters, and since his connection with Mr. Haggin had charge of the Elmendorf Farm and Rancho del Paso thoroughbred stallions. This was no small task, as at one time the stallions on Rancho del Paso numbered over forty head. So good an authority as Dr. J. R. Hagyard said he considered Mr. Swann the best "stallioner" he had ever seen and that he was able to handle any kind of horse without any great difficulty.

His first work was as superintendent of the Albany Street Railway barns where he stayed eight years, going from there to Nevada. While in Nevada he rose to affluence, becoming a ranch owner with 8,000 cattle and 1,200 sheep, virtually all of which perished during one of the severe winters experienced there, leaving him practically a pauper. He then went to San Francisco, Cal., where he trained trotters for Colonel Harry Thornton, just then a very prominent man in California. Later he worked for Governor Leland Stanford as a trainer and driver, continuing until the death of Governor Stanford, when he began work for Mr. Haggin.

In 1905 when Mr. Haggin sold Rancho del Paso, he came to Kentucky and took up his residence at Elmendorf. Four years later he shipped a load of horses to Argentine for the farm, which proved to be a stormy trip, and the excessive heat appeared to affect him greatly, he never appearing in as good health as before. In February, 1913, he was put on the retired list at Elmendorf at full pay. Hardening of the arteries was the trouble that caused his death.

His greatest success as a trotting horse trainer was probably with the stallion, James Madison, to which he gave a record to high wheels of 2:17¾, which horse later attained considerable reputation as a sire, the best of his get being Brilliant Girl 2:08¼; Tuna (4) 2:08¼, and Emily 2:10. At Rancho del Paso and Elmendorf he had charge of many stallions of international reputation, which included the great Salvator, Star Ruby, Water Cress, Water Boy, Africander, Royal Flush and many others.

Mr. Swann was a man of pleasing manner and made many friends in Lexington, as well as the other places in which he had lived. He was one of those "good fellows" who are always accepted as friends on short acquaintance, and no one ever had occasion to regret that he numbered him among his friends.

His favorite dog, Jerry, a big collie, now about ten years old, that he brought with him from California when he first came here, and his favorite horse, Greville, a twenty-five-year old stallion, were frequently brought in by George Miller, who has charge of the mares and the stallions also since Mr. Swann's illness, so that he could see them. Greville was for a number of years Mr. Swann's driving horse.—Trotter and Pacer.

Our stallions announcements are increasing in number with each issue.

Nevada Stock Farm

There was a time when the west numbered among its highly valued assets a goodly array of establishments devoted to the production of the thoroughbred horse, but with the coming of the great wave of "reform" that put racing under the ban, all but the veriest handful of these have gone the way of the great trotting nurseries that at one time kept them company. With no adequate market for their produce, the big stock ranches made way for growing cities, small farms, truck patches, orchards, and the like, and only quite recently has there seemed reason to look for a revival of the breeding industry. Some of the older farms have managed to exist through the lean years, and that these will soon be making repayment for their owners' steadfastness and that their numbers will be considerably augmented by newly formed studs seems at this writing highly probable—in fact, practically assured.

With the coming of relieving legislation in some states and the effecting of satisfactory, practicable compromises in others, the impetus given the thoroughbred industry has been such as to attract various newcomers to its ranks. Both in the east and the west this impulse has made itself felt, and the operations of none of the thoroughbred breeders, old or new, have been watched with more interest than have those of George Wingfield, of Reno and San Francisco.

Confident of the future of racing in his own state and in its ultimate general return on a new and more acceptable and substantial basis than before, Mr. Wingfield was one of the first of the westerners to prepare to benefit by the new regime. Taking for the foundation of his enterprise a portion of the famous Alamo Hereford Stock Farm of the late Governor Sparks, who was one of his staunchest friends, Mr. Wingfield organized in February, 1914, the Nevada Stock Farm, whose headquarters are some two and one-half miles south of the city of Reno. The establishment is a hundred-thousand-dollar Nevada corporation, whose executive personnel is as follows: George Wingfield, president; H. G. Humphrey, vice-president; C. F. Burton, secretary and treasurer; M. P. Guilliams, superintendent, these gentlemen, with W. H. Moffat, composing also the board of directors.

Imbued with a genuine love for the horse of good qualities from long and faithful services rendered by his four-footed partners in his earlier years on the cattle trails of the sage brush state and the grimmer territories adjacent to its borders, Mr. Wingfield set about gathering a band of brood mares and a class of stallions from which he should be able to produce performers equal in quality to those of any similar establishment in the land. At present in service are Star Bottle, winner of many famous stakes and present holder of the stallion record of 1:44 2-5 for a mile and a sixteenth; Ossary, famous as a sire on both sides of the Atlantic; Montgomery, the good son of Pessara—Montgomery Cooper, and Deutschland by imp. Sain—Derforgilla.

The mares have been selected with equal care from the ranks of the best matrons obtainable, and those at present enrolled on the farm's books include Alice Cary, by imp. Trappean—Abbie F.; Afamada, by Duke of Montrose—Laura W.; Anna May, by imp. King Eric—Fig Leaf; Avona, by imp. St. Avonicus—Orellana by Ormonde; Cake Walk, by Bard—Heel and Toe (sister to Gold Heels); Chaste, by Jim Gore—imp. British Blue Blood; Dora I., by imp. Eagle Plume—Froila; Divina, by imp. Bassetlaw—Angelique; Eleven Bells, by imp. Quick Lime—Elsie S.; Fay Muir, by imp. Canopus—Duplex; Geheimniss, by imp. Sain—Theresia; Rosie Posie, by Saunders—Elsie L.; Shasta Water, by Maxim—Tyranny; Silver Line, by Free Knight—Silver Lining; Sugar Maid, by Salvado—Saccharoid; Island Queen, by Dick Wells—Glena; Ina L., by Otis—Jungfrau; Jeanne d'Arc, by imp. Ben Strome—Naoma; Kumis, by imp. Atheling—imp. Kisberina; Lady Vera, by imp. Woolsthorp—Philura; Lady Trinity by imp. Star Shoot—Sempre d'Or by Logic; Marion Rose, by Balgowan—Sinfi; My Helen, by Filigrane—Maid of the Order; Ocean Dream, by Henry of Navarre—Golden Dream; Peggy O'Neal, by King William—Cleodora; Phyllis, by imp. Goldfinch—Phillistia; Princess Zeika, by Rey del Sierra—Countess Zeika; Ravelette, by Flamboa—Shannon Rose; Recreation, by Morello—Picnic; Roselawn, by Orsini—imp. Castle Hill; Schwalbie, by imp. Sain—Gratitude; Uarda, by Strathmore—Zuhlan, and Celesta, by imp. Sempronius—Rezia. Celesta is at present a member of the eastern racing stable and holder of the American record for one and one-sixteenth miles, 1:42¾; that she will prove a highly valuable matron when her racing days are over and bring further laurels to the farm through the performance of her produce is a most logical conclusion.

A. F. Dayton, well known to the devotees of thoroughbred racing, is in charge of the stable racing this season in the east under the Nevada Stock Farm colors, which is composed of Celesta, Scarlet Oaks Mineral Water and Finisher. Last fall the farm sent to Sacramento in care of Trainer George Strate one of the nicest bunches of yearlings ever seen on the coast, largely from the Keene establishment in Kentucky, including a chestnut colt by Superman—Jarto, bay colt by Hippodrome—Fleeing Venus, bay filly by Voter—Hanrose, bay filly by Hippodrome—Calyx, chestnut filly by Voter—Hattie Walker, bay filly by Voter—Fair Empress, and the brown filly by Sweep—Grace Commoner. In Strate's hands these youngsters have developed most promisingly during the winter, and some of the number should give a good account of themselves in the juvenile events when they go east.

Mr. Wingfield has spared no possible effort in his work in behalf of the bills creating the racing commission and providing for pari-mutuel wagering in his state, and, in company with Messrs. R. J. MacKenzie and A. B. Spreckels, has been one of the prime movers in trying to inaugurate a running meeting in connection with the P.-P. I. E., a proposition that is meeting with a great deal of approbation and has a good chance of becoming a reality. Californians would appreciate a glimpse of the thoroughbreds once more, minus the previous ever-present and ever greedy "bookie," and if they get it during the exposition their thanks will be due to the above coterie of owners and their associates.

At any rate, here, in Nevada, and in the east, the course of the Nevada Sock Farm colors will be watched with a great deal of interest, and sportsmen everywhere join in wishing the new nursery long life and an even break in the racing luck.

NOTES and NEWS

The Schwartz stable goes to Pleasanton next week to commence real preparation for the racing season.

◈ ◈ ◈

Onward McGregor (3) 2:23¼, in the stable of Bert Webster at Pleasanton, is the most recent addition to the ranks of stallions whose services are offered to breeders through the medium of this publication.

◈ ◈ ◈

A recent card from John Quinn at San Jose states that horses and horsemen at that point are getting along flourishingly and that things are shaping up well for speed manufacture.

◈ ◈ ◈

The first foal of the year at Curles Neck Farm, the Virginia establishment of C. K. G. Billings, is a nice filly by The Harvester 2:01 out of Yo San J. by Hershon 2:29¼, sire of the dams of Nathan B. 2:06¾ and Lady Grattan 2:08¾.

◈ ◈ ◈

Auctioneer Billy Higginbottom will shake the dust of the city off his feet next week long enough to go up to Davis and get the high dollar for the heavy horses going through the ring at the draft horse breeders' sale.

◈ ◈ ◈

Two of San Francisco's best known horsemen are in Southern California giving the "once over" to some trotting stake timber. They took their pocket books along and will probably bring home an equivalent in horse flesh, if representations previously made turn out to be correct.

◈ ◈ ◈

President Dan Hoffman of the California Driving Club did yeoman service in upholding the trotters' end of the horse show programs with the team composed of Tom Smith 2:13¼ and Jonesie Mac, by Carlokin 2:07½. They make a great pair to pole, and were the champs of their classes straight through.

◈ ◈ ◈

According to reports from Walnut Hall Farm the fastest halter trotter that ever hit the blue grass is in the present yearling crop—a colt by San Francisco, dam by Moko, second dam the dam of Tenara 2:05¾, Charmond 2:10¼, etc. Why shouldn't he make a trotter?

◈ ◈ ◈

Eastern reports have it that Directum I 1:58 will take in the P.-P. I. E. meetings. Let him come. Everybody come—nobody barred but those in bad with the parent association at the time the meetings come off, and they can find a comfortable seat in the grand stand.

◈ ◈ ◈

Jack Adkins is expected here in a few days to take up Buckhorn, Leo Skolny, San Vega, Helen Barbee, Sea Shell and Adelaide T., belonging to R. J. MacKenzie, and which are now running out at Hal Price Headley's Beaumont Farm.—Thoroughbred Record.

◈ ◈ ◈

J. H. Nelson of Selma is extending his operations as a "stallioneer," his last move being to purchase from A. Guthrie of Dinuba the mammoth jack that has proved so popular in his neighborhood. As Mr. Nelson already has a first class jack at the ranch this new fellow will be established in service at the St. George Stables, Selma.

◈ ◈ ◈

Wm. T. Chaffin died early in the present month at his home in Columbia, Tenn., where for many years the breeding farm of Chaffin Brothers has held high rank among establishments of its kind. Walter Direct 2:05¾, Hal Chaffin 2:05¼, Direct Hal 2:04¼ and many other famous race horses and pacing sires were bred at the Chaffin farm.

◈ ◈ ◈

Registrar Best and his corps of statisticians started in to compile the summaries and tables of the new year book so as to show the eligibility of all recent performers under the new rules that class them by their time in their fastest winning race, but found the task too much and threw up their hands and returned to the old system.

◈ ◈ ◈

Uhlan 1:58 goes to New York in a few weeks for use to saddle by his owner. Mr. Billings is reported to be contemplating a trip to the exposition with Uhlan 1:58, The Harvester 2:01, and other members of the famous band of champions gathered at Curles Neck Farm, and we trust that the intention will develop into an actuality, as the eastern fancier and his horses would be most welcome visitors.

◈ ◈ ◈

Charley Jeffries, the well known western trainer who has been in the northwest of late, arrived back in his old stamping grounds last Saturday morning and will probably spend this season in California. Charley has spent a good portion of the last year in the hospitals in Spokane and shows it, but a few months in California will probably set him up in good shape again.

◈ ◈ ◈

Jacob Peter Patery, widely known in this portion of California as an exceptionally expert and reliable shoer of harness horses, died early last week in Oakland, death following only a few hours after an operation which had been made in the hope of restoring him again to health. He was nearing his sixty-first birth anniversary and is survived by his wife and three adult children.

Messrs. F. E. Marsh, W. J. Davis and H. T. White have been appointed as the committee to select the cups to be awarded by the American Trotting Register Association to the winners of the major standard bred classes at the P.-P. I. E. shows this fall.

◈ ◈ ◈

Edward Peterson of Omaha arrived on the coast some days ago and is stopping at the Palace Hotel and making frequent auto trips to Pleasanton to spend the day with his horses in the stables of Frank and Marvin Childs.

◈ ◈ ◈

The New Zealand Trotting Record for January 11 carries a very good picture of the two American trainers who were present at the summer meeting at Greymouth—Messrs. James Conway and Charles James. The latter had the mount behind Beach Boy in the Mawhera handicap at a mile and a half, drawing five seconds. The Journal credits the event as being one of the best contests ever witnessed at Greymouth, with Beach Boy getting a rather rough passage, pocketed on the rail, but making an excellent race when he had a chance, finishing half a length behind the winner. James returned to Christchurch with the Boy at the close of the Greymouth meeting.

◈ ◈ ◈

The consignments to the First Annual Sale of the California Draft Horse Breeders' Association, to be held next Wednesday, February 24, at the University Farm at Davis, include some of the very best stallions and mares, both native bred and imported, that are to be found in California and persons in the market for breeding stock of this class will make no mistake in making selections from this offering. The quality line has been drawn very rigidly for the purpose of protecting purchasers, and the popular families of the drafter are generously represented. Catalogs may be obtained upon application to Secretary J. I. Thompson, Davis, and parties unable to appear in person may mail or wire bids to either Mr. Thompson or Auctioneer Wm. Higginbottom, at the same address.

◈ ◈ ◈

Dates for the fall races on the Santa Fe circuit have been assigned as follows: Lamar, week of August 16; Las Animas, August 23; Rocky Ford, August 30; Sugar City, September 6; Pueblo, September 13; Trinidad, September 20; Raton, September 27; Albuquerque, October 4. The classes for the speed program is as follows: Trotting—2:17, 2:24, free for all and green class. Pacing—2:15, 2:24, free for all and green class. The officers selected to manage the affairs of the circuit for the coming year are: President, Lewis Swink, Rocky Ford; vice-president, C. O. Fisher, Raton; secretary, J. L. Beaman, Pueblo; treasurer, Will R. Murphy, Las Animas; presiding judge, D. L. Silver, Lamar. We notice that they strike Pueblo at the time of the state fair when the northern circuit also has dates there but this will not conflict as they can all enter the same races.—Field and Farm.

◈ ◈ ◈

A number of eastern journals have of late been passing around an item similar to this one from the Horseman: "Guy Borden 2:07¼ has been reported by some of our contemporaries as a possible starter in the $20,000 pace at San Francisco, but to do this he will accomplish a feat never heard of before in the world's history, as he died on October 13, 1913, and must be brought back to life before he starts." Probably this item and the others like it arose from a partial perusal of the entry lists published in a recent issue of the Breeder and Sportsman. Our closing paragraph of the preface to the detailed list read that "instances will be noted in the early entries where horses are ineligible by record, or are dead, or known from other sources not to be probable starters, but as owners have not yet made declaration of transfer or substitution, as the case may call for, they appear as originally made." That lets us out, as it is merely a case of our eastern friends failing to "read it all" and jumping at conclusions.

◈ ◈ ◈

The old reliable Michigan Short Ship Circuit has been reorganized for the season of 1915 and the following dates assigned: Detroit, July 5; Jackson, July 12; Lima, July 19; Findlay, July 26; Toledo, August 2; Monroe, August 9; Port Huron, August 16; Saginaw, August 23; Bay City, August 30; Detroit (Michigan State Fair), September 6; then the fair circuit composed of Jackson, September 13; Howell, September 20; Charlotte, September 27; Saginaw, October 5. The usual array of class purses will be offered, with early closing thousand dollar stakes for 2:24, 2:20, 2:17 and 2:15 trotters and 2:21, 2:18, 2:14 and 2:13 pacers, while each meeting will give a $500 stake for three-year-old trotters. Conditions determining standing were made to conform with rules 152 and 153 in the A. T. A. code, with the addition of "if at the end of five heats two horses are tied with the lowest number of points for first money the one having the fastest heat to his credit shall be awarded first place."

RECOLLECTIONS OF THE THOROUGHBRED CROSS.

" I have been asked why other breeders of trotters never had the success with the thoroughbred blend that Gov. Leland Stanford had," writes Hamilton Busbey in a recent issue of the Horseman. "One reason is that they did not have an action controlling stallion like Electioneer, and another is that they were not so persistent in efforts to create what might be called a new type, as was the proprietor of Palo Alto Stock Farm. The resources of that establishment were unlimited, and failures only stimulated to greater effort. The educational system at Palo Alto also was in advance of that of other establishments. Hambletonian was a natural trotter, and when bred to Green Mountain Maid, the trotting propensity was increased in the foal. Harry Clay was not the gamest horse in the world, but his blood, as C. J. Hamlin used to say, was like oil to machinery.

"Gov. Stanford was fortunate in selecting mares possessed of what we might call antagonistic action to breed to Electioneer. One of these was Dame Winnie, a chestnut, 15.2 hands high, by Planet (son of Revenue and Nina by Boston), dam Liz Mardis by imp. Glencoe, a horse of great power and symmetry, and winner of the 2,000 guineas and the Ascot and Goodwood Cups; second dam Fanny G. by imp. Margrave, a big and lengthy horse, by Election, that won the Criterion Stakes and the St. Leger prior to being sent from England to Virginia, and third dam Lancess by Lance, a son of the famous American Eclipse.

"Dame Winnie was bought in Kentucky for a moderate price, and at Palo Alto she produced in 1881 to General Benton the bay gelding, Big Jim, which trotted to a record of 2:23½. Her greatest successes were by Electioneer. Palo Alto, her foal of 1882, trotted to a four-year-old record of 2:20¼, to a seven-year-old record of 2:12¼, and to a nine-year-old record of 2:08¾. Although not the smoothest gaited of horses, he was dead game and lasted longer on the turf than many trotters possessed of less friction. His sister, Gertrude Russell (1883), was a very resolute mare and lameness forced her to retire from the track with a record of 2:23½. I saw both Palo Alto and Gertrude Russell in numerous races.

"Columbine was another good mare carrying thoroughbred strains sent to the court of Electioneer. She was a bay of 15.3 by A. W. Richmond (son of Blackbird by Camden and of a daughter of Rattler), dam Columbia by imp. Bonnie Scotland, son of Iago and the celebrated Queen Mary, 2nd dam Young Fashion by imp. Monarch; 3rd dam Fashion by imp. Trustee; 4th dam Bonnets O'Blue by Sir Charles by Sir Archy and 5th dam Reality by Sir Archy, son of imp. Diomed. The blood of Bonnie Scotland and Trustee had proved plastic in action, and it aided Columbine to produce fast trotters like Anteeo 2:16¼, and Antevolo 2:19¼, when bred to Electioneer.

"Neither Palo Alto, Anteeo nor Antevolo has produced speed like May King (1886) 2:20, by Electioneer, dam May Queen 2:20, by Alexander's Norman (son of the Morse Horse); 2nd dam Jenny by Crockett's Arabian, by Mokhladi, an Arabian imported by A. Keene Richards of Blue Grass Park.

"It was my good fortune to know May Queen before she was a record trotter and I often rode in double harness with Mr. Richards behind the sons and daughters of Mokhladi. Maiden, the sister of May King, trotted to a record of 2:23 at three years old and was put to breeding. She was a failure as compared with May King. Opportunity may have had something to do with this.

"Young Miss, a daughter of Young Jim, the handsomest of the sons of George Wilkes 222, dam Miss Mambrino by Red Wilkes, a big, rugged son of George Wilkes, was bred to May King and the result was Bingen 2:06¼, founder of a great family of trotters. Kinglyne, the full sister of Bingen, was in achievement far below the standard of her brother. Members of families differ in temperament and action and this well known fact adds to the uncertainty of breeding.

"When Electioneer was bred to Lula Wilkes, daughter of George Wilkes and Lula (a fast but erratic daughter of Norman and Kate Crockett) the outcome was Advertiser. He trotted to a record of 2:15½ and when bred to the famous Beautifull Bells, by The Moor, gave us Adbell, whose 2:23 was the champion trotting record for yearlings from 1894 to 1909. I saw Lula in her speed flights on mile tracks and entertained the belief at one time that she would become the champion trotter. The trouble was in her head, not in her action. In the days of his prestige an offer of more than one hundred thousand dollars was refused for Advertiser.

"Edith, a bay mare of 15.2 by George Wilkes, dam Edith Carr by Clark Chief, 2nd dam Easter Carr by imp. Margrave, was bred to Electioneer and the result in 1886 was Hummer, who passed to Wm. Simpson of Empire City Farms. Although he was of the Electioneer-George Wilkes combination he did not trot to a standard record, but produced 17 trotters and 12 pacers, and his blood is breeding on. Mr. Simpson at one time expected him to eclipse Advertiser as a sire of speed.

"A. J. Alexander was the first conspicuous breeder to use thoroughbred mares for the purpose of increasing the speed rate of the trotting horse. That was during and immediately after the Civil War, and trotting horse breeding was in an experimental stage. Mr. Alexander's two greatest successes in this line were Miss Russell by Pilot Jr., out of Sally Russell, thoroughbred daughter of Boston, and Midnight by Pilot Jr., out of Twilight, thoroughbred daughter of Lexington, son of Boston. Miss Russell, bred to Harold, son of Rysdyk's Hambletonian, gave us Maud S., long the undisputed queen of the trotting turf, 2:08¾ to high wheel sulky on a regular track; and Midnight, bred to Dictator by Rysdyk's Hambletonian, furnished us Jay Eye See, the great rival of Maud S., and whose 2:10 at Providence made him the champion trotter for one day."

THE HORSE SHOW.

From the point of view of both exhibitors and spectators, the horse show at the Riding and Driving School last week was a most successful and enjoyable event, the support accorded and the pleasure derived from it promising much for the future of the affair as one of the fixed events of the winter season.

It would have been a hard matter for those in charge to have arranged a more comprehensive program, everything in the horse line from the most diminutive children's pets to the biggest draft stallions in the local barns being provided with opportunity for winning cups, ribbons or cash, and in almost every instance the classes were well filled. The grade of horses brought out in the competitions was exceptionally high and a number of the winners at able affair, the support accorded and the pleasure into the ring with the cracks of the country at the P.-P. I. E. shows.

Jumping exhibitions, drills and polo added to the dash of the evening programs and were much enjoyed. Society turned out en masse to fill the boxes and join in the various social events that were the companion attractions offered at the club, the loft having been most harmoniously decorated and prepared for the occasion.

The profits of the show were very satisfactory and will do much toward relieving the financial worries that are besetting those in charge of the good work being done by the People's Place. The officials in charge were Messrs. J. J. Gethin, manager; S. E. Kramer, secretary; Dr. C. Masoero, veterinarian, and W. J. Clements, Vancouver, ringmaster. Mr. D. O. Lively of the P.-P. I. E. Department of Livestock made the awards in the drafter classes, while Messrs. Godfrey Preece of New York, John W. Considine of Seattle, and Capt. L. R. Ball, U. S. A., picked the winners in the general program.

Following are the selections of the judges for first and second horse in each class:

THURSDAY EVENING.

Roadsters, trotters—Allan first, S. Christenson; Tom Smith second, D. E. Hoffman.

Saddle horses, three gaits—Bessie first, Mrs. C. H. Kirby; Kildare second, Miss Ethel B. Davie.

Saddle horses, five gaits—Mexico first, S. L. Goldstein; Midnight second, Mrs. W. L. McGuire.

Polo ponies, novice—Hussar first, Lt. D. L. Roscoe; High Spots second, Harry Hastings.

Combination horses, to harness and under saddle—Killarney first, Mrs. E. H. Lockwood; Bettina second, Mrs. F. N. Woods, Jr.

Police horses—Buster first, Officer G. A. Merchants; Barney second, Officer M. Hanley.

Horses suitable for cavalry—Golden first, E. C. Ford; General second, E. de L. Cebrian.

Heavy harness horses—Lady Barbara first, Miss Marucia Mintzer; Delight second, E. J. DePue.

Stock horses—Flying Dutchman first, W. S. Tevis, Jr.; Sergeant second, G. A. Merchants.

Ladies' jumping class—Esperanza first, F. E. Abecassis; Arab second, H. G. Leonard.

FRIDAY AFTERNOON.

Belgian stallions—Dragon first, Zola de Commin second, Dunham-McLaughlin Co.

Roadsters, pacers—Hamburg Belle first, John Ginocchio; J. G. P. second, Dexter Prince Stables.

Roadsters, trotting teams—Tom Smith and Jonesie Mc. first, D. E. Hoffman; Miss Johnson and Mackay second, Ed Kelley.

Saddle horses, special—Lee Rex first, Leon Liebes; Alpha second, Judge E. A. Bridgeford.

Harness pairs—Starlight and Harriet first, Kelley's Stables; Delight and Emiline second, E. J. DePue.

Trotting Marathon—Smiley Corbett first, S. Christenson; Ida M. second, H. A. Boyle.

Percheron stallions, special—Jusqua first, Mrs. Anita Baldwin; Motif second, Dunham-McLaughlin Co.

Runabout classes—Chester Chief first, Mrs. Carolyn Schreiber; Delight second, E. J. DePue.

Saddle horses, three gaits—Killarney first, Mrs. E. H. Lockwood; Golden second, E. C. Ford.

Polo ponies, light weight—Problem first, G. T. Cameron; Tango second, W. S. Tevis, Jr.

Saddle horses shown in hand, two types—With long tails, Rex Mack first, A. W. Pike; Undulata Annie second, Mrs. W. C. Ralston. With short tails, Star first, E. S. Heller; Chester Chief second, Mrs. Carolyn Schreiber.

Drivers single, business buggies—Alto Trix first, E. M. Doyle; Black Belle second, Kelley's Stables.

Saddle horses, three gaits—Star first, E. S. Heller; Delight second, E. J. DePue.

FRIDAY EVENING.

Roadsters, trotters—Tom Smith first, D. E. Hoffman; Alto Trix second, E. M. Doyle.

Thoroughbred saddle horses—Bob White first, Oscar Romander; Lord Golden second, Mrs. E. H. Lockwood.

Ladies' phaeton class—Lady Barbara first, Miss Marucia Mintzer; Pluto second, Mrs. T. L. Johnson.

Saddle horses, five gaits—Chancellor first, Mrs. E. H. Lockwood; Alpha second, Judge E. A. Bridgeford.

Horses suitable for officers' mounts—Fox Catcher first, Lt. D. L. Roscoe; Diffident second, Gen. W. S. Schuyler.

Tandem harness class—Pluto and Proteus first, Mrs. T. L. Johnson; Delight and Emiline second, E. J. DePue.

Ladies' saddle horses—Delight first, E. J. DePue; Kildaire second, Miss Ethel B. Davie.

Saddle horses, three gaits—Golden first, E. C. Ford; General second, L. de L. Cebrian.

Saddle horses, three gaits—General first, L. de L. Cebrian; Sligo second, Mrs. W. C. Ralston.

SATURDAY AFTERNOON.

Children's ponies, 12.2 and under—two types, Bonny and Silver firsts, Miss Laura McGinn and Master Jerry Bishop.

Children's ponies, 14:1 and under, to harness—Proteus first, Mrs. T. L. Johnson; Melba second, Miss Edith Goldstein.

Saddle tandems, long tailed—Lee Rex and Rex Mc first, Leon Liebes and A. W. Pike; Gwendoline and Lady Io second, E. J. DePue.

Children's ponies, 12.2 to 13.2—Mary first, Miss M. Fleishacker; Beauty second, Miss M. O'Connor.

Polo ponies, weight carriers—Flying Dutchman first, W. S. Tevis, Jr.; Peanuts second, G. T. Cameron.

Children's ponies, 13.2 to 14.2—Melba first, Miss Edith Goldstein; Chum second, Miss Barbara Payne.

Trotting teams—Jonesie Mc. and Tom Smith first. D. E. Hoffman; Smiley Corbett and Sutton second, S. Christenson.

Saddle horses, three gaits, open—Killarney first, Mrs. E. H. Lockwood; Bettina second, Mrs. F. N. Woods, Jr.

Combination horses—Delight first, E. J. DePue; Pluto second, Mrs. T. L. Johnson.

Hunters or jumpers—Bob White first, Oscar Romander; Czarea second, Miss Beatrice Nickel.

SATURDAY EVENING.

Heavy harness horses—Oregon first, L. S. Greenbaum; Emiline second, E. J. DePue.

Polo ponies, championship—Lightweight, Flying Dutchman, W. S. Tevis, Jr.; heavyweight, Problem, G. F. Cameron.

Saddle horses, park hacks—Delight first, E. J. DePue; Hilarity second, F. E. Abecassis.

Saddle horses, five gaits, championship—Chancellor, Mrs. E. H. Lockwood.

Saddle tandems, short tail—Emiline and Delight first, E. J. DePue; Kildaire and Glenn second, Mrs. W. C. Ralston.

Ladies' saddle horses, three gaits—Killarney first, Mrs. E. H. Lockwood; Gwendoline second, E. J. DePue.

Saddle horses, 15.2 and under, championship, two types—Long tail, Kildaire, Miss E. B. Davie; short tail, Delight, E. J. DePue.

Heavy harness horses, championship—Lady Barbara, Miss Marucia Mintzer.

Saddle horses, over 15.2, championship, two types—Long tail, Golden, E. C. Ford; short tail, Killarney, Mrs. E. H. Lockwood.

Jumpers, hurdle and broadjump—Esperanza first, Hilarity second, F. E. Abecassis.

A. T. R. A. MEETING.

The annual meeting of Stockholders of the American Trotting Register Association was held in Chicago at the offices of the corporation on last Wednesday, Feb. 3, at high noon. There being no business other than that of a routine nature the attendance was very light. The stockholders present in person were: Wm. Russell Allen of Pittsfield, Mass.; Paul Wilson of Menominee, Wis.; Fred E. Marsh of Libertyville, Ill.; Lee Sturgis, W. J. Davis, W. H. Knight and Frank E. Best, the last four named all of Chicago. The only newspaper men present were Henry Ten Eyck White and Arthur C. Thomas.

The committee on credentials — Messrs. Wilson, White and Best — found 533 shares represented out of 960. A number of other proxies were received, but the signers had neglected to affix revenue stamps, as required by the new law, and they could not be voted. The shares represented last year were 741, the year previous 662.

The treasurer's report showed the following receipts (odd cents omitted): Balance on hand, $4,536; registration receipts, $10,365; certificates, $2.16; transfers, $66; register sales, $2,790; Year Book sales, $2,665; miscellaneous, $85; interest, $148; total, $20,917.

The payments were: Salaries, $6,727; rent, $900; postage, $484; stationery and printing, $556; refunds, $214; miscellaneous, $386; discount, $23; advertising, $62; total, $9,348, leaving a surplus of $11,579.

President Allen announced that the year'ss profits were $5,962 as compared with $4,684 the year previous, but explained that the printing of the 1914 year book had not been deducted from this year's business, so, in reality, the profits for the past year were less than in the previous year.

The cause of the falling off in registrations was discussed. The passing of the road horse, due to the automobile, was assumed to be responsible for most of it. Mr. White called attention to the thousands of horses previously bred and owned by physicians alone. Mr. Thomas stated that Kentucky Futurity figures showed a falling off in entries that was more noticeable on the part of large breeders than of small ones. Mr. Best drew attention to the gradual increase in number of race meetings. Mr. Knight inferred, since breeding was declining and racing was increasing, that it was only a question of time till there would be a shortage of light harness horses.

The following ten directors were elected for the ensuing three years: Wm. Russell Allen, R. C. Estill, E. D. Gould, W. C. Brown, H. K. Devereux, Sterling R. Holt, P. P. Johnston, W. H. Knight, W. G. Simpson and Paul Wilson. Messrs. Estill and Gould are new directors, the former taking the place of J. W. Bailey, resigned, the latter of Lucas Broadhead, deceased. The vacancy caused by the death of L. V. Harkness was filled by electing David M. Look with one year to serve. The vacancy caused by the death of John H. Shults was filled by the election of E. J. Curtin with two years to serve.

The directors whose terms expire next year (1916) are: H. N. Bain, W. P. Ijams, H. C. Jewett, Alex Maclaren, F. E. Marsh, T. H. Rundle, W. H. Smolliner, Reese Blizzard, L. C. Webb and David M. Look.

The directors whose terms expire in 1917 are: W. G. Bennett, David Bonner, A. B. Coxe, Asa H. Danforth, W. J. Davis, W. W. Estill, Harry E. Hopper, F. E. Perkins, H. J. Schlesinger and E. J. Curtin.

The officers of the association are: Wm. Russell Allen, president; Horatio N. Bain, vice-president; Frank E. Best, registrar; W. H. Knight, secretary and treasurer. The Board of Censors consists of: W. P. Ijams, Asa H. Danforth and Horatio N. Bain.

The stockholders voted to recommend to the executive committee that the dividend be passed. This is the second year that no dividend has been paid.

Messrs. Marsh, Davis and White were appointed on a committee to purchase cups for the prizes to be awarded by the association at the Panama-Pacific Exposition.

Frank E. Best was asked why the Year Book was not out. He explained that he had started to compile the book with reference to the new eligibility rules so that it would show a horse's fastest winning race record, but found the task so monumental it had to be abandoned, and this caused the delay.

President Allen said: "Every effort should be made to publish the Year Book by January 1. A rival publication comes out then. Of course we know that the Year Book is superior to the other annual, but our book should appear as early as theirs even if we have to hire additional clerks and split the work up among them."

Mr. Best explained that the 1914 Year Book would follow a new plan. The great table will be curtailed to include only those sires whose sons and daughters made new records or produced speed in 1914. The index to record horses will cover only the past five years, not of all time. The brood mare table will be curtailed along lines similar to the great table. In other words, the new Vol. 30 will have the same relation to Vol. 29 as Vol. 9 had to Vol. 8. This will make Volume 29 in time very valuable. The price of the book has been reduced from $5 to $3. "The book was assuming such enormous proportions," said Mr. Best, "that we had to make a change somewhere and we finally decided on the plan I have just explained."

May Overton applied to the association for a check for his dividends. For about 15 years past Mr. Overton has not been cashing his annual $6 dividend checks. The stockholders decided to honor all of the old checks Mr. Overton could discover but refused to go to the expense of hiring an auditor to go over the books of the association, many of which are in storage, to determine how many checks he may have lost.

There was not a sufficient quorum for a meeting of either the executive committee or Board of Directors.—Horseman.

A NEW KIND OF HORSE STORY FROM PALO ALTO.

Many are the wonderful stories concerning horses that have originated in years gone by at Palo Alto, but recent daily papers on the coast carry a brand new one of a slightly different nature. They used to startle the world at Palo Alto with tales of the wondrous speed of the native-born trotters, but the present wonder tale deals with size. And the critter is not a native Palo Altan at that, but importation from Fresno county, which of course is a handicap. Had the runt been born at Palo Alto he would have tipped the scales at least another hundredweight, but here you are—judge for yourself:

Palo Alto, February 13.—A giant young horse just brought from the mountains of Fresno county was shod in Palo Alto yesterday by Edward L. Taylor, famous as the expert shoer of most of Senator Stanford's great racing horses.

This huge young horse stands six feet two inches high, measures ten feet one and a quarter inches in length of body from shoulder to heel, and, as he stands with his head up, the tips of his ears are eight feet two inches above the ground.

His head, from eartips to lower lip, is forty-two inches long.

His feet are said to break all records known to horseshoers. The veteran Taylor, now a grizzled old man, has been in the business of shoeing horses for forty-eight years, and he declared that this job was the biggest he had ever tackled. It took Taylor and his helper three hours to trim the left front foot of this horse and fit on the shoe, which had to be specially made.

The shoe measures nine and five-eighths inches across and nine and a quarter inches from front to back. For the four shoes there was required a strip of steel eight feet long, one and a half inches wide and half an inch thick.

The animal is so big that the work of holding up one corner of him in the process of shoeing proved a tremendous physical tax upon the strength of the shoer, especially as the young horse is inexperienced in standing accommodatingly to have shoes fitted.

At that, this horse is almost down to skin and bone at present, weighing only 2400 pounds.

He is a great, good-natured brute, sorrel in color, with a bald white face, a kind eye, a close-cropped mane and a light-colored tail. He was born near Wheatville, in Fresno county, six years ago this spring, and according to the man named Francis, who owned him as a colt, he weighed 800 pounds when born and caused the death of the mare that gave him birth.

Jasper Paulson, the horse dealer who has resided in Palo Alto for a quarter of a century, tours the country buying work and driving and riding animals. While in Fresno county this week he heard of this horse and went out to see if the story was true about his amazing size.

Paulson found the big animal working as off-wheeler on a six-horse freighting team, and traded three small brood mares in exchange for the giant gelding.

The horse is partly of Percheron stock and partly of Belgian ancestry.

He wears a twenty-six-inch work collar, is said to have pulled all alone a load of ten tons, and consumes one bale of hay a day.

He could easily haul one of the city's big water-wagons.

Paulson says that the horse, for which he has not yet selected a name that seems to him comprehensively appropriate, only needs proper care to be in a few months sporting a sleek coat, a showy tail and a rounded figure that will weigh an even 3000 pounds.

Only two of the feet got shod yesterday. The hind feet were provided with shoes today.

Mr. S. S. Bailey and family arrived at Pleasanton last week and are settled comfortably for the season, Mr. Bailey looking very well in spite of his recent illness.

The Dual Purpose Cattle

[By W. F. Ward, Senior Husbandman in Beef Cattle Investigations, Animal Husbandry Division.]

The dual-purpose cattle have been bred to produce females which would yield a good quantity of milk and produce offspring which would be desirable for beef. As the type of animal necessary for the production of large yields of milk is entirely different from that of the beef animals, it has been impossible to produce a breed which would combine these functions and be of superior merit for both purposes. The dual-purpose animal may, however, be a desirable milker and at the same time produce calves which make good, though not superior, beef animals. As there has been a constant tendency for some breeders to incline more to the dairy type of animals, while others prefer to develop the beef tendencies, there has been and probably always will be a wide variation in the type of dual-purpose animals. They are not so uniform in conformation as either the strictly beef or dairy breeds. Most breeders prefer to use cows which approach the dairy type nearer than the beef type and to use a bull of the beef type that had a dam with a good milk record. The offspring of such cattle necessarily can not be of as uniform type as the breeds which have but one function to perform.

The dual-purpose cattle are popular with the small farmer who keeps but a few cattle and must depend upon them to produce all the milk and butter needed for the family and at the same time raise calves or steers which sell readily for slaughter purposes. They have not been popular with the ranchman or farmer who raises large numbers of cattle.

The principal dual-purpose breeds in the United States are certain types of the Shorthorn, together with the Red Polls and Devons. Brahman or "Indian" cattle are sometimes included under this class, and are briefly discussed because of their importance in certain restricted sections of the country.

SHORTHORN.

The dual-purpose Shorthorn is more popular than any of the other dual-purpose breeds. They respond readily to good treatment, and have become exceedingly popular with the small farmer. Formerly these cattle were almost entirely of the Bates strain, but at the present time many of them contain considerable Scotch blood. As a breed they are the same as the beef-bred Shorthorns, except that the beefy tendency is not as strongly emphasized. The milking qualities have been developed, and the cows have a conformation approaching the regular dual-purpose form, being longer of limb, higher in flank, larger in barrel, and thinner in hams than the beef Shorthorns. The bulls approach the beef type more than the cows, but are lighter in the hind quarter and a little higher in flank and not so heavily fleshed as the strictly beef type. The udder extends high up in the back and well forward, the milk veins are usually very prominent, and the teats are medium to large in size and are well set. Calves from the cows by a well-fleshed bull usually grow and fatten well and make a good quality of beef.

RED POLLS.

The Red Polled cattle originated in England and were introduced into this country in 1873, but few importations were made until about 1885. Since that time many have been imported. This is strictly a dual-purpose breed, and approaches the ideal of the dual-purpose type. In size they are smaller than the beef breeds, and have not the thick covering of flesh. Mature bulls weigh from 1,700 to 2,100 pounds or more and the cows from 1,000 to 1,350 pounds or more. Occasionally very heavy individuals are found, but these are the exception and not the rule.

The cattle of this breed are fair grazers, ranking with or slightly ahead of the Shorthorns, but not equal to the Devon or Hereford. They are very prepotent, and give uniformity in offspring when bred to native cows. Like all dual-purpose breeds, it has been hard to fix or hold a uniform type, as many breeders incline to beef production, while others try to develop the milking qualities to the detriment of the beef form.

This breed has long been celebrated for its early maturity, easy fleshing qualities, and for a fair to good milk flow. The steers have attracted attention and sold for high prices on English markets for years, and have made very creditable showings in this country. They make good daily gains and lay on flesh evenly. They are usually rather leggy, and lack the heavy fleshing qualities of the beef breeds. The hind quarters are less well developed, with a tendency toward a rather thin thigh and a high flank and twist.

The milking qualities of the breed are fair. Many of the cows average over 5,000 pounds of milk a year. The cows flesh up readily when dry. The milk is not rich, usually testing from 3.7 to 4 per cent of fat.

In conformation these cattle resemble the Devon. The head is lean, medium in length, with a well-defined poll covered with a nice tuft of hair of medium length. The neck is longer and thinner than in the beef breeds and does not blend with the shoulders so nicely. The chest is usually well developed and the ribs well sprung, though lacking in a thick covering of flesh. The barrel is developed to a greater extent than with the beef breeds, and the loin and hindquarter are lighter fleshed. The bone is of medium size. The skin is thin, soft and pliable, and the hair is short and fine, showing quality. The color ranges from light red to dark red, but a deep, rich red is preferred throughout, although a little white on the udder or underline and a white brush are permissible. The udder is well developed in the back, but does not come forward well; it is "chopped off," and the tendency is to develop large teats. The milk veins are prominent and of fair size.

The Red Polls are more nervous than the Shorthorn, but less so than the Aberdeen-Angus. As this is a comparatively young breed, they are not so popular as the older breeds. As dual-purpose cattle they are hard to excel; they are popular in the Mississippi Valley States and have given excellent results for grading up the native cattle in the South, but they have never been used to any extent on the western ranges.

The association for this breed states that the following bulls have probably done more for the improvement of the Red Polled breed during the past fifteen years than any others: Corporal 4313, Demon 5421, Abbotsford 4721, Nailer 7396, One Price 8523, Irwin 8253, Cremo 13018, Logan 13500, Dafter 15871, and Elgin 19464. The popular families in this country at the present time are Dorothy, Lulu, Pear, Lillette, and Cosy.

The secretary of the Red Polled Cattle Club of America (Inc.) is Mr. H. A. Martin, Gotham, Wis.

DEVON.

This is one of the oldest breeds of cattle. They were introduced into this country at an early date and became popular in New England and in parts of Virginia nearly a century ago. The cows were good milkers, and the steers were used as work oxen or for beef, and filled either place admirably. They are exceedingly good rustlers, are vigorous, hardy, withstand both heat and cold well, and are very prepotent. For these reasons they were popular with the people of New England. They are slower of growth than any of the beef breeds except the Galloway. Their endurance, intelligence, and their gameness have made them popular as work oxen wherever they have been tried—no breeds excel them in this respect.

In size they are somewhat smaller than the Red Polled, mature bulls weighing from 1,500 to 2,000 and cows from 1,100 to 1,400 pounds or more. They are solid red in color, white being permitted only on the udder, or near the scrotum of the male, and on the switch of the tail. The shade of red varies, but a rich bright red is preferred. In conformation the Devons incline more to the beef type than to the dual-purpose type. They are close coupled, very compact, smooth, and rank high in quality and style. They have small bone, which is hard and compact, giving a slender, fine leg.

The head is lean, clean-cut, of medium length, and surmounted by rather long white or waxy horns, which curve upward, forward, outward, and backward in the cow and are almost straight in the bull. The horns of the steers are large, long, and often widespread, usually being very white or waxy, with dark tips. The neck is medium length, smooth, and blends nicely with the shoulder. The body is compact, fairly well covered with flesh, has well-sprung, deep ribs, and is usually low set. The chest, back, loin, and hindquarters are usually well developed, though the flank and twist are usually somewhat higher than in the beef breeds. The cows are fair to good milkers, giving rich milk, and always provide an abundance to produce a good calf. The steers fatten somewhat slower than the beef breeds, but produce meat fine in texture and of good quality.. The breed cannot be surpased as grazers, but they are usually slower in growth than the beef breeds, and this alone can account for the fact that they have never become popular throughout the country. In New England, in parts of the South, and in a few other States the Devon has proved profitable, especially on lands where the grazing was rather scant or of poor quality. They are prepotent; good calves are produced when good bulls are mated with common cows, and such calves usually make fair milkers. The Devon does not now hold a high rank among the breeds of the United States; since the ox has lost in popularity as a draft animal the Devon has become less popular.

Information concerning Devon cattle may be secured from Mr. L. P. Sisson, secretary of the American Devon Cattle Club, Charlottesville, Va.

BRAHMAN OR "INDIAN" CATTLE.

Under the names of Brahman, "Indian," or Zebu cattle are classified a number of different strains of cattle of the species Bos indicus. Sofe of these strains vary so in type, color, size, and habitat that they are classified as separate breeds. The most important breeds of these cattle are the Krishna Valley and Hissar breeds. These cattle are classed as dual-purpose animals, as many of the females give a good quantity of milk. They are used quite generally in India as milch cows, and are more satisfactory than any other breed of cattle under the severe conditions of drought, heat, insect enemies, etc.

As these cattle have been raised for more than 3,000 years in a hot climate, they are only suitable for the extreme southern portions of this country. Although they are of a different species from our common breeds of cattle, they cross readily with them. The females of this breed carry their calves somewhat longer than other cattle, the period of gestation being about 300 days.

The oil secreted by the sebaceous glands of the skin is of a peculiar odor and gives the skin a soft, oily feeling. This peculiarity, combined with the scant covering of hair and the extremely tough hide, affords these animals considerable protection from ticks, mosquitoes, screw worms, etc. Cattle ticks do not bother the purebred cattle at all, and few of the half-breeds become infested to any appreciable extent.

These cattle stand the heat well and have great endurance, moving readily in a fast walk or trot. They make the best of work steers if handled constantly by one driver, but they have a nervous disposition and give considerable trouble where the drivers are frequently changed. They are more nervous than any of our breeds of cattle. When raised in small herds and handled constantly they are quite docile, but if handled under range conditions they become wild and stampede or fight readily. The quality of the beef from these animals or from grade Brahmans is slightly inferior to that of either the beef breeds or the dual-purpose cattle, but they dress out a high percentage of meat. For extreme southern Texas and the land adjacent to the Gulf coast in Mississippi, Alabama, Georgia, and Florida, where the ticks, mosquitoes, and screw worms are prevalent, these cattle may prove very valuable for crossing with native cattle.

In size the bulls range from 1,500 to 1,800 pounds, and many of them attain a height of six feet, while the cows usually weigh from 1,100 to 1,400 pounds. The various strains of these cattle have different colors, although each strain has a fixed color. The colors are pure white or a creamy white, silvery gray, red, and dark brown approaching black. The silver gray, with dark fawn on shoulders and neck, and the creamy white are the most popular colors. Many of the animals have brindle stripes on the body.

The chief characteristics of the breed are the large hump on the withers, the large loose folds of skin forming the dewlap and the naval, and the long, drooping, pendulous ears. The head is also characteristic of this breed, as it is long, with a forehead which recedes from the eyes to the horns, while the bones forming the brow are prominent. The head tapers gradually from the eyes to the nostrils, the horns are dark, short, straight, heavy at the base, and point upward and backward. The ears are very long, drooping, and are thin and oily, frequently being almost devoid of hair. The eye is mild and sleepy, but changes quickly when the animal is aroused. The neck is of medium length and has heavy folds of skin forming an overdeveloped dewlap with fullness at the throttle. The body is deep but rather narrow, the hips are long, sloping, and narrow, and the rump often droops toward the tail. The legs are long, tapering, and show a strong bone free from coarseness. A very heavy sheath is developed and in old bulls often hangs 9 inches or more below the belly. The hump is large in males, attaining a height of 12 to 16 inches, but is not so well developed in the females. The half-bred males may have a moderately developed hump, but the half-bred females have none. Animals which contain as little as one-sixteenth Brahman blood usually show some Brahman characteristics, especially in the shape of the head and the loose folds of skin forming dewlap and navel.

KANSAS AND OKLAHOMA CIRCUIT.

Plans for the Kansas and Oklahoma circuit for the season of 1915 were perfected at a recent meeting of the secretaries of the various points, and as arranged the circuit provides fourteen weeks of racing as follows: Howard, week of July 12; Council Grove, week of July 19; Herington, week of July 26; Anthony, week of Aug. 2; Pratt, week of Aug. 9; McPherson, week of Aug. 16; Eureka, week of Aug. 23; Iola, week of Aug. 30; Winfield, week of Sept. 6; Topeka, Kan., week of Sept. 13; Hutchinson, week of Sept. 20; Oklahoma City, week of Sept. 27; Muskogee, week of Oct. 4; Chanute, week of Oct. 11. The minimum purses for aged classes are $400, with larger amounts in many instances, and a comprehensive program of classes for each way of going, and all ages, has been arranged. The board of directors elected for the year the following officers: Dr. F. S. Beattie, Iola, president; F. W. Sidle, Winfield, vice-president, and Ed L. Teed, Hutchinson, secretary and treasurer.

Of the various points from which we have had reports, Salinas seems to have suffered the heaviest damage during the recent storms that swept California, the race track seeming to have been the scene of some of the most severe of the storms' attacks. The new addition to the grandstand, erected last year at a cost of several thousand dollars by the Rodeo association, came in for some special attention on the part of the wind, the roof and other timbers being torn loose and scattered promiscuously over the neighborhood. The barns and the Helman residence were sheltered and fortunately escaped injury, though "H. H." and family doubtless had some uneasy moments before the storm wore away.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

WILD DOGS.

Azara's Dog.—This dog, foxlike in appearance, has a long body and long, bushy tail. Its legs are short, its ears are large. It is not closely related to the European fox, for its skull is quite unlike that animal's, and agrees with that of the wolves and jackal's. True foxes are unknown in South America.

Although Azara's dog exhibits some seasonable variation in color, as well as in the length of fur, the general color must be described as gray with black and white on the back, and black patches on the shoulders, also on the rump. The under parts of the body are almost white. The ears are tipped with black, as is the end of the tail; the general hue of which is a mixture of black and white. This animal is really beautiful, and is found almost everywhere in South America from Argentina to Chile and Brazil. It feeds chiefly upon small animals and birds. It is not known to burrow on its own account, but in the spring—the breeding season—the female lives in the hole of some other creature, not always a deserted hole. Indeed, she often takes up her residence in the home of the rodent called Patagonian hare (vizcacha), and drives the rightful owners out of a part of it. After a time, the unwelcome stranger ceases to receive much attention, because she is unassuming and gives little trouble. But as soon as the young vizcachas are large enough to leave their kennels, then the dog-fox makes them her prey. Having a family to provide for, she will grow so bold as to hunt her helpless quarry from one hole to another, and do battle with the parents, and carry off the immature ones notwithstanding all efforts for the protection of the latter. In some cases, after all the juvenile vizcachas have been eaten, and the young Azara dogs are big enough to follow their mother, the entire family leaves the vizcacha's burrow where such cruel havoc has been made, to settle in another, and to continue the usual depredations in that place. In a few words, Azara's dog, although far from any fox as far as science is concerned, is purely a fox in habits.

The death-feigning instinct possessed by this creature in company with one of the South American opossums (Didelphys) and at least one variety of the partridge (spotted tinamou), is sufficiently remarkable to require detailed notice. When the Azara dog is caught in a trap or run down by dogs, it at first fights savagely, but by degrees relaxes, and drops to the ground—apparently dead. The deception is so well carried out that dogs are often "taken in" by it, and no man would hesitate to pronounce the creature dead. Nevertheless, if one withdraws a little way from feigning fox-dog, and watches it very attentively, a slight opening of one or both eyes may be detected. Eventually, when left to itself, the animal does not start up as if it had been stunned, but slowly and cautiously raises its head first, and only assumes a natural position when its enemies are at a safe distance. It is a fact that some natives of South America have performed barbarous experiments upon death-feigning Azara dogs without succeeding in arousing them into exhibiting the ordinary signs of life, and this seems to show that the death-similating swoon is something more than a cunning habit, for if it was merely such a trick, no animal would allow itself to be wounded without wincing. A fairly reasonable hypothesis seems to be that the fox-dog, although not insensible, as its behavior on the departure of its enemies seems to prove, has its body thrown by extreme terror into that benumbed condition which simulates death, and during which it is unable to feel the tortures practised upon it.

It is most strange that an animal so powerful, fierce and able to inflict such terrible injury with the teeth as Azara's dog can inflict, should also possess the safeguard described above, which would appear more suited to weak or inactive creatures that can neither escape from an enemy nor resist it. The writer is unable to suggest the slightest explanation, and none seems to be in print.

The Cape Hunting Dog.—This dog is a distinct type, being differentiated from other dogs by the possession of only four toes on both fore and hind limbs, and by the possession of the same number of teeth as the wolf. In general appearance it is not unlike the hyena, the resemblance being due to the ochraceous gray ground-color with black markings, and the long ears. The vernacular name "Cape Hunting Dog" is due to the fact that the hunting is done by packs and not by solitary animals. The range of this dog is over the more open parts of Africa south of the Sahara and Abyssinia. It is about as tall as a grayhound, its legs being relatively long and slender, and adapted to the swift and enduring speed upon which it must depend for a livelihood. The head is broad and flat, with a short muzzle armed with massive teeth, somewhat large, upstanding furry ears, and a suggestion of the hyena in the physiognomy. The likeness to the last-named animal—even to the spotted hyena—however, is wholly superficial. The fur is short, thick, smooth, but is most shaggy about the cheeks and throat. The tail is long and wolf-like. Although the dog's general color is yellowish-gray, as has already been mentioned, it is often marked most irregularly with a variety of colors, such as a combination of red, white, yellow, and even black spots. It is probably correct to say that of all mammals the hyena-dog presents the greatest variety of distinct hues.

The voice of the Cape hunting dog consists of three different kinds of cry, each being used on special occasions. One of these is a short, angry bark, usually uttered when some unrecognized object is seen. Another resembles a number of monkeys chattering together—a very unusual cry for dogs. This sound is emitted at night when large numbers of the animals are together, and they are excited by some special occurrence, such as being barked at by domestic dogs. The third cry is said to resemble the second note of the (so-called) English cuckoo, and its significance does not appear to be known.

In the Southern Sudan, where these animals are abundant, the German writer, Schweinfurth (The Heart of Africa) saw one specimen that was quite tame, requiring no restraint beyond a chain, and obeyed its owner with all the docility of an ordinary dog. This observation seems to corroborate the assertion of Livingstone that the natives of the Kalahari desert are in the habit of taming the hyena-dog and training it for hunting purposes.

To Africans generally, both white and black, the hyena-dog is one of the most truly wild and dangerous animals of the country, taking the place of the wolves of the northern part of the world. The Cape hunting dogs gathered into packs, and astonished and terrified the early settlers and explorers by their numbers, audacity and strange cries. They frequented plains and scantily forested or bushy regions, where the small antelopes were plentiful, for these creatures were their chief prey. They pursued them in concert, although in some cases only two dogs worked together, until the baffled victim, sometimes of the larger species, was cornered or exhausted, and could be pulled down. The hyena-dogs were a terrible scourge to the sheep and goats of the early frontier farmers, as they killed or mangled many more of the flock in one of their nocturnal forays than they could possibly eat. The war waged against them in consequence of their attacks, and the diminution of the wild game, has caused a great decrease in their numbers; but numerous bands still range in the wilds of East and Central Africa, and the deserts west of Cape Colony. Further details can be obtained from Selous' "A Hunter's Wanderings," published in 1890.

The Dingo.—The improbability of Australia possessing a native placental mammal of fairly large size, and the fact that the dingo is not found in Tasmania or New Zealand, lend force to the belief that it must be a dog of Asiatic origin brought to Australia by the aborigines, and that it gradually became feral. It was at one time believed that the dingo, which was the only placental mammal found in Australia before the introduction of Europen species, might possibly be the descendant of the domestic dog run wild, but this has been disproved by the discovery of its remains in the quarternary strata of continental Australia. Nevertheless, it is possible that the ancestors of the dingo were introducel by quarternary man.

The dingo is a little less than two feet high, and is about two and a half feet in length. In color it varies greatly, some examples being to a considerable extent black, while others are pale brown. Although in a wild state these animals do not bark or growl, tame specimens placed among domestic dogs soon learn to bark. When teased, the dingo does not utter any sound, but raises its head to an erect position and becomes furious. Its prowess as a hunter is only too well known to the shepherds of Australia from its depredations among the flocks. A pack of from eighty to a hundred animals of the dingo species will pursue the prey, running with heads high and ears erect, till a killing occurs. When opportunity offers, much more is killed than can by any possibility be eaten. This seems to indicate love of hunting.

The dingo is domesticated by the native Australians in all parts of the continent, the puppies being found in hollow trees and similar places where the female animals make their lair. All native Australians treat these puppies kindly, and the latter become faithful companions as well as good assistants to their owners in search for opossums and other creatures which the black men of Australia use as food. These men, however, kill and eat the wild dingo, disemboweling it and then roasting the carcass whole in the earth under a fire.

With the advance of civilization, the dingo, like the native races to which it is companion, has gradually disappeared from large parts of southern and eastern Australia, and its numbers are elsewhere steadily decreasing. Its complete extermination as a wild animal is not improbable, because it is a serious menace to sheep. Its local extermination, however, has more than once been followed by such a great increase of grass-eating marsupials, upon which it preyed, that special efforts have been necessary to kill them off.

The Indian "Wild" Dog.—The Indian wild dog inhabits the forested parts of the entire Himilayan region, the treeless area of Eastern Thibet, and southward as far as the great forests of India, is usually known by the name "dhole." The buansu, peculiar to northern India, is merely a variety of dhole.

The chief characteristic of the Indian wild dogs is that they hunt in packs, and do not utter any sound while hunting. When once a pack of these creatures has started any animal, whether deer or tiger, that animal's doom is sealed. Some part of the pack will follow the prey for days, and will finaly bring it to bay, or run it down exhausted. The dhole is inferior in many respects to a trained domestic dog, but it is not difficult to tame the former, and teach it to hunt for the use of man.

The Indian dog differs from the Siberian dog in having smaller molar teeth. Its general build is not wolflike, but jackal-like, which is shown by the comparative shortness of the legs. The average length of the animal is somewhat less than forty inches, exclusive of the tail which, with the hair, may be said to measure fifteen inches. The usual color of this dog's upper part is red; the under parts are less red. Some specimens that are in museums are a grayish brown. As to speed and agility, the Indian dog is slower than the jackal and decidedly more clumsy than the fox.

The term "wild" dog is hardly satisfactory, because it gives the idea that the animal named represents the ancestral stock of some domestic dog. This is not the case with the "wild" dogs of India or Siberia.

Such Indian dogs as the pariah and the poligar—a large animal peculiar to Southern India—must be classed as "domestic" dogs, although their habits are far from "domestic," they are merely mongrels that have neither home nor owner, and they are often half starved.

The Fennec.—The fennec, the smallest of the canine tribe, is a pretty little fox-like animal of the Sahara. It is almost fifteen inches long, excluding its tail, which is nearly seven inches in length, and bushy like that of a fox. The general color of the animal is pale rufous cream, harmonizing with the desert sands of Africa. The breast, the inside of the ears, and the eyelids are white. The tail is tipped with black. The erect ears are of enormous size—each ear being as large as the creature's face, giving to the entire head a strange air of intense alertness.

The fennec digs in the sand with such remarkable speed that it not infrequently escapes pursuit by diving into the burrow, which is furnished with soft bedding, is remarkably clean, and in it the animal sleeps most of the day. At dusk it steals cautiously to some drinking-place, and later seeks its prey, which consists of mice, small birds, lizards and insects.

The name "fennec," it should be remembered, is sometimes extended to other African species which are closely related to the little creature.

It has been said that no pet animal can rival the female in grace and interest. Not above half the size of a cat, it has all the wiles and actions of a fox, and when alarmed by the sight of a stranger it will run under a chair or into a corner, and vociferously give forth its tiny bark. In captivity the fennec is usually fed on milk and morsels of meat, but it is apt to show a truly remarkable fondenss for dates. The wild animals are able to climb the date palms and get the fruit.

The fur of the fennec is valued by the natives, and is said to be the warmest of African skins.

The Raccoon Dog.—The raccoon dog is a small animal of Eastern China and Japan, which is said to resemble a miniature raccoon, especially about the head. It lives in burrows, gathers most of its food—fish and mice—along the banks of the rivers, and is often kept in captivity, especially by the Japanese, who eat its flesh, and value its fur, which is long and grizzled. This dog's muzzle is sharp; its ears are short; its tail is not extensive, but it is bushy.

The raccoon dog is a semi-nocturnal animal, living in summer in the mountains, and in the winter in the river valleys, where it is said to hibernate. If this hibernation really occurs, it is remarkable, for no other member of the family indulges in a winter sleep. The natives (chiefly in Japan) assert that this hibernation takes place in the burrow of a fox, or some other animal, but the creature is able to make a burrow of its own. It is certain that some raccoon-dogs do not hibernate, for they have been seen in winter crossing the ice of the frozen rivers by means of a succession of jumps.

These animals have few dog-like characteristics. Being almost omnivorous as to diet, they can easily be killed by poison. In summer they feed almost exclusively on mice, which they hunt in family parties. Fruit, however, sometimes forms a minor part of their diet. As raccoon dogs do not kill chickens or other domestic birds, they are not infrequently permitted to make their winter homes under houses.

The Otocyon (Lalande's Dog).—Lalande's dog is a small animal, smaller than the common fox, distinguished externally by its large ears, covered with fur, which are nearly equal to the head in length. In color this animal is of a uniform gray, except upon the limbs, wnich are darker, and the tail, which has long black hair, and is very bushy. It is a native of Southern Africa, and is more like the fennec than any other creature. As it lives in the open country, and is very shy, it is not well known, although many hunters have seen it at a distance. It is especially interesting as one of the most aberrant of the canidae, and on account of its unusual dentition. In

the lower jaw it invariably has four molar teeth—one more than any other member of the family. In the upper jaw it has three or four molars, whereas all other living canines possess only two. Some anatomists look upon this as an indication of marsupial ancestry.

The eyes of Lalande's dog are large; the limbs are longer than in the common fox, but the tail is proportionately shorter.

South African hunters call this creature the "long-eared Cape fox"; they say that it lives under small bushes, and that it is generally accompanied by its mate wherever it may be seen.

The Siberian "Wild" Dog.—The Siberian Wild Dog inhabits the forested regions of Northern Asia as far south as the Altai Mountains, and subsists almost entirely on deer, which it hunts in companies, pursuing them so constantly that it is said occasionally to destroy or drive away all the deer in certain districts. It also hunts the ibex (goat) in the high mountains. It appears that this semi-Arctic dog changes its summer coat of fox-red and long and woolly winter dress of yellowish-white, as do the Arctic foxes. In the Altai Mountains the Siberian dogs go in troops of from a dozen to twenty individuals, led by an old male. They usually select quite young deer for their prey.

The Siberian dogs are distinguished from all other species by the absence of the last molar tooth on each side of the lower jaw, so that the total number of teeth is forty instead of forty-two. The other distinguishing features of these animals are the short muzzle and the presence of long hairs between the pads of the feet. The Siberian dog is a handsome fellow, his splendid bushy tail, about half the length of his head and body, adding much to his appearance.

The Malay "Wild" Dog.—The Malay wild dog is a small species of dhole, which is found east of the Province of Bengal, throughout the Malay Peninsula, as well as in Java, Sumatra and perhaps Borneo. Whether the wild dog of Upper Burmah belongs to this species or to the Indian wild-dog species is doubtful, and this doubt gives support to the opinion of some naturalists that these Eastern forms are not specifically separated from the Indian form.

The Malay wild dog is smaller, and more slender in body and limbs than the Indian dhole. It has shorter and harsher hair of a deep red color. Its general habits appear to be those of the Indian dog.

The length of the combined head and body of a Malay dog is about thirty-four inches; its tail is about a foot long. Although this animal's general color is red, the under parts of some forms are grayish-white.

AIREDALE HINTS.

A few don'ts for Airedales: Don't expect much from an Airedale till he gets acquainted. They are a one-man dog and don't make up with strangers.

Don't shoot over him or near him till he gets used to the noise of the gun; easier to avoid gun shyness than to cure it.

Don't whip him for trifles. A sharp word will usually do, as they are very sensitive. But if he deliberately disobeys, switch him good, but be sure he knows what it is for. He will take his medicine and never whimper.

Don't tie a pup or a grown dog to a kennel; put up a wire (the longer the better). Slip a ring on it, fasten his chain to it, and watch him exercise.

Don't throw him in the water; let him go in alone. They take to it, and make the best retrievers from land or water.

Don't lend your Airedale to hunt. If you cannot go, keep him home. One breeder's experience was, they made indifferent hunters for strangers.

Don't let him fight; it is easier to keep them apart than it is to part them. Don't expect much from a pup. They need training like any dog, but will do more different stunts without training than any dog. Don't let him fight big game, if you can avoid it. They won't quit, and will die fighting. Get a pup, raise him right, treat him right, and he will be a pal; use him like a dog and he will be a dog. He knows more than you do; he understands your language,—you don't understand his.

Brookdale Hatchery Changes Hands.—At a meeting of the Santa Cruz supervisors with E. W. Hunt and W. H. Shebley of Sisson, representing the California Fish and Game Commission, final arrangements were completed for the transfer to the State of the Brookdale fish hatchery and the Swanton spawning station for the season of 1915.

Under the proposed arrangement to be approved by the State Board of Control, the Fish and Game Commission is to assume charge of operations at both places in that county. The hatchery and station will be operated at the expense of the Commission during 1915. Leases held by the county along Scotts creek are to be taken over by the State. The Commission is to turn over to the county 500,000 steelhead fry for planting. All other eggs taken in the county go to the State.

The Commission at the close of the season in Santa Cruz county may close down the stations as far as the taking of eggs and hatching of fry are concerned. If the county then desires to operate the Brookdale hatchery it will be done at county expense.

Drink Jackson's Napa Soda.

GOSSIP FOR SPORTSMEN.

A Most Peculiar Man.—A leisurely man, with a well seasoned pipe in his mouth, stood looking in at a show window. He wore a slouch hat and a soft gray shirt, and his clothes looked as if he considered clothes less important than some other things. His eyes were bent gravely on a display of fishing tackle and an enticing layout of shotguns and other firearms.

He did not seem to know that a hundred people in a great hurry were passing every minute, that trolley cars were thundering up and down the street, that some buildings were feverishly going up and others feverishly coming down, that goods were being made and carried energetically to and fro, and sold and resold, and that myriads of people, without thinking why, were whirling about in a tremendous hurry, like dancing motes in the sunlight.

He just stood still and gazed and smoked, a most peculiar man.

* * *

Quail Law Changes Proposed.—Every upland shooter who enjoys hunting quail and understands their habits is interested in the outcome of the proposed changes in the game law, as they may affect the quail season and bag. There is a general sentiment that both the open season, the daily and weekly bag limit should be curtailed. In some sections, where the birds have been pretty well shot out—in some of the southern counties, for instance—there is a sentiment in favor of shutting down "for a few years to give the bird a chance to propagate, especially since the advent of the automobile in the hunting field."

To shut down for a few years is the argument of game protectionists pure and simple and not founded upon accurate information or on lines of experience in the sport. A total shutdown for any extended period would be no doubt acceptable to coyotes, wild cats and other ground vermin, but would not bring about the desired benefit, except in a minor and unsatisfactory degree. This argument has been met with the suggestion that wild cat and coyote hunting should be inaugurated. Well, it is, to a certain extent, and good sport is derived from that pastime also. But as a general means of protecting quail the scheme is not feasible.

Among some sportsmen a two months' open season is advocated; that is not so bad. In this respect the months of December and January for an open shooting spell on valley quail have been mentioned in one of the game bills submitted. The month of January may be all right for following the time-honored tradition of holding the annual field trials, but as a definite selection for the sport of upland shooting that month and December are decidedly objectionable to local sportsmen and those of the bay counties and further up the coast. As an illustration of possible handicaps for these months it is only necessary to look up the weather reports for the past few weeks. How much quail shooting has been done? For almost the past two months weather and ground conditions have effectually put a quietus on quail hunting.

As for the bag, fifteen birds in a day is regarded as plenty, under present conditions. A morning shoot in quail country that will enable a bagging of fifteen birds is a good enough day's sport for anyone. Thirty birds a week is not too few, two day's shooting that will afford such a result is satisfactory to all good sportsmen. As a matter of fact, it is doubtful except under the most favorable conditions, if that number of birds has been the average of ten per cent of the hunters who have shot regularly this season.

The valley quail is rapidly becoming extinct throughout the more populated sections of this State, despite the birds' utmost endeavor. Quail if unmolested, around the ranch house or about the orchards and vineyards, will take good care of themselves and multiply. Where they are protected the birds become almost as tame as the barnyard fowls. Given half a chance the valley quail will hold its own in any locality, as is shown in some parts of the State not frequented by the hunters. Attempts made to transplant the birds from one district to another where they have been depleted, has in numerous instances been failures.

* * *

Five Years Too Long.—It may suit Los Angeles auto hunting parties, who have shot out the southern deer country, but will not meet northern support.

The proposed bill to close the open season on deer for a period of five years has been regarded by the sportsmen of Central and Northern California as a freak measure. It has met with much criticism and condemnation. The Marin county sportsmen are outspoken in denouncing this bill, and will oppose its passage from every angle. In the season of 1913, in Marin county, 327 deer were killed, and last season in two months 307 bucks were bagged. The claim is made that more deer are in the hills of Marin county than there was at any time in the past thirty years. The hunters, in nine cases out of ten, are good sportsmen and observe the law. The hills are alive with does and fawns, for the reason that the does are protected. Numerous gun club and other preserves afford safe cover for all of the deer. There are other counties where the conditions are practically the same.

* * *

A Federal Game Law Case.—The first effort ever made to convict anyone under the federal law regulating the killing of migratory wild game was made last week when J. Peters of Martinez was taken before United States Judge Dooling in San Francisco on a charge of having killed twelve wild geese.

The geese were taken along as evidence and Peters, who did not deny killing them, was taken before the judge with the birds. J. A. Craig, of Sacramento, appeared as the prosecuting witness in the case, but Judge Dooling refused to hear the case. The law had been declared unconstitutional in three States, his honor is reported to have stated, and he was not looking for trouble. It was appealed to the Supreme Court in Washington which might hand down a decision in 1916 or 1917, it did not matter which, and when that decision was rendered it would be time enough to begin prosecutions under the law in this State. So Peters was dismissed and returned to Martinez with his twelve geese.

Mina Spurgeon and G. M. Elliott, taken into custody Monday night at Sacramento by State and Federal Game Warden J. F. Inman for having seven wild geese in their possession, were brought to this city for a hearing in the Federal Court. It is alleged the men violated the United States statute making a closed season for wild geese from February 1 to October 15.

It is intimated that this case will be carried up to the highest tribunal as a test case, on constitutional grounds. Taken all in all, the Federal regulations do not, in many respects, seem to fit the California migratory wild fowl situation.

This is the first year in the history of goose shooting in this State when the season for that wild fowl closed January 31. The birds are most plentiful in Glenn, Colusa and Solano counties, as well as in some parts of the San Joaquin valley. The claim has been made in past years by ranchers that the geese do a great deal of damage, past experiences of the ranchmen having amply proven the assertion. Under the new federal regulations it is now illegal to shoot or hunt geese until next fall. Meanwhile the birds have a soft snap on growing crops until about the middle of April, when the northern migration takes place.

* * *

More Bounties Needed.—The measures submitted for the purpose of creating game refuges and preventing indiscriminate hunting in the national forest reservations have generally the support of all fair-minded sportsmen.

"Protect the wild game for the sake of the game, but not for ornaments," is the slogan of experienced devotees of rifle and shotgun. Too much protection, both in cutting down open sections and creating too large or too many havens of "refuge," will not accomplish the desired purpose. The predatory animals will not conform to any game law passed. One bob cat destroys more quail in a month than a hunter will kill in six months. A mountain lion will exact ten-fold more toll among the deer than ten hunters.

At present there is only $20 bounty on the mountain lion—the fact that over 2000 of these big cats have been accounted for since the head tax was put on shows what venison on the hoof has to contend with. Skunks, weazels, coons, coyotes, bob cats, foxes and bluejays—with egg-eating snakes thrown in for good measure—are not covered at all, but they all get their wild game rakeoff just the same.

* * *

Attacked By a Cougar.—Richard Allemand, a stockman of Southern Monterey county, was severely injured last week by a mountain lion when he tried to drive the animal away from a deer it had just killed and was devouring.

Allemand was riding with Ed Bourdieu, a Monterey county cattleman, in Stone canyon when they saw two mountain lions eating a four-pronged buck.

Allemand swung his lariat at the beasts to scare them, but instead of running away one of the lions leaped and caught Allemand by the shoulder. Bourdieu managed to dislodge the lion, and killed it with his revolver just as the infuriated beast was getting ready to spring back at Allemand. The other lion escaped before it could be shot.

Never in the history of Stone canyon have there been so many mountain lions as there are at present. Carcasses of deer and young stock are being found very frequently by the ranchers of this vicinity.

* * *

Many Deer Drowned.—A press dispatch last week from Willows, Glenn county, stated: Hundreds of deer were drowned during the high water in the river bottom from Jacinto northward. The water rose so rapidly and covered the ground to such a depth that very few escaped. Scores of carcasses are being found in the drifts and up in the grapevines where they floated and lodged.

J. B. Graves of Glenn reports that the extermination of the deer was complete in that section. He and several others took a boat a few days ago and made a trip over the bottom. In one place they found some twenty drowned deer. The animals had climbed on a large brush heap and there met their death. A number of smaller groups were found.

In one place the men found four of the animals that had the appearance of having been dead but a very short time. Out of curiosity the men rolled them until the water was pretty well out of them when to the astonishment of the men the deer began to show signs of life.

Their feet were then tied together and they were placed in the boat and the party started across the river with their load. One of the deer, a large doe, succeeded in breaking loose. She no sooner had her feet than she began fighting a spike buck as he lay helpless in the bottom of the boat and killed him. She next charged the men and finally had to be

pitched overboard to keep her from upsetting the boat.

Two of the deer, a male and female, were landed on this side of the river and turned loose.

* * *

A Duck's Long Journey.—A wild duck killed near Herndon on January 24 by George Knight has been identified as a bird that was treated for the mysterious "duck disease" at the mouth of Bear River, Utah, September 16, 1914, states the Fresno Republican. An aluminum tag was found attached to the duck's leg when it was killed. On one side the tag had the number 574 and on the other were the words, "Notify U. S. Agriculture, Washington, D. C."

S. L. N. Ellis, federal game commissioner, sent in the information and has received a letter saying that the bird was one of 270 sprig or pintail treated in September.

Ellis requests that persons who have found these metal tags on ducks to present the tags at the local office, as the government has requested more information on the birds examined.

* * *

Big Catch of Striped Bass.—Striped bass fishing circles are in a flurry of excitement over the record catch the 7th inst., by Louis Gotthelf, of a monster bass weighing fifty-two pounds, and this whopper flanked by four other bass weighing respectively fifteen, thirteen, twelve and eight pounds—a day's basket that tops all local traditions.

The big catch was landed near the Santo Rosa drawbridge over Napa creek. The baits used were "bullheads," the common bay mudcat. Stormy weather and muddy water were the conditions at the time. This episode adds another chapter to the uncertain quantity element in striped bass angling. Ordinarily muddy water has been found poor fishing ground. The theory advanced is that the bass, which were known to be fairly numerous in the creek, were unable, by reason of the turgid state of the water, to follow up and capture catfish, splittails and other small fry, and accepted the bullhead-baited hooks lying on the bottom, first come, first served.

The San Antone striped bass colony spent a recent Sunday's outing in securing the moorings of their arks and putting the fishing skiffs in safe quarters. A heavy gale prevailed all day and created havoc with mooring posts and anchor chains. So fierce was the wind that the tide run out was an hour behind schedule, the water was backed up until the whole marsh was flooded a foot deep.

* * *

Tarpon! Eh! What?—A report comes from the Panama canal zone that will cause saltwater fishermen, who fancy capturing the big ocean game fishes with rod and reel, to sit up and take notice.

William A. Street, a San Francisco youth, who is now located at Christobal, in a recent letter to W. J. Street, his father, requested the immediate dispatch of heavy saltwater tackle. He stated that "in the spillway waters below the Gatun dam there were hundreds of big tuna." Shortly after writing he could not curb his desire to have a go with the big fish and experimented with a stout hand-line. As soon as the baited hook was thrown into the water, there was a "strike" and a run. To his intense astonishment a fish, at least five feet long, leaped into the air about six feet, shook its hooked head like a terrier would a rat, splashed back into the water and started off again—snapping the line as if it were packthread.

That incident being worked out pro and con, the decision was that the big fish must be tarpon, appearance and action being similar to what the "king herring" does under the same conditions. So far as that goes, there is no record of the tarpon ever having been seen on the Pacific Coast, plentiful though it be in the Gulf and Florida waters. The fact, however, remains that big denizens of the sea and apparently game fighting fishes are in that part of the Panama canal waters. Meanwhile a number of local ocean big game fish fighters are awaiting further particulars—hoping that another spoke for the wheel of deep sea fishing sport has been turned.

* * *

Exposition Fly-Casting Tournament.—President Frank J. Cooper of the San Francisco Fly-casting Club, Walter D. Mansfield, Stanley Forbes and other members composing the committee of arrangements, at a meeting held last week decided that the dates for the international fly-casting tournament in this city will be August 12, 13, 14 and 15. The tournament will be held under the auspices of the local club, and will be participated in by representatives of over forty fly-casting clubs, members of the National Association of American Anglers.

A big banquet Thursday, August 19, will be tendered the visitors. The following day the club will charter a special train and entertain a large party of jolly anglers at the club lodge on the Truckee river, when the Easterners can sample the trout the wind that the tide runout was an hour behind possibilities of the famed Sierra fishing water.

* * *

Double Pay, "O. K."—In an opinion rendered by Attorney General U. S. Webb, it is found possible for a man to hold and draw pay for two positions, one a State and the other a county job.

The Sacramento division of the Fish and Game Commission had asked whether it was possible for one of the office deputies there to draw pay as a deputy and at the same time as a County Game Warden.

In ruling that it is permissible for the deputy to hold both positions, Webb says:

"So far as the Fish and Game Warden is concerned there would appear nothing incompatible with the performance of the duties of County Fish and Game Warden and State Deputy. So long as those services can be rendered to the citizens of the State and the county, there is nothing to prevent the officer from receiving the compensation of both offices."

* * *

Fishing Tackle Famine—Coast anglers are wondering if there will be a shortage of tackle.

An odd story comes from Redditch, England, according to Chas. H. Kewell. Redditch is a leading tackle manufacturing city in the world, so it is reported. Since the war started in Europe, over 6,000 men from Redditch have joined the colors. All of these soldiers were employed in the manufacture of all kinds of fishing tackle, quite a lot of the output being used in the United States—rods, reels, hooks, etc. This means that orders sent to Redditch tackle manufacturers by American and Canadian jobbers will be slow in filling. The fly-tying industry will probably not be affected, this branch of the business being followed by women and girls.

* * *

April 1 Is the Day.—It is announced by Fish and Game Commission officials that the steelhead trout season in Coast streams will open as usual this year on April 1. The State Legislature, it has been intimated, is likely to change the present law and declare May 1 as the opening day. The adjournment of the State lawmakers will probably be about April, and a law opening the trout season May 1 would not become effective for ninety days after adjournment.

AT THE TRAPS.

A Timely Hint. for 1915.—It costs a gun club nothing to have a tournament registered. This gives a club shoot importance, permanency in the official records and the dignity which comes from good auspices. For information relative to registered tournaments, write The Interstate Association, E. Reed Shaner, 219 Coltart Avenue, Pittsburg, Pa.

* * *

G. A. Handicap Committee.—The committee which will allot handicaps to entrans in the coming Grand American Handicap is made up as follows:

O. P. Goode, chairman, Chicago, Illinois; Harrison Kennicott, Evanston, Illinois; C. D. Coburn, Mechanicsburg, Ohio; J. F. Wulf, Milwaukee, Wisconsin; J. K. Warren, Birmingham, Alabama.

* * *

Golden Gate Shoot.—The outlook is promising for an extra large attendance at the Golden Gate Gun Club merchandise prize shoot. There will probably be a prize for every contestant.

* * *

A New Trap.—The Bruner-Kimball trap is something entirely new in the trap line, and must be seen in operation and shot over before it can be fully appreciated by the shooter.

The trap was made especially for throwing the "Coast Blackbird," and is about one-fourth the size of any other automatic trap. It is compact and strong, all bearings being hardened to stand wear and tear, and it throws any standard target flatter, farther, and with more rotation with less tension on main spring, than any other trap ever produced. And with a specially designed carrier, it throws targets by the hundreds and thousands without any breakage.

The trap throws a left-handed target, and is operated by a lever back of the score line, connected to a rod leading to the trap, and connected by a cocking arm. A backward pull of the lever sets the trap, and a forward motion springs the trap. The trapper changes the angle of flights as he places the birds in the trap.

When the shooter calls "pull," your bird is as prompt as though you had pressed an electric button, and you invariably get a whole bird to shoot at. The trap is so easily manipulated that one can keep three birds constantly in the air, it is claimed.

* * *

Coast Made Blue Rocks.—The new target is a duplicate of the old Peoria "Blackbird," manufactured by Fred Kimball over thirty years ago, and from which all other targets have been copied. The bird is a spun target, and the only spun target ever manufactured by any one but Mr. Kimball. This target showed its superiority over all pressed made targets thirty years ago, and it is showing superiority over all pressed made targets being manufactured today.

The makers assert that the "birds" are better breakers than any other target manufactured, and their being black enables the shooter in the hard light on the Coast to cover his bird from three to five yards faster than he can other targets.

* * *

Official Averages for 1914.—Encouraged by the enthusiasm with which the trapshooting fraternity greeted the first publication of the complete and official trapshooting averages, issued by The Interstate Association a year ago and distributed broadcast for the purpose of providing gun club and tournament officials and those interested in the advancement of this great sport with a pamphlet containing a rating of every shooter in the country, The Interstate Association is repeating the good work this season. In the new booklet just issued there is contained the average of every amateur and professional who competed in a Registered Tournament in 1914. This is a real directory of trapshooting, a "Who's Who" in the realm of this great sport. Those who were fortunate enough to obtain copies of the publication a year ago are again clamoring to be included in the mailing list. This year the shooters are arranged more carefully in alphabetical order so that they can be found at a glance when officials are endeavoring to handicap or classify the shooters. In the hope that this second yearly edition of the trapshooting averages will be of as great value to the trapshooting fraternity as its predecessor, this contribution of The Interstate Association can now be obtained by mailing request to Secretary E. Reed Shaner, 219 Coltart Ave., Pittsburg, Pa.

* * *

Garden City Traps.—The San Jose Blue Rock Club held a fine shoot last Sunday. O. N. Ford scored 96 out of a possible 100. C. H. Jones and Dr. A. M. Barker tied for second place, breaking 92 out of a possible 100. George A. Anderson, president of the club, finished with 91 to his credit. A good showing was made considering the fact that most of the members were out of practice. C. A. Haight of San Francisco was the guest for the day. C. H. Jones broke 39 straight, and Carl Schilling cracked 35; the two longest runs of the day.

Scores made at 100 birds were: O. N. Ford 96, Dr. Barker 92, C. H. Jones 92, G. H. Anderson 91, J. T. Downs 90, Carl Schilling 90, C. A. Haight 89, Ada Schilling 88, A. F. Lewis 87, H. H. Clark 80, A. E. Sandbo 60.

The season's regular opening shoot of the club will be held March 14, and will be a Fred Gilbert 20th anniversary shoot.

* * *

Smelter Smoke.—Good shooting was done at the February shoot of the Anaconda Gun Club at the Nell grounds the 7th inst., states the Butte Daily Post. Event No. 1 was for practice only; No. 2, for the Twohy medal; No. 3, for the Keppler; No. 4, sweepstake, and No. 5, Confarr medal. Those attending from out of town points were: L. A. Cunningham, representative of the Winchester Arms Company of Salt Lake; C. L. Flannigan, representative of the Peters Cartridge Company of Great Falls; Lee Williams, H. Z. Bielenberg and A. L. Tippett of Deer Lodge, and C. H. Smith and W. A. Willoughby of Butte.

The scores were:

Events—	1	2	3	4	5
Cummings	24	25	24	22	23
Smith	21	23	23	24	20
Willoughby	20	19	20	17	..

TRADE NOTES.

Movies Shoot Trap Shooters.—Pathe Weekly No. 10 which has just been released, includes a section that will interest all gun bugs. It shows John Philip Sousa, the March King, and one of the best known amateur trapshooters in the country, shooting at targets hrown from a hand trap by Jack Fanning.

The firm was staged at Mr. Sousa's home at Port Washington, New York. One section of it shows ten or more trapshooters lined up, with Fanning in the middle operating the hand trap.

The hand trap is not a new contrivance, but Fanning's method of operating it is decidedly new. When a trap is held firmly against the breast and the trigger pulled, an easy target will be thrown about 40 or 50 yards.

Fanning has discovered that by swinging the loaded trap at arm's length and pulling the trigger near the end of the swing, he can add 25 to 40 yards to the travel of the target. This is of interest to all trapshooters because it makes possible a more difficult target than is thrown from the regulation stationary targets, and also pictures the possibilities of a portable trapshooting club requiring no club house, trap house or trap boy.

Trapshooters who have a chance to see this film should not lose the opportunity.

Peters Points.

High professional averages at New Rochelle, N. Y., January 27, was won by Mr. Neaf Apgar, 92 ex 100, and again at Freehold, N. J., January 28, 88 ex 100 from 20 yards. At the latter tournament, high general average and high amateur average were won by Mr. A. L. Ivins from 19 yards, score 92 ex 100. Messrs. Apgar and Ivins both shot the "P" brand of shells.

At the annual Mid-Winter Tournament at Pinehurst, N. C., January 19-23, high professional average on all 16-yard targets was won by Mr. Emory H. Storr, who scored 570 ex 600 with Peters "steel where steel belongs" shells—the kind that won the five premier honors of the year 1914, to-wit: The Grand American Handicap; the Amateur Championship, single targets; the Amateur Championship, double targets; the official high amateur average, and the official high professional average. There could not possibly be a more impressive demonstration of superior quality than this.

THE FARM

HEALING FLESH WOUNDS.

There are a great number of remedies that may be used on wire cuts that will stimulate healing and also keep the wound in good condition otherwise. As a rule the less washing and soaking that you can do the better it will be for the sore. As a wash you can use no better material than some of the coal tar preparations, of which creoline is an example. Every stockman should keep this material at hand for use on his stock. For a wash use an ounce of the drug to a quart of water and you will have a wash that will not irritate and still have a wash that will cleanse. A powder made as follows will answer most purposes as a dry dressing: Boracic acid, four ounces; zinc sulphate, one-half ounce; iodoform, one-fourth ounce. Mix these and place some of the powder in a salt or pepper shaker and dust it on the sore two or three times a day.

If a wire cut is on some part of the body where there is but little movement, it may be stitched and will sometimes heal without the stitches tearing out, but if the cut is where the muscles are used in walking or feeding, it is generally best to not try and close the wound as the stitches will most certainly tear out, helping to make the scar more unsightly than it would have been otherwise. As a rule a wire cut should not be tied up unless the weather is cool and extra care is given to it. It may be necessary to protect the wound against flies but this may be done by taking a mixture of fish oil and oil of tar and applying it with a feather to the hair surrounding the cut or iodoform may be dusted on the sore two or three times a day.—L. L. Lewis, Oklahoma Experiment Station.

HORSES ON THE FARM.

There is no profit in letting the colts lose their colt flesh. Keep the colts fat and you will have an easy-keeping hardy horse.

It is just as economical to feed a balanced ration when all grains and mill feeds are high priced, as it is when they are cheap.

Good and regular grooming keeps the skin active and promotes health. A well groomed horse resists the cold and changes better than a horse that is neglected.

Letting the horses roll somewhere outside before being stalled for the night is pretty good insurance against much currying, as they will roll in the stall if confined there without being allowed first to enjoy this exercise.

As draft foals are capable of making about half their growth during the first year, to develop pure-bred or high grade draft foals into horses that will bring the highest market prices at maturity, all reasonable means should be taken to make the foal grow as much as possible during this time.

Put a blanket on the driving horse to keep his coat short. A heavy coat of hair is a burden to a road horse. The heavy coat causes him to sweat easily, and when standing he will chill quickly. A surface chill is very dangerous.

In haying, harvesting and other hauling, some men are constantly overloading their team. It is a bad practice and cruel. Do not do it. Load lighter and go oftener. Do not brag on how much your team can haul. Do not try to see how much they can. It is better not to know how much it takes to stick them.

Don't whip the horse if he is afraid. Talk gently to him. Don't forget his salt. Don't put a rough dirty bit in his mouth, nor a frosty one. Don't hitch him in the cold unprotected by blankets, and hitch him so the wind will not be in his face. Notice how horses in a lot always turn tail to a cold wind. Give him enough to eat of good wholesome food, and all the good water he wants.—Rural World.

The report of the dairy bureau shows the value of dairy products of the state for the past year to have been $33,000,000. Imperial county is in the lead with the volume of dairy output.

Potato planting in the islands of San Joaquin county is now under full headway and especial care is being taken to prevent any of the fungous troubles which have been so bad in this section in the past two years. Large areas of both wheat and barley are also being sown in the same district. In fact, cereal acreage in this section promises to be the largest ever planted.

HORSE OWNERS! USE GOMBAULT'S

CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from Horses. Impossible to produce scar or blemish. Send for descriptive circulars.

Second Payments $5 Due
Monday, March 1st, 1915
Pacific Breeders Futurity Stake No. 15

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1914 to Trot and Pace at Two and Three Years Old

$2800 FOR TROTTING FOALS
$300 TO NOMINATORS OF DAMS OF WINNERS

$2100 for Three-Year-Old Trotters.
100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Trot.
800 for Two-Year-Old Trotters.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1800 FOR PACING FOALS
$250 TO OWNERS OF STALLIONS

$1200 for Three-Year-Old Pacers.
100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.
500 for Two-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-year-olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

SUBSTITUTIONS.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before May 1, 1916, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1914.

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects

READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

DON PRONTO 2:02¼, eight years old, pacer, no straps, needs no boots; sound, not a blemish or a puff. Any amateur can drive him as well as a professional; has been in 2:02 with a 230 pound amateur up. This is a matter of record. Don Pronto is the cleverest all-round high class pacer in the country. Has held a world's record and is from the dam of Manrico (3) 2:07¾, a world's record holder. Is bred to be a great sire, being by THE DIRECTOR GENERAL (sire also of Wy-Drad 2:04¼, William O. 2:04¼, Mainsheet 2:05, Deuchester 2:07, etc., 8 in 2:10), and out of SILURIAN, that wonderful producing daughter of Wilton. Don Pronto was the biggest money winning free-for-all pacer in the west both in 1913 and 1914. Can surely beat his record. Is very beautiful, pleasant and a great favorite. **Price $1750.00.**

ALARICH 2:11¼ (Breeder's mark 2:09), trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. **Price, $650.00.**

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. **The best buy in California at $1600.**

NELLIE Mc, black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. **Price $1000.00.**

CARLETA, bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from families noted for early speed. She has been up from pasture about eight weeks and trialed this week in 2:49 very easily, last eighth in :19¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. **Take her at one-third her value, $650.00.**

OMAR, gelding, trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). **A present at $350.00.**

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. **Price $800.00.**

HERMES, brown colt, two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. **Price $1500.00.**

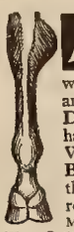
JOHNNY DUGAN, 3-yr.-old breeder's record 2:16, pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. **A great buy at $350.00.**

OLD FOLKS, bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½; dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is ready to begin fast work, having been jogged all winter. **Price $1000.00.**

CARINA, bay filly, trotter, two years old, by CARLOKIN, dam ATHERINE (dam of Copa de Oro 1:59, Rags 2:09¾ and Nicola B. (2) 2:23¼, tr. 2:17, winner of the Oregon Futurity and second in the P. C. T. H. B. A. stakes for two-year-old trotters).

Carina is entered and paid up in the same stakes as Carleta. She is a grand looking, well developed filly, showed a :40 gait at eleven months old. Is good gaited and good headed, is in training and promises to make a high class trotter. Trialed this week in 2:46, last half in 1:12½. **Price $600.00.**



AND ONE FOR THE $20,000 P.-P. I. E. TROTS — RAGS 2:09¼, winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old — in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. **Price $2000.**

In addition to the ones above mentioned I will offer to intending buyers NICOLA B. (2) 2:23¼, JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), a YEARLING BROTHER TO ESPERANZA 2:09, engaged in all of the Stakes, the phenomenal two-year-old pacer SANDY McNABB (staked), MISS QUEALY (full sister to Manrico), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

SAVE-THE-HORSE

(Trade Mark Registered.)

THE TIME, NOW!

All the winter long, the troubled owner of a lame horse reads our advertisements. Then, day after day slips away, while he talks, laments, listens, takes advice and hesitating—**FAILS TO ACT**—till the Springtime is on him and his horse is not yet able to work. Meantime the thrifty, prosperous, resolute man, reads, considers the evidence carefully—**Decides Promptly**—and his horse is quickly cured, worked, too, if needed. That's exactly what happens every year.

D. M. Clark, Arlington, Cal., writes: This is to inform you that my filly has quite recovered. I did not expect I could work her any more this winter, but she is working every day for four days now, and the joint on which I used Save-The-Horse is as strong as ever.

Another Lesson From Experience. J. A. Jones, Southampton, Mass., writes: "Send bottle of Save-the-Horse. Just counting up the different horses—nine before this and on all it did the trick. I think it the best remedy on earth."

19 YEARS A SUCCESS

Every bottle of Save-the-Horse is sold with signed contract bond to return money if remedy fails on ringbone, thoropin, SPAVIN or ANY shoulder, knee, ankle or tendon disease. NO blistering or loss of hair. Horse works as usual.

—Any season.

$5 at druggists', WITH CONTRACT, or we send by Parcel Post or Express paid.

F. O. GARDINER,
Secretary.

FOR SALE.

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great progeer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

FRED W. KELLEY,
366 Pacific Bldg. San Francisco.

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1298

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ De Ora (3) 2:17
2-yr.-old record 2:13½. 2-yr.-old record 2:27¼.
Trial (3) .....2:09 Gold Lily p. (2)....2:24½
Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1297.

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 Nicola B. (2).....2:23½
John Warwick (2) 2:17 Santiago (3) 2:24¼

Carl (2) .....2:19¾ Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 El Carbine (2).....2:27½
Carsto (2) .....2:22½ Eileen C. (3) 2:29
Carlschen (2) .....2:23 Carlos (2) 2:29¼
Fulton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

Pleasanton, California

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10.

Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10.

Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Vernon McKinney 2:01½

A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes.

Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity **1914**

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $4 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. His qualities as a sire are fully proven and breeders sending mares to his court have every assurance that the resultant foals will possess soundness, high individual excellence, and early and extreme speed. None better bred—none more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of **Uhlan 1:58;** 14 in 2:10
First dam **Episode 2:18** half sister to Peter the Great 2:07¼
Second dam **Santos**, dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. His inheritance is of the kind that is breeding on most spectacularly and that he will found for himself a remarkable trotting dynasty seems inevitable. Bred right, built right, gaited right, and his few foals show that he breeds right. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address **HARRY DOWLING, Supt., Woodland, Cal.**

THE ONLY SON OF JAY McGREGOR 2:07¼ ON THE PACIFIC COAST

ONWARD McGREGOR 3, 2:23 1-4

Yearling Trial Quarter in :33

Bay horse with black points, Height 16 hands, weight 1100 lbs.

First dam MARY GORDON 2:09¾ by Gordon 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and granddam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc. Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

BERT WEBSTER, Manager, Pleasanton, Cal.

EXPRESSIVE MAC 2:25 1-2

Sire of

Clara Mac 2:04½ — Vera Hal 2:05

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of McKINNEY 2:11¼ and the great brood mare EXPRESSIVE 2:12½ by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at $25 the season, usual return privilege, or $35 to insure. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

Race Track or Delivery Wagon Which?

Your horse's usefulness as a racer is continually hanging in the balance. Any day may bring him any of the hundreds of limb diseases that soon render him useless as a purse winner. It lies within your power to say whether such diseases shall ruin your horse or not—whether he shall be retained for the race track or relegated to the delivery wagon. It depends upon your willingness to purchase a bottle of

The Only Spavin Remedy in the

Mack's SPAVIN $1000 REMEDY

World Sold Under a $1000 Bond

and to follow our simple instructions. They require no skill or experience and you can use the horse while you are curing him. Mack's $1000 Spavin Remedy is absolutely guaranteed to cure Spavin, Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Ruptured Tendons, Sweeny, etc., regardless of how long the horse has been lame nor from what cause. We have a special deposit of $1000 with the First National Bank of Binghamton, N. Y., which we must forfeit if we do not do exactly as we say. Send for a copy of this bond. Read it.

Your Druggist Will Secure Mack's $1000 Spavin Remedy For You if you ask him. Price $5.00 a bottle. If he refuses, remit $5.00 to us and we will see that your order is filled without delay.

Send For "Horse Sense" No. 3—FREE

Describes and illustrates diseases of horse's limbs, shows correct name for every part of the horse and tells valuable facts every horse owner ought to know.

McKallor Drug Co.,
Binghamton, N.Y.

FREE Veterinary Advice

We have associated with us a Graduate Veterinarian to answer all questions regarding lameness in horses, free of charge. Mark a cross on picture of horse showing where lameness is located and cut out and mail same to us. You will receive instructions how to cure the trouble. If your druggist can't supply Mack's Thousand Dollar Spavin Remedy remit price direct to us and we will send at once, prepaid. $5.00 per bottle—and worth it. Accept no substitute.

Stanford-Occident Stake No. 1

To Trot and Pace at Three Years Old.

$3,000.00 to Trotters — To be Given by the — $2,000.00 to Pacers

California State Agricultural Society, 1917

ENTRIES TO CLOSE MARCH 1st, 1915

TROTTING DIVISION

$900.00 to 1st heat.
$900.00 to 2nd heat.
$900.00 to 3rd heat.
$300.00 to horse standing highest in summary.

PACING DIVISION

$600.00 to 1st heat.
$600.00 to 2nd heat.
$600.00 to 3rd heat.
$200.00 to horse standing highest in summary.

ENTRANCE AND PAYMENTS—$5 to nominate colt on March 1st, 1915; when name, sex, color and description of colt must be given; $10 Sept. 1st, 1915; $10 March 1st, 1916; $10 Sept. 1st, 1916; $15 March 1st, 1917.

STARTING PAYMENTS—$100 to start in trotting division; $50 to start in pacing division. All starting payments to be made ten days before the State Fair of 1917, at which the race is to take place. Nominators when making payments to start must designate whether the horse entered is a trotter or pacer.

CONDITIONS.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race, all other horses to go to the barn.

Heat purses divided 50, 25, 15 and 10%; the extra $300 for trotters, $200 for pacers in each division goes to the horse standing highest in summary. The Stanford-Occident Cup to be awarded to the colt standing highest in summary.

Distance 100 yards. A distanced horse shall be entitled to money already won. A horse distancing field or any part thereof is entitled to first money only. There will be no more moneys in each division or heat than there are starters.

Deductions from money winners—1st 10%; 2nd 7½%; 3rd 5%; 4th 2½%.

Entries must be accompanied by the entrance fee.

Nominators are liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $5000, the amount of the guarantee, only.

Hobbles will be barred in trotting and pacing divisions.

Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

"LEADER" and "REPEATER" FACTORY LOADED SHELLS

A canvasback flies about 150 feet a second; a bluewing teal 130 feet; and other ducks, geese and brant from 75 to 115 feet a second. This means that the quickest shot needs a fast load, even when shooting the slowest-flying wild fowl. Winchester "Leader" and "Repeater" Factory Loaded Shells are the get-there-quick, hit-hard kind. They have the velocity and penetration to bag the swiftest-flying wild fowl. Their primers are quick and sure and they are loaded with the best of powder, shot and wadding. That's the reason experienced and successful wild-fowl shooters prefer Winchester "Leader" and "Repeater" Factory Loaded Shells to any other make. In any make of gun they give the fullest measure of shooting satisfaction. Dealers everywhere sell them. They are

VICTORIES OF PARAMOUNT PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

AN APPEAL FOR AID.

There are few classes of people in the world more acutely aware of the uncertainties of human welfare than are trotting horsemen, and none more ready to extend a helping hand to the unfortunate, the good man temporarily down and out, or even to the scapegrace whom they know is down to stay, and down for his own fault. Few there are among them who have not known the need of help at some time or other, in small ways or large, through circumstances over which they had no control, and many a man of them who lives in comfort today can look back to the time when friendly help cleared the way for his present rank among his fellows. To these, and to every horseman, rich or poor, do we present for consideration at their hands the pitiable case of John McClintock, suffering miserably as this is written in a tent in the foothills of San Bernardino county, body and soul held together by the efforts of a gritty little woman whose strength is fast fading away—a slip of femininity who until recently never knew what hardship meant.

John McClintock, long editor of the Pacific Horse Review and much longer a devoted lover of the trotter and a tireless worker at all times in behalf of the trotting industry, is known among horsemen as a good man and true, and, withal, an independent one, and the news that he is in desperate straits comes as a sad surprise, though we all knew of his illness in a small way. Months ago he was forced from his desk by consumption and came with his wife to California. The odds were against them from the start, and though last fall Mr. McClintock was better, no means of earning a livelihood were open to one in his condition.

Seeking the open for health and a chance to get a hold upon fortune again, he filed upon a homestead last fall some thirty miles north of San Bernardino, and here alone he has made his stand, his wife working as a seamstress in Los Angeles when she could find such work to do in order that starvation might be staved off from herself and the man she loves. Bravely they bore the brunt of the unequal struggle until the day came when the end of all seemed in sight, and the barriers of the pride of a good man and a better woman were beaten down and an appeal was made to horseman friends for help—help to build a rough homestead shack and supply the actual necessities of life that illness denies them the right to earn.

Nor has the appeal fallen on deaf ears. The northwestern horseman to whom it was made known not only made a quick and generous response, but he set in motion the activities of wire and mail that have carried the cry for help to horsemen everywhere. Charity is a blessed thing, as so many of our rank know from charity received in some guise or another. If charity covers a multitude of sins it would most becomingly cloak a great many of us. If charity begins at home, then is help in this case true charity, for he is one of us—and after all, help at such time is more friendship than charity. There are those among us of whom John McClintock has said many a friendly word, to whom he has in times gone by extended a helping hand. Now when all save misfortune and a dauntless woman have deserted him he asks us for our aid. Shall it be said we failed to rally to his cry?

Those of you who can and will contribute to the fund, no matter how much or how little, are urged to do so, quickly. Contributions will be received by and forwarded from the offices of the Breeder and Sportsman, the Pacific Horse Review, any of the eastern turf journals, or, better still, mail your portion direct to John McClintock, Hesperia, California, and send a word of cheer to keep it company. You will never regret your action.

WHY A RACING COMMISSION.

Sponsors of the racing commission bill, which has for its avowed intention the revival of the breeding and racing of thoroughbred horses in California on a clean basis, are having considerable trouble in convincing the public—and especially horsemen of both standardbred and thoroughbred persuasion—that the bill is possessed of any degree of merit or that its enactment would prove productive of the results set forth above. Immediately upon the introduction of the Marron bill we called attention to its deficiencies, and the measure introduced by Mr. Beban, known locally as "the Boots bill," has no more to commend it from our standpoint. The Thoroughbred Record recently made use of the Chronicle's comment on the bill, which elicited the following letter from Mr. Chas. T. Boots, addressed to and published by that authoritative organ of the American running turf:

"In the last issue of your most valuable paper there appeared an article on the attempted revivals of racing by legislation in which was a statement taken from the San Francisco Chronicle in reference to legislation before the California State Legislature. It was stated that evidently the framer of the bill did not understand racing conditions and that it did not seem to have any backing from the men most interested in the sport. The bill creating a state racing commission which has just been passed in Nevada was taken from this bill, which was drawn up in consultation with Messrs. A. B. Spreckels, E. P. McDaniel (Superior Judge of Yuba Co.), R. J. MacKenzie, Albert Joseph, Geo. Wingfield, H. T. Griffin, W. B. Jennings, J. C. Nealon, Chas. T. Boots and others who either are at the present time or have in the past been actively engaged in raising and racing thoroughbred horses.

"In the opinion of the writer of the article appearing in the San Francisco Chronicle the bill had no merit because it did not provide for gambling on the races. It is true that the bill to create a state racing commission does not aim to legalize gambling by pari-mutuel machines or any other means and was drawn up with that end in view. The bill is to promote by the best possible means horse racing as a sport, not as a business. The Kentucky State Racing Commission was not created to legalize gambling nor has it done so. It was created to regulate horse races in Kentucky and it certainly has accomplished its purpose.

"The framers of the present bill before the Senate of California do not intend to try to have pari-mutuel betting on races, their aim is to have a state racing commission of five members, who shall be appointed by the governor of the state and shall have the power subject to the provisions of this act to state, when, where, how and by whom running races may be conducted in California.

"They hope by this means to gradually revive the breeding and racing of thoroughbred horses in this state on a clean basis. They believe that if conducted under a commission composed of breeders of horses, who are to receive no pay for their services but are to give their time for the love of the thoroughbred horse and clean races, that short race meetings may be given successfully in different cities of the state. They do not expect that these meetings can be run at a profit but they do think that they can be conducted without financial loss and by that means in a few years the thoroughbred horse may come into his own and improve the class of all horses in California.

"They fully realize that the results must be very slow and it must be many years, if ever, before the horse interests come to what they were before they were ruined by gambling, race track greed, and mismanagement.

"If the Messrs. Spreckels, MacKenzie, Wingfield and a few others are willing to give their time and means in an endeavor to bring about this result they should certainly receive the support of every lover of the thoroughbred horse not alone in California but of the whole country. We who are endeavoring to bring about this reform have assured the legislators of California that we are trying to revive the thoroughbred horse industry of California and revive it without the gambling evils and we ask the support and confidence of all the people who want sport for sport's sake and not those who want sports of all kinds, including horse racing merely as a means of gambling."

Any and all persons who are familiar with local conditions will not be slow in seeing the shortcomings of the bill, or in finding instances in which its operation would be detrimental, taking for the basis of their investigation the flat statement that we made before and make again, that thoroughbred racing in California has been proven to depend upon betting for its support. After the "passing" of the old system, racing was given a thorough tryout with "jaw bone" and "hand to hand" betting at the track at Emeryville, and if racing under those conditions had paid it would not have been voluntarily abandoned.

A racing commission regulating betless racing must draw its revenue for expenses by a pro rata daily levy upon the gate receipts of such meetings as are held under its sanction—and meetings held without its sanction are outlawed and subject to a heavy fine which would greatly exceed the pro rata levy under license from the commission. If racing with hand to hand and jaw bone betting cannot draw a gate that will pay purses and expenses, how do the sponsors of the bill figure that betless racing "can be conducted without financial loss" and assume the additional burden of the commission's expense percentage? Moreover, why a commission to regulate something that does not exist or to encourage a "revival" of racing on a clean basis, when there is at present no legal obstacle to conducting betless racing?

Also consider this: When thoroughbred men threw up the sponge, a little band of trotting horse men and fair boards kept their end of the business alive by the hardest of labors, and by the willingness on the part of a few men to go ahead without profit for the sake of keeping racing from dying out entirely. At various places fairs are held with both trotting and running races—at other points racing days and matinees are given occasionally for local horses for small purses and little admission charged. Placed under a commission these meetings could not live—and they come as nearly to being "sport for sport's sake" as we can imagine. Count up the places you know of where racing is at present conducted, either independently or in conjunction with fairs, and see how many can stand a "tap" of fifty to a hundred dollars daily for no reason on earth than that they be "regulated" by a commission! How long would they last? You know the answer—a very few could stand it, perhaps, others would conduct one meeting at a loss and stop right there, still others would never try to give a meeting, and we cannot afford to lose what meetings we have.

Then take a glance at it from this angle:—If betting had been confined to the track enclosures all over the land, racing would probably still be in progress in most sections where it had a real hold. The cigar stand hand book, the back door "pool room" and the shady joint were responsible for more "down falls" from positions of trust and responsibility than were the open books and auctions at the track side. These pests are with us yet in the larger cities, with a following much more restricted than of yore. Given local racing, betless racing, and those who would bet at the trackside and thousands more will flock to the handbook, the pool room, the joint—and these will multiply immeasurably. Thus will "clean" racing revive the very worst feature of the old system.

Mr. Boots' letter in certain instances is misleading. He states that the Nevada bill was taken from his bill, but he neglects to state also that the companion bill providing for pari-mutuel wagering was the "keynote" to its enactment. He also states that the Kentucky Racing Commission "was not created to legalize gambling nor has it done so," and that "it was created to regulate horse races in Kentucky and it certainly has accomplished its purpose," but he neglects to state that the horse racing it regulates is horse racing with wagering attached, and that in both instances revenue is derived by the association from a percentage of the money wagered. Mr. Boots also implies that the gentlemen mentioned—among whom we have some most excellent friends—will be impeded in their efforts to establish betless racing in California unless the commission is not estab-

Horsemen Visit Los Angeles

ROBERT A. SMITH, Correspondent.

Owners and drivers who have made history in the light harness horse world have migrated in flocks, recently, to Southern California, where they are sure to sidestep the sleet and snow and where they can indulge in and thoroughly enjoy their favorite pastime, even in the dead of winter. Of these who have recently visited, or are now visiting, Los Angeles and vicinity and who may be seen daily at Exposition Park, performing the self-imposed task of tuning the "workouts," renewing acquaintances and swapping reminiscences are Mr. John Sheppard, of Boston, Mass., who since his ownership of that sensational trotter Arab 2:15 years ago, has been the proud possessor of many very fast trotters, and has been one of the best and most prominent road and matinee drivers for over half a century. The germ has been so deeply seated and nurtured that Mr. Sheppard, although past his eightieth year, is as enthusiastic regarding the trotter as he was fifty years ago. He has forsaken the heat and cold of the east, the cares of his large mercantile business and under the environment of California's climatic and equine influences is getting younger every day.

Robt. E. Ellison of Lima, Ohio, another youngster, past seventy-five years of age, raced and marked the pacer Storm 2:08½ by Brown Hal, when pacers beating 2:10 weren't so common as they are at present—I think it was about 1892 or 1893, the year Robert J. 2:01¼ made his first appearance for the money. "Bob" will "wise up" on the horses here, previous to taking in the big meeting at San Francisco.

John W. Springer, who won the M. & M. in 1907 with Sonoma Girl 2:04¼ when she defeated the phenomenal Highball 2:03¾, subsequently disposing of her to Miss Lotta Crabtree of Boston for $26,000, has been here a few weeks, having come down from his hime in Boise, Idaho, and will of course keep his hand in by driving an occasional heat, so that he will not lose his "finesse," as he is ever on the qui vive for another Sonoma Girl.

John Bransford, who was such a satisfactory mayor to the citizens of Salt Lake City that they re-elected him to a second term, is one of the regular Los Angeles winter colony. John has been a power not only in Salt Lake's municipal affairs but in its horsedoings. His moral soundness, quickness of perception, complete up-to-the-minute knowledge of the rules and his ability to jump in and drive one as well as a professional make him much sought after by associations, to act in the capacity of judge.

Thos. Donnelly, the genial proprietor of the Empire, one of the largest hotels in Winnipeg, Canada, also owner of several big business blocks in that city, has been here several weeks. While "Tom's" home town is very much on the horse map, he makes his yearly winter visit to Los Angeles in order to keep his portly system filled with horse, as he needs and takes no let-up. His mid-winter visits here are no more regular than his attendance at the Detroit Grand Circuit meetings, not one of which he has missed in many years. The war may have caused the bottling up of Germany's fleet but it never could stop Donnelly's regular Los Angeles and Detroit visits. "Tom" owns several real fast ones, among them a mare by Toddington 2:20, that was second several years ago, a heat in 2:12¾, in the two-year-old futurity at Lexington, and for which he paid $5200 at the public vendue held in Chicago, the following winter. Reports are that she will head a summary in a big race and when she does the Canadian Exchequer will be greatly enhanced.

Jose. Osner and Thos. Johnston, charter members and since its inception active in the matinees of the Denver Driving and Riding Club, spent several weeks here and have returned to Denver. Mr. Osner is a matinee driver of the first rank and was very much interested in the colts working here.

Thos. Irvine of St. Paul, Minn., proprietor of the Cloverdell Stock Farm, Lake Elmo, Minn., has been here all winter and is so thoroughly carried away with California, as the ideal place to work colts and prepare horses for the races, that he is thinking seriously of having shipped from his farm his mare Edna Patch p. 2:08¼, by Dan Patch 1:55¼, and two colts by Peter the Great 2:07¼, for development at this place.

Jos. James, brother of Havis, is also a tri-weekly visitor. While Joe's zeal for the trotter is at present a trifle dormant, his love for a real high classer is attested by his frequent trips to Exposition Park from his home at the beach, on the workout day of any of the top notch possibilities.

John W. Considine, owner of the Woodland Stock Farm, the trotting nursery and home of many good horses, located at Woodland, Cal., spent a couple of days looking over the horses at the track, but as we had some dampness at that time he didn't have an opportunity to see any stepping.

R. J. MacKenzie, en route to Chicago, paid us a flying visit of two days, hardly long enough to tell us about May Mack 2:04½, Joe Patchen II 2:03¼, et al., at his Pleasanton establishment. His chief topic and one he couldn't be weaned away from was the performance of his Anvil—Martha Spy two year old trotter, when he startled the natives of the Livermore valley town by trotting a half in 1:09—"some" two-year-old for this time of the year.

John Caul, for many years a horse lover of Cleveland, Ohio, has also been one of the "storm dodgers." John drove his first races on the old Glenville track at Cleveland in 1870, the year it was built and thrown open to the public. Every morning John "watches" the trotters and beats "Joe" Thayer (sometimes) a game of billiards in the afternoon.

Don Baxter, who was the official secretary of the Lima, Ohio, association for several years, takes a day off occasionally from his large oil interests, to run out to the track to see Lon McDonald and Bill Durfee step along a little.

T. W. Stiles, one of the owners of the Clay-Cotton Stable, Inc., of New Haven, Conn., has become so charmed with California after a seven weeks' sojourn, that he is building a home in Altadena and will eventually become a resident of this vicinity. The Clay-Cotton stable consists of seven horses, all of which will be raced on the twice-trounds in Connecticut and "Yankeedom" the coming season.

A new face at the track today was Mr. Griswold of Greenfield, Iowa, who bred, raised and in 1913 raced Simmona, giving her a tab of 2:15¼ in a winning race in the three-minute trot on the half-mile track at Shenandoah, Iowa, selling her last March to the Dover, New Hampshire, reinsman, Walter Cox. Simmona is by Mr. Griswold's premier stallion Simmons Star, a son of Simmons. The mare is reported to have worked a mile in 2:05 for Cox during the 1914 training season, and a perusal of her half-mile track races indicates that she is a very high class race mare.

Mr. Fredericks, a follower of the Grand Circuit for many years, who left his business interests in Detroit for a two months stay here, times the trotters all morning and enjoys a polo game in the afternoon. The horse is his sport and he says that the automobile is simply a means of getting from one place to another.

Stockton Letter

Joe Jones moved to the track at Stockton about the middle of the month, the head of his stable being the noted race mare Leata J. 2:03. She was taken to the farm last November, her shoes taken off, and every day that the weather was good she was turned out into a paddock of eight or ten acres with a few colts, and she surely enjoyed it as a change from her hard campaign down the Grand Circuit in 1913 and her races in California in 1914. I don't think I ever saw her look better at this time of the year; she is high in flesh, her coat is slick as a mole's, and she is full of fire and as wild as a deer. Joe says his stable was too large last year and he didn't have a chance to give her the prep that she needed, but that his string will be smaller this season and that he will try and prep her for a mark of two minutes. Those free-for-all pacers had better look out for her this fall at the big meetings in San Francisco.

The next one in his stable is Hanover, trial 2:09¼, by Hannibal (son of Iran Alto 2:12¼, by Palo Alto 2:08¾), dam Princess Pussy by Dexter Prince. This mare is the dam of Hanover, trial 2:09¼, and Black Venus 2:09¾, and is a full sister to Edith 2:10. Hannibal's dam was by Alcantara 2:23, second dam by Nutwood 2:18¾, the two greatest brood mare sires of the world. Hanover has all the good qualities that make a great race horse—good gaited, good headed, lots of speed, and game. He worked a mile in 2:09¼ forty-nine days out of the paddock and Jones drove him a quarter last year in twenty-nine seconds. He was laid over with the rest of his horses till this year, and the best of experts here say that he is better than a 2:05 pacer.

Bill Jones, that trotted in 2:13, last half in 1:05, last quarter in :32 for Jones last summer but was unsteady, is big and fat and slick, and Joe thinks that if he can get him to settle down and stick to the trot, 2:08 won't stop him. He is by Derby Mac and out of a mare by a son of Whipple's Hambletonian.

A three-year-old by Dexter Derby 2:17¼ and out of a mare by Stam B. 2:11¼, second dam by Dexter Prince, is receiving his first lessons and takes to the pace like a duck to water. The one that the local trainers all have their eye on is a three-year-old filly by One Better, trial 2:14 as a two-year-old (son of Nearest McKinney 2:13¼ and Much Better 2:07¼ by Charles Derby 2:20). The dam of this lass is Lady Irene 2:14 by Diable 2:09¼, second dam Geraldine 2:16¾, dam also of Leata J. 2:03 and Little Dick 2:09¾; she is of the Leata J. order, heavy set, good gaited and very determined. Jones says he is going to wait on her as he did with Leata J., as he wants another good one to go down the Grand Circuit with and he is pinning his faith to her.

* * *

The next stable is that of T. A. Jackson, who is dead in love with his four-year-old gelding Icicle by The Iceman 2:10, dam California by a son of Sabi Wilkes 2:18. This colt as a yearling could trot, pac singlefoot, gallop and run, so Jackson said he woul make a combination horse of him. As a two-yea old he was broken to saddle and under the directio of that noted saddle horse man, Ed Turner, he soo learned to go five gaits, picked up several high scho stunts and was exhibited at a number of our loc matinees. Then Jackson would hitch him to a sulk and work him a few miles on the pace, at which h did nicely and showed quite a lot of speed. Las summer at a home matinee he was entered in a tro ting race just to fill out, Jackson equipping him wit a pair of heavy toe weights to hold him on th diagonal gait. They beat him the first two heat but he won the third and fourth, trotted one mile i 2:30½ and only made three breaks during the day—a showing that was a great surprise to everybody He has a two-year-old by McAdrian, trial 2:15, ou of California that knows nothing but trot and wit but very little work can show a 2:40 gait. The las and least in size and years is a nine-month-old las out of the same mare but by Royal McKinney 2:19¼ sire of Leata J. 2:03, Blanch A., trial 2:17¼, Loya A., trial 2:11¾, etc. This filly's nams is Laura J. and she is surely a little trotting machine. Jackso says that all he wants is district fairs and he wil show the public what he can do.

* * *

Next in line is the stable of Farmer Bunch, headed by Ed Lavin's great little trotter Lily of the West She is wintering nicely, her coat is slick as a button, her muscles are hard, her wind is good, and every time that Bunch jogs her he comes in with one of "those kind" of smiles. He told Lavin the other day that if he didn't beat the coast record with her this fall he would quit "talking horse," to which Ed replied: "Gee, Farmer, that would kill you, and I don't want to take any chances of having a dead driver up when she is finishing her miles in the stakes." However, neither one shows any inclination to make any change in their present arrangement, so that their mutual confidence in the filly seems pretty strongly established.

In the next stall is a chestnut gelding called Dredger Boy, the property of Fred Rice and Arthur Wardrobe of Clements, Cal. He is by Dexter Derby 2:17¼, dam Flossy by Guy McKinney, sire of Vernon McKinney 2:01½, etc., and goes right to make a fast horse. With but little work last fall he trotted a mile in 2:30, last quarter in :35, and the way he did it was the most convincing part of the performance. A four-year-old filly by Dexter Derby 2:17¼, dam by Lynwood 2:18¾, the property of Charley Osborne of Waterloo, is receiving her first lessons on the trot, and the Farmer is just breaking a three-year-old gelding by the same sire, owned by Patsy Dolan of Waterloo.

* * *

Our old friend John Rowen says he feels his age when it comes to being head trainer and groom for three highly bred youngsters by Mechanic, trial 2:14 (son of McKinney 2:11¼), out of Modesto by Mendocino 2:19¼. Modesto has nine producing dams and John turned down $4750 for Mechanic when he was a four-year-old. Under Rowen's tutelage the foals from the mating of the two are developing in a most pleasing manner, and only financial matters keep him from sending all three to the best trainer on the coast.

* * *

Our expert horse shoer Frank Groom, the owner of Dexter Derby 2:17¼, can be seen jogging this good trotter every morning before shop time and it gives him a great deal of pleasure to have the change, for he is a very busy man in the big shop from seven in the morning until six at night. Groom has four or five colts by his horse that look good, one of them, Clements Maid, apparently the making of a nice trotter if given a chance, as Jones had her a little while last year and she showed very well indeed.

* * *

Mr. Williams has two at present, one by Ray O' Light 2:08¼, out of a Nutwood Wilkes dam—a three-year-old filly just getting her first lessons. The other one is owned by Judge Renden of Stockton and is a nice son of Mechanic. Mr. Williams is expecting three or four more the first of the month.

* * *

Charley Phagan, Stockton's old time famous trainer, can be seen almost every day driving his guideless pacer Newport 2:15, now twenty-five years old. Charley won a race with him last year at one of our matinees, which pleased the public very much as the game old horse has long been a favorite. Phagan also has a grandson of McKinney out of a Dexter Prince mare, a trotter he says he is going to give plenty of time and make an aged trotter or none at all. Charley doesn't believe in colt training.

* * *

H. B. Thornbury, the owner of Jack Barrymore, the champion saddle horse for which he paid five thousand dollars last fall, is having him prepared to show in all his classes at the big fair in San Francisco and says he don't see how they can beat him. Mr. Thornbury also has eight or ten highly bred Kentucky jacks that he expects to have at the fair and these long eared mortgage lifters drove away all the monotony of the rainy days with their melodious chorus night and morning, as they never fail to turn loose and apprise the neighborhood that feeding time has rolled around.

Yours as ever,

SUBSCRIBER.

THE CAMPAIGNS OF DON PRONTO 2:02¼.

One of the most popular pacers that has ever campigned on the coast is the black son of The Director neral and Silurian that Will Durfee has raced so ccessfully during the last four seasons, the Don's nerary for that time embracing a scope of country om Salem to Syracuse and many "way stations" d "side trips."

The youngster made his debut at Lexington in idsummer of 1910 as a three-year-old, when he was ven a time record of 2:24¾ "just for the looks it" and to give his dam a bit more of a represention in the list, Miss Quealy (2) 2:26¾ having eceded him by a few minutes in annexing a standd record. Later in the season he trialed below irteen, and came west to be fitted for his real cing by W. G. Durfee at Los Angeles. From the itset of his career as a wild and woolly westerner was well liked, and his popularity has waxed eater every campaign.

In his four-year-old form he made eleven starts, ginning his professional operations as a real race rse on Aug. 11 at Woodland, where he ranked third the summary to Teddy Bear and Nordwell and was cond in the fastest heat of the race, 2:06¾. At arysville in his first race he got tangled up in that emorable contest won by Maurice S., in which rank N., Hal McKinney and Margaret Derby were l heat winners, and was forced to finish behind the oney, but three days later he showed his quality y winning a much faster race, dropping the third eat to Teddy Bear, the time being 2:05½, 2:05½, :07 and 2:09. At Sacramento he won the 2:10 pace ter Teddy had annexed the first heat in 2:05, comg back with three heats in 2:05½, 2:07½, 2:08, but ropped back to fourth position in his next race at ortland, Francis J. and Jr. Dan Patch getting the g end of the purse. Back again in California he owed his liking for the twice-arounds by taking wo straights at Hanford in moderate time, repeating e dose the following week over the full sized oval t Fresno, stepping six heats from 2:07 to 2:09½. hen came the hike to Phoenix, where on Nov. 6 he efeated Hal McKinney and Geo. W. Newton in a ace in which all three won heats and in which four iles were paced in 2:07¼ or faster. Started again wo days later he got into company a bit too fast for im and finished fourth to Don Densmore, Branham aughman and Blanche in 2:03¾, 2:03¾, 2:03¾, at being his last start for the season, and his recrd of 2:05¼ standing as the fastest heat for a four-ear-old pacing stallion.

The following year the Don was a member of the table taken across the divide by Mr. Durfee, finishg behind the money in his first engagement at rand Rapids. At Kalamazoo he was third to Bram Baughman and C. the Limit, and at Detroit ourth, that being the first meeting with the "friend rom his home state" whom he was destined to tangle p with so frequently in future years—Jim Logan—. the Limit and Branham Baughman finishing sec- nd and third respectively and the time being 2:03¼, :03¼, 2:05. At Cleveland they froze him out, at ecatur he drew down the ante, and at Syracuse he egan to "come alive" again and won the 2:06 pace, VyDrad being the competitor and the fastest heat :03½. Back at Detroit he was second to Branham Baughman in the 2:05 pace in 2:04½, 2:04¼, and wo days later got a clean bill of health in the 2:06 ace in slow time. In the 2:05 and 2:06 pace at Columbus he was second, once to Branham Baughnan and once to Braden Direct, winning a heat in ach race, the average time for the eight heats being trifle faster than 2:04½. "Bill's big day," however, ame at Lexington on October 8, when he won one of he greatest races ever trotted in the futurity with Manrico and second money in the Tennessee with he Don, Braden-Direct winning with three heats in 2:02¾, 2:03¼, 2:03½. A week later, as a farewell for the season, the black horse started against time to beat 2:03¼ and stepped a nicely rated mile in :31¼, 1:00¾, 1:31½, 2:02¼, the performance stamping him as the world's champion five-year-old stallion.

For the last two seasons the scene of his operations has been confined to his "home country," where he has proved the best winner among the free-for-allers. In 1913 he was second to Jim Logan in 2:02¾, 2:04¼, at Woodland, and at Santa Rosa was again beaten by the same lad. At Sacramento he turned the tables on him with two heats in 2:02½, 2:02¾, which stands as the fastest two-heat race paced in California, and at Phoenix was second to Leata J., winning the first and fastest heat of the race in 2:02¾.

In 1914 he again met Jim Logan in a number of starts, Jim getting a "percentage" in performance, but Pronto getting the most money. At Santa Rosa Montgomery buckled into his old standby for a new coast record of 2:02¼, Pronto finishing second, and at Woodland the former pair took another clip at the same mark, the timers returning them the champs with a mark of 2:01¾, with Don Pronto second in the record heat, and third in the summary, topped by Jim and Leata J. At Sacramento he was again third to the same pair, the mare winning, and at Salem he evidenced no aversion to the mud and beat Haltamont and Ella Penrose in the slowest race in which he ever engaged. At Phoenix he went two sparkling races, administering defeat on each occasion to his ancient antagonist, Jim Logan, and including such good ones as Knight of Strathmore 2:03¾, Don Densmore 2:02¼ and Minnie Chimes 2:04¼ in the deal. His average time for the two races was barely slower than 2:05.

At eight years of age Don Pronto is as sound and fast as ever and has equaled his record with a heavyweight amateur behind him. He has won in excess of twelve thousand dollars and looks like he would pay a profit for some seasons to come. He is a free legged pacer and one of the best behaved ones in the land, all of which combines to get him the glad hand whenever he faces a California crowd. With others of the Durfee stable he has been offered for sale, and anyone who desires a perfect mannered pacer for the matinees and free-for-alls will go far without finding his equal.

HANFORD DOINGS.

Hanford, Feb. 20, 1915.

Editor Breeder and Sportsman:

Nothing very new or startling on the Kings County Fair Grounds race track. However, there are more horses quartered thereon now than there have been for many years at the present time of the year. The cowboys, Burrel and Lucky Jack, add considerable vim to the activities at the fair grounds, as besides being very agreeable young men they are splendid riders and they break any kind of a horse to ride and drive, single and double. They have the thoroughbred race horse Tourist and another son of The Desert with lesser fame; also two very prettily spotted horses supposed to track back to the Arabians, the mare being very beautiful and a perfectly trained saddle mare.

Moody Liggett is stepping some of his string up pretty lively, Mollie and Sidney Borden by Guy Borden being the farther advanced. The latter, owned by Mr. Senter of Hanford and leased to Liggett to race in the futurities this year, shows up very well for the short time he has been worked; if he does not start to growing pretty fast in size he will be a rival for Watch Charm honors and give Alberta 2:03¾ a close call. Mr. Friend of Porterville placed his speedy mare Soumise 2:10½ in Liggett's stable recently to have Moody search her out a bit and see if she has her usual whizz, with a view to entering her in classes to which she is eligible.

Russel Gray's string being written up twice recently there is nothing new to add, only that one of his favorite pupils, Lightning Bug 2:22, a brother to Toggles 2:08½, died this year, the property of Mr. E. Erlanger of Lemoore. The stallion was changed into a gelding and did not recover from the operation.

The death of Mr. Silvester places all of his horses on the market, a Zombro mare and her two foals by Mr. Kellog's promising young sire Nobage by Bon Voyage 2:08, also a black stallion by Zolock 2:05¼, and another, I think by Chas. Derby 2:20, being the headliners of his stable.

Claude Dalby looks after Mr. James McCord's heavy draft stallions and jacks and occasionally rides a bucking broncho, at which Claude is a whole lot better than a green hand.

The directors are already working to give Hanford a better county fair than ever and there is every reason to expect that success in abundant measure will crown their efforts.

PHILIP C. BYRNE.

Lou Taylor is back at Pleasanton after his vacation at his old home in New York, and is getting his stuff in shape for the summer campaign. He has recently received for training a six-year-old mare by Copa de Oro 2:01, dam by Geo. W. McKinney 2:14½, owned by Albert Curtis of San Jose. She is a big husky girl and worked in 2:23 over the two-timer at Pasadena last year for Frank Williams.

Joe Patchen II and His Mates

The quartet of stallions whose services are offered to the public this year at the establishment of R. J. MacKenzie at Pleasanton present a variety of blood lines from which the most exacting breeder should be able to make a selection that would meet his every requirement. The best families of both east and west are worthily represented through the strains that have been most productive of champions of all ages and both gaits.

At the head of the stable is the MacKenzie favorite, Joe Patchen II 2:03¼, whose winnings have never been approached by those of any other pacer in one season. Small introduction does this fellow need to American horsemen on either side of the big divide, and he is the same "big train" as of old—big and husky, pleasingly put up, and possessing a world of speed and gameness. His sire, Joe Patchen 2:01¼, has a representation of seven in the 2:10 list, including the champion Dan Patch 1:55¼, whose eighteen two-ten performers give him a commanding position among the progenitors of extreme speed. A daughter of Dan Patch produced last year's good pacer Carna G. 2:05¾, so there is no question as to the breeding on qualities of the family founded by the "Iron Horse," as the original Joe was affectionately known. Through his dam the inheritance of the Pleasanton Joe is superior—to many ways of thinking—to the maternal inheritance of the famous Dan, as his dam is Bessie Bonehill 2:05¾ (dam also of Empire Direct 2:09¼) by Empire Wilkes 2:29¼; second dam the great brood mare Arab Girl by Crittenden 433, sire of the dams of Bessie Bonehill 2:05¾, Will Leyburn 2:06, Governor Francis 2:08¼, and three others in 2:10; third dam by Bashaw Jr. 51.

Mahomet Watts 2:08¼ owns allegiance to two great championship families of the east and the west—those of Axworthy and Electioneer, sturdily reinforced by infusions from other lines of extreme prolificacy. He is a son of General Watts (3) 2:06¾, whose record long stood as the world's best for trotting stallions of the age, and whose trio of representatives in the 2:10 list all gained recognition in that select company as three-year-olds, the first to appear being Mahomet Watts 2:10, followed in 1914 by the California-trained fillies Miss Perfection 2:09¼ and Josephine Watts 2:09½, whose performances have been such as to demand a healthy respect for their sire here on the coast. Through his dam Mahomet Watts traces to sources most familiar to Californians and horsemen throughout the world and most highly respected in all quarters, the matron who gave him birth being a product of Palo Alto—Alla P. 2:21½ by Palo Alto 2:08¾, champion trotter, son of Electioneer, and sire also of the dam of High Admiral 2:07¾; second dam Lula Wilkes (dam of five including Advertiser 2:15¼) by George Wilkes 2:22; third dam Lula 2:15 by Norman 25, whose blood is so highly prized through his daughters, many of the greatest of present and recent equine stars carrying that cross—most notably the entire line of Bingens, and the lesser families of Norval and Norris, all productive of champions. Alla P. is also the dam of Doctor Allerton 2:23¼, Pussy Pumpkins 2:29¼, and grandam of Walter Kirk 2:15¼, Blackburn Watts 2:22¼ and Trixie Chimes 2:24¼, so that her blood is proven to possess the essential breeding on qualities. Mahomet Watts is a horse of fine finish and pleasing and symmetrical build, good gaited and fast, with plenty of courage and stamina. His record was taken in a winning race and he was timed separately in the M. & M. below 2:06. He is the only son of General Watts to whose services coast breeders have access, and the cross should prove a good one for almost any of our native mares, as the gait controlling sires represented in his pedigree have proven uniformly successful in all intermingling with the blood of other strains.

The McKinneys are represented in the Pleasanton Driving Park offerings through two exceptionally good grandsons of the founder of the family of that name, Vernon McKinney 2:01½ and Zomblack. Vernon McKinney, who is the fastest member of his tribe, is by Guy McKinney, son of the "old original" and Flossy Drais by Guy Wilkes 2:15¼, sire of the dams of nine in 2:10, including the three-year-old trotters Peter Thompson 2:07½ and Miss Stokes 2:08¾ and the good speed sire Guy Axworthy 2:08¾, sire of Lee Axworthy (3) 2:08, Axworth (3) 2:10, Guy Nella 2:07¼, Muda Guy 2:09, and others. Guy McKinney's second dam brings in another most potent cross, that to Onward 2:25¼ through a daughter productive of extreme speed, the dam of China Maid 2:05¼, while through his third dam he inherits the sturdy blood of Mambrino Patchen 58. Vernon McKinney gets additional infusion of blood that has produced extreme speed through Maud Vernon by Mount Vernon, sire also of the dam of the great race mare Leata J. 2:03, while his second dam is a daughter of Gen. McClellan, sire of the dam of the trotter Mack Mack 2:08. He is a horse of great power and good size and gives promise of becoming a most successful sire, as his youngsters are making an excellent showing and are changing hands readily at pretty fair prices.

As Zombro 2:11 is accepted generally as the best son of McKinney to date, so is Zomblack in his turn heralded as the best son of Zombro by those who know him—certain it is that few horses have been held in higher esteem by Mr. MacKenzie and his right hand men. Sons of Zombro are proving successful sires, and the highest-priced yearling of all recent sales was by a son of Zombro—the twenty-one hundred dollar Harvest Note, by San Francisco, out of Notelet by Moko. Zomblack's dam brings to him an inheritance of extreme potency, she being a double producing daughter of Demonio 2:11¼ (sire of the dam of Del Rey 2:03¾, etc.), and out of Mamie Comet (dam of 3) by Nutwood 2:18¾, whose blood is so highly valued through his daughters. Zomblack's speed has been emphatically evidenced by various fast performers, including a mile in 2:08¾ on the trot as a three-year-old, and there are few handsomer horses in the country He has the best of manners and temper and as the Zombro blood is more highly prized year by year breeders who patronize this youngster now are laying up a good profit for themselves in the future.

These stallions are quartered at Pleasanton in charge of Superintendent C. L. DeRyder, from whom particulars of all kinds may be obtained, and as they are in training and will make limited seasons interested persons will do well to make their investigations concerning them at once.

NOTES and NEWS

Monday, March first.

◈ ◈ ◈

Is a date you must not overlook.

◈ ◈ ◈

Entries close for Stanford-Occident Stake No. 1 for three-year-olds to trot and pace in 1917.

◈ ◈ ◈

Also, a payment of $5 is due on nominations in Pacific Breeders Futurity No. 15 for foals of mares bred in 1914.

◈ ◈ ◈

Patronize the new Stanford-Occident, by all means, and do not neglect keeping up your entry in the Breeders futurity. A failure on your part to do either will be a matter for future regret.

◈ ◈ ◈

Peter Howard has recently sent to Millard Sanders' stable at Pleasanton a four-year-old trotting gelding by a son of Monterey. He is a handy youngster and worked in 2:22¼ last year for Millard before the season was over.

◈ ◈ ◈

Bert Webster has recently taken up Madam Mac 2:10¼ by Expressive Mac 2:25½, campaigned last year down the big line by Charley DeRyder, and will key her up for some racing later in the season. She trialed last year several seconds faster than her present mark, which itself is not a win race record, and she ought to be a pretty serviceable five-year-old.

◈ ◈ ◈

A. W. Longley while on a recent visit to Pleasanton Driving Park purchased of H. E. Armstrong the two-year-old gelding by Vernon McKinney 2:01½ out of that good speed producer Jessie M. (dam of Hal J. 2:09½, Della H. 2:10, etc.), by Del Norte 2:08, and turned him over to Bert Webster. Every foal out of this mare has had speed, and the cross to Vernon McKinney ought to be productive of something pretty good.

◈ ◈ ◈

Millard Sanders holds the season's record at Pleasanton to date with a mile in 2:17½, last quarter in :30, behind Lou Crellin's pacer O. U. C., by C. the Limit 2:03¼, dam Rosie Woodburn 2:16 by Easter Wilkes. This lad has the earmarks of a real pacer and Millard expects to drop him down to a mile in 2:04 by May first unless someone comes through with a bundle of coin and takes him away prior to that date.

◈ ◈ ◈

John W. Considine spent a portion of the week in the city, going from here up to the farm at Woodland to see how things look after the big rains. Oniska, the dam of San Francisco 2:07¾, now in foal to True Kinney 2:12¼, and Rosemint, sister to Aristo 2:08¼ and Nuristo 2:10¼ and dam of Arista Ansel (2) 2:18¼, the good trotting mare now in the stable of Keefer & Spencer at Pleasanton, have been consigned to the Fasig-Tipton Company's midwinter sale at Madison Square Garden next week.

◈ ◈ ◈

Someone lost $250 outright by not buying Carleta by Carlokin, dam Alexandria by Bon Voyage from W. G. Durfee prior to this week, as the little lady is improving so fast that the price has been raised that much over the previous figure. She trotted a half recently in 1:16, last eighth in :18, so Will has pretty good grounds for regarding her as a very high class two-year-old. Someone is going to suffer some future regrets over allowing some of these youngsters to get by them when they could have been bought worth the money.

◈ ◈ ◈

We are in receipt of a communication from Secretary John W. Pace of the North Pacific Fair Association correcting an announcement made in the original bulletins sent out from his office in which both the Oregon and Washington State Fairs were scheduled to commence on September 27. This recommendation of the committee on dates was not accepted and the Washington State Fair will commence on October 4, as stated in our report of the association's meeting at Vancouver.

◈ ◈ ◈

Mr. and Mrs. Lou Childs arrived at Pleasanton some days ago and have joined Frank and Marvin at the Walker home, to remain until the horses of the two stables move down to the P.-P. I. E. track later in the season. Mr. Childs was in Omaha recently endeavoring to lay plans for the construction of a new driving park in that city and its restoration to the map as a trotting point; but while the proposition met with much favor among the packingtown sportsmen it was deemed advisable to defer definite action until general conditions assume a more settled aspect.

◈ ◈ ◈

A car of horses from M. W. Savage's big Minnesota speed nursery, the International 1:55 Horse Farm, is expected to arrive at Pleasanton early in March to be fitted for their engagements at the P.-P. I. E. meetings, Mr. Savage having been one of the most liberal of eastern horsemen in according patronage to the various early closing stakes, which he doubtless intends supplementing by entries straight through the array of class races. The car will include about a dozen head, and as the Dan Patch family has the same large following of admirers in California as it has in other sections of the world, the arrival of the shipment is looked forward to with much interest.

Sweet Princess and Margaret M. have been bred to Jim Logan 2:01¾ at Woodland.

◈ ◈ ◈

And still the stallion announcements increase in number, Derbertha Bells and Bon McKinney being the additions this week. Is your horse represented?

◈ ◈ ◈

A newcomer to the stable of Will DeRyder at Pleasanton is the Demonio gelding Ben R., that worked last year at the pace in 2:11¼.

◈ ◈ ◈

The Arizona State Fair is scheduled for November sixth to thirteenth, which conflicts with the fall meeting of the P.-P. I. E. However, as racing is pretty well over everywhere else by that time there will probably be horses enough to go around.

◈ ◈ ◈

Al Schwartz moved this week from the McKinney Stables in this city to the Pleasanton Driving Park, taking with him a dozen head of the good prospects and tried campaigners that he has been jogging locally during the winter. Eddie Kirk will assist in tuning them up, and as Al has never had a better bunch of performers at both gaits he ought to give a good account of himself this season.

◈ ◈ ◈

The first consignment from Curles Neck Farm goes through the sale ring at the Garden next week, young ones by The Harvester from such mares at Lou Dillon 1:58½, Bertha Mac 2:08, Adioo Dillon, Memories, Ariello, Nelly Worthy, and other aristocratic matrons. The first of the get of Manrico 2:07¼ also appear on the hunt for new owners, and the resultant prices are arousing quite a bit of interest even this far away.

◈ ◈ ◈

Seven colts owned by John Cartwright of Dayton got out of their corral Saturday night and upon the S. P. right of way. They wandered along until they reached Durham, where the little band of experimenting youngsters came to grief when the northbound Oregon Express went through Sunday morning. One was badly crippled and three killed outright, including a highly prized son of Dan Logan 2:07¼ out of a well bred mare.

◈ ◈ ◈

Conversation this week with several persons who are in position to speak with authority on the subject convinces us more thoroughly than ever that the present status of the district fair bill is O. K. with the powers that be, and it is up to horsemen to see that it remains so. The passing of the bill as it stands means enough state aid to make a vast difference in the future outlook. Any increase in the bill means its death warrant. Line up your senator and assemblyman before March 8 and let us have prompt and favorable action upon it.

◈ ◈ ◈

Mr. J. J. Campbell, now a resident of Pasadena, was a visitor in Pleasanton last week, coming up to give the "once over" to his youngsters in the stable of Sutherland & Chadbourne—Bon Cres (3) 2:10¼ by Bon Voyage, Mabel Bond, three-year-old filly, and Great Bond, two-year-old colt, the last two by The Bondsman and all three out of Mr. Campbell's favorite matron, Kate Kopje by Cresceus 2:02¼. All three are most promising and Mr. Campbell is more thoroughly convinced than ever of the future that awaits Kate Kopje as a producer. She is now at Woodland Stock Farm to be bred to Robert Bingen 2:11¼.

◈ ◈ ◈

Edward Peterson of Omaha, who has been spending several days in San Francisco and Pleasanton watching his candidates for the season's big stakes and major classes take their winter work, left Sunday for home by way of Los Angeles, where he stopped long enough to have a thorough inspection of the entries of some of his competitors for the P.-P. I. E. classics of both ways of going. The bear stories that are going the rounds concerning Dr. Burns, Jr., White Sox, Ilo Tolus, Hallmark, and the Durfee trotters are enough to make anybody sit up and take notice, but so long as Hal Boy and Loe Blossom continue doing as nicely as they are at present, Mr. Peterson is not losing any sleep.

◈ ◈ ◈

A letter recently received from the one and only Thomas W. Murphy conveys the welcome tidings that on April first he expects to make more entries for the fall meeting of the P.-P. I. E. than any other three stables combined, and that he will be on deck for that event with some thirty to forty campaigners of the genuine Murphy kind, including, of course, the various champions which are members of his band—Directum I 1:58, Peter Volo 2:03½, Frank Bogash Jr. 1:59¼, Anna Bradford 2:00¾, and others. The example set by the wizard of Poughkeepsie will mean that many other of the most prominent stables will make the trek across the plains and the big divide, and the close at Lexington will no doubt see a solid train of horse cars, well filled, headed for the Golden Gate. Only the fact that a stable of 85 horses is demanding all his time during the training season deters Tommy from making the run out for the June meeting—similar conditions operating likewise in a few other notable cases. However, the absence of some of the larger stables at the June meeting will greatly encourage attendance and participation of very many others who might feel a bit doubtful in regard to tackling the "big boys" but who have the horses to put up just as good racing as do the stars. The June meeting will be productive of the greatest racing ever seen on the coast, and surpassed at but few points in the world, while the fall meeting will undoubtedly be the banner fortnight of trotting horse annals.

Stockholders of the Riverside County Fair Association have elected directors for the coming year. Those chosen were, J. E. McGregor, M. M. Milice, D. Ormand, J. W. Chase, F. W. Stadler, W. G. Suits, A. J. Stadler, M. I. Wheeler, F. P. Younglove, H. P. Zimmerman, Glenn A. Calkins, F. A. Gardner, Harry L. Graham, J. F. Backstrand, B. S. Bartee, J. C. Cooper, W. D. Clements, J. M. Davison, W. H. Fertig, H. A. Hammond, O. E. Holland, Riverside; John L. Bishop, Highgrove; F. L. Hall, Perris; E. J. Genereux, Corona; W. L. Paul, Coachella; C. L. Suits, Blythe; George W. Thomas, Arlington; W. D. Clements, Glenavon. Directors are still to be elected for Elsinore, Hemet, San Jacinto, Beaumont and Banning.—Hemet News.

◈ ◈ ◈

Mrs. V. L. Shuler was expected to arrive at Pleasanton this week to join her husband and son and "set up housekeeping" while the training season lasts. The earlier arrivals of the family are more than pleased with the situation, and the boys at Pleasanton Driving Park are already offering "future book prices" on the chance that the family will call California home from now on. One trip around "the loop," with green grass, flowers, almond blossoms and sprouting grain on every hand and snow topped mountains in the distance started the "California spark" to glowing in the Shuler breast, and one round of the MacKenzie track only a few hours after a genuine sod soaker settled matters. Anyone "dubious" as to coming out to California has only to apply to V. L. Shuler, Lon McDonald or Al Whitney to have all doubts and fears cleared away.

◈ ◈ ◈

The attention of horsemen is drawn to the conditions of the recently announced Stanford-Occident Stake No. 1, entries to which close Monday, March 1, with Secretary Chas. W. Paine at Sacramento. The conditions are a departure in various respects from those governing the State Fair classics as previously given, the sponsors having made an effort to present a stake for three-year-olds pleasing to all parties. The payments are spread over a period of several months, with a liability to nominators for only the amount paid in, the sum total of the pre-starting payments being $50. A starting payment, which is not due until ten days prior to the state fair of 1917, of $100 on trotters and $50 on pacers, brings the entire payments up to merely the customary five per cent, and the money in each division is nicely distributed. Each heat carries thirty per cent of its portion of the stake, divided as usual among four horses, the remaining ten per cent and the Stanford-Occident Cup—one each for trotters and pacers—going to the ranking horse in the summary. Three heats will end the race except in case of three heat winners developing, whereupon they only will contest a fourth heat. Some good racing should result, and we bespeak a generous patronage for the new event which will be raced by three-year-olds in 1917, $3000 for trotters and $2000 for pacers.

◈ ◈ ◈

When Edward Peterson started for eastern points Saturday he left his Ford car at Pleasanton for the use of the Childs family and both Frank and Marvin—especially Frank—are developing rapidly as benzine buggy teamsters and are considering issuing a challenge to Ed Geers to race at the P.-P. I. E. for money, marbles or chalk. Frank has one serious handicap to his prospects for developing into a rival of Barney Oldfield, Eddie Pullen, Ralph de Palma, Earl Cooper, et al., having an unfortunate aversion to the scent of gasoline that is prone to laden the atmosphere in the vicinity of a truly successful speed demon. So intense is his dislike for the delicate aroma of the more popular of John D.'s perfumed products that last Saturday evening he got up a scrape "turning her over" with the cranks in endless repetition endeavoring to induce her to run without any gas. Somebody finally broke it to him gently that a benzine horse works only when well supplied with liquid refreshments and he reluctantly filled the tank, whereupon the engine began the old familiar purr at the first cranking. With a little more weight in front so that she won't be so inclined to climb trees and telephone poles Frank thinks that Fordy will make a very useful critter on the road, though perhaps she may never develop enough class to stake down the big line.

AN IDAHO STABLE.

Some promising material with one fast record performer is in the stable of Warren Dennis at Rexburg, Idaho. At the head of the list is the pacing mare, Ovieda 2:05, by Bob Fitzsimmons 2:07¾. This mare is eight years old and has the unique reputation of having started in thirty-one races, of which she won twenty-eight, getting second money twice and third once. She took her present record at North Yakima, Wash., on the first mile track she ever raced over. Her winrace record of 2:07½ was taken at Salem, Ore., while she holds a winrace on a half-mile track of 2:09½. Mr. Dennis has Bobinell, a four-year-old, and Bob Fitzsimmons, Jr., a three-year-old, sister and brother of Ovieda. For Hamilton brothers, of Sugar City, Idaho, who own Ovieda, Mr. Dennis is working a three-year-old Hal B. colt that shows some class. Josie Knight, by Twelfth Night, is a bright prospect and has shown some fast miles. A three-year-old by Beirne Holt 2:11¼ is a good gaited trotter and will speak for himself later.

Mr. Dennis also has other good ones in his charge and will race his stable on either the Western Canada or Michigan Short Ship Circuit.—Western Horseman.

FIRST WORLD'S RECORD FOR 1915.

California grabbed off another world's record all for her own last Saturday when the Panama-Pacific International Exposition opened to the world—about a quarter of a million of the planet's population being on hand to join in celebrating the great event. All previous "opening days" of great expositions fall far short of that of our own show in point of attendance by many thousands, and at this writing, with the big infant only six days old, the average daily attendance is in excess of one hundred thousand. This, too, in the face of a week of unsettled weather conditions with showers very frequent. The crowds have taken in every portion of the grounds, from the Van Ness avenue entrance to the far end of the race track, and the most phlegmatic visitors come away imbued with an unexpected enthusiasm over the fair and its future. Only by repeated visits can the true magnitude of the undertaking be realized, and descriptions of the fair as a whole are mere waste of words and time. It is the greatest ever known and that is all there is to it.

While no shows in the livestock department are scheduled until late summer and fall, view herds of almost all classes are already in evidence, and within a few weeks the animal aristocracy of all nations will be gathered within its boundaries. Big horses and polo ponies occupy a goodly bit of space at present, and with the auto races out of the way the trotters and pacers will begin showing up in their box stalls, and the horse will play an important part in the proceedings on St. Patrick's Day.

Entry blanks for the purse races closing April first are going to all points in the country where horses are in training, and the programs of both meetings will be advertised throughout the United States and Canada during the month of March, so that no horseman will be ignorant of what the exposition offers for his express benefit. As the spring season draws on interest is growing steadily, more and more horsemen are making inquiries concerning the meetings and arranging to come out, so that the prospects for success were never brighter. Get in the game and lay your plans to take in the biggest of all big expositions, and to get your share of the many thousands of dollars offered for harness horses.

TWO UP-TO-THE-MINUTE IDEAS.

Seattle, Feb. 16, 1915.

Editor Breeder and Sportsman:

Inasmuch as the western winter season is about over, and the rainy season is passing by, and the flowers that bloom in the spring, tra la, are coming on, and also a great many isms and hobbies are making their spring debut, it occurs to me that it is about time that I sprung something.

I have been reading everything in the horse journals pertaining to the judges' stand and the timers' stand and I want to express myself as being in favor of the one judge system and that this one judge be an official of the two recognized trotting associations, and also that he be a man who is not under obligation to any driver, owner or association. In other words, that every horse and driver be the same to him when they come down in front. This one judge, with a competent starter and a competent clerk, should be a success.

I also have an idea which I think is all my own; that is, that the timers' stand should come in for some spring renovation. I believe that a large electric clock should be placed over the timers' stand and connected by an electric wire to the judges' stand, with an electric button or foot pedal which the starter presses the moment he says go. The pressing of the foot pedal would start the clock on the front of the timers' stand. Also that an electric button be placed in the timers' stand so that the presiding timekeeper could press the button when the first horse's head comes to the wire, thus stopping the clock and showing the exact time within fractions of each second and doing away with all controversy as to the correct timing of horses. This device will also be pleasing to the audience, as they will also be interested in watching the clock. This system would do away with the so-called cheating and holding over of horses and giving of records slower than that made by the horses in any particular race.

I have no ax to grind, only I think the time has come when playing favorites to any man or men in the horse races is about at an end. I believe all men should look alike when they go into a sporting contest, so far as the management is concerned.

Yours very truly,

C. A. HARRISON.

In order that the live stock placed on exhibition at the Panama-Pacific International Exposition may be thoroughly safeguarded and the responsibility for its condition placed in the most competent hands, an official veterinarian of the United States Army has been made the Official Veterinarian of the Panama-Pacific International Exposition. President C. C. Moore of the exposition requested the assignment of Dr. Coleman J. Nockols as official veterinarian, and he has been detailed by his commanding officer to act in this capacity.

Secretary Charley Paine of the State Agricultural Society and Senator Ben F. Rush of Suisun were members of the opening day crowd at the exposition and walked some steen miles along with the rest of the bunch, getting home dead tired but fully convinced of the success of the big show.

NO NEED FOR ALARM OVER QUARANTINE AT P.-P. I. E.

Numerous telegrams and inquiries reach the office of the Department of Live Stock, of the Panama-Pacific International Exposition, asking for information with regard to the possibilities of importing cattle, sheep and swine from states that have been infected with foot-and-mouth disease.

There are sixteen or seventeen states that have been visited with this disease; the rest of the Unitd States has not been troubled.

The Department of Live Stock, of the Panama-Pacific International Exposition, will not ask Federal or State quarantine authorities to do anything that will jeopardize the health of the live stock in any part of the United States.

The cattle competitions in live stock at the Exposition do not begin until October 18th. Sheep and swine begin November 3rd.

Long before these dates the foot-and-mouth disease will be effectually stamped out.

Dr. Chas. Keane, California State Veterinarian, has made the following rule: "No cattle, sheep, or other ruminants, or swine, will be permitted to be shipped for exhibition purposes at the Panama-Pacific International Exposition from any area in which foot-and-mouth disease has been found, or from areas contiguous thereto, until a reasonable length of time has elapsed since such territory has been declared clean by the United States Department of Agriculture and State Live Stock Sanitary officials."

Any negative action by individuals, associations, clubs or states at this time would be premature. There will be a truly great live stock show at San Francisco and the wise breeder will get ready for it.

WESTERN FAIR MANAGERS MEET.

The Western Association of Fair Managers held their annual meeting on Jan. 30 at Kansas City, Mo., and elected the following officers for the coming year: A. L. Sponsler, Hutchinson, Kan., president; I. H. Mahan, Oklohoma City, vice-president; John Stinson, St. Louis, Mo., secretary.

The membership of this association consists of the American Royal Fair, Kansas City, Mo.; Kansas State Fair, at Hutchinson; Missouri State Fair, Sedalia; New State Fair, Muskogee; Oklahoma State Fair, Oklahoma; Kansas State Fair, Topeka; Texas State Fair, Dallas; Louisiana State Fair, Shreveport.

The Nebraska State Fair Association and the St. Louis Exposition Company, now organizing, have both been invited to join this association and without a doubt they will do so. At any rate, Nebraska had been given dates along with the other members as follows:

Nebraska State Fair, Lincoln, Sept. 6-11.
Kansas State Fair, Topeka, Sept. 13-17.
Kansas State Fair, Hutchinson, Sept. 18-25.
Oklahoma State Fair, Oklahoma City, Sept. 25-Oct. 2.
New State Fair, Muskogee, Oct. 4-9.
American Royal Fair, Kansas City, Oct. 4-9.
Texas State Fair, Dallas, Oct. 16-31.
Louisiana State Fair, Shreveport, Nov. 3-10.

—Horseman.

LIVE STOCK SALES COMMISSIONER.

One of the objects held in view by all exhibitors in the department of livestock at the P.-P. I. E. is the prospective sale of surplus stock. In order to facilitate this, and to give skillful aid, where it will be highly appreciated, the office of Sales Commissioner has been created for that department. Mr. William H. Carruthers, a long-time resident of the Pacific coast and for many years actively engaged in the breeding and sale of pure bred live stock, has been appointed to this office. Mr. Carruthers has a very wide acquaintance among pure bred live stock breeders and ranchmen throughout the entire Pacific coast region, and has a thorough knowledge which covers the requirements of his duties.

A uniform commission of 5% will be charged on all sales, and this small commission, together with the wide experience and efficient service offered by the Sales Commissioner, will doubtless be highly appreciated by the breeding fraternity. Those who desire to list their stock for sale during the Exposition should send their names to Chief D. O. Lively of the Department of Live Stock, Panama-Pacific International Exposition, San Francisco, Cal.

ANSWERS TO CORRESPONDENTS.

Q.—What is the breeding of Alto McKinney?

A.—Alto McKinney 2:17¾, b. h. foaled 1903 by McKinney 2:11¼; dam Irantilla by Iran Alto 2:12¼; second dam Flirtilla by Peel. Bred by Vendome Stock Farm, San Jose, Cal.

Q.—If a horse took a record better than 2:10 in a race as far back as 1910 but got shut out and won no money in said race, is he eligible to start as if absolutely green, rating without any record under the new rule, never having been raced since?

A.—Yes, if he has no other record in a winning race.

Q.—Is Joe Wheeler's record 2:07¾?

A.—You missed it a quarter of a second—2:07½.

Q.—How was Rockwood bred?

A.—Rockwood 1467, by Fleetwood 894; dam (Montezuma's dam) by Abdallah 15; second dam by Grey Messenger, son of Dove; third dam by Pirate Whip; fourth by Hancock's Hambletonian.

WHY A RACING COMMISSION?

(Continued from page 3)

lished. Such can hardly be a fair implication in seeking support for his measure, as there is absolutely no law in California prohibiting the holding of thoroughbred racing without betting and there is no conflict of dates as there is no such racing save in minor, isolated instances. All California is their oyster and there is an "r" in every month of the twelve if they wish to indulge in betless meetings—and they needn't pay a gate percentage to a commission, either.

Do not get the idea that we are opposed to a revival of racing on a proper basis—far from it. Our friends among thoroughbred men are numerous; we always have accorded the thoroughbred more space than any other American turf journal with the exception of the Thoroughbred Record, and a revival of that industry means money in our pockets. But—when thoroughbred racing is revived we wish it properly done, on a basis that will care for all contingencies, that will really re-establish it so that it will remain with us as a great industry and not merely as a detriment to the commonwealth, and we insist that it be done in a way that will work no hardship on those who have kept the racing game, both under saddle and to harness, from dying out entirely during the dark days we have gone through and must yet endure.

To such a bill we will extend our most ardent support.

PLEASANTON FAIR DISTRICT No. 3.

The stockholders of the Alameda County Fair Association, which has been changed to "Pleasanton Fair District No. 3," comprising the counties of Alameda, Contra Costa, Santa Clara, San Mateo, San Benito, Santa Cruz and Monterey, held their annual meeting at the Fair Grounds on the 13th of February, and elected the following officers and directors:

E. E. Hall, president; Henry Lachman, vice-president; H. P. Mohr, treasurer; W. J. Dakin, secretary. Directors, H. P. Mohr, H. Lachman, W. J. Dakin, L. J. Gerloff, C. L. Crellin, C. H. Schween, T. H. Silver, N. S. Boone, H. Meek, E. K. Strobridge, E. H. Stevenson, E. E. Hall, M. Brown, Wm. McDonald, A. P. Leach.

The president appointed the entire board as an executive committee and the following as chairmen of the standing committees: T. H. Silver, Auditing; Wm. McDonald, Division A, Horses; E. C. Harlan, Division B, Horse Show; H. P. Mohr, Division C, Cattle; N. S. Boone, Division D, Sheep; A. W. Glass, Division E, Swine; H. P. Mohr, Division I, Grains; M. V. Pery, Division J, Vegetables; F. C. Winton, Division K, Horticulture; C. L. Crellin, Division L, Viticulture; H. Lachman, Division M, Floral and Decoration; A. P. Leach, Music and Entertainment.

A RECENT VISIT WITH McKINNEY 2:11¼.

It was a source of no small amount of pleasure to visit the great McKinney 2:11¼ recently in his enjoyable and comfortable large, well-ventilated box stall in the magnificent big barn at the great eastern breeding establishment, Empire City Farms, Cuba, N. Y. It was so pleasing because we were almost astonished at finding the world's greatest living standard sire in such perfect condition. For McKinney could well pass for an eighteen-year-old rather than to consider him at his actual age of twenty-eight years. His coat of black hair catches one's glance as only a well-groomed show horse would glitter to your "lamps." He still possesses that handsome neck seen in his early pictures; his back surely does not show the burdens of twenty-eight winters, and he is stout, yet hard as nails, for every day in the year he gets four miles of jog work. His foot is a full grown, big, healthy one, and really, his whole physique is one of perfect health. He served sixteen mares last season, of which ten caught. It is the intention of the management to breed all their matrons to the great son of Alcyone the coming season. We noted a four-day-old colt by McKinney upon the premises, and it is a large and strongly built baby. The world's second best 2:10 speed sire should outlive any other light harness horse's prepotent powers, as judged from this distance. Only four sires stood ahead of McKinney the past season in respect to new performers, and there is hardly any doubt but what the close of the present year will find him a double century sire, as he has but nine to go to attain this high rank.

There are thirty horses upon the premises, and a better appearing or sounder looking lot of stock has not come under our eyes in travels through ten eastern states and Canada. There are ten yearlings by the "old horse," and all are good appearing youngsters, with excellent substance. Superintendent H. L. Wright has been on the farm for twenty-odd years. He has a splendid straightaway of about a sixteenth of a mile under cover in the large concrete stable.

Roy Miller recently invaded the home farm and selected ten two-year-olds to take to the Lexington, Ky., branch for education. None of the young stock is developed at Cuba for speed, as all that is done at the southern point.—Horse Review.

THE FECUNDITY OF DAIRY CATTLE.

[by Harold McAlister, Chino, Cal.]

There is no factor of greater importance to the breeder of purebred stock than that of choosing the breed that has the greatest fecundity. No matter how remarkable a dairy herd may be in all other qualities, if it does not possess at lease a high degree of fertility, it is bound to prove a losing venture. How many breeders have spent profitless years in useless attempts to build up a herd that was otherwise of fine individual quality, but was lacking in prolificacy! Prof. E. Davenport, in his "Principles of Breeding," states that "However worthy and however valuable, intrinsically, the strain may be, it is worthless, unless he can produce it with certainty in any desired numbers." As in purebred dairy stock the sale of the surplus stock is probably more important than the sale of the milk, the question of fecundity becomes doubly essential. The value of the prolific dairy cow, compared with the one that is relatively less fertile, is shown in the accompanying table by the number of female descendants at the end of the sixth generation, supposing that one-half of the calves dropped by each cow were heifers.

	Total	Generations.					
	Calves.	1st	2d	3d	4th	5th	6th
Cow No. 1—	2	1	1	1	1	1	1
Cow No. 2—	4	2	4	8	16	32	64
Cow No. 3—	6	3	9	27	81	243	729
Cow No. 4—	8	4	16	64	256	1,024	4,096

Thus, no matter how great an individual cow No. 1 would be, a breeder could never hope to build up a herd from her issue, while, on the other hand, he would have a splendid herd at the end of a few years from the offspring of either No. 3 or No. 4.

In selecting a breed of dairy cattle, therefore, the question of prolificacy must receive firse place. It is a well known fact that one of the chief results from inbreeding is the decrease in fertility. In its native land, the Holstein breed was never permitted to be inbred by the shrewd Dutch farmers. On the other hand, the Jersey and Guernsey breeds, confined as they were to mere specks of islands, and with stringent laws forbidding all outside importations for so many years, were of necessity very highly inbred. Also, the inbreeding was not done under a guiding hand for the increase of butter production, but might be said to have been done promiscuously and without reference to which was the best blood. From an article in the Jersey Bulletin of September 10, 1913, we find that they "are forced to obey their laws to inbreed to Golden Fern Lad in Jersey. They are breeding first cousins in blood and have been doing it for some time. Every animal now on the island is descended from Golden Lad, the widest, and by no means the best, distributor of Sultane's blood." In America, the Jersey breeders have also inbred to quite a great degree,—intensifying the evils committed over in the Island.

The United States Department of Agriculture states in its Year Book that the "Jerseys were boomed, were advertised, and were carried up to the zenith of their power, and then came the natural results of inbreeding and incest. * * * To get impressive power that would supply the block and pail, sacrifices were made that eventually led to disaster. Nature exacts penalty for reversion or disobedience of her laws. We see intensity of blood used with grand effect in sheep, but in cattle we have had signal failures in the Shorthorn and the Jersey." The Holstein breeders in America, however, as a rule, have never countenanced any inbreeding, but have preferred to increase the butter production of their cows by introducing the best Holstein blood from outside herds.

The most concrete illustration that can be offered concerning the relative prolificacy of the different dairy breeds may be taken from the annual registrations of the various breed associations for the past decade, as shown below:

	Holsteins.	Guernseys.	Jerseys.
1905	9,773	2,116	9,670
1906	11,823	2,670	10,899
1907	14,650	2,958	12,029
1908	16,534	3,126	13,302
1909	19,591	3,957	15,107
1910	26,176	7,272	18,679
1911	32,889	5,395	21,769
1912	37,435	6,932	23,334
1913	43,215	9,132	25,726
1914	54,998	9,822	29,381

Eighteen years ago the Holstein Association was registering less than twice as many animals as the Guernsey Cattle Club. In 1913-1914 the Holstein Association registered almost six times as many cattle, in spite of the fact that during the intervening time there have been practically no Holsteins imported into America from Europe, while the Guernsey breeders have every year imported large numbers of Guernseys, numbering sometimes as many as eleven hundred and fifty animals in a single year. Yet from 1910 to 1914, there was a gain of but 2,550 in Guernsey registrations, while at the same time there has been a gain of 28,822 Holsteins, or over eleven times as many, without, practically, any importations. The Guernsey records also show that during eleven years in their history they have suffered a loss of registrations, while the Holstein Association has never yet suffered an actual decrease. In the last five years alone, were it not for the importations of Guernseys into the United States, the registrations of that breed would have a decrease, instead of an increase in numbers. Comparing the registrations of the two breeds, we find that while, as in the last five years, an average Holstein herd will be more than doubled, the average Guernsey herd will not be as large as it was originally. The profit, therefore, in the Guernsey herds, from the sale of surplus stock, is a feature that as yet is exceedingly doubtful.

In regard to the registration of the Jerseys, we find that ten years ago it was practically the same as that of the Holsteins, there being a difference of only one hundred and three between the registrations of the two clubs. Last year the registrations for Holsteins were 25,617 more than those for Jerseys, or almost twice as many. The registration of 29,381 Jerseys, however, in the last year, is misleading, inasmuch as there should be deducted from this number 4,455 Jerseys that have been imported in the last ten years, and their descendants, making a total of over 7,500, which would bring the proper number of Jerseys registered to 21,881, instead of 29,381. The importations of Holsteins in the last ten years have been practically nil. Now, although the two breeds had practically the same number in 1905, there has been in 1913-1914 a natural increase for the Holsteins of 45,003, and of 12,211 for the Jerseys, a difference of 31,014 registrations in favor of the Holsteins during the past year. The registrations for last year, then, for the Holsteins were 54,776, and for the Jerseys 31,881, omitting the descendants of the importations of both breeds for the last ten years, and with both breeds starting on an equal basis in 1905. Thus, an average Holstein cow will have inside of ten years over twice the number of descendants that the average Jersey will have. It must also be remembered that the Jerseys were in America in large numbers long before the Holsteins were introduced, and that, until the last few years, the Jerseys have also had a much larger annual registration. It has only been lately (in the past few years) that the Holstein breed has reached sufficient numbers to make a great annual increase. At the present time, however, the registration of Holsteins is far greater than that of all other dairy breeds combined, and every future year will show more marked and continuous gains, while those of other breeds will remain comparatively at a standstill.

RADICAL CHANGE IN FOOT-AND-MOUTH QUARANTINE.

Washington, D. C., Feb. 23.—Two orders just signed by the Secretary of Agriculture make radical changes in the quarantine regulations for the foot and mouth disease. All the territory east of the Mississippi and north of Tennessee is now included in the quarantined area and no shipments of live stock, except for the purpose of immediate slaughter, will be permitted from this area to the South or West. Stock owners, however, in the States of Virginia, West Virginia, Vermont, Maine, and the District of Columbia may ship out their stock upon affidavit that it has been on their farms for a certain length of time and has not been exposed to any risk of contagion.

This step the authorities believe to be necessary for the protection of the South, Southwest and West, which have not as yet been affected by the disease. The recent discovery of a few cases where cattle, shipped from areas where the disease had existed, carried it to previously uninfected sections, such as four counties in Kansas, convinced the department that no precautions will make such shipments absolutely safe. The new measure, it is said, should confine the disease to the regions in which it has already made its appearance and in which the work of eradicating it will be pushed as before. All of the large slaughtering centers are within this area and very few shipments for immediate slaughter are expected to be made out of it.

Under the new regulations territory within the area now quarantined, which was formerly free, is designated as restricted territory. In this restricted territory live stock may be moved freely to other points within the same territory, but can not pass beyond the limits of the quarantined area, except for immediate slaughter. The regulations governing the area known respectively as closed, exposed, and modified, remain practically the same as before. From the modified area live stock can be shipped for immediate slaughter to points within the quarantined area and from exposed area as well, after a preliminary inspection and certification by federal authorities. No stock may be shipped out of the closed area for any purpose and can only be shipped into it for immediate slaughter.

Immediate slaughter is now defined as slaughter within 48 hours after the stock arrives at the abattoir. No reshipments from abattoirs are now permitted. These regulations have been made necessary by the fact that in a number of instances cattle ostensibly intended for immediate slaughter at one abattoir have been held there for several days and then reshipped to other yards where they have been allowed to remain until the disease had actually broken out.

These regulations are embodied in the order known as Bureau of Animal Industry Order No. 234, which defines and classifies the various areas in all the States affected. Another order—Bureau of Animal Industry Order No. 233, requires that on and after February 17, 1915, all live stock, unless intended for immediate slaughter, shall be transported only in railroad cars which have been cleaned and disinfected. This applies to the whole United States.

MR. GOCHER'S STAND AT HARTFORD.

Hartford, Conn., Feb. 8, 1915.

Editor Breeder and Sportsman:

On February 3, 1915, the Boston Globe and several other papers published an article that was send from Hartford in reference to the Connecticut Fair Association withdrawing from the Grand Circuit. The following paragraphs appeared in said article:

"It is said, the dispatch states, that the real mover for the withdrawal from the Grand Circuit is W. H. Gocher, Secretary of the National Trotting Association. He tried to have Charter Oak withdraw from the circuit last summer, when the Michigan State Fair announced its opposition meeting; but President Dower convinced Secretary O. A. Janes that it would be a bad move at that time.

"Since then Mr. Gocher, according to the correspondent from Hartford above referred to, has advanced the idea that mile track racing in the East is past and that it is time to tie up with the half-milers in this section. It seemed that he would carry his point but it is generally believed that the reopening of the case before the board of directors will mean that Charter Oak will reconsider and accept the dates of Labor Day week."

As soon as my attention was called to said article, I published an emphatic contradiction in the Hartford Times, which among others took the matter referred to from the associated press, and for the enlightenment of yourself and your readers wish to submit the following brief review of the local situation:

The Connecticut Fair was organized in 1908 to maintain mile track racing at Charter Oak park and put on a fair that would be a credit to the city and the state. Mr. W. O. Burr of The Times was one of the first subscribers to the venture. Seven fairs have been held and a Grand Circuit meeting was a feature at each of them. At the last three the fields of starters were very light, while many of the races failed to develop contests.

In 1914, when Detroit decided to put on a special meeting on the same dates as the Connecticut Fair, no one connected with the latter ever considered withdrawing from the circuit, but every effort was made to induce Detroit to cancel its program, Mr. Dower even going to Detroit for that purpose. He was not successful.

As for the half-mile track proposition, no one to my knowledge ever considered abandoning the mile track at Charter Oak, although it was voted about two years ago to build one inside of the oval in response to requests from a number of local owners. The course, however, was never surveyed. The present issue has also arisen on account of not a sufficient number of horses of Grand Circuit caliber coming to Hartford to make an attractive race meeting, and that there was not much difference of opinion on the subject on January 26 is evidenced by the fact that four of the five members of the executive committee, each of which are familiar with all of the affairs of the association, voted to withdraw from the Grand Circuit and look elsewhere for racing material. As to what the directors will do at the meeting which will be held in the near future remains to be seen, but I have no doubt but that they will act for the best interests of all concerned. The citizens of Hartford, however, can rest assured that there will be racing on the mile track at Charter Oak park next September.

Many pages of turf history have been made in Hartford since Goldsmith Maid and Smuggler had their memorable battle at Charter Oak park in 1876. St. Julian placed the world's record there at 2:11¼, while it was also the scene of the triumphs of Director, Lord Derby, Patron, Billy Buck, Hamburg Belle and scores of others who left the imprint of their shoes in the old mile course, and it is the desire of the present management that when the names of these old-time stars are recalled, it will be to compare them with still greater races which are being decided there, as it is contests and not fast time which makes racing attractive.

Every one connected with the Connecticut Fair Association is doing what he can to maintain mile track racing in this section but of late years, the returns have not been very satisfactory on account of light fields of starters and the majority of the contests being little better than processions.

The books of the Connecticut Fair Association show that at the five meetings held between 1910 and 1914 inclusive, three hundred horses were started in sixty-three races, making the average number of starters for each event below five, while in 1914 the average number of starters for the events programmed was below four. During these five years, the Connecticut Fair Association also paid horse owners $29,377 in excess of the amount received for entrance fees. This with the amounts paid turf papers for advertising the meetings, printing and circulating entry blanks as well as track officials, et cetera, made the net cost of the racing department for five years over $33,000. Further comment is unnecessary.

W. H. GOCHER, Treasurer.

Horace Feindel is the pleased owner of the first foal of the season at Pleasanton Driving Park—a bay colt by Johano (his Carlokin-Johanna Treat stallion) and out of Birdie (dam of Bodaker 2:13) by Jay Bird 5060, second dam Lady Lyle (dam of Earlmont 2:09¾, etc.) by George Wilkes. The youngster is almost to the hour the same age as the exposition and is just as healthy and full of spunk as that young enterprise.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

OLDEST FIELD TRIALS CLUB IN AMERICA.

[By H. T. Payne.]

The Pacific Coast Field Trials Club, commencing January 23, held its thirty-second annual trials. There is but one field trials club in America—the Eastern—that has had a longer existence than the Pacific Coast club. But for several years past the Eastern did not hold trials, so that in fact the Pacific Coast club is today the oldest club of the kind actually in the field, a distinction of which the sportsmen of California may well be proud.

The early history of this club is in many respects an amusing one, for its organizers were true sportsmen, ambitious and determined. They had read of competitive trials of dogs on game birds; the descriptions of the sport sounded good to them; and they became anxious to see and enjoy the real thing.

With the true California spirit they argued that the Golden State must be abreast of the very foremost in this new sport as it was in all others, and a club for this purpose must be organized. Accordingly the club was organized and a date set for the trials, judges selected, rules formulated, and the coming trials proclaimed to the world.

The entrance fee was $5 both in the Derby and the All-age, and the purses were $25, $15 and $10. There were five nominations in the Derby and thirteen in the All-age. The first trials were held at Walltown Timber, near Folsom, on November 26, 27 and 28, 1883, with F. W. Dunn officiating as judge. The spirit was strong, the enthusiasm great, but the dogs were weak. In fact at that time there were but few thoroughbred setters or pointers on the Coast, and most of those who did own good dogs were somewhat skeptical about entering into the competition. They were afraid that some cold blooded native might beat their blue-bloods.

The result was that there were but five starters in the Derby, two pointers, one English and two Irish setters. If either of these had ever made a point the only evidence of it was the unsupported statement of its owner, for not one of the five gave any evidence of understanding either the meaning, purpose or necessity of such an art.

The judge was a sportsman in the truest sense, and therefore believed that as setters and pointers were bred to find birds and locate them for the gun, he, being unable to get any points, determined that at least a dead bird should be found before he would render his decision. Accordingly one was hidden, and with a good deal of assistance from his handler one of the puppies found it. Had the judge been one of the present generation of field trial judges, he would have got out of this dilemma by remarking: "Just look at Heels! Great 'class'! He's in the next county by this time and therefore wins first."

The awards were: Henry A. Bassford's pointer dog Butte Bow (Ranger—Josie Bow), first; General H. C. Chipman's Irish setter bitch, Beatrice (Shakoe—Nellie), second, and G. B. Crosby's pointer dog, Bow Jr. (Ranger—Josie Bow), third.

In the All-age there were seven starters: one pointer, one Gordon, one Irish and three English setters. Most of the dogs in this stake did fairly well, though none of them bolted or got into the next county. The absence of these characteristics of "class" did not worry the judge to any great extent, and he placed them as follows: Fred A. Taft's Gordon setter dog, Don (Dan—Lady), first; Joe M. Bassford's pointer bitch Beautiful Queen (Ranger—Queen), second, and Horace H. Briggs' Irish setter bitch, Belle (breeding not known), third.

Such was the small start of the Pacific Coast Field Trials Club.

At the trials the following year there were eight starters in the Derby; one pointer, one Irish and six English setters, and thirteen starters in the All-age, five English, one Irish and two Gordon setters and five pointers. For the next two years the number of starters fell off both in the Derby and All-age, reaching the lowest point in the 1886, when the Derby had but two starters and the All-age seven. This was the smallest Derby in the history of the club, though as late as 1894 the Derby had but four starters. The smallest All-age stake was in 1890 when the starters numbered but six.

In the early years of the club's trials the owners broke and handled their own dogs, with the result that the dogs were far better broken and under far better control than since the advent of professional handlers. The interest, too, was keener and the attendance larger. Geo. T. Allender was the first professional handler, breaking and handling in 1885 a small string with which he won first in the Derby with J. Martin Barney's pointer, Tom Pinch, and first in the All-age with Wm. Schrieber's pointer, Mountain Boy. In 1889 M. D. Walters made his first appearance as a handler, and the year following Wm. De Mott entered the field.

Of the charter members of the club in active membership the late Judge C. N. Post of Sacramento was the last to answer the final call. Death has called away many of the keen sportsmen who in the early years of the trials broke and handled their own dogs, and the weight of many years has compelled others to give up the sport. Even of those who may be classed as pioneers of the club but few remain, they being W. S. Tevis, of Bakersfield, H. T. Payne, John H. Schumacker, W. G. Kirckhoff, H. W. Keller of Los Angeles, and J. E. Terry of Sacramento. But as death, old age or other causes have depleted the ranks of the old guard, to the roster has been added new names whose keen sportsmanship has never allowed the enthusiasm to lessen or the sport to grow weaker in interest.

While the great disaster of 1906 cast its shadow over the club as the dark clouds of burning San Francisco swept over the State, still the club weathered the financial storm with a smiling face and a stout heart, and though temporarily checked in its long successful career, it was still in the ring to celebrate its thirty-second anniversary, stronger in numbers, more resolute of purpose, and with a future promising years of continued usefulness.

In the history of its annual trials there appears to be a break, as the year 1887 does not appear in the chronological record. This is caused by the club changing the date of the trials from December, 1887, to January, 1888.

In connection with the early trials of the club, a letter written to the writer several years ago by Joe Bassford, one of the charter members of the club and one of the handlers in the first trials, will prove of interest.

"Of all the field trials I have attended I enjoyed the two first ones the most, as we camped outright where the trials were run. Well do I remember the first heat ever run (the All-age). It was between Tom Bennett's Sibyl and my Beautiful Queen, and the owners were the handlers. Both handlers were very much excited, and it was : "Here, Sib!" "Come here, Queen!" and "Tom, have you seen my dog?" and "Joe, have you seen Sib anywhere?" And we helped each other in those times to find our dogs all over the hill.

"Then the old campfire at night, and good Nick White caring for the blankets to keep them clean. And in the very early morning to see Horace Briggs plunge into Deer Creek for a bath when everything was white with frost. And that delicious snore of Fred Taft's when one was tired and wanted to sleep. We can think of it now and laugh.

"Judge Dunn judged both our first stakes, and at the end of each heat he would read aloud the score made by each dog, telling how and why one dog was beaten and how the other won. I think it gave entire satisfaction as I have been in heats since and got beaten but never could understand why. I have also won at least one heat since and never could understand how I did it. Of course I took it all the same, but did not think it was right. But I was a 'field-trialer' by this time. Well do I remember a setter dog, Dan, I ran in the trials under Judge Dunn. When the score was read aloud to the crowd my dog owed the board 15 points for chasing rabbits. How cheap I felt! I think it would be an improvement today if each dog was penalized heavy for chasing rabbits. Some of them might owe the board even in these days."

In connection with the recent trials of this club, a review at this late day of the pioneer importers of thoroughbred field dogs will certainly prove of interest to our present day field trials men.

The first pedigreed dogs brought to the Coast were English setters. It is possible that other thoroughbreds came to the State earlier than those. I shall mention, notably, a brace of English setters—quite likely pure Lavaracks—brought to the Coast by Mr. W. C. Ralston of the Bank of California, but no pedigree of them was given, and the same may be true of some pointers. The first of known pedigree were imported by J. W. Knox, of San Jose, in about 1878. These were Belton II. (Belton—Dimple), and Bell (Rob Roy—Garth's Bess). Mr. Knox was never a patron of the field trials, but some of the dogs of his breeding and their descendants were at one time prominent in the trials and on the bench. Among these were Leavesley's Juno, Miller's Sam, Farmer's Queen and others.

I. N. Aldrige of Marysville soon followed Mr. Knox' lead, bringing to the State McGregor (Rob Roy—Queen Mab) and Lula Laverack (Carlowitz—Petrel). Some of the descendants of the two figured in the trials for a time, but none of them proved to be winners.

W. F. Whittier brought to the State in about 1879 or 1880 Rock Jr. by Luther Adam's Rock out of Sibyl. And about the same year Mr. E. S. Maybury brought out Dan (Prince—Dora) and Sibyl (Leicester—Doll).

E. Leavesley, of Gilroy, began breeding English setters about 1881. He bred very extensively and used to sell off his surplus stock at auction every year. His blood lines, however, were not of the right kind and the dogs bred did not figure to advantage in the trials, but he bred a number of bench show winners. Lola Montez, the founder of the strain which our friends of the north are trying to give the name of "Montez setter," is one of his breeding.

Judge C. N. Post and G. W. Watson of Sacramento, under the name of the California Kennels, purchased the two bitches Sweetheart and Janet, both by Count Noble out of Dashing Novice, and the dog Harold by Gath out of Gem, and two years later added to the kennels the bitch Enid (Gleam—Doe), a litter sister to Georgia Belle, the dam of Gleams Sport, Maiden Mine, Callie White and other field trials winners of note. These were the first importations to the Coast of what is generally known as the field trials strain. Sweetheart was sent east and bred to Sportsman (Gladstone—Sue). From this union came those two great performers Sunlit and Sirius. Sunlit, while not as fast when running free as some of our later performers, was the fastest dog I have ever seen on scattered birds. In the final heat of the race in which she won the All-age she fairly flew from point to point until, before the judges could get an opportunity to call her up, she had scored 36 singles in the on heat. All of the above dogs except Enid were winners themselves, and besides these the kennels bred the following winners: Haladine, Saline, Stephana, Petronella, Pelham, Johanna and Mercury. In 1884 the writer brought to the Coast Jolly Planter (Plantagenet—Countess Flirt) and Princess Claude (Burgunthal's Rake—Iowa Queen), and later Stanford (Count Noble—Ruby's Girl), Lily C. (Cable—Winnipeg Belle), Fred W. (Count Noble—Spark), and Del Sur (Eugene T.—Bess of Hatchie). From Stanford and Lily C. came the well-known winner Countess Noble.

From 1890 to 1893 quite a number of fine bred setters were brought to the Coast by T. J. Watson, P. D. Linville, Thos. Higgs, E. K. Gardner and Geo. Crocker, until by this time the quality of the setter blood on the Coast was equal to that of the best, and many good dogs were produced every year.

Joe, Henry and George Bassford were the pioneer importers and breeders of thoroughbred pointers of the Coast, and to these gentlemen and Messrs. Post and Watson are due in a very great measure the early success of the Pacific Coast trials.

The Bassfords began their importations in 1880, bringing out Ranger Boy (Dilley's Ranger—Royal Fan), Beautiful Queen (Dilley's Ranger—Queen), and Josie Bow (King Bow—Josie). At the time of her death Josie Bow had the greatest record as a field trial dam of any pointer bitch in America, being the mother of six winners. From these kennels came the following winners: Butte Bow, Bow Jr., Lemmie B., Solano B., Victor II., Blossom, Frank, Lottie B., Sankey B., Rose, Queen's Lost and Adelia.

Wm. Schreiber imported from Scotland in March, 1885, two finely bred pointers, Mountain Boy (Grouse—Nell) and Lassie (Prince—Forest Lily). In 1888 he also imported two more from the same country. These were Sal B. (Brag IV.—Forest Queen) and Nestor (Gladsome—Forest Queen II.). Sal S. was imported in whelp to Don (Drake—Jewell). In 1891 Mr. Schreiber sent Sal S. east and bred her to Rip Rap, thus introducing to the Coast the first of the blood of that famous dog. Mountain Boy, Lassie and Nestor were all winners in the trials.

A. B. Truman began the importation of pointers in 1886, by bringing out Romp P. and Rush T., both by Sensation out of Seph G. In the year following he added that fine specimen of the breed, Patti Croxteth T. by Croxteth out of Patti M. Patti Croxteth proved a winner in the trials but her greatest victories were on the bench.

J. Martin Barney of Dutch Flat figured prominently in the earlier years of the trials. He brought to the Coast in 1885 that fine dog Tom Pinch (Wise's Tom—Beulah) and the year following he purchased Galatea (Nick of Naso—Temptation).

H. R. Brown imported in 1886 a fine bitch Donna Sensation (Sensation—Seph G.).

R. T. Vandervort, coming to the Coast to make it his home in 1887, brought with him two well-known pointers of superb breeding. These were Vandervort's Don (Price's Bang—Peg) and Drab (Dan—Arrow).

P. D. Linville was the pioneer in the black pointers that proved popular on the Coast for a time. He imported a brace of this breed in 1886, but death claimed them both shortly after their arrival. James Watson took up the breed a couple of years later, importing Old Black Joe, who won the Derby and All-age the year following. Losing him by death, Watson soon imported another brace of the same strain from which he bred several winners. By 1890 the breed was represented on the Coast by a large number of dogs and bitches of the finest breeding, which have been constantly added to until today the Pacific Coast can boast of as good blood in either breed as is to be found anywhere. The sportsman's spirit of W. S. Tevis, J. E. Terry, the late W. W. Van Arsdale, Elmer Cox, S. Christenson, John W. Considine, T. J. A. Tiedemann, Henry L. Betten, Roy Avery, Lloyd, Lansing and Gordon Tevis, J. S. French, Jos. Chanslor, J. Walter Scott, E. Courtney Ford, Wm. Dormer, J. Kilgarif and many others have constantly added the best blood of the East. But with these later importations all are familiar; I am writing only of the pioneers in the sport—of the men and the dogs that first made the trials a success.

* * *

A complete summary of the Pacific Coast Field Trials Club's trials—from the inaugural meeting above mentioned down to and including the trials for 1914, was published in the Breeder and Sportsman, January 10 and 17, 1914.

At The Traps

Under the caption "Twenty-five Years Ago Today," The Chronicle publishes daily a few notes mentioning interesting occurrences that happened 25 years ago. Last Monday, Washington's Birthday, the following paragraph appeared with other items:

"California trap shooters were defeated by the two Eastern teams in the final shoot at Haight street baseball grounds."

The lines caught on with the local gun bugs and brought up various reminiscences pro and con. Phil B. Bekeart and Harry Golcher were discussing the shoot when the writer appeared and joined in the conversation. As is usual in discussing old time sporting events, there was a hitch here and there. The writer suggested that the Breeder and Sportsman, for that week March 1, 1890, would have a full account of the shoot—as it has had of all Coast and other important trap shoots for the past thirty-three years.

Of the good fellows mentioned in the story which follows many have passed away, but four of the California team are with us today—"Pop" Merrill in Stockton, Martines Chuck at San Diego, Harry Golcher, with the Pacific Hardware and Steel Company in this city. H. T. Payne is now located in Los Angeles, "hard as nails" and genial as ever. Charley Haas, than whom a more graceful shotgun handler never faced the traps, is alive but afflicted and will probably never shoot a gun again. E. T. Allen has retired from business and is living in the country, well and hearty.

Harvey McMurchy is back in Fulton, New York, we believe, and has, until the past year or two, been a regular spring visitor on the Coast, missing but few of the opening shoots each year of the California Wing Shooting Club, which organization will open the live bird season at the Sobrante traps Sunday, March 7.

Sam Tucker is settled down comfortably in Connecticut, but without doubt looks back with fond memory to the days when he exploited the Old Reliable here and all over the Coast.

Rollo Heikes is still with the boys on the Eastern firing line and always made good. Charley Budd and Quimby we have met, but lost track of in recent years.

California Against America.

The most brilliant match between teams of ten on a side that has ever been shot here at pigeons was that of Saturday afternoon last at the Haight street ball grounds in this city. The match was a peculiar one in several respects. It was instituted at short notice, to give eclat to the visit of the expert shots who are touring the country under management of Colonel C. W. Dimick, in the interest of the United States Cartridge Company. No opportunity was afforded the local men to practice, and none of them had shot over traps to any extent since October last, while the visitors were in perfect form. Several of the very best of the Californian shots could not take part, such as Crittenden Robinson, A. W. Bruner, Frank J. Bassford, and others, but a good, safe team was selected, and the splendid scores made fully justified the wisdom of the choice. It was thought that one hundred and twenty-five kills would win, but in the outcome the home team rolled up one hundred and thirty, an average of thirteen out of fifteen, while the visiting wizards scored one hundred and thirty-seven, just under fourteen birds to the man. Such work cannot but arouse admiration and emulation. The Californians were beaten fairly and squarely, after a closely shot-out race, and took their defeat in good spirit. The visitors were evidently shooting up to their highest capacity, and they needed to do so.

The Californians were John K. Orr, Captain, whose first pigeon match in the State was shot in 1856, who is always brilliant, quick and effective; Martinez Chick, of San Diego, a quick shot and reliable; Chas. J. Haas and Chas. A. Merrill, of Stockton, both in the first rank of any company at the traps; Henry A. Bassford, of Vacaville, a little slow, but a dead shot; Jos. Delmas, of San Jose, not particularly graceful in handling a gun, but as reliable as any man in the State; Dr. S. E. Knowles, of this city, who has reduced trap shooting to certainties, bar luck; Colonel S. I. Kellogg, not as experienced at live birds as the others, but a clean, fine shot; H. C. Golcher, a Hercules in frame and a master of the gun, and Edward Fay, whose race was as brilliant as any of the day. The team did not work together with sufficient care, and lost several birds which might have been scored dead with more watchfulness.

The ten visiting world-beaters were Harvey McMurchy, a model in style, judgment and skill; W. H. Wolstencroft, the quickest shot alive, and deadly withal; W. F. Quimby, a little slower, and not given to leading his birds quite enough; H. B. Whitney, trim, precise, sure as fate, and the equal of any man ever seen in the State as a shot; W. E. Perry, whose shooting actually seems automatic; C. W. Budd, clean-cut, masterly and perfect at the traps.

James R. Stice, a massive man, but lithe and speedy; Rollo O. Heikes, a first rate shot and first-class in all other respects; S. A. Tucker, known and read of all our readers, and John A. Ruble, a little morose in manner and failing to center his birds, yet scoring them all dead.

All of the visitors were cracks, and their styles afforded most interesting matter for study and reflection. Mr. Wolstencroft in particular was a study. Such marvelous quickness was never before seen. His second barrel is fired almost simultaneously with the first.

Colonel C. W. Dimick was referee, Ramon E. Wilson and H. H. Briggs judges, Ed Hough and H. T. Payne scorers.

Bassford, of the California team, was the first to face the traps, and opened the contest auspiciously by dropping a black tailender within three feet of the trap with the first barrel, the appreciative crowd in the grand stand applauding the performance with much patriotic enthusiasm.

Wolstencroft, the lightning marksman of the champion team, came next, and fairly discounted Bassford's clever permances by slamming his bird before it was six inches above the trap.

Kellogg of the local team then followed and knocked a fistful of feathers out of a powerful red left-quarterer that dashed wildly away toward the Cliff House the moment the trap was sprung. The second barrel of the Colonel's twelve-gauge stopped the fugitive, however, within twenty yards of the boundary, and the grand stand resounded again with local enthusiasm. Budd of the visiting team then killed a white straightaway bird in fine style, and the shooting kept on alternately, Golcher scoring with his second barrel, McMurchy with his first, Knowles with his first, Stice with his first, Perry with his first, Fay with his second, Quimby with his second, Chick with his first, Heikes with his first, Merrill with his first, Ruble with his first, Delmas with his first and Whitney with his second.

Nine men of each team had killed their birds, only two of the Californians being compelled to use the second barrel, while five of the champions deemed it prudent to pull the second trigger and lose no chance. Haas was the last of the Californians to face the traps on the first round and he killed his first bird in fine style. Tucker of the visiting team was the last of the champions, and the echo of his ten-gauge gun was dimmed by the shout in the grand stand, as the right quarterer he aimed at defied his first barrel and carried the charge of shot from his second just outside the fifty-yard boundary. This was the first miss of the day, and the Californians had won the initial round, having scored ten straight birds to the champions' nine.

On the next round, however, Bassford, Chick and Delmas missed, and the champions led by one bird, the score standing 18 to 17. The champions gained another bird on the third round, scoring 27 to the Californians' 25. The next round was a stand-off and the score stood 36 to 34. The Californians held the champions level in the next two rounds, and in the seventh killed ten straight birds, while Perry of the champions missed one, the score then standing 63 for the visitors to 62 for the Californians. Evener shooting is not often seen, but the champions shot with more method if less brilliancy than the local men. The visitors threw away no chance, and killed their birds almost on the traps, while the local men very often let the birds get a start that needed the hardest kind of shooting to stop.

At the end of the tenth round the score stood 93 for the visitors to 89 for the Californians, and then the home talent experienced a streak of bad luck that lost them the match. Bassford began the round by failing to stop a left-quarterer with both barrels, though the bird dropped dead at the fence. Golcher gave a swift black-tailender both barrels, but the load of shot only increased the fugutive's pace. Fay, who had a clear score of nine straight kills, gave a right-quarterer both barrels, but the bird struggled out of bounds and died there. Chick wasted two cartridges on a fleet-tailender. The climax for the Californians was capped when a left-quarterer that was apparently dropped dead in bounds by Merrill fluttered across the field in front of the retrieving pointer and got well outside of bounds before yielding up the ghost. Heikes was the only member of the visiting team who failed to score, as his bird, a strong red tailender, took both barrels and got to the fence before dropping. The score stood 102 for the champions to 95 for the Californians. On the next round the demoralized Californians dropped behind two more, and at the end of the thirteenth the score stood 121 for the visitors to 111 for the Californians.

On the fourteenth round the Californians shook themselves together once more, and Wolstencroft and Quimby missing easy birds, the visitors' lead was reduced to eight birds. On the final round Kellogg missed a strong left-quarterer that skimmed over the fence like a swallow. The other Californians all scored in fine style. Heikes, of the visiting team, missed a lively black straightaway bird that made a bee-line for Alameda the moment the trap was sprung, and Tucker, the last of the visitors to shoot, missed by the failure of his first cartridge to explode. He got a second chance, and missed his bird, and the match ended in favor of the visitors by the score of 137 to 130.

Budd, McMurchy, Ruble and Whitney of the champion team made clean scores. Of the Californians, Merrill was the only man who killed fifteen straight birds. Orr, Fay, Delmas and Haas came within one of clean scores, and but for bad luck would have equaled the visitors.

Colonel Dimmick was the perfect referee, being alert, at home in the position, quick in applying the rules, and so affable as to make everything run smoothly. The local men were not familiar with the rules and lost two birds by the fact. The scores were:

At 15 live birds per man; for teams of 10 on a side, chosen from California and from the U. S. Cartridge Company's Aggregation; revised American Association Rules; for a trophy presented by Mr. E. T. Allen. Referee, Colonel C. W. Dimmick; judges, Ramon E. Wilson and H. H. Briggs; scorers, E. Hough and H. T. Payne.

Eastern team—

C. J. Haas	12	28	1111	1011	1111	111—14
Total						130

In the foregoing scores, some of the shooters used 10 gauges, others shot 12's. The handicaps were 30 yards rise for the 10 bores and 28 yards for 12 gauges. The scores gave the kills and misses only, and did not designate whether one or both barrels were used.

The clean American sport of trap shooting developed into something of a boom last year, as shown by the records of the Interstate Association for the Encouragement of Trap Shooting. The official statistics of registered tournaments show that nearly 5,000,000 blue rocks were shot at in registered tournaments held by 628 gun clubs throughout the country. This total of clay pigeons is probably more than trebled when the innumerable regular club shoots and unregistered tournaments are taken into consideration. When it is realized that the average cost of a shot at "single" birds trapped is 5 cents (for ammunition and the bird), upon which shooting the above figures are given, it can readily be seen that the shotgun enthusiasts are liberal spenders in following the game. In the records of the governing organization more than 12,000 members are on the rolls of hundreds of gun clubs in the United States and Canada that held registered shoots in 1914. Added to this are very many other clubs, besides privately installed traps where the sport is indulged in at odd times.

One writer states: "It was only about twenty-five years ago that this modern American sport had its beginning, though it traces its origin back to the English pastime of pigeon-shooting. The name 'trap-shooting' originated in this country at the time when American inventiveness substituted inanimate targets for live birds and the game was otherwise transformed. Today there are something like 3400 trap-shooting clubs in the United States, with an active membership of 110,000 to 115,000. One of the highest authorities on the sport estimates that counting those who shoot over the traps with considerable frequency in the course of a season without being officially enrolled as club members, there are at least 250,000 and perhaps 300,000 trapshooters in this country."

Country clubs in large number have placed trap-shooting among their standard outdoor sports, and many colleges have done likewise. Several American warships carry trapshooting equipments, and at naval and military stations in the Philippines and Alaska, as well as at army posts here at home, the sport has an enthusiastic following.

Mississippi river steamers are equipped with traps for indulgence in the sport by passengers.

In the registered tournaments of the association during 1914, 620 contestants won 889 valuable trophies and a total of over $25,000 in purses was divided by high guns. The purses hung up throughout the country, when all of the unofficial but regular club meetings are considered, will run up to many thousands of dollars more, distributed among the crack gun pointers.

In this State there is in active organization of more than 100 of the something like 250 trap shooting clubs credited to the Pacific States and Territories—and new clubs forming all the while. California was third in the list of States for 1913, in the consumption of blue rock targets in trapshooting, last year we slipped back to fifth position—the order being Ohio, Pennsylvania, Iowa and Canada with Illinois close up.

Coast shooters have held their own with the Eastern talent whenever they competed with shooters from the other side of the Rockies or when they met the Easterners on their own ground. In the official list of averages at 2,000 or more targets given out by the Interstate Association for 1914, S. A. Huntley, of Vancouver, Wash., is second on the roll with .9652% at 7,820 bluerocks, F. M. Troeh, winner of the Coast individual championship in the Pacific Coast Handicap at Portland, twentieth with .9380%; J. F. Couts Jr., of San Diego, .9348% at 7,370 targets, twenty-sixth; H. F. Wihlon, Gresham, Ore., winner of the Preliminary Handicap at Sacramento, fifty-third, 91%; J. F. Dodds, San Diego, sixty-sixth,

.8968%; Harry Ogilvie, seventy-fifth, .8846%. A fine showing considering the strong competition.

In Dayton, Ohio, last September, at the Grand American Handicap tournament, over 500 shooters from all points in the country, A. G. Flickinger, of the Vallejo Gun Club won fourth place, a trophy and a substantial purse in the feature contest of the tourney, by breaking 96 out of 100 birds. Tony Prior, of the Golden Gate Gun Club, won the Consolation Handicap trophy and purse against a big field with the fine score of 97x100 at 20 yards rise. Ed Staunton, Huntley, Dodds, Couts Jr. and other Coast representatives were in the money every day of the five days' big shoot.

The high official averages in this State for the past year show J. F. Couts Jr. .9379% out of 7,270 targets; Bob Bungay, of Long Beach, .9264%; Tony Prior, .9210%; W. P. Sears, Los Banos, .9077%; Frank M. Newbert, Sacramento, 90%; J. N. Weiser, National City, 90%; Ed Mitchell, of Los Angeles, winner of the Pacific Coast Handicap at Madeira, leads the professionals with .9608%, he lost but 59 birds out of 1,200; Hugh E. Poston, of this city, second, .9334%; O. N. Ford of San Jose (since reinstated as an amateur), third with .9323%; Dick Reed, San Francisco, fourth, .9268%.

The coast professionals held their own with the best in the country. Lester H. Reid, of Seattle, ranks first with over .9644%; Frank Riehl, Tacoma, seventeenth, .9456%; Hugh Poston, thirty-first, 93%; O. N. Ford, thirty-fourth, 93%; Dick Reed, forty-seventh, 92%; P. J. Holohan, Portland, forty-eighth, 92%; Guy Holohan, sixty-ninth, Clarence A. Haight and Chas. H. Knight of this city, eighty-eighth and ninetieth respectively, which all is some clever shooting in hot company.

Among the local shooting clubs is the California Wing Shooting Club, the oldest trap shooting organization in the country. Some of the champion wing shots of the world have shown their prowess in the past forty odd years at the club's shoots. Among the crack shots at the Family Club traps are Phil B. Bekeart, George Uhl, J. B. Coleman, W. A. Sanborn, Col. J. W. Dorsey, Ed Staunton, J. L. Hawks, George and Frank Stall, of Winnemucca, Dr. C. D. McGettigan and others. The Golden Gate and Exposition City Gun Clubs each have a large membership. Across the bay at the Claremont Club, a number of crack shots frequently enjoy the sport, among them Bud and Harold Havens, John Cadman and others. The Bay View Gun Club composed of Alameda shooters holds regular shoots near the south end of High street.

Two clubs, the Garden City and the San Jose Blue Rock Club, flourish in San Jose, among the bunch of good shots are several clever women trap shots. Farther south there is the Salinas Rodeo Rod and Gun Club; Watsonville Blue Rock Gun Club; Santa Cruz Sportsmen's Association. Among other clubs of central California, down the valley and other points, may be mentioned Sacramento, Capital City Blue Rock Gun Club; Martinez, Alhambra Gun Club, Fred K. Burnham, Arctic explorer and big game hunter, president; Richmond Gun Club, Auto Gun Club, near Alviso, San Leandro Gun Club; Dixon, Dairy City Gun Club; Hollister, El Gabilan Gun Club; Newman Rod and Gun Club; Modesto Owl Rod and Gun Club; Paso Robles Rod and Gun Club, Pixley Gun Club, Porterville Gun Club, Fresno, Raisin City Gun Club, Lodi Blue Rock Club, Vallejo Gun Club, Tulare City Gun Club, Turlock Gun Club, Vacaville Blue Rock Club, Willows Gun Club, Winters Gun Club, Grass Valley Sportsmen's Association, Healdsburg Gun Club, recently organized by Otto M. Feudner; Coalinga American Gun Club, Bakersfield, Kern County Gun Club, Bakersfield Blue Rock Club, Fresno City Gun Club, Los Banos Gun Club, McKittrick Gun Club, Porterville Fish and Game Protective Association, Auburn Gun Club, Cloverdale Gun Club, Corning Gun Club, Dunmuir Gun Club, Oilfields, East Side Gun Club, Eureka Blue Rock Club, Lemoore Gun Club, Lindsay Gun Club, Nevada City Gun Club, Red Bluff Gun Club, Taft Gun Club, Tehama Gun Club and others.

A new club, the Blackbird Gun Club, has been recently organized in Los Angeles. Among the Southern California clubs are: Tuna Gun Club at Avalon, Cucamonga Gun Club, El Centro Gun Club, Escondido Gun Club, Fillmore Gun Club, Floriston Gun Club, Blue Bill Gun Club at Florence, Imperial Valley Shotgun Club at Imperial, Cerritos Gun Club, Long Beach; Long Beach Gun Club, Lordsburg La Verne Gun Club, Pasadena Duck Club, Los Angeles Rifle and Revolver Club, Sheriff Gun Club, Los Angeles; Manhattan Gun Club, Willow Gun Club, Los Angeles Gun Club, Maricopa Blue Rock Club, Otay Rod and Gun Club, Pomona Gun Club, Redlands Gun Club, Redondo Gun Club, Riverside Gun Club, Urbita Gun Club at San Bernardino, Pastime Gun Club at San Diego (a live bunch), San Fernando Blue Rock Club, Aliso Duck Club at Santa Ana, Santa Maria Gun Club, Saugus Gun Club, Tuxedo Country Club at Santa Barbara, Terra Bella Gun Club, Tropico Gun Club, Old Baldy Gun Club at Upland, Ventura Rod and Gun Club, and others.

Many of the above mentioned clubs are members of the California-Nevada Trap Shooting Association, composed of clubs of both States.

The San Jose Blue Rock Club members will shoot in a Fred Gilbert 20th anniversary shoot, Sunday, March 14, at which time the club will start the regular trap shoots for this year.

The Golden Gate Gun Club blue rock trap shoot drew an attendance of over 100 shooters from this city and many other points February 21 at the West Alameda shooting ground. The shooters were closely watched by a large crowd of spectators. Among the contestants were three clever shooters of the fair sex, Mrs. Ada Schilling of San Jose, Miss G. Meyers and Mrs. E. Houghawout, each of whom held their own with the other shooters. The main event, a "merchandise" prize shoot, was a match at 50 targets, shot in two 25 bird sections. In this contest every shooter drew a prize—miscellaneous and useful articles of all kinds, besides cash amounts, all of which were donated by friends of the club. The midday event was a big team shoot at 10 birds per man. Clarence Haight's team won over Armorer Price's team. The general average of scores was not up to what was expected, a cold and raw, windy day being a handicap. Straight scores of 25 were made by Ted Riley and L. Simpson. Riley's run of 28 straight was the best "long run" of the day. In the "grub" shoot, straight scores of 10 were shot by Prior, Bradley, Webb, Newbert and Edgar Forster. The total of scores in two 25 bird sections, 50 targets in all, and the "grub" shoot at 10 birds, follows:

Targets—	25	25	Bke.	10	T't'l

The Golden Gaters will hold the regular opening shoot for 1915 on Sunday, March 21, at which shoot a Fred Gilbert 25th anniversary club shoot will be the feature event.

If you wish to pattern your shotgun, try out a rifle or revolver, there is no better gallery on the Coast than that in the basement of the Peters Cartridge Company, 583-585 Howard street, this city. Any sportsman will be welcome to prove up his shootin' iron.

In demand of the times to supply the many Coast gun clubs there is now a blue rock plant in operation near Los Angeles. This newly established enterprise also is placing a new trap on the market. Heretofore these trap shooting essentials were sent out here from different Eastern manufacturers.

Opposition to Senate bill No. 699, prohibiting the shipping and sale of trout from Lake Tahoe and Truckee river districts, has been organized. The Lake Tahoe Trout Fishermen's Association charges that it is the action of the "game hog" again, and that San Franciscans will be deprived of the privilege of a mess of trout if the bill goes into effect. The bill is backed by the Lake Tahoe Improvement Clubs, consisting of about 100 property owners about the lake.

Fish Lines

During the operations of the United States Government Hatchery crew at the Los Molinos river station, in Tehama county, Superintendent Mitchell had a crew of seven men drawing the big nets and large hauls were being made. A new fish-way has been installed on the Los Molinos river just below the old mill dam, which went out last winter. The river was seined from this new fish-way to the lower dam.

While a great many of the catches were not yet "ripe," the number of eggs per day ran as high as half a million, and this was considered good for so early in the season. The rains which raised the river, particularly the Sacramento, increased the run of fish.

There was also a better run in the Los Molinos after the first of November, at which time the Los Molinos Land Company diverted into the river channel all the water flowing in its ditches, amounting to over half the normal flow of the river.

By reason of the new fish-way just below the mill dam the salmon are prevented from going farther up stream, and those which were caught before being "ripe" were thrown back and caught and recaught many times by the daily hauls before they were ready to "strip."

News of the fishing operations had been spread abroad, and people came from all parts of the county and from many miles beyond to carry away the fishes which the hatchery crew discarded. Many arrived in wagons and took away enough fish to dry for use during the entire winter.

H. W. Shebley, superintendent of hatcheries and deputy commissioner, made a trip to the San Bernardino mountains to establish a new hatchery in the San Antonio canyon, at the base of Mount Baldy. They proposed to stock up with rainbow eggs the new propagation colony which will help furnish the stock to plant in streams of 12 counties.

These waters are replenished with trout each year, as the popular sport of whipping the southern mountain streams thins the fish to a point approaching extinction. This season Pritchard will plant two million trout, or double the quantity of last year.

Grass Valley citizens who had occasion to go down the Rough and Ready ditch and along Deer creek recently report that during the last storm thousands of small trout, averaging four and five inches in length, could be seen floating down those streams. It is said that the water in Deer creek below the Champion mines contains something that kills the fish and as a result many of the speckled beauties have been destroyed.

Almost each year the streams near Nevada City are stocked with trout by the Sportsman's Club and several enthusiastic nimrods have asked if some means cannot be devised to keep the fish from coming down stream and being killed.

The San Francisco Fly-Casting mid-winter tournament has been postponed until Saturday, March 6.

Good striped bass fishing has prevailed in the waters near the Napa drawbridge for the past two weeks. Louis Gotthelf's finny prizes, for several recent trips, numbered six fish, scaling respectively 29½, 17, 12 and 8 pounds, 43½ and 15 pounds. He also tangled up with one huge bass that smashed his rod and broke away. Frank Messager landed an 11-pounder, another angler caught a 12-pound bass, George Gregory picked up two fish, 16½ and 9¼ pounds in weight. Weather and water conditions have been very unfavorable at that resort.

Other reports are that two large bass were taken last week in Galenas creek and also several from Corte Madera creek near Greenbrae.

As soon as the weather clears, the striped bass chasers should experience fine fishing, for the large fish should be numerous in the creeks and sloughs for the next two months or so, if past tradition is anything to count on.

Salt Water Fishes Flooded Out.—Bay fishing, particularly the chase of the homely rock cod, is all off at the present time. There is too much fresh water in the bay, the volume of up river flood waters has driven the saltwater fishes out to sea.

PASSING OF AN ANGLER.

As he was about to take part last Monday in the mid-winter tournament of the San Francisco Fly-casting Club, Harry Russell, one of the members, dropped dead from heart failure in the club lodge at Stow lake in Golden Gate Park. He had been conversing with fellow members but a moment before, and had appeared in good health, except that he had complained of a slight indigestion.

Russell was 54 years old and was born in Sacramento. For twenty years he had been connected with the local branch of the General Electric Company, and for ten years had been its sales manager. He was a member of the Bohemian Club and was a graduate of the University of California in the class of 1881.

FOR PROTECTION OF BREEDING STOCK.

At a recent meeting of the directors of the Percheron Society of America the following resolution favoring the reimbursement of breeders of live stock for pure bred breeding animals destroyed in any public welfare campaign against animal welfare was adopted, and copies forwarded to members of the committee on agriculture in the United States Senate:

Whereas, The live stock industry of the United States is now threatened with a disease that is of such grave character as to require the destruction by slaughter of all the animals that have been in any manner exposed; and

Whereas, The destruction of such animals is required as a measure for the public welfare and both Federal and State authorities have recognized this by making appropriations to reimburse those whose animals have been destroyed; and

Whereas, The Department of Agriculture has so interpreted the law regarding such appropriations as to fully reimburse the man who has fattened steers, or common grade cattle, on the basis of the value of said animals for meat, and to fully reimburse the man who has grade dairy cows on the value as milk producers, but has so interpreted said law to refuse to reimburse the owner of pure bred registered breeding cattle on the basis of their value for breeding purposes; and

Whereas, Under the present interpretation of the law the man who has poor or common stock is fully reimbursed for losses, while the man who has at great expense in time and money, built up a valuable breeding herd, must accept one-half or one-fifth actual value when his herd is destroyed; therefore

Be It Resolved, That we, the directors of the Percheron Society of America, believe that when the National or State Governments find it necessary to destroy herds, studs or flocks of pure bred registered breeding animals, in a campaign for national welfare, the breeders or owners of such stock should be reimbursed on the basis of a fair valuation of such animals for breeding purposes.

Drink Jackson's Napa Soda.

OFFICE OF THE COLLECTOR OF INTERNAL REVENUE, FIRST DISTRICT OF CALIFORNIA.

To All Concerned:

Only a few days remain of the time when returns of income for the year 1914 can be filed by individuals and corporations without incurring the severe penalties for delinquency in filing.

March 1st is absolutely the last day returns can be filed without subjecting the taxpayer to these penalties. In the case of an individual, the specific penalty for delinquency is from $20 to $1000, and in the case of a corporation, from $50 to $10,000, and in addition to these penalties, any amount of tax found to be due will be increased by fifty per per cent. I cannot, therefore, too strongly urge the importance of filing returns on or before March 1st.

Immediately after March 1st, a large force of Internal Revenue officers will be sent into the territory of this district, which comprises all of California north of Kern and San Luis Obispo counties, and all of the State of Nevada. From information gathered during the past year, these officers will know the names and addresses of practically all persons whose incomes for the year 1914 were sufficient to make them liable to file returns. All such persons who have not filed returns at the close of business on March 1st will be found and absolutely no excuse will be accepted. It will do them no good to plead lack of information because they have now had nearly a year and a half to inform themselves as to the requirements of the Income Tax Law since that law passed. The officers of this district have exerted themselves to the utmost to disseminate correct information. I have repeatedly urged all persons who did not understand the law to either call at my office or write and ascertain their liability under the law. Everything possible along this line has been done, or will be done up to and including the first day of March, and every person who neglects or fails to perform the duty imposed upon him by the statute on or before that date will do so at his own risk. I repeat that absolutely no excuse will be taken and that the penalties will be imposed.

The liability of an individual to file return can be succinctly stated. Every citizen, or resident of the United States, man or woman, whose net income amounted to $3,000 or over for the year 1914 must file a return. Every non-resident alien with a net income of any amount from property owned and business, trade or profession carried on in the United States must file a return. The single or married status of a person is not a consideration in the determination of liability to file return although it later does become a consideration in the determination of tax liability.

Absolutely every corporation, excepting certain specifically exempted kinds of corporations accurately described in the statute itself, must file a return whether it operated at a profit or at a loss, and even though it was not actively engaged in business during the year 1914. The only question is whether it had a legal existence during any part of the year 1914. If it had, it must file a return. Certain corporations which have established a fiscal-year basis in the office of the Collector of Internal Revenue may file returns on that basis, but all others must file returns on the basis of the calendar year of 1914 on or before March 1, 1915. The exemption of $5000 allowed a corporation under the special excise law of 1909 is not allowed under the Income Tax Law.

Returns may be filed at the headquarters at the Custom House in San Francisco, and at the Internal Revenue office in the Security Bank Building at Oakland, and at the Internal Revenue offices in the postoffice buildings at Sacramento and Fresno. They may also be sent by mail but when mailed, must be sent in time to reach an Internal Revenue office not later than March 1st.

Beginning February 23, 1915, the Internal Revenue offices just referred to will be kept open until 10 p. m. each week day for the accommodation of the public, and on March 1st, will be kept open until midnight. In the meantime, letters seeking information will be promptly answered, and information will be given by telephone or telegraph on request at the expense of the person desiring it. Everything possible will be done, but I repeat that after March 1st no excuse will be taken and the penalties will be imposed upon those who will have failed to comply with the law.

Respectfully,

JOSEPH J SCOTT., Collector.

San Francisco, California.

THE FARM

MEETINGS IN CONGRESS HALL.

One of the buildings belonging to the Department of Live Stock of the Panama-Pacific International Exposition is the Hall of Congresses which was specially erected for the accommodation of live stock and allied associations which will hold their meetings in San Francisco in 1915. Those associations which have already signified their intention of holding a meeting or convention in San Francisco in 1915 are as follows:

American Association of Importers and Breeders of Belgium Draft Horses.
American Aberdeen Angus Breeders' Association.
National Duroc-Jersey Record Association.
American Oxford Down Record Association.
American Rambouillet Association.
Red Polled Cattle Club of America.
American Shire Horse Association.
American Poland China Record Association.
American Hampshire Sheep Association.
American Shorthorn Breeders' Association.
American Duroc-Jersey Swine Breeders' Association.
American Hampshire Swine Breeders' Association.
American Tamworth Association.
American Southdown Breeders' Association.
The Polled Durham Breeders' Association.
American Association of Fairs and Expositions.
Chester White Swine Record Association.
American Shropshire Registry Association.
American Shetland Pony Club.
Welsh Pony and Cob Society of America.
American Angora Goat Breeders' Association.
National Mohair Growers' Association.
American National Live Stock Association.
International Milk Dealers' Association.
American Milch Goat Record Association.
Buff Minorca Club of America.
American Buff Plymouth Rock Club.
O. I. C. Swine Breeders' Association.
American Association, Medical Milk Commissions.
American Genetic Association.

IMPROVING RANGE WATERING PLACES.

How range which ordinarily can not be grazed because of inadequate water facilities can be opened up for stock is told by the Department of Agriculture in Farmers' Bulletin 592 on the development and improvement of stock watering places upon national forests. No stock range can be said to be properly utilized if there is an uneven distribution of water. On some areas the water supply is not sufficient for the number of stock the forage will support. On others the water supply is sufficient, but it is not permanent, making it necessary to remove the animals before the season is over. Still other areas are made practically worthless for stock purposes by the absence of water except at rare intervals during winter. Practical suggestions for the improvement of the water supply are made in the bulletin, which may be obtained on application to the department at Washington.

Ranchers who are cultivating the farms and fruit groves on the newly subdivided acreage of Nuevo Rancho, in the Lakeview-Perris-Hemet valley district, are facing a season of exceptional prosperity, according to those who are acquainted with conditions in that section of Riverside county. Early and copious rains have placed the soil in splendid condition for cultivation and unless something unforeseen transpires, the crops this year should break all previous records.

Each of the ten thousand farm boys appointed as delegates to the corn convention and corn show at San Francisco will be expected to exhibit ten ears of some pure variety of Dent corn at the Panama-Pacific International Exposition.

HORSE OWNERS! USE GOMBAULT'S CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from Horses. Impossible to produce scar or blemish. Send for descriptive circulars.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects

READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horsefiesh for racing purposes.

DON PRONTO 2:02¼,

eight years old, pacer, no straps, needs no boots; sound, not a blemish or a puff. Any amateur can drive him as well as a professional; has been in 2:02 with a 230 pound amateur up. This is a matter of record. Don Pronto is the cleverest all-round high class pacer in the country. Has held a world's record and is from the dam of Manrico (3) 2:07¼, a world's record holder. Is bred to be a great sire, being by THE DIRECTOR GENERAL (sire also of Wy-Drad 2:04¼, William O. 2:04¼, Mainsheet 2:05, Deuchester 2:07, etc., 8 in 2:10), and out of SILURIAN, that wonderful producing daughter of Wilton. Don Pronto was the biggest money winning free-for-all pacer in the west both in 1913 and 1914. Can surely beat his record. Is very beautiful, pleasant and a great favorite. **Price $1750.00.**

ALARICH 2:11¼ (Breeder's mark 2:09),

trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. **Price, $650.00.**

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. **The best buy in California at $1600.**

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. **Price $1000.00.**

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. She has been up from pasture about eight weeks and trialed this week in 2:49 very easily, last eighth in :19¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. **PRICE $900.00**

O M A R, gelding,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). **A present at $350.00.**

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. **Price $800.00.**

HERMES, brown colt,

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. **Price $1500.00.**

JOHNNY DUGAN,

3-yr.-old breeder's record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. **A great buy at $350.00.**

OLD FOLKS,

bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is ready to begin fast work, having been jogged all winter. **Price $1000.00.**

CARINA,

bay filly, trotter, two years old, by CARLOKIN, dam ATHERINE (dam of Copa de Oro 1:59, Rags 2:09¼ and Nicola B. (2) 2:23¾, tr. 2:17, winner of the Oregon Futurity and second in the P. C. T. H. B. A. stakes for two-year-old trotters).

Carina is entered and paid up in the same stakes as Carleta. She is a grand looking, well developed filly, showed a :40 gait at eleven months old. Is good gaited and good headed, is in training and promises to make a high class trotter. Trialed this week in 2:46, last half in 1:21. **Price $600.00.**

AND ONE FOR THE $20,000 P.-P. I. E. TROTS—RAGS 2:09¼, winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old—in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. **Price $2000.**

In addition to the ones above mentioned I will offer to intending buyers NICOLA B. (2) 2:23¼, JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), a YEARLING BROTHER TO ESPERANZA 2:09, engaged in all of the Stakes, the phenomenal two-year-old pacer SANDY McNABB (staked), MISS QUEALY (full sister to Manrico), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

BROOD MARE FOR SALE CHEAP.

Ezelda W., foaled in 1907, Reg. Rule I Vol. XXI, full sister to Bertha Pointer 2:08½ by Del Coronado. First dam Belle Pointer by Sky Pointer; 2nd, Princess Wilkes by Ned Wilkes; 3d, Princess Clay by American Clay; 4th, Carrie Prince by Black Prince. This mare has trotted a mile in 2:35 as a two-year-old (by W. Durfee); has raised two fine, speedy colts; is sound, 15¾ high, weighs 1050 lbs, bay; has wire cut on right front foot, able to trot now in 3 minutes. Will trot fast if trained. CHAS. W. WINTER.
ALHAMBRA, CAL.

FOR SALE.

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great procer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

FRED W. KELLEY,

COPA DE ORO 1:59
WINNING PERFORMANCE

○ DURFEE'S STALLIONS ○

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ De Ora (3) 2:17
2-yr.-old record 2:13½. 2-yr.-old record 2:27¼.
Trial (3) .....2:09 Gold Lily p. (2)....2:24½
Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 Nicola B. (2).....2:23½
John Warwick (2) 2:17 Santiago (3) 2:24¼
The Lark (3).....2:18½ May Marian p (3)..2:24¾
Carl (2) .....2:19¾ Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 El Carbine (2).....2:27½
Carsto (2) .....2:22½ Eileen C. (3) 2:29
Carlschen (2) .....2:23 Carlos (2) 2:29¼
Fulton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

Pleasanton, California

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10.

Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10.

Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Vernon McKinney 2:01½

A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes.

Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910

Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

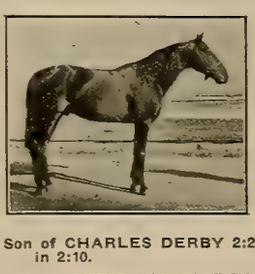
WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25, half-mile track, ½ mile—1:08¾
SELMA PALEY, trotted ½ mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU " ¼ mile :35½
GERTRUDE RIVES " ¼ mile :36¾
BILLIE BOYD " ¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23,



Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 1125; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

CAL. CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of

Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.

And the dams of

John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. His qualities as a sire are fully proven and breeders sending mares to his court have every assurance that the resultant foals will possess soundness, high individual excellence, and early and extreme speed. None better bred—none more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

CAL. CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of **Uhlan 1:58**; 14 in 2:10

First dam **Episode 2:18** half sister to Peter the Great 2:07¼

Second dam **Santos**, dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. His inheritance is of the kind that is breeding on most spectacularly and that he will found for himself a remarkable trotting dynasty seems inevitable. Bred right, built right, gaited right, and his few foals show that he breeds right. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address **HARRY DOWLING, Supt., Woodland, Cal.**

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the **Rush & Haile Ranch, Suisun, Cal.**, season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

Derbertha Bells

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

THE ONLY SON OF JAY McGREGOR 2:07¼ ON THE PACIFIC COAST

ONWARD McGREGOR 3, 2:23 1-4

Yearling Trial Quarter in :33

Bay horse with black points. Height 16 hands, weight 1100 lbs. Cal. Cert. No. 24.

First dam MARY GORDON 2:09¾ by Gordon 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and granddam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc. Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

$5,000.00 GUARANTEED — **$5,000.00 GUARANTEED**

Stanford-Occident Stake No. 1

To Trot and Pace at Three Years Old.

$3,000.00 to Trotters To be Given by the $2,000.00 to Pacers

California State Agricultural Society, 1917

ENTRIES TO CLOSE MARCH 1st, 1915

TROTTING DIVISION	PACING DIVISION
$900.00 to 1st heat.	$600.00 to 1st heat.
$900.00 to 2nd heat.	$600.00 to 2nd heat.
$900.00 to 3rd heat.	$600.00 to 3rd heat.
$300.00 to horse standing highest in summary.	$200.00 to horse standing highest in summary.

ENTRANCE AND PAYMENTS—$5 to nominate colt on March 1st, 1915; when name, sex, color and description of colt must be given; $10 Sept. 1st, 1915; $10 March 1st, 1916; $10 Sept. 1st, 1916; $15 March 1st, 1917.

STARTING PAYMENTS—$100 to start in trotting division; $50 to start in pacing division. All starting payments to be made ten days before the State Fair of 1917, at which the race is to take place. Nominators when making payments to start must designate whether the horse entered is a trotter or pacer.

CONDITIONS.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race, all other horses to go to the barn.

Heat purses divided 50, 25, 15 and 10%; the extra $300 for trotters, $200 for pacers in each division goes to the horse standing highest in summary. The Stanford-Occident Cup to be awarded to the colt standing highest in summary.

Distance 100 yards. A distanced horse shall be entitled to money already won. A horse distancing field or any part thereof is entitled to first money only. There will be no more moneys in each division or heat than there are starters.

Deductions from money winners—1st 10%; 2nd 7½%; 3rd 5%; 4th 2½%.

Entries must be accompanied by the entrance fee.

Nominators are liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $5000, the amount of the guarantee, only.

Hobbles will be barred in trotting and pacing divisions.

Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

No horse shall receive more than one money in each heat.

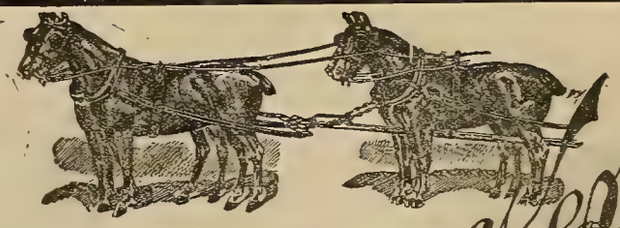
Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

A. L. SCOTT, President. CHAS. W. PAINE, Secretary. Sacramento, Cal.

STALLIONS DISEASED

In the stud they often become so devitalized that they must be given a long rest from such service. This is due to the absorption into their systems of poisonous bacteria, or germs, both contagious and sexual, in serving mares of all degrees of health and disease. There are many of these germs very injurious to the stallion. To counteract the growth of such germs in his system and keep him in normal condition, there is but one germicide in prepared form known and fit for internal use:



SPOHN'S DISTEMPER COMPOUND.

Is safe, simple and sure. It acts on the whole glandular system, regenerates the vital forces, leaves the blood rich and red. It will enable any stallion to go through a long stud season, keeping him vigorous, and not the least danger from any form of distemper. Give him a dose of "Spohn's" every other day, on his tongue, or with bran and oats: 50c a bottle; $5 a dozen. All druggists, turf goods houses, or the manufacturers.

36. Three Year Olds Pacing, State Fair Futurity (closed)..... 1500

SATURDAY, NOVEMBER 13

37. Free For All Class Trotting....$ 5000
38. Three Year Olds Trotting, Breeders Futurity (closed)... 2800
39. 2:06 Class Pacing (will close June 1, 1915)..... 20,000

Entries for all above races for the FALL MEETING close on April 1st, 1915, except Nos. 2, 3, 8, 14, 18, 21, 24, 26, 33, 36, 38 and 39.

CONDITIONS FOR ALL RACES CLOSING APRIL 1st, 1915.

All races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of two per cent. additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entries to close Monday, April 1st, 1915.

Nominators who make entries and ship horses from east of the Rocky Mountains will be given $50 towards the return to points east of the Rocky Mountains on such horses as start in any of the races and fail to win any money.

Entrance fee, three per cent, due at time entries close, two per cent. additional if not declared out on or before June 1, 1915, for the Summer Meeting and on or before August 1, 1915, for the Fall Meeting. Declarations must be paid in full at time of declaring out or declaration will not be accepted. Usual five per cent. additional from winners in all races except Futurity Stakes, Occident and Stanford Stakes.

Professional drivers will not be permitted to drive in Amateur and Driving Club Races.

The Management reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Management reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Management reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed by the Panama-Pacific International Exposition for the amount offered and are for the amount offered only.

Records made against time, i.e., breeders' records, and records made in a losing race, shall not be a bar to class eligibility.

Any horse that started in 1914 without improving its record, equaling its record and not winning a race, shall be entitled to one second.

The owner hereby releases the Panama-Pacific International Exposition from all liability of every kind and character on account of loss, damage or injury to horses or other property said owner may have on said Exposition grounds; and further agrees to abide by all the rules of the said Exposition, especially as to the use of track for working out as well as for racing, use of stalls, paddock, wearing of colors, uniforms, numbers and general conduct of all employees.

CONDITIONS FOR $20,000 STAKES—FINAL CLOSING DATE JUNE 1st, 1915.

SUMMER MEETING

No. 17—2:10 CLASS TROTTING.....$20,000
No. 33—2:06 CLASS PACING $20,000

FALL MEETING

No. 2—2:10 CLASS TROTTING $20,000
No. 39—2:06 CLASS PACING $20,000

ENTRIES MADE JUNE 1, 1915, $1000 TO START.

Horses to be named with entry. Entrance fee to accompany nomination. Horses must be eligible on Jan. 1, 1915, to stakes in which they are entered.

Stakes divided $5000 to the first heat, $5000 to the second heat, $5000 to the third heat and $5000 according to rank in summary. Moneys divided 50, 25, 15 and 10 per cent. $20,000 Stakes mile heats, 3 in 5. No race longer than five heats, and moneys in races not decided before the fifth heat will be divided according to rank in the summary at the termination of the fifth heat.

A horse with a record shall be allowed one second for each year, if raced, in which it fails to equal or reduce its record or win a race, if same is claimed by the nominator when making the entry.

Time allowances according to National Trotting Association rules.

(STAKES GUARANTEED BY THE PANAMA-PACIFIC EXPOSITION)

Members of National Trotting Association and American Trotting Association. National Trotting Association rules to govern.

For entry blanks and further particulars, address

Live Stock Department, Exposition Grounds, San Francisco, Cal.

Derbertha Bells

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

1601 Seminary Ave., OAKLAND, CAL.

EXPRESSIVE MAC 2:25 1-2

A. T. R No. 11513 — Cal. Cert. No. 1041.

Clara Mac 2:04½ Sire of **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of McKINNEY 2:11¼ and the great brood mare EXPRESSIVE 2:12½ by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at $25 the season, usual return privilege, or $35 to insure. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

THE PROOF (2) 2:29¾ Reg. No. 51956

By **The Exponent** 2:11¾. Sire of The Temptress 2:08½. Etc.

First Dam **Chord** 2:27, great brood mare, by **Wilkes Boy** 2:24½, sire of the dams of 11 in 2:10

THE SALE OF DON PRONTO to Australian parties is one more bit of convincing evidence of the efficiency of the advertising service of the Breeder and Sportsman, which serves the field of the western horseman as does no other publication. Of the numerous American bred trotters that have gone to the lands on the other side of the world in the years since the light harness horse achieved popularity in those countries, the interest of the buyers has been aroused through information gleaned from our columns in practically every instance. This ought to mean "a plenty" to you, Mr. Horseman, without further emphasis on our part.

LAST CALL FOR THE FAIR BILL.

The legislature re-convenes on Monday next at Sacramento and the fate of the district fair bill will not long remain unknown, as it is probable that it will come up for consideration during the earlier sittings of both branches of our governing body.

During the few weeks last passed we have reviewed the local conditions so repeatedly and fully that there remains little for us to say at this time that is both new and pertinent. We cannot resist the temptation, however, to make one last call upon all parties interested in the bill to unite in its support and to make personal representations to their members of the legislature urging an early consideration and enactment of the same as it now stands. The arrangement of all California fairs and race meetings is hanging fire pending its passage or failure, and there is a great deal at stake.

During the most recent racing seasons in California, operations have been gradually curtailed until the point has been reached where it is almost impossible to raise, train and race horses locally at a profit—this in a state from which have gone forth at one time and another the champion trotters of all ages and sexes, a state that is pre-eminently adapted by nature for the successful production of extreme speed and the highest degree of individual excellence. Betting was abolished because it was so conducted that it created a general situation absolutely untenable; district fairs fell by the wayside and the appropriations were discontinued because the fairs were not properly managed and the state's money was not disseminated in the intended channels. These are hard things to say, and they have proven stumbling blocks in the path of the movement to revive the fairs on the correct basis.

There is but one way that they can come back—by the establishment of only a few, and by these original few being made unqualified successes from every standpoint. The directors of the exhibitions must play fair with the state in disbursing its money; exhibitors must respond by extending generous patronage to the classes provided for them; horsemen must enter freely in the speed contests and furnish clean, sharp racing; most important of all, the public must set the seal of approval upon each individual enterprise by according it the deserved and necessary attendance.

That these things will all be brought about by the passing of the fair bill is our firm belief. The fairs are needed by all classes of people—demanded. That they will succeed, managed properly, is inevitable, nor can it be gainsaid that an original successful few will lead directly to an ultimate successful many. It all hangs upon what the legislature does now—and the action of the legislature depends upon what you do. A bit of concerted energy will lead us from the present "slough of despond" to a firmly established prosperity. If you haven't transmitted to your senator and representative your desires in this matter, do so today. Tomorrow may be too late.

UNFAIR DISCRIMINATION.

Recent discussion locally regarding the movement to establish betless thoroughbred racing in California has brought up the matter of wagering on other contests of all kinds that goes on openly and absolutely without restriction. Bets can be laid in San Francisco with ease on anything you care to mention without danger of interference, except horseracing, and to lay a wager on a horse race you must seek an illegal handbook and take a chance of arrest and the incidental penalty.

In the current issue of the Breeders' Journal the same matter was most ably covered by Tedd H. Kline and we can do no better than to reproduce the same with thanks to the writer:

"Cultured people may gamble and drink to their heart's content on special occasions and the police pay no attention to them. The other day in Boston, the police arrested some fifty men caught doing some petty gambling in a pool-room on Broadway, South Boston. Two days before, Yale and Harvard had played a great game of foot-ball in New Haven. The amount of illegal gambling consequent upon it, if reports be true, was incomparably greater and more reprehensible than that carried on in the Boston pool-room. Yet neither police nor university presidents made the least sign of protest."

The above paragraph is taken from a most virile sermon preached by the Reverend James Sheerin, of St. Matthews Episcopal Church, Boston, on the last Sunday in November, 1914.

Later Mr. Henry L. Allen, that most finished writer, in commenting on this sermon, wrote as follows:

"Anyone who takes note at all of the enormous gambling that is done in all larger cities, on the result of elections, football, baseball and numerous other things, cannot but wonder why the authorities generally should make speculating on horse races the one form of gambling to regard as criminal."

For the benefit of all who, like Mr. Allen, wonder why the authorities make speculating on horse races the one form of gambling to regard as criminal, I want to say with a positive knowledge that many of our very good friends of The Fourth Estate, and especially that branch of the F. E. known as the sporting department, have so pulled the wool over the eyes of the people and the authorities everywhere that they believe every other sport but horse racing has sprouted a set of wings, that there is practically no gambling on anything at all any place but on horse races, either at the tracks of the respective cities where racing is held or in the despised handbooks, throughout the United States.

I am not prepared to say how squarely and honestly all the other games are played, besides horse racing, but I am prepared to say something about the enormous gambling activities on baseball, football, elections, bowling, prize-fighting and billiard matches that furnish the season around sporting interest.

The first observations I made along this particular line was during my residence in Grand Rapids when I was associated with the Furniture City Driving Club there. As assistant secretary and publicity man of that organization I made it my business to hustle pretty actively among the sporting fraternity. I could tell (and I can tell now) where every handbook was located in that city. I knew the bookmakers, had a personal acquaintance with many of their patrons, and knew in round numbers just how much money was bet each day in the year on whatever sporting events were taking place.

In Grand Rapids, some of the most clever gentlemen in the city wagered thousands of dollars every month of the baseball season on the result of the games. One young man whom I knew well, the head of a large mercantile house there, was the heaviest bettor of them all. In fact great numbers used to follow him in and wagered as he did. He was a great church and club member, a high society man and greatly respected by all. His friends all knew he gambled, the police department, which was also his friend, knew he gambled extensively and knew where he placed his money, but that made no difference to them. The sporting editors of the three Grand Rapids papers knew this also but winked the other eye, and said, "We cannot afford to interfere with his personal liberty."

The point I am making is this: It is no crime to wager but it is a crime that so many daily papers everywhere should wink at everything except betting on the horse races. As in the case of Chicago which at the present time is quite stirred up because of an expose a certain daily recently made of the hand-books throughout the city, which takes bets on the races at the winter running tracks. A fine thing this. It takes the people's mind off the Board of Trade, bucket shops, poverty, underpaid department store girls and other things too numerous to mention. Such a crusade also apparently makes good with the paper's readers who thrive on this anti-gambling crusade stuff.

However, this paper, or any other paper for that matter, would not care or dare to print the truth about the enormous amount of money that changes hands every day during the baseball season. It does not care to say anything about the snug fortunes that are bet on the outcome of the great fall football games. It does not care to say anything about the mint of money that goes on the big bowling tournaments every winter. It does not care to say anything about these items, but if the sporting editors were on the square they would print these stories about the betting angle of other sports besides horse racing and would tell their readers just where they could place their bets, if they wanted to.

But your average sporting editor is not built that way. Instead he hushes up every item concerning gambling on any other events and plays up to the limit the sepeculation news attached to horse racing. Also he hushes up any scandal that may become attached to other sports, except horse racing. For that down-trodden sport, he wears his eyes out looking for a piece of turf rottenness to show up and when he finds it, lo! a two column scare head goes over the whole article, so that his readers may see what a putrid business racing horses is.

"What killed thoroughbred racing in the once great racing centers?" is a question still asked by many. I can tell you. The daily newspapers killed racing because in the halcyon days if one picked up a daily paper, looking for turf news, he never found but two head-lines, towit: "Bookies Given a Drubbing" or "Public Routs the Bookies." And there you are.

When I came to Cleveland, in the summer of 1912, to take up the same duties for the Cleveland association that I had assumed at Grand Rapids, the first man I became acquainted with was the sporting editor of the Cleveland Leader and almost the first subject we talked upon was race track betting. I told this gentleman of the conditions at Grand Rapids and asked him if things were not about the same in Cleveland. I almost insulted him, and he pooh poohed the idea that gambling to any great extent was going on in Cleveland upon baseball, football, bowling, billiards or any other sport. I replied that I would have to convince myself first that he was right before I finally dismissed the discussion with him.

I have now been a resident of Cleveland for three years or nearly so, and if there is a city in the United States where more gambling goes on, on every other sport besides horse racing, I want to know where it is located.

If the daily newspapers of Cleveland are to be believed, cigar stores, buffets, hotel lobbies, private rooms in office buildings and other rendezvous too numerous to mention are the abodes of the hand-book men of the Sixth City and every day, so it is whispered, thousands of dollars change hands on the results of baseball games, football games, automobile races, bowling tournaments and billiard matches, as the case may be and in season. But the daily papers never demand that the authorities stop this enormous speculation which is positively known to occur.

No down and outers make these wagers, either. Polished, refined gentlemen. Business men of all sorts, professional men galore. Dozens, even hundreds of the Sixth City's best citizens, both men and women, make daily wagers and glory in them.

It is rank discrimination, that's what it is, and until an indignant public, headed by the horsemen, makes a consistent effort to stop it, just so long will the Fourth Estate continue to hammer the racing game everywhere and every time it gets a chance.

Who is back of the other sports I have mentioned? Generally speaking, a lot of champagne soaked promoters, whose God is the silver dollar and who have bullied or bought their way into the public press by an unlimited flow of golden coin and passes.

Who is back of the great sport of horse racing? Generally speaking, America's finest men and women. Our greatest financiers, business builders, professional men of all kinds, who play the racing game for the love of it, who already have made their money and who love the game as a sport.

It is this legion of America's finest flower and chivalry that the Fourth Estate has consistently fought, bombarded and misrepresented until the breath of life in them is nearly extinct. But a great reversal of form is coming and when it does our very good friends of the Fourth Estate will be, to use a race track expression, "left at the post."

Evidence of True Greatness

Much has been written in turf papers in the three or four seasons last passed of the performances of the get of Prince Ansel (2) 2:20½, and of the very limited opportunities for proving his real merit that fell to the lot of the son of Dexter Prince and Woodflower by Ansel prior to his purchase in 1912 by John W. Considine. Considerable emphasis has been laid upon the latter topic, and statements made concerning the very small number of foals he has begotten have in some quarters met with more or less skepticism. The fact remains, however, that very few people—even those who concede that he has had no chance in years gone by—appreciate fully the results accomplished in the face of most discouraging conditions.

Talking over this very matter at Pleasanton recently with Charley Spencer, who knows the family better, perhaps, than anyone else, the writer was a bit surprised himself at some of the statements made by the former Woodland Stock Farm trainer, and received information previously lacking or taken only as "hearsay" that instilled a new and deeper respect for Prince Ansel and his get. Thanks to the kindness of Mr. Spencer and to his interest in Prince Ansel, some statistics of the case were obtained from records in his possession and the case of the Woodland Stock Farm premier can now be presented in a truly convincing manner that admits of no sidestepping, as the matter presented covers his whole connection with the farm while under Mr. Brown's ownership. The following is a roster of all mares owned at the farm that foaled to the cover of Prince Ansel prior to the season of 1912, the comments made concerning foals being taken from memoranda made at various times by Mr. Spencer:

Mares Foaling in 1899—1.

Chamois by Shamrock—Bay filly, died as yearling.

Mares Foaling in 1900—None.

Mares Foaling in 1901—3.

Chamois—Black filly Anselois, never broken, dam of Nusta 2:23¼.

Francisca by Almont 33—Chestnut filly, died as weanling.

Nosegay by Langton—Chestnut colt Prince Gay, trial 2:12, last quarter :31, died, could have beaten 2:10 that year.

Mares Foaling in 1902—2.

Majella B. by Nushagak—Chestnut filly, died as suckling.

Mamie Martin by Nushagak—Bay filly Princess Mamie 2:27½, trial 2:18, last quarter :31, broke down; brood mare at Woodland Stock Farm.

Mares Foaling in 1903—None.

Mares Foaling in 1904—3.

Bonnie Derby by Chas. Derby—Bay filly Bonnie Princess 2:25½, trial 2:07½ in 1913.

Lottie Whippleton 2:15 by San Diego—Brown colt Prince Lot 2:07¾.

Mamie Martin—Bay colt Harold M. trial 2:23, last quarter :33, went lame from splint.

Mares Foaling in 1905—6.

Bonnie Derby—Bay colt, never trained.

Bonnie by Berlin—Bay filly, never trained.

Everette by Nephew—Bay colt Wesos 2:12¼, timed in race at Marysville in 2:09½.

Majella B.—Bay filly Angella 2:27¾, trial to cart 2:16, last half 1:05.

Nosegay—Bay filly Gay Princess, brood mare.

Viola by Gen. Benton—Bay filly Ansevola trial 2:22, dam of Yolo King trial (2) 2:21, now in the training stable of Woodland Stock Farm.

Mares Foaling in 1906—5.

Bonnie Derby—Bay colt, never trained.

Everette—Chestnut colt, saddle horse.

Josie D. by Nutwood Wilkes—Bay filly trial 2:20, ninety days work.

Majella B.—Bay filly Decoratia, unbroken, injured as weanling, brood mare, first foal Mona Ansel trial 2:20½ half-mile track, ninety days work.

Serpolo by Mendocino—Gray filly, trial 2:36 as a two-year-old.

Mares Foaling in 1907—3.

Daisy B. by Waldstein—Bay filly Susie Miller, very fast, dam of John Malcolm (2) 2:11½.

Majella B.—Brown filly Frances C. (3) 2:24¼, matinee record 2:19.

Viola—Bay filly, never trained.

Mares Foaling in 1908—6.

Daisy B.—Bay colt, very fast, went wrong.

Everette—Bay filly, paralyzed, recovered, brood mare.

Josie D.—Chestnut colt Joseph D., trial (2) 2:18, last half in 1:07.

Lauress by Mendocino—Chestnut filly Laura Rogers (2) 2:18¼, (5) 2:11¼, separately timed in a race at Peoria, Ill., in 2:06½.

Majella B.—Bay filly Georgia Kalos 2:24, trial (3) 2:20.

Serpolo—Gray colt, trial (2) 2:20, half in 1:05½.

Mares Foaling in 1909—5.

Bonnie Derby—Bay filly Bonnie Ansel, trial 2:07¼, Alex Brown's entry for 2:10 trot, June meeting P.-P. I. E.

Everette—Bay filly, untrained.

Josie D.—Bay filly, Josie Ansel, separately timed in race in 2:13½ as three-year-old, could 2:10, taken sick and could not start in stakes; now in the training stable of Woodland Stock Farm.

Serpolo—Gray filly, trial (2) half in 1:13¾.

Steina by Steinway—Chestnut filly, died as weanling.

Mares Foaling in 1910—4.

Arista by Nushagak—Bay filly Arista Ansel (2) 2:18¼, can beat 2:10, now in the training stable of Keefer & Spencer.

Lottie Whippleton—Brown filly Lottie Ansel (2) 2:14¼.

Lauress—Chestnut filly Laura Ansel, trial (2) 2:20.

Serpolo—Foal died.

Mares Foaling in 1911—6.

Arista—Brown colt, could trot 2:30 clip as yearling when sold.

Everette—Bay filly, fast natural trotter, untrained.

Josie D.—Chestnut colt, Joseph Ansel (3) 2:12¾.

Lauress—Chestnut colt, dead.

Nutflower—Bay colt, trial 2:16¼, last quarter :32¼ in 1914, will beat 2:10.

Steina—Bay filly Tiena, brood mare.

Here is ample and absolute proof of the meagerness of Prince Ansel's past opportunities for showing his real qualities as a sire, and it requires but a scant inspection of the foregoing for one to become convinced of the true merits indicated thereby. From a total of 44 foals born at his home in a period covering over a decade, six of whom died before reaching an age permitting even breaking, eleven have achieved records, five have beaten 2:10 in races or public trials, one holds the coast record for two-year-old trotting fillies, other season records are theirs, and two have become producing brood mares, one the dam of a world's champion.

Aside from the farm's own matrons, very few mares owned by other parties were mated to him in this period and their offspring does not exceed a score—Mr. Spencer sets ten or twelve as a safe figure—and from these have come three trotters, Ima Dudley 2:27½ (foaled in 1907, bred by E. D. Dudley), Dorothy Ansel (2) 2:20 (foaled 1908, bred by C. B. Bigelow) and Adansel (2) 2:29½, (3) 2:14½ (foaled in 1908, died in 1914, bred by M. C. Keefer). With thirty-eight foals living to training age at the farm and estimating those owned by outside parties at twelve, Prince Ansel would have a total of fifty sons and daughters four years old and over in 1915—fourteen of them in the list, eleven of which are trotters. Many stallions have had as many foals as this live to racing age from a single season's crop, and a few very simple comparisons and deductions form the basis for Prince Ansel's claim to genuine greatness. Much might be written further, but for the time we leave the figures to make their own arguments, and repeat that Prince Ansel's opportunities as a sire are all in the present and future.

To Go East in 1915

Present indications point to a larger representation on the Grand Circuit and other eastern tracks this year on the part of California horsemen than for some seasons past, as a number of stables are being fitted with the expressed intention of making a trip across the big divide after the June meeting of the P.-P. I. E. Charley DeRyder, with the horses of R. J. MacKenzie and one or two other patrons, has a number of both young and aged performers that are fit to go up against almost any kind of company; a portion of the Bailey and Childs stables can find their best opportunities on eastern tracks; Will Durfee has not yet declared his plans but friends "in the know" would not be surprised at his announcement of another trek across the plains; Henry Smith, Bud Davis and Jake Brolliar are contemplating entering through the Michigan Short Ship or some other mid-western circuit, as are a few other owners and trainers from this section, and I. L. Borden of this city has announced the intention of sending Albaloma 2:08¼, Baby Doll 2:10¼ and perhaps others of his stable, now at San Jose being prepped by Johnny Quinn, to try conclusions with the cracks of the big line.

"You know," remarked Mr. Borden in a recent conversation, "the earning capacities of a really good horse are so curtailed by local conditions that an owner does well to make expense money even on a winning campaign. In 1914, for instance, aside from the meeting at Phoenix, Albaloma had but five starts at four points in California, all of which he won, earning some $2200 in his home state, while at the Arizona fair he demonstrated his capacity to race in 2:05 and forced Maymack to trot to a world's record to beat him. This year, aside from the meetings here at the exposition, his number of starts in California would probably be cut to two or three, for only moderate purses, so I can see no possible chance to make a fitting campaign with him here, as he is a horse that has always responded well to plenty of hard work. Really, the fellow has earned his right to a trip down the larger circuits, and if he trains on in his usual form I will undoubtedly give him a chance to show people just what kind of a horse he is. Baby Doll is a high class mare and at present shows no bad effects from her previous troubles, and as she has proven herself a 2:07 trotter I believe she can earn money in her class east or west. One or two others may or may not do to go east, and such horses now in training as show racing promise of average merit will be raced here at home; I expect, of course, to have starters in the local futurities, as usual.

"I am aware of the fact that many horsemen have remarked, 'What a shame Borden didn't hold over Albaloma for the exposition trots,' and all I have to say is that if my foresight had been as good as their hindsight I might possibly have done so—perhaps not. At the beginning of the season of 1914 he had a record of 2:09, so that his eligibility would have been contingent upon getting him beaten or failing to reduce his record—matters which Messrs. DeRyder and McDonald very cheerfully attended to and which would have been productive of the result recommended by other parties had his starts been confined to the Phoenix meeting. It has been my practice, however, to race a horse when he will do to race and to win every race I can. I have had the satisfaction of seeing this lad in three good honest campaigns, in which he was always trying and always gave a good account of himself. Carried over, he might or might not have made a stake trotter as a six-year-old. Present indications, of course, are favorable, but—" Mr. Borden smiled a wry little smile before he continued—"about a quarter of a million people went through the turnstiles at the exposition on opening day. In the light of past experience I would say that that figure bears a close relation to the number of things that can happen to any horse between now and June twelfth, any one of which would be fatal to the chances for a winning performance. At that I may be underestimating things a few thousand, and I am very well satisfied with Albaloma's past record. Neither the services of the strategy board nor the resort to the excuse book have been necessary so far, and I will go on with him just so long as he continues to do as he has done—respond to every reasonable demand made of him.

"There is another side to the matter, too," continued the Victoria Island "farmer" in a less serious vein. "Do you recall the reasons set forth by General Gordon for his advance into Pennsylvania during the civil war? According to his often expressed ideas he had no hope or intentions of achieving glory or victory, but made his invasion prompted solely by his highly developed southern sense of gentlemanly obligation—'social reciprocity,' I believe he put it. Having been visited by his northern neighbors for the major portion of the conflict he felt in honor bound to return their courtesies and scrapped his way some distance into northern territory before the end came. His original visit was somewhat abruptly and rudely curtailed, but in the years to come the old General played a prominent part in cementing the good feeling that now exists between the once warring sections.

"Now the same reasons that prompted him to invade the north play some part in prompting an 'eastern invasion' on my part at this time. We expect many of our eastern friends out with their stables at the exposition meetings, and perhaps we Californians can do something to induce more of them to come out by observing the 'social proprieties' of the case and paying them a visit during the summer. With other local men I have taken a great interest in the success of the big trots and have urged the attendance of all good stables from ocean to ocean. To show that I believe that horses can be shipped here and raced without inconvenience I will endeavor to do my share by making a campaign in the 'native haunts' of some of the horses and horsemen for whose attendance we are most eager. I will have the company of other Californians, and we will endeavor to furnish enough competition that they will have to come on back west with us for the final argument as to which horses are the best.

"Of course," he concluded with another smile, "they may 'Gettysburg me' as they did the old General, but with an even break in the racing luck the boys that do it will know they have been in a horse race, and if my trip will be productive of a greater attendance at our exposition meetings and a more cordial feeling between horsemen east and west it will not have been entirely fruitless, even if devoid of financial profit."

DRAFT HORSE BREEDERS' SALE.

The first annual sale of pure bred draft stock, held on Wednesday of last week at the University Farm at Davis under the management of the California Draft Horse Breeders' Association, attracted a representative crowd of heavy horse fanciers from various quarters of the state and the prices ruled at figures that stamp the event as a success. Practically all the horses led in for Auctioneer Wm. Higginbottom to dispose of carried reserve, which in almost every case was generously exceeded, and almost every horse catalogued was profitably disposed of.

Through the operations of this initial sale the value of such an event has been fully established and it will become an annual fixture on the "horse calendar" in California. The principal sales were as follows:

Imp. Belgian stallion Noirhat Docteur 4050 (10), J. Elmo Montgomery, Davis	$ 300
Belgian stallion Hamilton C. 6415 (5), M. & J. Williams, Concord	685
Belgian stallion California Chief 6414 (6), C. Harris, San Francisco	600
Belgian stallion Nebraska Chief 4516 (6), W. Fine. Millville	300
Belgian stallion West's California Chief (1), Del Greive, Davis	100
Belgian mare Christine, in foal (3), Del Greive, Davis	155
Belgian filly Chrystabel (1), J. S. Gibson Co., Williams	250
Shire stallion Salvador Forest King 13385 (3), E. W. Westgate, Rio Vista	1000
Shire mare Salvador Baroness 9236 (8) and foal, John McCormack, Rio Vista	475
Shire filly Salvador Rose 14530 (2), Dr. C. M. Faris, Sacramento	195
Percheron mare Adalaide 100393 (3), Wm. McLaughlin, Emeryville	290
Percheron mare Phoebe 100389 (3), Wm. McLaughlin, Emeryville	290
Percheron stallion Pago 71435 (6), C. Harris, San Francisco	500
Imp. Percheron stallion Gallipali 59913 (9), Dr. C. M. Faris, Sacramento	550
Percheron stallion Chico (4), A. Oure, R. R. 5, Sacramento	300

Only a few weeks until entries close for the class races at the exposition—April 1. See the full program and conditions on another page of this paper.

DON PRONTO 2:02¼ GOES TO AUSTRALIA.

Telegrams from W. G. Durfee early in the week requested friends at this end of the line to look out for the arrival of Don Pronto 2:02¼, as the great pacer was en route for Australia via this port, and on Tuesday night the Don arrived on board the Aroline of the Independent line, accompanied by Wm. Green. They cleared from San Pedro about midnight Sunday night and had a very rough trip, coming between the heads here some sixteen hours behind the customary schedule. Pronto occupied a "commanding position" in an especially constructed stall on the upper deck, protected by well battened canvas from the weather, and though the waves broke over his "cabin" in the heavy seas he took it all as a matter of course and came through in excellent condition. By an oversight on the part of the steamship people no feed was loaded for him, and he ate the entire supply of carrots, etc., that the galley had to offer. At that he unloaded Wednesday morning chipper as could be and was comfortably quartered temporarily at the City Front Stables on Jackson street.

It was the original intention for the Don to begin his real sea voyage Wednesday on board the Hinds-Rolph steamship Maitai, but the delay of the Aroline cut the time required for the administering of the mallein test and the completion of the necessary veterinary inspection, so the lad will have to remain here for some days awaiting another boat. In the meantime he will get his daily exercise and be kept in the best of shape.

The Don's new owners are Chisholm & Co., a Sydney firm of harness horse fanciers, and the deal with Mr. Durfee was consummated by cable as a result of the advertisement carried in the Breeder and Sportsman, which is the medium through which Australia and New Zealand make most of their purchases of American light harness horses. While the owners' intentions are not known, it is very probable that the Don will be raced a bit before his retirement to the stud, as there are many fast miles yet under his belt. As a sire he should prove of great value in improving the breed of trotters in Australia, as he comes from the most successful families in America. He is by The Director General (son of Director 2:17 and Winifred by William L., second dam a daughter of Mambrino King, etc.) and is the fastest of the eight performers by that sire that have raced to records faster than 2:10, four of them in 2:05 or better.

Don Pronto's dam is Captain Barnette's great broodmare Silurian 2:25½ by Wilton 2:19¼, son of George Wilkes 2:22 and sire of nine and the dams of twelve in the 2:10 list, of whom Don Pronto is the fastest. To the cover of Moko, Silurian produced Miss Queeley (2) 2:26¾, and Manrico (3) 2:07¼, winner of the Kentucky futurity in 1912, holder of the world's trotting record for the fastest sixth heat in a race, and now established in the stud at the great Walnut Hall Farm in Kentucky. The Don's second dam is Silhouette (dam of four trotters, one sire, and grandam of six performers including the other great futurity winner Siliko 2:11¼) by Hambrino 2:21¼, sire of one and the dams of seven in 2:10 including Hawthorne 2:06¼; third dam Silverlock (dam of three trotters, etc.) by Mambrino Time, etc.

While it is a matter of regret that the game black horse could not remain in California where he has always been most popular, his exportation to Australia is a matter for self-congratulation on the part of California horsemen, as there is no doubt that he will make good most emphatically in his new home and thereby do much to increase the respect and demand for California horses in the antipodes. California and Mr. Durfee are "shy" one mighty good free-for-aller, and Australia and Messrs. Chisholm & Co. are ahead one brand new race horse of A-No. 1 caliber and a prospective great sire.

Will Green, well known on American tracks on both sides of the big divide, came up from Los Angeles with the Don, will look after him during his lay over in this city, and accompany him on the long journey to Australia, where he may or may not decide to remain for a time. Billy came into port after the stormy coastwise trip a bit empty in the carrying regions and a trifle pale about the gills, but nevertheless looking forward cheerily to the prospect of another tussle with old kid seasickness. The Don made the better passage of the two on the first leg of the journey, but Billy claims that he will find his sea legs quicker the next time out and that both of them will land at Sydney right side up with care and ready for whatever turns up.

Virginia Barnette (3) 2:08¼ came very nearly "getting hers" a few days ago at Los Angeles in a manner that shows just what risks of heart failure the owner of a high class trotter runs. She had been jogged to pole with Esperanza (3) 2:09—and incidentally the wireless reports from Angeltown are warm in lauding this pair as a team hitch—and while being unhooked got away with a line dragging and made a run of several blocks outside the grounds, ending up with a nasty tumble at a manhole. When men from the stable got to her they took her for dead from a short distance, but she was gotten to her feet and her apparent injuries are confined to a hind foot from which the shoe was torn, splintering the hoof somewhat and causing lameness. It is a wonder that she was not much more seriously injured, and it is not believed at present that she will suffer any permanent harm from her escapade.

The June Colt Stake Entries

With the coming of some genuine California sunshine this week the attendance at the Panama-Pacific International Exposition continued to break all previous records and horsemen throughout the coast country began laying definite plans for "lettin' 'em down a notch" weekly from now until the beginning of the June meeting. The enforced planking of the track at the exposition grounds for the holding of the Grand Prix and Vanderbilt Cup auto races, and the postponement of the latter classic of the benzine burning world until March sixth, again gave the track a setback, but the plank will be lifted immediately and Superintendent Maxwell and his crew will lose no time in putting it in shape for its original purpose. Eastern and northwestern horses continue to arrive at local training tracks or are definitely known to be headed this way, and that there will be an unprecedented "gathering of the clans" from June 5 to 19 down by the Golden Gate is certain.

TWINKLING DAN 2:06¼

Entered by Gen. C. C. Watts in the big pacing stakes at the exposition, now in the hands of C. L. DeRyder.

The welcome announcement was made by D. O. Lively early in the week that the exposition track would be available for the holding of matinees by the California and San Francisco Driving Clubs, and these organizations will begin their season's activities quite a bit in advance of the first of the professional programs. Stall room is in readiness and a number of local matinee horses will be quartered in the department of livestock and commence training over the exposition track immediately after the track is again in shape. All present indications point to a bumper entry list on April first for both meetings, which are being given the widest of publicity through the columns of all the leading turf publications. Full programs and conditions appear on our inside front cover, and anyone not receiving entry blanks will please make their wants known promptly. They go in the mails today for all parts of the country.

We have had several inquiries regarding the probable fields in the colt stakes for the June meeting, already closed, and as a matter of general interest we append the list of entries to these events, with the added information that nominators have until June 1 to make declaration as to whether they will race at the trot or pace, in case of transfer the difference in entrance fee being payable or refundable, as the case may be:

SUMMER MEETING.

No. 4, Two Year Olds Trotting, $2000.

I. L. Borden, San Francisco, Cal., b g Alesandra by Barney Barnato, dam Ramona by Prince Robert; rn f Alabama by Barney Barnato, dam Directola by Direct.
S. Christenson, San Francisco, Cal., b c Natalday by Wilbur Lou, dam Ella J. by Bob Mason.
W. G. Durfee, Los Angeles, Cal., ch c by Manrico, dam My Irene S. by Petigru; bl f by Manrico, dam Subito by Steinway; b f by Carlokin, dam Atherine by Patron; b f by Carlokin, dam Alexandria by Bon Voyage.
C. E. Farnum, San Francisco, Cal., ch c by Flosnut, dam by Dillcara.
O. E. Folk, Riverside, Cal., ch c Kidd Tolus by Pactolus, dam Pocahontas by Domineer.
W. I. Higgins, Deer Lodge, Mont., b c Monte Simmons by Del Monte Bond, dam Deer Lodge Maid by Fitzsimmons.
International 1:55 Horse Farm, Minneapolis, Minn., br f Fay Patch by Dazzle Patch, dam Miss Flashlight by Baron Wilkes; b c San F. Patch by Dan Patch, dam Margaret Nash by Directum.
Estate of John C. Kirkpatrick, San Francisco, Cal., br f Lucretia Bond by The Bondsman, dam Lucretia by Nazote.
R. J. MacKenzie, Pleasanton, Cal., b c Anvilite by Anvil, dam Martha Spy by The Spy.
Chas. R. Marley, Woodland, Cal., bl f The Expense by The Proof, dam Nusta by Nushagak.
A. L. Scott, San Francisco, Cal., b m Lady Bondilon by The Bondsman, dam Weatewater by Sidney Dillon.
F. E. Ward, Los Angeles, Cal., b s by Dr. Wayo, dam Emily W. by Jas. Madison.
Geo. L. Warlow, Fresno, Cal., s f Ludie McKinney by Stanford McKinney, dam Gadsky by Athablo.

No. 22, Two Year Olds Pacing, $2000.

I. L. Borden, San Francisco, Cal., b f Cherry B. by Barney Barnato, dam Ella G. by Hamb. Wilkes.
W. G. Durfee, Los Angeles, Cal., b or ch c by Copa de Oro, dam Leonor McKay by McKinney.
International 1:55 Horse Farm, Minneapolis, Minn., b f Judith Patch by Dazzle Patch, dam Hal Raven by Hal B.; b c Buzzer Patch by Dan Patch, dam Renline by Online.
R. J. MacKenzie, Pleasanton, Cal., b f by The Bondsman, dam Ava J. by Zombro; b c by The Bondsman, dam Gregan by Steinway; b c by The Bondsman, dam Corinne Neilson by Clarence Wilkes; b f Miss Axworthy Dillon by Axworthy, dam Cleo Dillon by Sidney Dillon; bl c by El Zombro, dam Crabtree's Gift by Hedgewood Boy.
F. B. Stockdale, Fresno, Cal., b f May May by Athasham, dam Guide Aleetice by Calif. Guide.

No. 28, Three Year Olds Trotting, $5000.

I. L. Borden, San Francisco, Cal., b g Dr. Smith by Tom Smith, dam Wanda 2nd by McKinney; b f Little Florence by Barney Barnato, dam Hester McKinney by McKinney.
W. G. Durfee, Los Angeles, Cal., b c Nicola B. by Carlokin, dam Atherine by Patron; bl c by Carlokin, dam My Irene S. by Petigru.
A. R. Gumaer, Florence, Colo., bl c Peter E. by Gumaer Hal, dam Claudia Chimes by Chimes.

Hemet Stock Farm, Hemet, Cal., br f Allie Lou by Kinney Lou, dam Lady Zombro by Zombro.
International 1:55 Horse Farm, Minneapolis, Minn., br s Ned Patch by Dan Patch, dam Miss Flashlight by Baron Wilkes; b s Grant Patch by Dan Patch, dam Rare Flower by Astronomer.
Ed. O. Johnston, Oakland, Cal., b c William Ervis by Copa de Oro, dam Calif. Girl by Zombro.
Mrs. E. K. Livermore, San Francisco, Cal., br g Zomwelyn B. by El Zombro, dam Evelyn B. by Prince Ansel.
R. J. MacKenzie, Pleasanton, Cal., bl g Gay Zombro by El Zombro, dam Nosegay by Langton; b g Bonquin by Quintell, dam Lilly Young by McKinney; b f by Prince Ansel.
F. J. Ruhstaller, Sacramento, Cal., bl f Tennie Hall by Moko Hall, dam Tennie by Temescal.
A. L. Scott, San Francisco, Cal., b f Lady Ino by Le Voyage, dam Lady Nez by Nutwood Wilkes.
F. B. Stockdale, Fresno, Cal., br f Mayflower by Black Hall, dam S. P. Pointer by Star Pointer.
L. H. Todhunter, Sacramento, Cal., b f Janett Bondsman by The Bondsman, dam Sweet Bow by Bon Voyage.
F. E. Ward, Los Angeles, Cal., b c Freckle Beirne by Beirne Holt, dam Freckle Bird by Red Freckles.
Geo. L. Warlow, Fresno, Cal., b f Tewana by E. G. Diablo, dam Cora Wickersham by Junio.

No. 10, Three Year Olds Pacing, $3000.

I. L. Borden, San Francisco, Cal., ch g Sheldon B. by Barney Barnato, dam Ramona by Prince Robert.
C. E. Farnum, San Francisco, Cal., ch c Parknut by Flosnut, dam Lottie Parks by Cupid; ch c King Dill by Dillcara, dam Grisette by Marengo King.
Hemet Stock Farm, Hemet, Cal., ch c Oro Lou by Kinney Lou, dam Zeta W. by Nutwood Wilkes; ch g Sterling Lou by Kinney Lou, dam Louise Reed by Sterling McKinney.

FLEETA DILLON (2) 2:08¾.

Sterling R. Holt's entry for the $20,000 trots at the P.-P. I. E., in the stable of V. L. Shuler.

Thos. Holmes, San Bernardino, Cal., s c Wandell by Zolock, dam Happy Maid by Happy Prince.
International 1:55 Horse Farm, Minneapolis, Minn., b f Thistle Patch by Dan Patch, dam Thistle Bird by Thistle; b f Agnes Patch by Dan Patch, dam Louise Hersey by Arion.
S. C. Kinney, Bushnell, Neb., b c by Impetuous Devil, dam Lilee Palmer by Norval King.
R. J. MacKenzie, Pleasanton, Cal., b c by Joe Patchen II, dam Miss Harris by Sidney.

With the departure of the Schwartz stable for Pleasanton last week, San Francisco lost, temporarily, some of her most prominent light harness performers from both the professional and amateur ranks, and Al has the best string of both trotters and pacers that he has ever had at this season. The string has been kept in good shape all winter by jogging and brushing over the Stadium track, and the whole bunch is in excellent condition for making speed and being ready for the June meeting at the exposition. Adolph Ottinger is the principal owner represented, with the tried campaigners Zulu Belle 2:06¼, Dick W. 2:06¼, Copper the Ore 2:10¼ and Agnes Carter (2) 2:20, who has not been raced since her two-year-old form but who is showing most promisingly again. For Jimmy Ryan, Schwartz is giving the prep to the Irish trotter St. Patrick 2:11½ and the old matinee hero Happy Dentist 2:05¾, and for F. Gommet he has Prince McKinney 2:29¼ and his daughter Baby Gommet, a green trotter that demonstrated close to 2:10 ability last season. J. Ginocchio's good pacing mare Homburg Belle 2:12¼ is also included in the stable, which is rounded out by Al's green ones, Ray Alto by Iran Alto, Soreta by San Francisco, Jerry D. by Sidney Howard, and William Tell by Welcome Wilkes.

NOTES and NEWS

Don Pronto 2:02¼ goes to Australia.

The buyers "saw the ad in the Breeder and Sportsman."

Some poor place to advertise, eh Genevieve. All the best ones in that country and New Zealand have been placed by similar proceedings.

Riverside claims the dates of October 5th to 9th inclusive for her fair, the last in the California schedule and following Hanford.

The Horseman and Spirit of the Times Futurity for foals of 1915 will be worth $20,000 as heretofore, but the entrance fee has been reduced to $1.

Albaloma 2:08¼, Baby Doll 2:10¼ and perhaps one or two others of the Borden stable are booked for a trip down the Grand Circuit if all goes well.

Jim Stewart's horses and the lanky James himself arrived back in their accustomed winter quarters at Los Angeles recently and will get ready for another run for the money in 1915.

Jack Villar is riding easy behind his pupils at San Jose, and intends introducing Lady Arabella to the local matinee men when the fun races start. She is good mannered, training fine and can lay 'em down around the course in twelve.

The one best bet for exposition visitors right now is the Canadian building. There never was a display quite like it and our friends across the border have certainly "done themselves proud" in the preparation of their share of the P.-P. I. E.

Captain C. P. McCan writes from Portland that all his horses are in fine shape and that he expects to race a youngster or so this season. He has earned the right to a few good ones and friends will greet their appearance and success with pleasure.

Fred Woodcock has leased the Portland track from Captain McCan and expects to put on a meeting that will draw a good crowd this year, Portland's dates being set for the week of August second. Fred has a pretty good stable, himself.

John Mack 2:12½, by Geo. A. Fuller 2:08¼, dam Ida Purple 2:14½ by Cutting 2:10½, is quartered at Los Angeles in charge of Trainer Kirby. He is entered in the 2:10 trots at the P.-P. I. E. by F. L. McQuilty of Curran, Ill., and will start in some of the class races as well.

Advice under date of February 26th from Acting Manager Grieg bears the unwelcome but not wholly unexpected tidings that the Winnipeg exhibition will not be held this year, but that the board governing it hopes to be able to stage it again in 1916 in greater style than ever before. Here's hoping!

And still that list of stallions advertised in the Breeder and Sportsman continues to grow, the announcement of Peter McKlyo (3) 2:12½ being the new one this week. We do not wish to have the record fail next week, so some good man will please send in his order not later than next Tuesday.

Abe W. Johnson of Irvine, Cal., reports the arrival on February 20 of a nice brown colt by Directum Penn 2:12½ out of Belle Raymon (dam of Don Reginaldo 2:12½, Zombro Belle trial 2:11½, etc.) by Raymon, second dam the great brood mare Gipsey by General Booth, sire of the dam of Delilah 2:06½, etc.

Messrs. Joe Carson and E. J. Rochon have made application to the Dominion authorities to remove their trotters and pacers to the United States and these two crack Canadian stables will probably soon be located at one of our California tracks, as the exposition races are their goal and both have entries in the big stakes.

Wm. Cecil has recently added to his stable at San Jose a three-year-old bay filly by Prince McKinney 2:29¼ (sire of Sweet Princess 2:16½, etc.) out of the matinee pacer Lady San Jose 2:13½ (matinee) by a son of Guy Wilkes. Cecil's other youngsters out of Berta Logan, one by Prince McKinney and the other by Nearest McKinney, are learning fast and Owner H. G. Angevine is more than pleased with them.

Helen Mac, the sister to Clara Mac in the Borden stable, is showing a twenty gait at the trot and will continue to be trained at that way of going if she keeps on coming as fast as she has so far. Being a bit "mixed" at first, after the fashion of her famous sister, Johnny Quinn adorned her with a nice pair of panties of the Indiana variety, but Helen didn't like the way the unaccustomed garments tickled and made a few "Steve Brodies" that caused John to hunt the stable with her and put her through a disrobing act. A bit of weight turned the scale the other way and the stable now has two good Expressive Mac trotting prospects.

The Montana legislature has killed race track betting in the treasure state, principally from the same causes that led to its abolishment elsewhere—too much strong arm work in the wrong quarters.

Mountain Dee (3) 2:24¾ has improved a great deal in appearance and deportment since Ben Walker took him in hand and looks like the making of a high class horse. Ben's other pacer, Kinneysham 2:13¼, is fit and husky and his trotter, Inyo Boy by Oceto, is showing him a bit more whenever called on.

Bessie Custer is working below 2:30 at Los Angeles and Al Whitney promises to hang into her steadily before time for the June trots. She is some trotter, from Los Angeles chatter that reaches this office. It is also reported that buyers continue to offer ten thousand large iron men for Dr. Burns, and that the owners continue to decline such offers with thanks.

George Williams of Los Angeles, known far and wide in the horse world as "Pedigree George," has recently bought the runner Sandy McNabb, a winner at Juarez, and is temporarily a frequenter of the Mexican course across the river from El Paso. It will also be a surprise to the boys to learn that Pedigree annexed a new side partner during the winter in the way of a wife, so the Juarez venture serves also as a honeymoon.

H. B. Thornbury of Los Angeles is adding constantly to his stable of saddle horses headed by the champion Jack Barrymore, is most recent purchases being the five-months-old gelding Carvel and the two-year-old colt Englewood, secured from A. C. Jones of North Middletown, Ky. Mr. Thornbury promises to have one of the finest stables of saddle horses shown at the exposition.

Recent advices from Europe are to the effect that Idolita 2:09¼ was destroyed sometime in January in Germany, although no particulars are available. Idolita had been in Europe ten years and was the most popular and successful American trotter in Germany. He was a California product, having been bred at Palo Alto, and was a son of Mendocino and Edith by George Wilkes, grandam Edith Carr by Clark Chief.

C. D. King, now at San Jose where for the present he is in the employ of John Quinn, recently purchased from C. C. Crippen of that city the black horse Guy Carlton 2:30, full brother to Guy Borden 2:07¼ and the pacer in the present Borden stable, Sir Guy Dillon. Carlton has previously been worked at the trot but King switched him to the pace and he looks better as a racing prospect at that way of going.

I. L. Borden of this city recently purchased from San Jose parties the good brood mare Carrie B. 2:18 and her yearling foal by Tom Smith 2:13¼. This daughter of Alexander Button and Carrie Malone is a well proven speed producer, being the dam of Lovelock 2:05½, Ray O' Light (3) 2:08¼, Ishmael 2:21½ and California Lou (2) 2:27½, and her foal to the cover of Tom Smith should be possessed of considerable whizz. She was bred last year to Iran Alto and is thought to be safe with foal.

The Hercules car entered by Harold Hall in today's Vanderbilt Cup is sponsored by the San Jose sportsman, H. G. Angevine, and was built especially for the event from Hall's own plans and specifications. Hall is an engineer of experience and had such faith in his ability to construct an exceptional engine and car that Mr. Angevine gave him free rein and told him to "go to it." The car has made some great tests and its builder and driver is carrying a whole bundle of local good wishes in his try for speed laurels.

Colonel Jim Thompson made a quick trip to San Jose early in the week and arranged to move his training stable in the near future from the state fair grounds at Sacramento to the driving park at the Santa Clara metropolis. The Colonel will take down quite a string, including L. H. Todhunter's Peter the Great colt, Peter McKlyo (3) 2:12½, that will be in stud service until July 1; Guacho by Nobage, dam Zombelle by Zombro, that was a contender in the local futurities in 1913; Honeyback, three-year-old filly by The Bondsman—Lottie Lynwood, staked and owned by Charles Butters; Sweet Bow 2:17½, winner of the two-year-old trotting division of the Breeders futurity in 1909 and her three-year-old filly Jeannette Bondsman, by The Bondsman; Natal Day, S. Christenson's great two-year-old trotter by Wilbur Lou 2:10¼ and out of the dam of Honey Healey 2:08¼, San Felipe 2:09¼, etc.; Zombrene S., a four-year-old daughter of Zombrene and a Diablo mare, with a trial last year in 2:16¾; Ruby Bond, three-year-old filly by The Bondsman—Dowina by Bon Voyage; Sweet Adena 2:16, by Zombro—Norta K. by Del Norte, and the three yearlings brought back from Kentucky last December—a filly by The Northern Man 2:06½ out of Lilly Young by McKinney; filly by Tregantle 2:09¼ out of Queen by Dictator Wilkes, and the colt Bon Watts by General Watts (3) 2:06¾, dam Pesteria by Bon Voyage, second dam Persia by Allie Wilkes, third dam My Lady by George Wilkes, etc. This is one of the best bred bands ever gathered in any western stable and Genial James promises to develop some of them into genuine trotters.

Jack Tolliver, who has been "ironing 'em off" for the San Jose colony of trainers all winter, is putting in his time working a nice going three-year-old trotter, Bon McKenna by The Bondsman, out of Maranda by McKenna 2:17½. The lad is owned by D. D. Hanks of San Jose and is developing pretty well for Jack.

F. M. Price of San Jose is at the driving park there with the four-year-old bay horse Kinmont by Kinney G. 2:24½, out of Fairmont by Monterey. This is Kinmont's first regular training work, but last year right off the road as a three-year-old he paced the San Jose track in a matinee in 2:35. He is a good sized, well built fellow with a good head and Price thinks he has the making of a profitable horse.

George L. Parker of Portland, one of the horse lovers of the northwest who is working all the time to keep up the game in his country, has turned his three-year-old pacing filly Janice L. P. over to Fred Woodcock to fit for her 1915 engagements and both owner and trainer expect the daughter of Hal B. to give a good account of herself. She was second in the two-year-old pacing division of the Oregon futurity last year in Trainer Flanders' hands, Woodcock winning it with May Day Hal. Mr. Parker also has Helen Mistletoe by Hal B. and the two-year-old pacer Marian A. by Oregon Patch. He expects to be on deck at the exposition trots as a spectator and is boosting the big meetings in his home city for all he is worth—an example that no one will regret following in other localities.

WINNIPEG NOTES.

Unless all signs are misleading, there will be no harness racing in Winnipeg this summer. There will be no exhibition meeting and when this was announced several leading horsemen arranged to send their horses to California. This put the finishing touches to the prospects for the Fort Garry meeting, which is held here in June of each year, and now the Winnepeg Driving Club officials say there will be no matinees during the summer. This leaves the racing in Manitoba to the meets at Portage la Prairie, Brandon, Killarney and a few small fairs. These race meets may also be called off later, for there is some talk of that at the present time.

When it was announced there would be no exhibition races here next summer Mr. Rochon made preliminary arrangements to send The Badger, The Beaver, Alta Dillon and Seneca Boy to California to capture some of the big money hung up there. Then Joe Carson came out with the announcement that he would send College Gent and Strathtell to the same meetings. These horses will be shipped west as soon as the necessary permits have been received and it is more than likely that other horses will follow in the near future.

Recently a number of horses have changed hands in Winnipeg and its immediate vicinity. Some of the principal sales are: R. T. Travis has bought Billy Tempter 2:22¼, that made his record over a half-mile track. Mr. Travis brought him up from the south and expects to race him in the 2:20 class this year.

Joe Carson has sold Lady Verton 2:15¼, by Alverton, to C. Wright of Fort Rouge. R. T. Richards, owner of Molly Darling 2:05¼, has bought Dr. Red, a bay gelding with a mark of 2:09¼, from Joseph McGrath, Elmwood. This horse is extremely fast but has not been raced for two years on account of a slight accident. R. S. Hamilton has taken over the bay gelding De Witt 2:18¼ from the owner for the winter's racing. W. W. French is handling Beautiful Sail 2:24¼, by Mainsheet, for Dr. W. J. Hinman, V. S. Beautiful Sail made her mark as a two-year-old and it was then a world's record for a two-year-old on a half-mile track. As a two-year-old she was sold to R. T. Shelvin, of Buffalo, for $2,900, and while in his possession she stepped in 2:20½ hitched to a wagon.—Canadian Sportsman.

A good many of the western horse buyers who have gone out in the interest of sub-contractors to pick up war steeds for European export have gone broke and others have been financially crippled as a result of over-buying. The buyers have been scouring the country for horses and took nearly everything offered, paying fairly good prices for them. These were shipped to the eastern concentration points, where the foreign inspectors passed upon them. The inspectors were mighty particular about what they got and as a result the rejections were as high as fifty per cent in some cases. One firm in Denver had 1,500 head left on his hands. Some of the rejected animals have been fixed up by the owners and safely passed on a second or third trial, but usually the first rejection stands. One dealer had a shipment of 1,000 horses from Miles City, Montana, to St. Paul. Of these 400 were rejected by the inspectors as unsuited and the dealer still has them on hand. There are large numbers of rejected horses at all the big markets and as there is not much demand for them the loss falls heavily on the buyers who had no contracts but who took a chance at the open field. There is likely to be another warrant to get horses and if this is the case the inspectors will have to pay more money for them. One of the old dealers in Denver has nine months in which to pick up $250,000 worth of war nags for the French and within the past fortnight an Italian buyer has appeared in Denver with the desire to get 400 head of cavalry stock, so something will be doing right along.—Field and Farm.

THE MURPHY STABLE IN WINTER QUARTERS.

Upon a recent visit to Poughkeepsie, N. Y., I found the stable of Thomas W. Murphy wintering splendidly, the horses getting daily jog work over the mile track of Hudson River Driving Park and the adjacent roads, Eugene Murphy and Ned McCarr doing most of the driving. That was prior to the arrival of Directum I 1:58, Margaret Parrish 2:06¼, and a few other celebrities that have recently been added to the stable, the head of the Murphy establishment then being on a scouting tour for prospective stake material for the coming campaign.

The first stable visited was that presided over by the second trainer, McCarr, and, upon entering, I found Lassie McGregor 2:06¼ being given walking exercise upon the barn floor. It will be recalled by readers of the Breeder that the daughter of Jay McGregor 2:07¼ broke down while scoring for the first heat of the Charter Oak Stake last Labor Day, which ended her brilliant turf career. The ailment was a rupture of the suspensory ligament of a hind leg, and, while she now walks sound and the crippled leg seems as straight as its mate, Lassie will doubtless be retired to the stud, it being reported that she will be bred to Peter Volo (3) 2:03½, the three-year-old trotting champion.

The latter will remain in the Murphy stable, as previously announced in the Breeder, and will be mated with a few royally bred mares at a fee of $500. The breeding operations, however, will not be allowed to interfere with the four-year-old turf career of the marvelous son of Peter the Great 2:07¼, and he will be prepared to meet the best in his class during the coming season, and, incidentally, for an attack on The Harvester's record of 2:01. Peter Volo closed his last campaign perfectly sound, is in fine physical condition, and should improve sufficiently over his three-year-old form to enable him to come very close to the stallion record, if he does not beat it a little. A mile in faster time than 2:01 would seem like a big order for a four-year-old, but the colt was, in the opinion of his trainer, able to trot in 2:02 or better last season, so that he will not have to improve so much in order to accomplish the task scheduled for him. Peter has not grown the least bit coarse, as one might have expected he would owing to his having been an overgrown yearling and two-year-old—in fact, his proportions are about perfect, and I would judge that he will not measure over 15.3 hands at maturity.

Second only to Peter Volo in matter of monetary value is Peter Scott 2:07½, son of Peter the Great, for whom Murphy paid $30,000 last season soon after the stallion had won two heats and second money in the M. & M. at Detroit. The Scott horse is a magnificent individual, has size, abundance of substance, a fine disposition, and last, but by no means least, speed. Since he showed a mile in a race at Syracuse, last August, in faster time than 2:05, it is to be expected that he will win a number of the coveted prizes for trotters during the next campaign.

Anna Bradford (3) 2:00¾, by Todd Mac 2:07¾, the world's champion three-year-old pacer, is being put in shape to beat two minutes as a four-year-old, and no one will be surprised if she accomplishes the task, thus becoming the champion pacing mare. She is in splendid condition, but has apparently not taken on any great amount of flesh since closing her 1914 campaign, which, however, was not very wearing on her constitution for the reason that she won all of her races comfortably.

Another world's champion in the string is the filly, Rose Magee (1) 2:19½, who holds the yearling record for pacing fillies. The daughter of The Abbe 2:04 was purchased at auction last fall by Edward Thompson, of Northport, Long Island, and will probably be trained this year with a view to racing her in her three-year-old futurity engagements.

While writing of champions, it has occurred to me that the Murphy stable contained quite a number that hold such honors. For instance, there is U. Forbes (2) 2:12¼, who established the present half-mile track record for yearling trotters in 1913. He is now three, and, while he went slightly amiss last summer, after taking his present record in a winning race at Lexington, Ky., he has entirely recovered from the injury and should trot around 2:05 this season if he stays sound.

Frank Bogash Jr. 1:59¼ is a champion in more ways than one, his name appearing four times in the world's record table, while he is also the fastest harness horse thus far produced by Canada. Frank went suddenly lame last fall, at Lexington, while being warmed up for a race, but he is again as good as new and will be out after the free-for-all purses.

Brighton B. 2:05½, the gelding that surprised many last fall by beating some of the best trotters out, looks better than at any time in his life, and should be able to hold his own with the best in his division. He won the American Horse Breeder Futurity at three, but was generally considered a little soft until he won a hard fought race or two last fall.

One of the greatest disappointments in the Murphy stable of 1914 was the little mare, Lulu Lumine 2:09¼, for whom $12,000 was reported to have been paid by A. H. Cosden, of New York, after she had made a splendid campaign over western tracks. Last season she opened her campaign at Cleveland, where she was defeated by Star Winter 2:05, but she was timed in that race in 2:04¾. Evidently the race was a harder one than she had been prepared to go, for she trained off early and was laid away for a fresh start this season. Whether or not she will make good in her 1915 campaign remains to be seen, but in all probability she will, for she was highly regarded by all who saw her race two years ago. It would seem that a mare capable of trotting in 2:05 should cut considerable figure in the 2:10 classes, provided she does not run up against another trotter of Star Winter's caliber.

Space will not permit of my going into detail regarding the numerous other members of the stable, but herewith is a partial list of those I saw aside from the ones mentioned above:

Trotters—Mirthful 2:06¾; Kentucky Todd (3) 2:08¾; The Temptress 2:08½; Strafford 2:13½; Barbara Overton (2) 2:16½, now five; Polly Overton (2) 2:29¼; Colonel Cochran Jr. 2:14¼; Great Isle, 2:13¼; Peter Worthy, b. c. (3) by Guy Axworthy 2:08¾, dam Lady Caleta 2:15¼, by Peter the Great; Silver Axworthy, ch. c. (3) by Axworthy 2:15½, dam Easter Lilly W. 2:06¾ by Oratorio 2:13, and several other youngsters.

Pacers—Major Ong 2:03½; Tilly Tipton 2:06¼; Irene Beau 2:12¼; Hal S. 2:16¼; Peter Farren, b c. (4) trial 2:03½ at three years; Hedgewood Boy Jr., b. g. (4) by Hedgewood Boy 2:01; Jean, a green mare, that was started once or twice in the Murphy colors last season.—Berwick, in the Horse Breeder.

RAGS 2:09¼ AND THE PAST PERFORMANCE TABLES.

While the Carlokin filly Esperanza is the only three-year-old that ever made a clean sweep of the senior divisions of the coast futurities, there is another member of the Durfee stable whose performances the previous year very nearly rival those of the consistent Berry trotter, the brown gelding Rags, now five years old.

Rags was bred by Will Durfee and has received all his education in the "Durfee school" at Los Angeles, whence have graduated so many of the coast's best performers. Always a big, growthy sort of a colt, he was not started as a two-year-old, but began his career in the public gaze most auspiciously the following season. Late in July, some weeks prior to the first of his stake engagements, he had his first try-out in company in a little neighborhood affair at Los Angeles—the class 2:30, the purse one hundred dollars. After winning the first heat and acquiring a tag of 2:26 to precede the balance of his description — three-year-old brown gelding by Del Coronado 2:09½, dam Atherine 2:16¾ (dam of Copa de Oro 2:01, etc.) by Patron 2:14¼—he was drawn and carried along easily until September sixth, when he straight-heated a field of eight good youngsters, in the Breeders Futurity, trotting the various miles in 2:12½, 2:13¼ and 2:13¼.

At Sacramento on September 16 he duplicated his Santa Rosa performance in the Occident, Miss Gaily and Guacho furnishing the competition and the fastest time being 2:13¼, and four days later in the Stanford met the same pair and others and was returned victor at the end of a lively five-heat duel with the fast but uncertain Hemet Stock Farm entry. The trotting sister to the three-year-old champion pacing gelding, Hemet 2:08¼, won the first heat in 2:14¾ and came back with a second mile right in Rags' time—not ragtime—2:12½. Superior behaviour played a good part in the decision at the windup, the Durfee gelding lasting better than the chestnut daughter of Geo. W. McKinney and lining out the last three heats in 2:13¼, 2:14½, 2:14½, the balance of the original field having been gradually weeded out by the flagman in the first, second and third times out. At Salem on the last day of the month he found the Oregon futurity just like getting money from home with two slow miles on a heavy track.

As a four-year-old, still an overgrown colt, he made only four starts but paid an excellent profit at that. Back at Santa Rosa almost a year to a dot from the date of his first appearance in a real race he trotted second to Allerton in the 2:09 class, forcing the Borden horse to trot to his present record of 2:08¼ in the first heat and repeat in 2:08¾. The final heat being in 2:09, with Vallejo King second and Rags third. In the 2:12 trot at Woodland he met Baby Doll and Merry Mac in a merry little contest, getting his tab of 2:09¼ in the second heat, winning the first and third also in slower time. His most profitable day's work for the season came on September 17 at Sacramento when he annexed the major portion of the five thousand dollar Governor's stake with three miles in 2:12½, 2:13, 2:13¼, the contending horses being Matawan, Nuristo and Mabel Van. This was his final start on his native soil, as his only other engagement was dated for October 1 at Salem, over a heavy track again. Here he met that other son of Almaden D.—Dean Swift 2:08, fastest by record of the season's far western trotting geldings—yielding first position, after a well fought battle in which he finished 3-2-1-2. He came home with the balance of the stable hearty and husky, and is maturing into a rugged, handsome horse. His winnings total well toward the nine thousand dollar mark to date, and Mr. Durfee considers him able to win more in the future, as he is racing sound, good in any kind of company over all kinds of tracks, and has shown his ability to beat his present record decisively. If not sold he will be a starter in the classes to which he is eligible at the June meeting at the P.-P. I. E., and only the fact that he already has entries for that event keeps Mr. Durfee from naming him in the $20,000 stake for 2:10 trotters, as his performance gives him a license to stand well up in the money in that event.

Write for P.-P. I. E. entry blanks if you do not get yours in a very few days.

GREAT ARRAY OF ANIMALS AT EXPOSITION.

One of the most surprising features of the Panama-Pacific International Exposition, to one who stops to investigate, is the importance of the part to be played in the Exposition by animals. Exclusive of the formal live stock showing, which makes up one of the principal divisions of the Exposition proper, a great variety of animals will be found in every part of the grounds, aiding, in numerous directions, in purveying entertainment and furnishing diversion for Exposition visitors—which in reality is the final Exposition purpose.

In the numerous enterprises that compose the "Zone"—as the amusement street is called—about 4000 animals will be found. But even before these show animals were brought to the grounds the animal population of the exposition had taken on interesting proportions. No sooner had the great exhibit palaces been constructed than a number of uninvited wild visitors of a particularly objectionable species took up their abode therein. Some of them have been dislodged. Their eviction was accomplished with considerable difficulty after several months of persuasion, intimidation and subterfuges in the shape of bait and traps.

Following the skunks came a miniature invasion of rats, who fed upon the remains of workmen's luncheons, and for awhile lived in luxury. Their occupation was short, however, and their disappearance furnished an excellent example of the "survival of the fittest." It must have been noised about the city that the exposition offered good feline hunting grounds, for there was shortly an incursion of cats, and the rats vanished. Many of the cats have remained in the buildings, and some of them have been made pets by the exposition guards quartered in the various parts of the grounds.

During the construction period a workman employed on the 435-foot Tower of Jewels brought two pet coons to the grounds. The pair made their escape, and since the completion of the tower have made their home in the dark recesses of the network of steel beams that forms its frame. All efforts to locate and banish them have failed.

Nearly all of the fifty-odd state and foreign buildings that are included in the exposition have pet animals among their inhabitants, and in many cases the animals have been brought from the state or country represented. Australia, for example, has brought a family of kangaroos and several other original inhabitants of the South Pacific commonwealth to the exposition. The Canadian building has a pool of water that affords a first-rate home for a trio of live beavers. A related family dwells in the Idaho building, which also contains a number of other denizens of the mountains of that state.

Flocks of pigeons form a definite part of the exposition color scheme, and greatly enhance its Oriental character. Several thousand of them are cooped in the upper parts of the great arches that mark the western and eastern entrances of the Court of the Universe.

The animal part of the Zone is large enough to stock a well-filled zoo. There is a large space devoted to an animal show, with the usual lions, tigers, leopards and familiar animals of the circus, while the 101 Wild West Show supplies several hundred creatures of appropriate variety. The Alligator Farm contains nearly three thousand specimens of alligators and crocodiles of all sizes, a flock of pelicans, herons, snake birds, eagles, horse-shoe crabs, sea turtles, some raccoons, and three trained sea cows. In the Submarines concessions is a troupe of trained sea lions that follow the big steel boats under water. Their antics are visible through portholes of the submarines.

In the Principality of Toyland Grown Up, a $1,000,000 enterprise that comprises a whole amusement park within itself, will be found any number of animals, from the trained-flea circus to the troupes of trained reindeer, ponies, donkeys, dogs, sheep, monkeys and goats. Incidentally the monkeys are to be seen performing in a sketch entitled "A Night in a Monkey Music Hall."

The South Pole concession, which portrays Captain Scott's expedition to the Antarctic, has several wolf dogs, penguins and other animals brought from that region. Of special interest to the little folk are the four storks that promenade with great dignity in front of the Baby Incubators building or perch on the chimneys thereof. These birds were brought from Holland especially for exhibition at the exposition.

In the Australasian, Hawaiian and Samoan villages are to be found numerous animals indigenous to the countries represented, while on the slopes and crags of the "mountains" that form backgrounds for a number of concessions are painted goats, deer, coyotes, mountain lion and the like, that lend animation to the scene. In the same category might be included the various animals of strange or natural shape, as the case may be, that help to make up the sculptural decoration of the exposition. Camels, elephants, horses, giraffes, lions, bear, wolf, oxen, porpoises, all contribute to the "travertine" menagerie, as it has been called, imitation travertine marble being the principle building material employed in the exterior construction of the exposition.—Our Animals.

The legislature convenes next Monday, and if you are doing your part to protect your own interests you will have your assemblyman and senator lined up to railroad the district fair bill to success.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

EXPOSITION BENCH SHOW RULES.

Rules that will govern the dog show to be held in November in this city under the auspices of the Panama-Pacific International Exposition and the issuance of which has been eagerly awaited by fanciers have been sent to the printer by J. D. Graham, assistant superintendent of the Department of Live Stock of the Exposition.

The Universal Kennel show to be held on the grounds will be conducted under its own code of rules. Due recognition will be given to the registration and exhibition of dogs of all countries, and with equal privileges. A summary of the rules follows:

The classification will include only established breeds of record, and the competition will be open to the world. Previous records or winnings will not bar from competition.

Entries must be filed with the Chief Clerk of the Department of Live Stock on the prescribed form, on or before Monday, October 25, 1915. The grounds of the Department of Live Stock will be open for the reception of dogs on Saturday, November 27, and their exhibition will begin on Monday, November 29, and close on Wednesday, December 1, 1915.

All dogs shown in the breeding classes must be recorded, or accepted for record in the recognized books or records for their respective breeds.

All entries will be free. A benching fee of $3 for each entry will be charged to cover the expenses of receiving, benching, showing, feeding and returning the dog. Each specimen must be removed from the Exposition grounds by the exhibitor promptly at the expiration of the show period.

No entry will be received or cared for until the benching fee is paid.

Each exhibitor will be permitted to enter and present for award not more than two entries in each section of the ring.

Every dog must be entered in the name of its bona fide owner as the exhibitor and the application for entry must be signed by the owner.

No dog will be received or benched that has not been passed by the official veterinarian, and no dog or puppy will be received without a suitable collar and chain.

The word "dog" as used in the rules includes both sexes over twelve months of age; and the word "puppy" includes both sexes over six and under twelve months of age. Puppies under six months will not be received.

The age of a dog or puppy will be reckoned from the date of birth to November 1, 1915. Unworthy or unhealthy specimens will not be admitted to competition.

All labeling or decoration of cages must be made subject to the approval of the Chief of the Department of Live Stock.

The general rules of the Department of Live Stock, as published in the final classification and prize list, will govern wherever applicable to the group.

Prizes will be awarded as follows: On each dog or bitch, one year or over: 1st prize, $5; 2nd prize, $4; 3rd prize, $3; 4th prize, highly commended; 5th prize, commended.

On each male or female puppy, over six and under twelve months of age: 1st prize, $4; 2nd prize, $3; 3rd prize, $2; 4th prize, highly commended; 5th prize, commended.

The championship prizes, either sex, any age, will be $5 each.

The premier championship award will be a ribbon.

Here is the complete list of the numerous varieties of breeds that will be recognized:

Sporting Division — Airedale Terriers, Basset Hounds (roughand smooth), Beagles, Bedlington Terriers, Bloodhounds, Chesapeake Bay Dogs, Clumber Spaniels, Cocker Spaniels, Dachshunds, Dandie Dinmont Terriers, English Setters, Field Spaniels, Foxhounds (American and English), Fox Terriers (wire and smooth), Gordon Setters, Greyhounds, Griffons, Harriers, Irish Setters, Irish Water Spaniels, Irish Wolfhounds, Labradors, Otter Hounds, Pointers, Retrievers (wavy and curly coated), Russian Wolfhounds (Borzois), Scottish Deerhounds, Scottish Terriers, Skye Terriers, Sussex Spaniels, Water (other than Irish) Spaniels, Welsh Terriers, West Highland White Terriers, Whippets.

Non-Sporting Division—Belgian Sheep Dogs (rough and smooth), Black and Tan Terriers (Manchester), Boston Terriers, Boxers, Bulldogs, Bull Terriers, Chihuahaus, Chinese Crested, Chow Chows, Collies (rough and smooth), Dalmatians, English Toy Spaniels (orange and white, red, black and tan and tricolor), Esquimaux (Husky and Mallimuth), French Bulldogs, German Pinscher, Great Danes, Griffons Bruzellois, Italian Greyhounds, Japanese Spaniels, Maltese Terriers, Mastiffs, Mexican Hairless, Newfoundlands, Old English Sheep Dogs, Russian Sheep Dogs (Owtchers), Papillons, Pekinese Spaniels, Pomeranians, Poodles (corded), Poodles (curly), Pugs, Samoyedes, Schipperkes, St. Bernards (smooth and rough), Toy Poodles, Toy Terriers, White English Terriers (also toy), Yorkshire Terriers.

WESTMINSTER SHOW.

The exclusive set in the dog world stepped to the front Monday afternoon at Madison Square Garden, New York, when the thirty-ninth annual show of the Westminster Kennel Club opened, to continue four days until Thursday night following. Not in three years has the feature been held in the Garden, and it was a regular old home week when the dogs hopped from their crates to take their places once more in the familiar surroundings of long ago, states The Times.

In the matter of entries there was just a little falling off from that of a year ago, which rightly or wrongly is probably attributed to the war, but there were enough dogs to make the Garden seem like a winter resort for all the canines of the world, the total numbering 1,710, with about 3,000 entries in the various classes. Certainly there was the best in dog flesh entered in the various breeds, and the judging showed that there were many newcomers into the ring that would give their champion rivals a sharp tussle for the honors.

Never in the history of the annual show was there such a gathering of dog lovers as swarmed through the aisles of the Garden the first day. From the opening of the doors they began to troop in, and before the afternoon was well along the passageways were in many places congested.

Matford Vic, George W. Quintard's wire-haired fox terrier, whose early tradition was anything but indicative of the supreme honors which she was to attain, at the Westminster Kennel Club Show Thursday afternoon mounted dogdom's highest pedestal in this country, when she toook the coveted honor, that of being the best dog in the show. This little terrier, whose first glimpse of life was from the obscurity of an English barnyard, from which she was taken after the payment of a paltry $10, carried to victory the kennel of her owner against the competition of the most famous champions of all other breeds. Purchased for almost nothing, she could not be bought today for $10,000, it is claimed.

Probably no owner of dogs ever scored a more notable victory than did George Quintard. Not only did he win the highest award with Matford Vic, but the captured the reserve too with his new importation, Wireboy of Paignton, a happening which many assert has never been matched before in the history of the Westminster Show. Wireboy and Vic were not satisfied with their achievement, however, for a little later they won the brace special and with Raby Dazzler and Holmbury Reve the best team special.

Few people know of the early history of Vic and that a ten-dollar bill was the supposed limit of her worth by one owner. It is an interesting story when that all but outcast is crowned as the queen of dogs in this country. Some two years ago a fancier of cocker spaniels living near Birmingham went to purchase some dogs. He was not well versed in the terrier breeds, but took a fancy to this little puppy, which was running around the barnyard of an English farmer, and thought that it would make an interesting playmate for his grandchildren. He asked what the farmer would take for the dog, and was answered that £2 would purchase it. He took it home and was laughed at by each of his two sons, whom he tried to give it to, they telling him that it was not the kind of a dog to appeal to their children.

The grandfather was discouraged, but he decided to hold the dog, and one day took it to a show in which he was exhibiting his cocker spaniels. A terrier fancier happened to catch sight of the terrier, which was then out of the puny stage, and he said: "That is a fine dog that you have there. Why don't you exhibit it here?" The owner was skeptical, remarking that he would not have a chance against the champions that were entered, but at last he was prevailed upon to bench Vic. Absolute consternation seized him when the dog went through the classes a winner and he realized that he had a flyer. He laughed at his sons who had rejected the dog, and refused an offer of $500 for the fox terrier. Eventually a higher bid was made, $1,000, and that bought Matford Vic. George W. Quintard's agent then set out to purchase the terrier, and it is said that the cost to the fancier was about $2,500. On her first appearance in this country Vic captured the honors in the fox terrier classes at the Boston show a year ago and was beaten at the New York show by Vickery Fast Freight. The only other defeat which has been recorded against the dog was at the Toy Dog Show, when a Maltese terrier was placed above Vic as the best dog in the show. The judge, however, admitted that the placing was governed somewhat by his view that a fox terrier was not in reality a toy dog. Matford Vic was judged the best fox terrier.

One of the features of Monday's judging was the awarding of the ribbons in the pointer class. Jay Gould, the court tennis champion of the world, was the judge of the breed, and he turned things topsyturvy by some of his awards. This was not so noticeable in the consideration of the dogs as it was in the judging of the opposite sex. There were a number of entries which carried with them into the ring the stamp of champion from former contests in the judging ring. Gould liked none of them sufficiently to give a blue ribbon to. The award went to John Borup's May Queen B in the winner's class, and it won in each of the classes for American-bred dogs right through to winners. It was in this breed that Clarence H. Mackey, after an absence from the shows for fifteen years, had a number of entries. He was not very successful in gaining first places, but he did obtain places in many of the classes. Two of his best dogs were Palmetto Belle and Prince Cash Bell. George J. Gould had a number of retrievers entered.

One of the oddities of this year's show in the line of sporting dogs was the entry of a number of wire-haired pointing griffons. They are a reddish-gray dog, much larger than the toy griffon, being more nearly comparable to the Airedale in size. In Italy, France, Belgium, and Germany they are popular bird dogs, but heretofore they have not been to any extent in the Westminster event, this being the first year in which the club has had a special class for the breed. The largest exhibitor was G. Dan Morgan.

The wire-haired and smooth fox terrier classes were well filled, though there was the absence of the entries from the Vickery Kennels and the Sabine Kennels of Orange, Texas, which have withdrawn from further competition. George W. Quintard had the largest individual entry, and some of the best of the breed.

Close competition, with several surprises resulting, marked the judging of a number of popular breeds Wednesday. This was particularly true when the fox terriers, both wire-haired and smooth, the Boston terriers, and the Sealyham terriers were in the ring. The rivalry in these breeds, which is always keen, drew more than usual attention to the work of the judges, the ring being surrounded by a large gathering of fanciers, and, generally speaking, the awards met with popular favor, though the prestige of several champions was trod on none too gently.

Some dog from the fox terrier division is always looked upon as being a possible contender for the honor of being judged the best in the show, hence there was particular attention paid to the awards Wednesday. George W. Quintard scored a notable victory in the wire-haired fox terrier classes, taking first and reserve in winners for both dogs and bitches. In the class for dogs Wireboy of Paignton, imported by Quintard recently from London at a cost of $5,000, scored a victory over the notable winner, Champion Raby Dazzler. The two came together in the open class, and after much careful consideration by the judges, Paignton got the blue, Dazzler being second, and the same order prevailed when it came to the winners class. There was an opinion by some that Dazzler showed to the best advantage, and certainly he was in prime condition, the main point on which his kennel mate scored a victory seeming to be in the length of neck. With the bitches Quintard scored victories with Holmbury Reve and Cromwell Cheeky, which were placed in that order in the winner's class. Quintard's most remarkable victory came in the smooth fox terrier division, when a puppy, Ridgeway Envoy, an American-bred dog, went through the first classes a winner, and then in competition in the winner's class scored over D. G. Reid's Rondo.

In a strong benching of Irish terriers John G. Bates was remarkably successful in the high classes, his champion, Blarney Beau Brummel, taking the award in the winner's class for dogs and his Blarney Belinda coming through to victory as the best of the opposite sex.

George W. Qintard's bulldog bitch, Wooden Joan, was successful in limit open and winner's classes and Robert Lobban's well-known Deodora Monarch was judged the best in dogs.

THE NAME IS WRONGLY USED.

The question has been often asked: "Does the bench show Llewellin no longer exist?" In the first place "Llewellin" is a misnomer as applied to English setters. A few years after the dogs purchased from Mr. Llewellin, and their descendants, had done nearly all of the winning by setters at American field trials, there arose a demand for some name by which these dogs might be distinguished from our native setters. "Field-trial Setters" was at first suggested, but this did not seem to fill the demand, so Arnold Burgess suggested the name, "Llewellin Setter." As the dogs had principally come from Llewellin's kennels, the name was adopted. This was soon followed with an edict from some one that only dogs coming from the Llewellin kennels and their descendants should receive this name. Dogs, therefore, that were of exactly the same breeding were tabooed as not straight bred Llewellins, for the very whimsical reason that they did not come from his kennels or were not descended on both sides from dogs that did.

But the greatest inconsistency in the adoption of this name was found in the fact that the dogs so named were bred in various ways. Gladstone, for instance, was half Laverack and by a sire by Duke out of Rhoebe. Count Noble was by Count Wind'em—a three-quarter Laverack—out of Nora, a half Laverack and half Duke—Rhoebe, making him five-eighths Laverack and three-eighths Duke—Rhoebe. Rahe was by Dan (Duke—Rhoebe) out of Ruby and she by Fred (Laverack) out of Rhoebe. He was therefore one-quarter Laverack, one-quarter Duke

blood and half Rhoebe blood. Carlowitz was bred by Llewellin, yet he was a pure Laverack, but under this rule he too must be classed as a Llewellin.

Waddington's Daisy was by Carlowitz out of True. Carlowitz was bred by Llewellin, and True was by Llewellin's Prince out of Dora, making her three-fourths Laverack. Still under the rule she was a Llewellin. Rederick, imported from Llewellin's kennels, was one-fourth Duke—Rhoebe and three-fourths Laverack. Ruby was a Llewellin because he owned her. She was by the Laverack, Fred out of Rhoebe, but Rob Roy a full brother was not, because he was sold to Arnold Burgess by Thos. Slatter, the owner of Rhoebe. Then comes another mixture and still they are straight bred Llewellins such as Dashing Berwyn, Dashing Model, etc. These were sired by Llewellin's Dash II, by Prince (Laverack) Dash II, out of Kate, by Graham's Duke out of Corbett's Slut. Now Llewellin's Dash II had more of the Rhoebe blood that was so prominent in the rest of his dogs. So that when we find that a Llewellin setter, so-called, can be one-fourth Laverack, half Laverack or three-fourths Laverack and the rest Duke—Rhoebe or with the Rhoebe blood left out or the Duke blood left out, it naturally leads to the inquiry: What was this Duke and this Rhoebe blood?

Duke was by Graham's Duke out of Corbett's Slut. The sire and dam of Graham's Duke was Dart and Bess and this is all that is known about him. The sire of Corbett's Slut was Rollo, and nobody knows who was her dam. Rhoebe was by Hackett's Rahe out of Slatter's Psyche. Hackett's Rahe is fully traced for two generations, and partially for several more, but Psyche, according to the English Kennel Club's stud book was a waif, descended in some way from the Gordon Castle and South Esk strains of setters. Later a pedigree, as becomes one of such fame, has been found for her, but there is no certainty of its authenticity. At any rate Duke and Rhoebe were from two different sources, neither of which have any claim to purity of strain, even if of blood.

Mr. Llewellin, unquestionably, deserves great credit for producing, or what is better, for introducing into America, this out-crossed Laverack setter. The Laverack setter was not only an established strain, but it had been kept pure within itself long enough, and bred true enough to type to almost entitle it to be called a breed. It is true the Laveracks had been interbred on false theories until they were generally faulty in chest and shoulders. But in spite of this nature would often assert itself, and reverting back to the old type, produce a Countess, a Nellie, a Phantom and others of the right formation. It was therefore on the pure blood of the Laverack that Llewellin built his foundation. And, whether these Laveracks were crossed onto the Duke—Rhoebe blood or onto Duke alone, or Rhoebe alone, the result was good, because the foundation was pure. All it needed was strengthening by some outside blood on account of its long and constant interbreeding on false theories. It was strongly prepotent on account of this purity. It was this prepotency that made so many of the early crossbreeds from the Llewellin kennels handsome, shapely, and well-built dogs. It is this prepotency asserting itself, after years of the most reckless interbreeding, that gives an occasional well-made, handsome dog even at this late day.

The so-called Llewellin is not entitled to the name even as a strain, for they have not yet reached that point where they have established a type by which they can be identified, beyond generally an apple head, short nose and snipy muzzle. But even this is not constant, for good, clean, shapely heads are often seen, as the individual reverts back to the pure blood of the Laverack. With the present system of interbreeding, with the one idea of developing speed, the bench-show Llewellin will soon be known only in history. And what is worse it will not take much more than another decade to completely eradicate all his bird-sense and make him useless as a field dog, except possibly as a racing machine.

The English setter needs a new Llewellin, not to undo what he did, but to undo what foolish fads have done to the good work he began. The English setter needs a new Llewellin to make another outcross onto some strain devoid of the nervousness which characterizes our dogs of today; something with more brains and more substance, more desire to hunt for birds, and sure enough to handle them when found. Something built on the lines of the true English, with the fine intelligent head and speaking eye, and with a conformation that can stand a day's work.

NEEDS REVISING.

At San Francisco show prize was offered for the best "field dog" and the judge awarded it to a good-looking English setter, of a strain prominent only in bench shows, as the best setter or pointer in the show. Against this decision a protest was filed with the club. On just what grounds the protest was made is not remembered, but supposedly on the plea that there were better field dogs in the show than the winner. That is, dogs that could do better work in the field. On this ground the protest naturally fell down, for no judge in the ring can form any idea of a dog's work in the field. He may easily form an estimate of the dog's ability to cover ground fast and wide and stay at his work for a day's shooting, but the dog might be unbroken and therefore useless in the field.

Just so long as bench show committees will offer such inconsistent prizes, just so long will there be trouble. The best field dog, from a bench show standpoint, is the most typical setter, pointer or spaniel, and even hounds, beagles, and harriers might be included in the list. In the eyes of the sportsman the "best field dog" would be the one that could do the best work on upland game birds; but in order for a bench show committee to have this determined they would have to take the competing dogs to trials and have them tested on game under competent judges. Prizes like the one causing the protest should be more definitely worded, so that they can be decided in the judging ring.

While referring to this matter the attention of show committees is desired to another kind of prize that bench shows are offering that will result in doing harm to the shows—the prize for field trial dogs. First, in making the class or classes, setters and pointers should not be put together. No judge can intelligently judge a dog of one breed against one of another breed; secondly, make the classes for dogs that "have been placed in a field trial," not that have merely been entered or started. The owners of good field trial winners will soon tire of patronizing shows if their dogs are to compete with anything that may "have been entered." At best the expediency of making field trial classes for bench shows is very doubtful. Therefore show committees, if they desire the patronage of the field trial men, should be very careful to place such restrictions on the entries as will meet with the approval of field trial men.

While there are an abundance of setters and pointers in California these breeds are generally found in limited numbers at the shows, and the reason for it is that the bird dog men are quite generally of the opinion that bench shows do the field dog interest far more harm than good. Bad judging, and bad handling of classes and prizes by show committees has had a strong influence in the formation of this opinion. Another fruitful source of the creation of this opinion is getting pet-dog judges, who never saw a dog at work on birds and who have not the faintest idea of the requirements of a field dog—in the way of speed, sudden turning, and instantaneous stopping—to judge these dogs. The result is awards become a farce and dogs that are impossibilities as field dogs are often placed to the front.

If, therefore, bench show committees want to win back the field dog sportsmen as patrons of the shows, they must give them better treatment in the way of judges, and use more discretion in the making of classes and offering of prizes.

THE BEGINNER AND THE RIFLE.

Anyone with reasonably good eyes, a pair of arms strong enough to lift six or seven pounds, and who has a fair control of his muscles, can become a good rifle shot; and the measure of the success gained is in direct ratio to the amount of brain matter and practice devoted to this excellent sport.

The word "he" is used here to designate the shooter, but this by no means is to imply that the shooter should be of the masculine persuasion. On the contrary, it is of more importance for a woman to learn to handle firearms well than it is for a man.

A man has his fists and strength to fall back on in case of assault, while the average woman is helpless. Every day or so we read of some dastardly outrage perpetrated on some unprotected woman, and for every instance we read of half a dozen take place that never get into print. If every woman would learn, as she learns cooking or sewing, the use of firearms and acquire the ability to hit what she shot at, the popular amusement of assaulting and robbing and murdering lonely women would cease to have its present attractions to the thug. Every man who has a wife or sister or daughter, and who is himself proficient in the use of firearms and yet fails to instruct the woman folks dependent upon him how to handle a gun of some sort, should feel that he is lacking to some extent in his duty toward them. Let the girls learn the use of firearms; the knowledge may come in handy some day and they will be better off, anyway, for the outdoor practice.

The first step in learning the proper use of a rifle is like the celebrated recipe on cooking the hare—first get your rifle. Don't get any old rifle that some friend may have or that some one recommends to you; get a rifle that will answer your purpose and yet be safe to shoot near a city if you happen to be a city dweller, and that will be economical to shoot.

If you are a beginner—and this article is only addressed to this class of shooters—you have no business with a big calibre or a high power rifle. They are dangerous weapons to shoot near a settlement, even in the hands of an expert; and a raw hand's peppering the surrounding country with bullets traveling at some 2,000 feet per second is very liable to bring him before a coroner's jury, or at least to face the angry owner of damaged live stock, and he will have to pay damages enough to disgust him with all future shooting.

The best all-round rifle is a .22 calibre repeater that will handle the long rifle cartridge, or a good weight single shot adapted for this cartridge. It does not pay you to buy a toy that cannot be held steadily and each gun doesn't last long. Get a rifle weighing at lease five pounds of any of the standard American makes, Winchester or Remington preferred; they are are all good nodadays. See that the pull is not over four or five and a half pounds, and you are ready to begin practice. You can test the pull by getting a weight that you know is not over five pounds and hanging it by a string to the trigger, the hammer being previously cocked. If the gun is pulled off, the pull is correct, but if the trigger cannot be pulled with a five-pound weight you had better take it to a gunsmith and have the pull lightened.

It is better to practice with the gun unloaded for a few times; the beginner is always a little gun-shy even with a light rifle and .22 cartridges; that is, the noise disturbs him so that he does not give due attention to pulling the trigger as he should.

The whole secret in shooting a rifle is not the "vice-like grip" we read about, where the shooter holds his rifle immovably fixed on the target until he gets ready to shoot and then pulls the trigger; this is a physical impossibility. Learn to shoot a rifle as you would a shotgun; with the arm out, with control of your rifle, so that you can shoot in a strong wind or at an object running rapidly. The main requisite to being a good rifle shot is complete control of your muscles—not to hold the gun "motionless" on the target, for this is practically impossible—but to squeeze your firing hand at the first instant your sights are lined up on the object to be hit and not at the second or third or fifteenth time your front sight crosses the object to be punctured.

You will find that it is a very hard thing to hold your sights in line on an inch bullseye at thirty feet or so for even an instant, and if you can do so you will find it a still harder matter to squeeze your hand while the sights are on the bullseye. Your brain says "Shoot!" but the telegraphic service to your finger on the trigger never seems slower or more like real telegraph service than when you attempt to send the "Fire" signal to your firing hand.

With the gun unloaded take aim at a small target or black disk on the wall, holding the rifle with left arm well extended but not tensed up rigidly, and with the right hand firmly gripping the stock and trigger. Stand as easily as possible, don't screw yourself up in a knot; you must be as comfortable as possible to do good shooting. Most people will find the gun fits better to raise the right shoulder, or elbow—which will raise the shoulder—thus making a better support for the butt of the rifle and decreasing the liability of the weapon's slipping.

Now, with the sights pointed in the direction of the target and the hammer cocked, but without taking much care as to the gun being carefully aimed, try slowly squeezing your right hand until the gun snaps. The motion should be as though you were trying to squeeze the trigger up into the stock and the whole hand should be slowly contracted. Don't pull or jerk the trigger for that is just what you should not do. "Pulling" the trigger will invariably pull the gun also, and your shot will not strike where your sights were pointed before you fired.

Practice, a dozen times, squeezing the trigger with the whole hand while gripping the gun with the same force as the trigger, until you can tell what force is necessary to discharge the gun. You will find that by this method you can fire a gun with an eight or nine-pound pull very easily, whereas by clasping the stock loosely with the right hand and attempting to fire by simply pulling on the trigger, it will seem to you as though the gun would never go off and you will begin to shake and wobble it long before the shot is fired, or else you will jerk the trigger and thereby pull the sights off the object to be hit. After you think you have mastered this trigger squeezing until you can fire the gun without jerking the sights out of line, try the aiming drill.

Start the muzzle about six inches below the bullseye, if practicing at a thirty-foot range; take a medium sight, neither coarse nor fine, and preserving this same relative position of the sight in the notch, raise the gun slowly until the front sight just touches the lower edge of the bullseye, then stop the gun for an instant and squeeze the trigger, watching carefully to see which way, if any, the muzzle is twitched when the trigger is pulled. You should not try for a second sight. If the sight did not come steadily and slowly, and you did not feel that the bullet would strike the bullseye if you pulled the trigger, don't shoot.

It is better to take the gun down and try again. It is simply a matter of practice, getting the hand to respond the instant your front sight gets into position, and it will not do to try a second time if you do not get the sight into the right position the first time you raise the gun. Always take the rifle down and start over again; don't hold the gun up on the bullseye and wobble around, trying to get the sights on the right spot, for that's just what makes poor shots. Train yourelf to squeez the trigger at the right time, just as the batsman swings his bat at the ball just at the right time to meet it and drive it out for a long hit. He doesn't get a second chance, the ball has passed and he must train himself to strike at the proper moment or not strike at all. A good many beginners—and for that matter, shots of long experience—think that because the target is inanimate that they can wiggle the gun around the target all day until they get what they think is the cirrect sight, and then pull the trigger. This is wrong; because in the first place the longer the gun is held out the more unsteady the rifleman becomes. You can prove this by holding a book out at arm's length and watching the arm begin to tire and become unsteady and finally become nerveless. In the second place, the practice with the rifle, while very enjoyable, should be regarded as a means to an end, and whether you are shooting at game or at an enemy in battle you want to shoot quickly and accurately, and the only way to accomplish this is by raising the gun slowly and steadily and firing when the sight reaches the object, not before that time nor afterward.

Hold your breath when you start your gun up; that is, take a moderately long breath, enough to fill your lungs comfortably and don't breathe when about to fire. If this is oppressive it shows that you are taking too much time in your sighting.

Don't be in a hurry to use cartridges; learn to handle the gun properly before loading it at all; practice this firing and sighting drill until you can fire the gun every time you start it up and are reasonably sure that your sights are in the right spot when the trigger is squeezed. If you cannot do this you have no business loading the gun, the noise of the discharge will only distract your attention and will add nothing to your proficiency. If you were in the army at present you would be required to practice this aiming and firing drill for weeks before you even saw a ball cartridge, and all that this drill is for is merely to hit the object shot at, nothing more. Have confidence in yourself, raise the gun confidently and don't get the rattles or jerks at any stage of your rifle shooting. Concentrate your mind intently on the one thing of squeezing the trigger at the right time, and don't let any outside influences disturb you or take your mind off the operation. Concentration is necessary in all things, and is never more so than in shooting a rifle, until the pulling of the trigger at the right time becomes second nature to you as it will if you start right and practice faithfully.

(To be concluded next week.)

Trap and Target

Registered Tournaments.—Secretary E. Reed Shaner announces the pleasing information that 205 tournaments have been registered. This list is made up as follows:

145 Regular tournaments, to which The Interstate Association will make contributions.

24 State tournaments, to which the Association will make contributions.

26 League tournaments, to which the Association will make contributions through the several Leagues.

5 Special tournaments, to which the Association will make special contributions.

Nine more applications carrying requests for contributions have been approved, conditional on the applicant clubs naming non-conflicting dates; 113 clubs have been given the privilege of registering their tournaments under our "Old Policy"; 68 applications have been returned unapproved, for various reasons, and 30 State tournaments have yet to be heard from.

* * *

"Pull!"—The local trap shooting season this year will be conducted under the auspices of four gun clubs—California Wing Shooting Club, Golden Gate Gun Club, Exposition City Gun Club and the Bay View Gun Club. The regular club shoots will take place the first, third and fourth Sundays of each month, the season closing in September.

The California Wing Shooting Club will probobly open at Sobrante grounds Sunday, March 7. The Bay View Gun Club will start on the same date, on the club grounds at the South end of High street, Alameda. The Golden Gate trigger pullers will start Sunday, March 21. The club shooting grounds are located at West Alameda station. The Exposition City Gun Club's opening shoot will take place at the Easton trap ground, in San Mateo county, Sunday, March 28. Sunday, March 14, the club has arranged to hold a Fred Gilbert 20th anniversary shoot. Gilbert shoots will also come off at the Golden Gate blue rock shoot, March 21, and at the San Jose Blue Rock Club's shoot March 14.

* * *

California-Nevada Tournament.—The third interstate shoot of the California-Nevada Trap Shooting Association, it is intimated, will take place in this city, probably during the month of August.

* * *

All In Line.—The Fred Gilbert 20th anniversary shoots will be held this year, it is intimated, by over 500 gun clubs throughout the United States and Canada. The matches are distance handicaps at 100 single targets and for valuable cup trophies.

* * *

American Championship Shoot.—The tenth annual blue rock tournament for the championship of America, will take place under the auspices of the New York Athletic Club, at Travers Island, April 30th to May 1. Two hundred targets per man will be shot at each day. Crack shooters from the Coast, Middle West, East and Canada will compete.

* * *

..New York Sportsmen's Show Notes.—The police department ordered all night shooting on the roof of the Grand Central Palace in connection with the Sportsmen's Show discontinued because of the objections of the neighboring residents. All the trap shooting was then finished in the daytime and special trophies were offered in the several events. The conditions the 25th inst., on account of the rain and wind were very much against good scores, but nevertheless there were many meritorious performances.

* * *

L. N. Herrick of the Westchester Club was the high amateur, with a score of 41 out of a possible 50. Neaf Apgar of New Jersey, high professional, 39 out of 50. W. H. Yule of the N. Y. A. C. was leading for the long run trophy, with a score of forty straight.

Women entrants in the trap-shooting competition on the roof were constantly increasing in number, the latest arrival in the event being Mrs. L. D. Vogel of Detroit, the amateur woman champion, and she signalized her entry by taking the lead from Miss L. M. Boles of Greenwich, Conn., who had heretofore proved her skill over the best of the other contenders. The score that Miss Boles had made was a 40 out of a possible 50, and Mrs. Vogel went one better by breaking 41. Her performance was in a sense remarkable, for the conditions on the Palace roof were far from propitious for high scores. There was a strong wind, and the cloudiness was a particular disadvantage.

In spite of the unfavorable weather in mid-week, however, there were more men in competition than on any previous day, and several of the leaders had to give way to other seekers after honors. W. H. Yule, the New York Athletic Club crack shot, was first in the amateur class, his score, a 45 out of a possible 50, placing him ahead of L. N. Herrick of the Westchester Gun Club, who held the highest previous score of 41 out of 50. Yule also led for the Long Run Trophy with forty straight, and he took one day's High Gun Trophy. The professional lead was also changed when H. H. Stevens of New Jersey struck down 46 of the clay birds out of a possible 50. The best previous score had been made by Neaf Apgar, also of New Jersey, when he broke 39 out of 50.

* * *

That the school boys of New York gained practical shooting experience is certain from the announcement that they have used 50,000 rounds in the rifle competition which was a feature of the show. That the officers of the United States Army took a keen interest in the schoolboy rifle shooting was evidenced by the presence of two officers from Governors Island—Capt. Laurence Angel and Capt. L. A. Dewey—both of whim were detailed by Gen. Leonard Wood to assist in running the competition. Morris High School won the Winchester Trophy with a total of 1,146 out of a possible 1,200.

R. Reppert of Morris High School made an unusual score in the schoolboys' rifle shoot when, in one of the 200 target events, he hit the bulls-eye 199 times. In some of the other events for the boy sharpshooters some excellent scores were made, S. Vernet of Manual Training and G. Bergman of Pratt Institute each having a perfect score of 100 in an event for 100 targets.

Gossip For Sportsmen

Fish and Game Report.—The report of the State Fish and Game Commission for the biennial term, July 1, 1912 to June 30, 1914, shows, among other matters, that California ranks in the number of hunting and fishing licenses second or third in the United States. Illinois leads with 185,000 annual hunting licenses; New York may be a hundred or so ahead of this State, but the New York reports do not show conclusively. The total number of hunting licenses sold in this State for 1913-1914 amounted to the sum of $164,111, $1873 less than for 1912-13. The total sum received for hunting licenses from July 1, 1911, to June 30, 1914, was $329,720.

The report states that California is protecting its fish and game resources more vigorously than any other State, with the exception of New York, which employs fifty more game wardens, has over treble the population and less than one-third the area.

In many sections of the State deer are more numerous than a few years ago. In other districts there has been an appreciable decline each year. The records compiled show the number of bucks killed in 1913 to be 8269, for 1912 7537 bucks, for 1911 6489 deer. This list is based upon reports of deputies. It is probable that the actual number of bucks killed would double the figures here given.

Quail in the greater parts of the Coast district are barely holding their own. The season for taking the valley quail, and also the bag limit, is greater than the supply of birds will warrant, it is claimed. In the territory embraced in the Fresno division, as a whole, the supply of valley quail, it is stated, has also materially decreased during the past two years—dry seasons.

The season of 1912-1913 for wild ducks, in the bay counties district, was far better than during 1913-1914. It is estimated only one-half the number of birds were killed during the latter season. Canvasback ducks, however, were the exception; this variety was not so abundant for many years past.

The total number of arrests for fish or game law violations for the past twelve years numbers 8343. Fines collected during the past four years, upon convictions, amounted to $9271. Imprisonment of 1189 days was the misfortune of numerous offenders during that period who did not, or could not, pay fines imposed.

One hundred and ten deputy fish and game commissioners, hatchery culturists, etc., are on the pay roll of the Commission.

* * *

Needs Changing.—The framers of the present fish and game laws failed to take into consideration the man who pays a license in many ways, and with particular injustice to the people of Contra Costa county. The finest fish in the waters of the Straits of Carquinez is the striped bass and the most enticing bait is a portion of crab, yet the law says: "No female crab and none less than seven inches across back" can be legally taken—which means that the man who wants to angle for bass in those waters is barred from using the most acceptable bait.

The framers of the law failed to take into consideration the fact that there are several different species of the crab family—the only one growing in the straits waters being known as a "mud crab," no one of which ever attained "seven inches across the back"—even if it lived until the shell was covered with barnacles. The preservation of the fish and game supply is a commendable thing, but the man who enjoys sitting on a wharf and angling should be given an opportunity to get the bait he needs. The mud crab should be eliminated from the list, as it is of no use as food and the only known purpose of its existence is for "striped bass food." Give the man with a hook and line a chance for his money.

* * *

Striped Bass Catches.—Fair weather prevailing this afternoon will induce a number of local striped bass anglers to leave town, bound for a day's fishing tomorrow in Napa creek, near the railroad drawbridge. That delegation will be increased by other rod and reel enthusiasts, who will make the trip tomorrow morning.

The reason for all this activity in the ranks of the rodsters is that a number of large-sized fish have been caught at that fishing resort recently. Saturday and Sunday, two weeks ago, despite the cold wind, rain and hail, a score of bass chasers could not be deterred from indulgence in the fascinating sport. Louis Gotthelf of this city was high hook, with a catch of one bass that scaled 43½ pounds and another that weighed 15 pounds. George Gregory's two fish weighed 16½ and 9¼ pounds. Frank Messager landed an 11-pounder. Ed and Harold Ladd, Harvey Harmon, Charles Stapler, Bill Schneider, "Chicken Sam" and other well known striped bass experts nearly all drew blanks. Charles Urfer fished at Appleby bay, several miles below the drawbridge, and caught four bass a 15-pounder being the largest. The favorite bait used by those who have been lucky in the waters here referred to has been "bullheads"—the ordinary bay catfish. The water in the creek for several weeks past has been muddy, and will probably be so tomorrow.

The veteran striped bass fisherman, Al Wilson, one week caught 200 pounds of striped bass in the creek. Other rodsters were also fairly lucky. Among the observing salt water fishermen the opinion is general that large bass will be running for sixty days or more, not only in Napa creek, but also at other favorite bass fishing waters about the bay shores.

Gotthelf's tally for eight trips to Napa drawbridge since January 1 shows a total catch of sixteen striped bass, weighing 336 pounds, as follows: Fish scaling 21, 37, 24, 8, 10, 11, 27, 8, 13, 15, 52, 10, 13, 29½, 15 and 43 pounds. The largest fish taken so far in that part of Napa creek, a 54-pounder, was caught by "Pop" West, a Napa sportsman, several seasons ago. Charles Bond of Alameda has the credit of catching the largest striped bass, with rod and line, up to date—a fish weighing 55¼ pounds, caught in San Antone slough. Several bass weighing over 60 pounds have been caught by net fishermen off San Pablo, on the east bay shore. The largest bass yet seen in the local markets was a monster of 80 pounds, 72 inches long and 18 inches through at the pectoral fins. This fish was taken near Benicia several years ago by a handline wharf fisherman.

About a score of fishermen tried the San Antone waters Sunday with but poor success. Across the bay, along the San Pablo shores, there will not be much doing with striped bass until pleasant and sunshiny weather will induce the fish to come in on the shallow shore waters.

* * *

Among lucky fishermen there is the commendable desire to have a picture of the big fish captured. Most photos taken show the fish dangling with distended jaws and expanded gills, rather unartistic that. A better way is to suspend the rod and reel prize—whether it be a large trout, striped bass, in fact, almost any big fish—by the tail. The effect is more natural and gives a better idea of the subject.

Trade Tips

J. Lino, of Chicago, made a most remarkable score at the Valentine Day meet of the Chicago Gun Club. With the wind blowing a gale, he hung up the right smart score of 145x150, a most worthy effort under the circumstances. He shot a Remington Pump gun and Nitro Club shells. Max Kneussel, of Ottawa, Ill., took second honors shooting the same brand of shells.

The cold does not seem to detract from the enthusiasm of Toronto, Canada, shooters, for on February 20, 50 men lined up at the traps of the Stanley Gun Club. Geo. Beattie, of Hamilton, and S. G. Vance, of Fillsonburg, both shooting Nitro Club shells, took first and second places, scoring 72x75 and 71x75 respectively.

Drink Jackson's Napa Soda.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects

READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

ALARICH 2:11¼ (Breeder's mark 2:09), trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. **Price, $650.00.**

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, **CARLOKIN 2:07½.** First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. **The best buy in California at $1600.**

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by **ZOLOCK 2:05¼,** dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. **Price $1000.00.**

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. She has been up from pasture about eight weeks and trialed this week in 2:49 very easily, last eighth in :19¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. **PRICE $900.00**

O M A R, gelding,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by **DEL CORONADO 2:09½,** dam Pineapple by Albion (son of General Benton). **A present at $350.00.**

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year, a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. **Price $800.00.**

HERMES, brown colt,

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. **Price $1500.00.**

JOHNNY DUGAN,

3-yr.-old breeder's record 2:16, pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. **A great buy at $350.00.**

OLD FOLKS,

bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is ready to begin fast work, having been jogged all winter. **Price $1000.00.**

CARINA,

bay filly, trotter, two years old, by CARLOKIN, dam ATHERINE (dam of Copa de Oro 1:59, Rags 2:09¼ and Nicola B. (2) 2:23¾, tr. 2:17, winner of the Oregon Futurity and second in the P. C. T. H. B. A. stakes for two-year-old trotters). Carina is entered and paid up in the same stakes as Carleta. She is a grand looking, well developed filly, showed a :40 gait at eleven months old. Is good gaited and good headed, is in training and promises to make a high class trotter. Trialed this week in 2:46, last half in 1:21. **Price $600.00.**

AND ONE FOR THE $20,000 P.-P. I. E. TROTS—RAGS 2:09¼,

winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old—in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. **Price $2000.**

In addition to the ones above mentioned I will offer to intending buyers NICOLA B. (2) 2:23¼, JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), a YEARLING BROTHER TO ESPERANZA 2:09, engaged in all of the Stakes, the phenomenal two-year-old pacer SANDY McNABB (staked), MISS QUEALY (full sister to Manrico), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

NEW EDITION OF JOHN SPLAN'S BOOK **"Life With the Trotter"**

PRICE, $3.00 POSTPAID

"Life With the Trotter" gives us a clear insight into the ways and means to be adopted to increase pace, and preserve it when obtained. This work is replete with interest, and should be read by all sections of society, as it inculcates the doctrines of kindness to the horse from start to finish."

Address, BREEDER and SPORTSMAN, P. O. Drawer 447, San Francisco, Cal. Pacific Bldg., Cor. Market and Fourth Sts.

THE FARM

OFF HORSES AND THE SWORD.

You have noted that unless the larger horse of a team were driven on the off side you are annoyed or even distressed? That is, of course, because your heart is on your left side. You may say that it is because you are used to that particular arrangement of horses; but did you ever ask yourself why the larger horse is harnessed upon the right side? Let us follow it up; it is really very interesting.

It is because, not so very long since, we had a postillion to drive for us, who rode one of the horses. It was his habit to hitch the smaller horses on the left-hand side, because it is easier to get on a small horse than on a larger one—and because it was the habit to mount a horse from the left side.

The habit of getting on a horse from the left side was formed because men had the habit of wearing the sword upon the left side; therefore to get upon a horse from the right side while wearing a sword was not practical; one's sword would get tangled between one's legs. The habit of wearing the sword on the left side rather than on the right was formed because most men were habitually right-handed; and so could draw easier and quicker from a scabbard on the left. The habit of being right-handed was formed so that the heart might not be easily reached by the opposing sword.—Eugene M. Rhodes, in Harper's Weekly.

WHOLESALE AND RETAIL

Peter The Great

is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

His Son

Peter McKlyo 3, 2:12 1-2

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

Bay horse with black points. Height 16 hands, weight 1100 lbs. Cal. Cert No. 24.

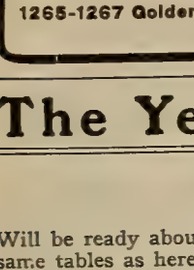
First dam MARY GORDON 2:09¾ by Gordon 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and granddam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc. Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

BERT WEBSTER, Manager, Pleasanton, Cal.

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Three-year-old record 2:24½; trial (3) 2:15, 1:05.



Sire of

Bon Courage (2) 2:12¾ Bon Bell (3) 2:17¾

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the Rush & Haile Ranch, Suisun, Cal., season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

WORMS

"Wormy," that's what's the matter of 'em. Stomach and intestinal worms. Nearly as bad as distemper. Cost you too much to feed 'em. Look bad—are bad. Don't physic 'em to death. Spohn's Compound will remove the worms, improve the appetite, and tone 'em up all round, and don't "physic." Acts on glands and blood. Full directions with each bottle, and sold by all druggists.

SPOHN MEDICAL CO.,
Chemists, Goshen, Ind., U. S. A.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

CAL. CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of

Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.

And the dams of

John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. His qualities as a sire are fully proven and breeders sending mares to his court have every assurance that the resultant foals will possess soundness, high individual excellence, and early and extreme speed. None better bred—none more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

CAL. CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlen 1:58; 14 in 2:10

First dam Episode 2:18 half sister to Peter the Great 2:07¼

Second dam Santos, dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08 etc

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. His inheritance is of the kind that is breeding on most spectacularly and that he will found for himself a remarkable trotting dynasty seems inevitable. Bred right, built right, gaited right, and his few foals show that he breeds right. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address HARRY DOWLING, Supt., Woodland, Cal.

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ De Ora (3) 2:17
2-yr.-old record 2:13½. 2-yr.-old record 2:27¼.
Trial (3) .....2:09 Gold Lily p. (2)....2:24½
Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 Nicola B. (2).....2:23½
John Warwick (2) 2:17 Santiago (3).....2:24¾
The Lark (3).....2:18½ May Marian p (3)..2:24¾
Carl (2) .....2:19¾ Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 El Carbine (2).....2:27½
Carsto (2) .....2:22½ Eileen C. (3) 2:29
Carlschen (2) .....2:23 Carlos (2) 2:29¼
Fulton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

Pleasanton, California

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10. Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10. Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Vernon McKinney 2:01½

A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes. Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance — 16 hands, 1200 pounds — bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10. Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation — an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910

Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25, half-mile track, ½ mile—1:08¾
SELMA PALEY, trotted ½ mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU " ¼ mile :35½
GERTRUDE RIVES " ¼ mile :36¾
BILLIE BOYD " ¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23.

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

Race Track or Delivery Wagon Which?

Your horse's usefulness as a racer is continually hanging in the balance. Any day may bring him any of the hundreds of limb diseases that soon render him useless as a purse winner. It lies within your power to say whether such diseases shall ruin your horse or not—whether he shall be retained for the race track or relegated to the delivery wagon. It depends upon your willingness to purchase a bottle of

The Only Spavin Remedy in the **Mack's SPAVIN $1000 REMEDY** *World Sold Under a $1000 Bond*

and to follow our simple instructions. They require no skill or experience and you can use the horse while you are curing him. Mack's $1000 Spavin Remedy is absolutely guaranteed to cure Spavin, Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Ruptured Tendons, Sweeny, etc., regardless of how long the horse has been lame nor from what cause. We have a special deposit of $1000 with the First National Bank of Binghamton, N. Y., which we must forfeit if we do not do exactly as we say. Send for a copy of this bond. Read it.

Your Druggist Will Secure Mack's $1000 Spavin Remedy For You

if you ask him. Price $5.00 a bottle. If he refuses, remit $5.00 to us and we will see that your order is filled without delay.

Send For "Horse Sense" No. 3—FREE

Describes and illustrates diseases of horse's limbs, shows correct name for every part of the horse and tells valuable facts every horse owner ought to know.

McKallor Drug Co.,
Binghamton, N.Y.

FREE Veterinary Advice

We have associated with us a Graduate Veterinarian to answer all questions regarding lameness in horses, free of charge. Mark a cross on picture of horse showing where lameness is located and cut out and mail same to us. You will receive instructions how to cure the trouble. If your druggist can't supply Mack's Thousand Dollar Spavin Remedy remit price direct to us and we will send at once, prepaid. $5.00 per bottle—and worth it. Accept no substitute.

Mark a cross showing where your horse is lame & mail it to us

VICTORIES OF PARAMOUNT PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

Lively Race On In Trapshooter's League

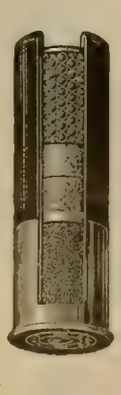
Philadelphia Trapshooter's League contestants are getting a lot of enjoyment out of the present League series. Competition is close and exciting.

Here are Reasons why the Camden, N. J., Club keeps well toward the Top

of **47** Club Shooters Last Week, **44** shot either *Remington-UMC* Gun, Shells or both;

of **86** Shooters on Camden grounds, **72** shot the Steel Lined Speed Shells—mostly Nitro Clubs;

of 10 High Men, 9 Shot *Remington-UMC*



NOTES FOR YOUR ATTENTION

NOTE 1.—Our booklet entitled "Inside Shot Shell Facts Laid Bare"—yours for the asking—will let you know why these Camden shooters and thousands of others prefer *Remington-UMC*. A postal will do.

NOTE 2.—League shooting is doing much for the trapshooting sport everywhere. It grows in popularity wherever properly instituted. Write us for trapshooting literature and general shooting information.

Entries for all above races for the FALL MEETING close on April 1st, 1915, except Nos. 2, 3, 8, 14, 18, 21, 24, 26, 33, 36, 38 and 39.

CONDITIONS FOR ALL RACES CLOSING APRIL 1st, 1915.

All races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of two per cent. additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entries to close Monday, April 1st, 1915.

Nominators who make entries and ship horses from east of the Rocky Mountains will be given $50 towards the return to points east of the Rocky Mountains on such horses as start in any of the races and fail to win any money.

Entrance fee, three per cent, due at time entries close, two per cent. additional if not declared out on or before June 1, 1915, for the Summer Meeting and on or before August 1, 1915, for the Fall Meeting. Declarations must be paid in full at time of declaring out or declaration will not be accepted. Usual five per cent. additional from winners in all races except Futurity Stakes, Occident and Stanford Stakes.

Professional drivers will not be permitted to drive in Amateur and Driving Club Races.

The Management reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Management reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Management reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed by the Panama-Pacific International Exposition for the amount offered and are for the amount offered only.

Records made against time, i.e., breeders' records, and records made in a losing race, shall not be a bar to class eligibility.

Any horse that started in 1914 without improving its record, equaling its record and not winning a race, shall be entitled to one second.

The owner hereby releases the Panama-Pacific International Exposition from all liability of every kind and character on account of loss, damage or injury to horses or other property said owner may have on said Exposition grounds; and further agrees to abide by all the rules of the said Exposition, especially as to the use of track for working out as well as for racing, use of stalls, paddock, wearing of colors, uniforms, numbers and general conduct of all employees.

CONDITIONS FOR $20,000 STAKES—FINAL CLOSING DATE JUNE 1st, 1915.

SUMMER MEETING

No. 17—2:10 CLASS TROTTING.....$20,000
No. 33—2:06 CLASS PACING $20,000

FALL MEETING

No. 2—2:10 CLASS TROTTING $20,000
No. 39—2:06 CLASS PACING $20,000

ENTRIES MADE JUNE 1, 1915, $1000 TO START.

Horses to be named with entry. Entrance fee to accompany nomination. Horses must be eligible on Jan. 1, 1915, to stakes in which they are entered. Stakes divided $5000 to the first heat, $5000 to the second heat, $5000 to the third heat and $5000 according to rank in summary. Moneys divided 50, 25, 15 and 10 per cent. $20,000 Stakes mile heats, 3 in 5. No race longer than five heats, and moneys in races not decided before the fifth heat will be divided according to rank in the summary at the termination of the fifth heat.

A horse with a record shall be allowed one second for each year, if raced, in which it fails to equal or reduce its record or win a race, if same is claimed by the nominator when making the entry.

Time allowances according to National Trotting Association rules.

(STAKES GUARANTEED BY THE PANAMA-PACIFIC EXPOSITION)

Members of National Trotting Association and American Trotting Association. National Trotting Association rules to govern. For entry blanks and further particulars, address

F. W. KELLEY, Secretary Race Meetings,
Live Stock Department, Exposition Grounds, San Francisco, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells.—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

EXPRESSIVE MAC 2:25 1-2

A. T. R. No. 41513 Licensed Pure Bred, Cert. No. 1041.

Clara Mac 2:04½ Sire of **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of McKINNEY 2:11¼ and the great brood mare EXPRESSIVE 2:12½ by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at $25 the season, usual return privilege, or $35 to insure. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

Kalamazoo fell in line by making its ten-thousand-dollar trot for horses eligible to the 2:07 class.

◈ ◈ ◈

Adolph Ottinger and party motored to Pleasanton and return Sunday to give the Schwartz stable a bit of inspection.

◈ ◈ ◈

O-u-c-h! O. U. C. turned loose a mile Saturday morning at Pleasanton in 2:13½, 1:03¼, :30½! Chalk up the price another thousand bucks above our January quotation.

◈ ◈ ◈

Ed Parker at Pleasanton has recently added to his stable the two-year old trotting gelding Jack McDonald by Bon McKinney (3) 2:24¼ out of Jane McCrea by Nutwood Wilkes. The lad is staked in the Coast futurities and is owned by George Barber of Milpitas.

◈ ◈ ◈

For all particulars as to how to miss a train apply to C. A. Durfee. Do it over the phone or by mail, merely as a precautionary measure. You might learn just as much or more by a personal interview with the gentleman but there is a certain comfort in being safely out of range on certain occasions that makes life much more pleasant.

◈ ◈ ◈

J. L. Chandler of this city has turned over to Horace Feindel at Pleasanton for educational purposes the yearling colt purchased by him last fall from the Kirkpatrick estate's consignment to the DeRyder sale—Vernon Pointer by Vernon McKinney 2:01½, dam Poinsetta K. 2:25 by Star Pointer 1:59¼, second dam Flewy Flewy (dam of Charley D. 2:06¼, etc.) by Memo. The youngster is a dandy and unless the dope is all wrong he ought to make a genuine pacer.

◈ ◈ ◈

Homer Rutherford has bred Yu Tu by R. Ambush to Mahomet Watts 2:08¼. Yu Tu is the dam of his three-year-old trotter George N. Patterson that was a money winner last year in the Breeders futurity and looks now like he would furnish some hot competition in his engagements this season. Homer is just breaking a nice yearling by The Bondsman out of this mare, owned by Mrs. W. J. Porter of San Jose, and the lad is a nice big fellow and trots manfully. Lawrence Shuler has tried to maverick him at various times and if he turns up missing after the P.-P. I. E. meeting Homer will know where to look for him—in the Shuler car, eastward bound.

◈ ◈ ◈

Deciding that he would remain in the far west this season, Charley Spencer consigned to the Chicago sale the two mares left in the east when he returned from his last campaign in that section—Bonnie Princess 2:25½, trial 2:07½, by Prince Ansel (2) 2:20½, out of Woodland Bonnie Derby by Charles Derby 2:20, and Laura Rogers 2:11¼, trial 2:06¼, by Prince Ansel, out of Lauress by Mendocino. The former was bought by John Bauhart of Chicago for $260 and the pacing mare went to Geo. W. Raub of LaRue, Ohio, at $230. The pair hardly brought their value but sold well up with the general offerings, as of the 191 animals catalogued, less than one-fourth brought $200 or over, and only 17 sold in excess of the figure brought by Bonnie Ansel.

S. Christenson has booked to Onward McGregor (3) 2:23¼ the brood mare Perza (dam of June Pointer 2:10¼, Enchantress 2:29¾, etc.) by Allie Wilkes 2:15, dam Anglia (dam of four) by George Wilkes, etc.

◈ ◈ ◈

President George Gianinni of the San Francisco Driving Club now has Graham Bellini (3) 2:11¼, Ella M. R. 2:16¾ and Bradmont 2:17½ in training at Pleasanton, getting ready for the fun season that is due to begin in May.

◈ ◈ ◈

The Durfee filly Carleta by Carlokin continues to improve very fast and the price continues to climb, one thousand being the present quotation. If California buyers don't annex some of this stuff we will be inclined to consider folks kidders, pure and simple, when they drop in and say they are "on the buy."

◈ ◈ ◈

The Oakland owned horses Rapallo, Asa Pointer and a three-year-old gelding by Copa de Oro are now members of Will DeRyder's stable at Pleasanton, and if his string keeps on increasing Will will soon be a busier man than his kid brother, more or less known to fame under the name Charles L.

◈ ◈ ◈

A big combination sale will be held about the middle of April at Woodland Stock Farm at which buyers will have an opportunity for making purchases of the right kind of animals for various purposes at their own prices. Full particulars will be forthcoming in early numbers of the Breeder and Sportsman, and it will pay you to watch for the same.

◈ ◈ ◈

The Oakland butchers plan to hold a big Fourth of July picnic at Pleasanton Driving Park, with motorcycle races for the Sunday attraction and a nice card of harness horse events for the feature of the second day, with good money hung up. Final arrangements will be perfected and the program announced at an early date.

◈ ◈ ◈

Mr. Thomas Smith of Vallejo was a visitor in San Francisco last week, and is pleased with the spring showing of his good trotter Vallejo King 2:10½, in the stable of Sutherland & Chadbourn at Pleasanton. The King was a 2:10 trotter last year and a better one this year, apparently. Mr. Smith has bred several real high class trotters and still owns the sire of his present candidate, General John B. Frisbie, full brother to Vallejo Girl 2:10¼, Tom Smith 2:13¼, etc.

◈ ◈ ◈

J. H. Nelson of Selma writes that through his ad in the Breeder and Sportsman he located a number of high class Belgian stallions, and on last Saturday purchased of L. J. Wysner of Lindsay the imported stallion Cyrus de Fonteny 2609, winner of second prize in a class of 250 animals at Soygny in 1907, his sire and half sister both sweepstakes winners in previous seasons. Mr. Nelson reports that Expressive Mac 2:25½, and all his draft stallions and jacks are being well patronized, and that 1915 looks to him like a good year for breeders.

◈ ◈ ◈

Arawanna B. (dam of Sweet Princess 2:16½, Baby Gommet trial 2:12, etc.) is suckling a nice filly foal by Joe Patchen II 2:03¼ and has been bred to Mahomet Watts 2:08¼. She gives promise of becoming a famous matron and this cross ought to be a productive one, as she is by Sidney Dillon and out of Lily Stanley 2:17½ (dam of three) by Whippleton. Judging from the class of mares that are being mated to Mahomet Watts, the son of General Watts 2:06¾ and Alla P. 2:21½ should be long remembered in turf history in California.

◈ ◈ ◈

Leo Lynch of San Ramon moved into training quarters at Pleasanton the first of the month with the three-year-old filly Gleaming by Wonderlight, dam Lena Thorp by Prince Charles and the two-year-old colt Dr. Dyer by Vernon McKinney 2:01½, dam Rubric by Elyria 2:25½, sire of the dam of Soprano 2:03¾, etc., second dam Wayside 2:21½ by Ottawa Chief, both staked locally. Gleaming trotted to cart last year in 2:38, quarter in :36, while the Doctor paced as a yearling quarters in :36, eighth in :18, so that Mr. Lynch has a good foundation laid for going ahead with their education.

◈ ◈ ◈

D. E. Mizner has been awaiting the arrival of the Savage horses with much interest, as he wishes to see how they stack up with the members of the same class in his stable, one of which he considers the best trotter of her age and work that he has ever had. There are two that trace to the 1:55farm's premier. one of the four-year old bay gelding Dan M. Patch by Dan Patch out of a daughter of Harrison 2:18¼ (son of Ottawa Chief and Mary Wood by Richard Wheelock), and the other the filly referred to above, by Lynwood Wilkes and out of a sister to Dan M. Patch. Neither are much more than well broken but both have a good way of trotting that promises future profit for their owner. N. M. Moore of Healdsburg. The lass is not large but is nicely made and has a very determined way of trotting and a good brush that she ought to learn to carry all the way. Dan also has a green trotter belonging to Butch Walz of Healdsburg that is doing nicely—a five-year-old gelding by Kinney Lou 2:07¾ and out of Missie Medium, the dam of Bon Volante (3) 2:19¼, Le Voyage (3) 2:25¾, etc.—and expects to receive soon from his brother George in Portland a trotter by Shepherd Laddie that has worked in 2:14¼ in previous training.

We recommend to every horseman a careful perusal of the program of the big meetings at the exposition which appears, with all conditions, on a business page of this publication. Classes are provided for horses of all speeds, and are so arranged that in almost all cases a horse can get two, three, or even four starts. Entries close on April first for all the class events, and a number of horses have already been named straight through the meetings, present indications pointing to an excellent entry list for all events. Write for entry blanks if you are not already in possession of same.

◈ ◈ ◈

Millard Sanders sold to S. S. Bailey this week the green pacer O. U. C. which he has been developing for Lew Crellin, the price paid being $5,500. The big fellow was turned over at once and will be staked down east for Frank Childs to race, the Bailey-Childs combination planning to go 'em one more heat like they did with Leata J. In Sanders' hands the son of C. The Limit 2:03¼ and Rosie Woodburn 2:16 has come like a champion and in him Mr. Bailey has probably the best pacing prospect in California. Mr. Crellin has found this line of horses pretty profitable, as this lad brought him $5,500, his sire, C. The Limit 2:03¼, sold for $10,000, and his grandsire, Searchlight 2:03¼, fattened the Crellin bank balance to the tune of $15,000.

◈ ◈ ◈

Deputy Sheriff William G. Durfee of Los Angeles came up state last week on a business trip, returning Wednesday evening to resume speed making for the June meeting at the fair. Will has wintered well, to all appearances, and promises to ride some fast miles behind several members of his stable. Virginia Barnett has come around rapidly from the slight injuries received in her recent accident and Will expected to resume jogging her upon his arrival back home. Immediately after the lass got bunged up Rags was started on the repeat and the stable will take no chances on failing to have a worthy candidate for the 2:10 trots. All the young ones are coming fast, as a result of which there may be noted some price changes in the sale advertisement this week.

◈ ◈ ◈

The concensus of opinion is that Tim Sexton would have a right nice trotter in Future Tramp by Tramp-fast (2) 2:12½ if the lad only had a dam of some sort. Ain't it awful the way some of these "short bred ones" act? Here he is, a nice prospect ,and merely out of Future Princess Ideal (dam of The Ideal Lady 2:09¼, Future Fast (3) 2:26½, etc.) by Chimes, sire of eleven and the dams of twelve in 2:10; second dam Estabella (dam of Heir-at-Law 2:05¾ and five others, grandam of Ess H. Kay 2:00¼, Lady of the Manor 2:04¼, Princess Helen 2:05¾, etc.) by Alcantara 2:23, who never sired but six in 2:10 and whose daughters were such rank failures that they never raised but twenty that got into the charmed circle; third dam the great brood mare Annabel by George Wilkes, who never sired anything but about half of the book. The fourth dam is rotten, too—Jessie Pepper by Mambrino Patchen 58 who "sided" George Wilkes in his feeble efforts to produce something. Take away this trash and bring on something with some breeding!

◈ ◈ ◈

Mr. A. Albright Jr. of New York, who spends more or less time annually in California, has been a visitor at a number of local tracks recently and was much pleased with the plants and with the horses in training. Mr. Albright owns a half interest in the colt Nathan Axworthy 2:12½ that won six out of seven starts last year over the half-mile tracks down east as a four-year-old and promises to mature into an extra good trotter, and has ten or a dozen record horses and young things of his own, including the pacer Lake Gregory 2:10 by Red Lake 2:15¾, a four-year-old green sidewheeler by Baron Bel 2:11½, the three-year-old Kentucky Todd colt Toddling (2) 2:21¼, that went some nice races in the central west last year and trotted the Dallas track in 2:14, and the four-year-old green trotter Lois, that worked the Goshen track last year for Billy Dickerson in 2:14. She is by Guy Axworthy 2:08¾ and out of a full sister to May Earl 2:10¼ by San Mateo 2:13¼, grandsire of the champion pacer William (4) 2:00. Trainers Isaac Hully and Earl Pitman are handling most of the Albright horses, a number of which will be seen at the races this year. At the Midwinter Sale last week the four-year-old mare Helen the Great was purchased for the New Yorker by one of his agents and should prove a valuable acquisition, as she has shown considerable speed and is a daughter of Peter the Great 2:07¼ and Anita May by Highwood 2:21½, one of Nutwood's very best sons, second dam Hazel Cossack 2:16¼ by Don Cossack 2:28. Both matrons named, and also the third and fifth dams, are producers.

A GENEROUS RESPONSE.

It affords much pleasure to us to be able to announce that horsemen have been both prompt and liberal in their response to the appeal for aid for Mr. and Mrs. John McClintock, contributions from all quarters of the country having been transmitted to Mr. McClintock at Hesperia in the hope that his condition may be alleviated and some meed of modest comfort brought into his life to aid him in his plucky battle for health. We know that the cause is worthy, and that no money will be better spent, on the part of both donor and recipient.

Railbird Twitter

Signs of spring in California are not as marked as they are in other sections of this land of ours for the simple reason that there is less contrast in our seasons and the change from one to another brings no momentous alterations to our plans of daily existence. We do not have to go into ecstasies over the flowers that bloom in the spring, tra la, because we have flowers blooming all the year. Nor is the "first robin" a sign of big headlines in the daily press with us, as the first robin is with us from Christmas to Christmas with the exception, possibly, of those widely separated dates, the thirtieth of February and the thirty-first of September. Our main sign of spring among our feathered population lies in the greatly augmented bursts of song poured forth in steadily increasing volume by that "weather loving songster," the railbird. The railbird does not migrate, he is with us day in and day out—he simply changes the substance of his song as one season merges with another. In the summer, his lay is much like that of his eastern brethren, as is the case also in the fall; in the winter he is on hand at every track but his melody is subdued and pensive, reminiscent and historic in its composition; time has to some extent dimmed the luster of the victories and wiped away in a certain measure the sting of the defeats of a season gone. To the "casual observer" there is apparent in the winter's harmonies—and occasional discords—a most startling resemblance to the chorus emanating from the throats of those benighted attendants at a meeting of the Coal Stove Circuit in that "climatic paradise," the Windy City, when the "balmy breezes" from icebound Lake Michigan have reached a point in the severity of their gentle ministrations that sends the most hardened habitue of the open in search of a place by the fire or on the lee side of a steam heater, and even brings about a temporary cessation of hostilities between those two of our most esteemed contemps whose offices lie within (in)-haling distance of the storied perfumes of the stockyards.

In the spring, however, the influence of the season upon the railbirds' song is the same in California as in all other quarters of the harness horse world, with the slight difference that our birds change the tenor of their tunes some sixty to ninety days earlier than do the denizens of the "horsological gardens" of the Atlantic seaboard and inland points. Gone are the tales of yesteryear, sad or gay; no longer rise the odes of triumph in commemoration of a ticket cashed at Squedunk when Pushmataha Queen came from behind and nipped the heat and race from Itta Bena Belle and Mishawaka Maid; gone, too, are the sad, sad memories of that Black Friday at Frozen Dog Buttes when Micky the Flea in a disastrous moment of temporary mental aberration forgot to part the foretop of the Pride of Ponchatoula exactly in the center, thereby throwing him out of balance and causing his defeat in the deciding mile of the race in which he carried all the stable money! A whole new season is here—a whole new crop of green ones—hardly a stable in the land but has a trotter that has better than an even break for the M. and M., and as for pacers, why say, folks, there's nothin' to it. "What I'm tellin' you is that he can step any good track, any good track, mind you, so darned close to two minutes that there ain't no watch made that can get the difference, unless, of course, it happens to be on the fast side of it. Come back? Say, Directum I is a dog along side of this horse. William? Say, can that noise. That bird of Marvin's ain't got nothin' on this colt, an' look at how he's bred!" Do you get it? Sure you do—from Bangor, Maine, to San Diego, from Vancouver, B. C., to Tampa and all the way points you get it. If you don't get it in your home town, providing there is a railbird in your vicinity at all, you have picked out a darned bum place to live and you are entitled to sympathy.

All over California at present the clatter of flying feet and the "twitter" that is poured forth by every knot of fence riders form mighty welcome sounds. The rains, for the most part, are behind us, and the horses that have been kept in pretty good shape since December are working now from 2:20 to 2:30 in almost all cases, while certain ones are going still faster and stake colts and green ones are being asked for brushes at rates of speed that enable the owner, trainer and railbird to get a pretty fair line on what to look for later on in the season. Los Angeles has a good attendance every workout day and the Angelenos are not bashful at all in sending out tales of some sparkling work for this time of the year. Hemet, Riverside, Hanford, Fresno, Stockton, Sacramento, Woodland, San Jose, Santa Rosa, Pleasanton—every town where there is a horse in training—all look forward to the publicity that horses "made" on their tracks will get when the season is well under way.

Pleasanton, as the most popular wintering place in this section of the Golden Slope, affords the most interest for either the casual or the regular visitor, and scarcely a day goes by now that spectators are not on hand in considerable number. With these added to the "resident delegation" that never misses a trick, and with tricks galore being sprung at almost any minute from nine to two and others developing at odd hours, the boys on the fence find lots to talk about. Every day sees faster work, and in another month the boys will be reeling off some rattling miles.

Millard Sanders and Lew Crellin's pacer are responsible for a whole lot of the wonder tales that are being circulated at present, and they are not fairy tales either, for the clockers have let this bird put over nothing that they didn't have a line on. Early last week he unbelted a mile close to fourteen with the half just abaft the three hole, and on Saturday he went it a bit better, with the full distance in 2:13½, the half in 1:03¼ and the quarter in :30½. Incidentally, the C. The Limit horse hasn't any monopoly on showing two-minute-speed right now, as he started to go by Vernon McKinney on a fast finish in the stretch and Vernon had other ideas, as he hit his stride in about three lengths and the pair of them streaked it to the turn like a couple of runners. Vernon McKinney has all the whizz he ever had and is perfectly willing to show it almost any time.

May Davis 2:08¼ with Jud Smith up and Star Tilden with Hank Smith performing as usual worked some nice easy miles together very pleasingly during the time that the writer's feeble yip mingled with the sturdier barks of the tellers of bear stories last week, the fastest circuit being in 2:21 with the last quarter in :32. The Davis and Smith stables will probably both go to some good middle western circuit.

A pair that come in for a good deal of favorable comment from all quarters are Fleeta Dillon (2) 2:08¾ and Peter McCormick 2:08¾, in the stable of V. L. Shuler. They not only shipped out in fine shape but, like the members of the Shuler family themselves, have taken very kindly to California and are coming along steadily in their work. The mare has been over the MacKenzie track in 2:24 and the big trotter some three or four seconds faster. Peter's coat has brightened up and he has put on a bit of flesh since his arrival, and is making all sorts of friends for himself. Going slow he has the appearance of a genuine old-fashioned trotter, but when he moves up he is about as handy a big horse as they make 'em and a good looking one at that. His dam is Pearl Cecil by Cecil W. 2:28½ (son of Gambetta Wilkes and out of the dam of Eyelet 2:06½ by Nutwood), second dam Lilly Greene by Almont Archy (son of Almont 33 and Jessie Patchen by Mambrino Patchen 58), third dam Rose Steck by George Steck (by Strathmore, out of a daughter of Edwin Forrest), fourth dam Nancy by Post Boy 2:23, etc. Several brood mare owners have evidenced a desire to breed to him, but for this season at least the black fellow is in California for racing purposes only, leaving Peter McKlyo (3) 2:12½ as the only son of Peter the Great whose stud services are accessible locally.

Another of the easterners that is furnishing matter for some of the twitterings is Mahomet Watts 2:08¼. He has "had his" previously in a blind bridle, but DeRyder has worked him mostly with an open rig to which he has taken pretty well, but recently he was given a tryout with the old original blinds. Now Mahomet has certain well defined ideas of his own along with his speed and general quality, and it didn't take him long to evince a positive dislike to the change. By the time he got good and mad he was trotting a two-minute gait and taking some hold, so the boss decided to let him work the bile out of his system, the result being a squarely trotted quarter right at a flat thirty seconds. It is the open rig for his from now on and the big boss is confident that he is on the right track and that patience will make the fast fellow a wonderfully useful horse.

Maymack is the same "old pill" after her own peculiar fashion, and couldn't be doing much better. She got a nice work Friday with California B. (Bert Webster up behind the son of Athasham) and the pair trotted their last mile handily in about 2:20, with the half in 1:07. Anvilite pulled his cart over the route Thursday in 2:35, last quarter in :33, and the MacKenzie trotting mares Bertha Carey 2:08¼, Miss Perfection 2:08¼ and Astro Harvester are all working nicely. Zomblack is developing a lot of whizz at the pace and as he is getting rid of the meat he annexed during his letup he looks pretty rugged and racy, while the stable looks to have another high class green pacer in the four-year-old by Vernon McKinney, dam by Diablo, second dam the dam of Leata J. 2:03.

Homer Rutherford plans to join the eastward bound delegation after the P.-P. I. E. meeting with Geo. N. Patterson and Colleen, his Charley D.—Cricket pacer. She is well along and ready to drop to a mile in 2:10 on short notice and will soon be giving folks something to talk about, while the Patterson lad came through the stretch with O. U. C. the other morning in a manner highly flattering to the youngster. He is a nice cut of a horse, and if he has no untoward accidents ought to give a most excellent account of himself. Tango, Ed Parker's Lijero colt, is another three-year-old that the birds like, and worked last week in 2:33½, :33½ and :15½.

The Childs boys are riding easy with their strings and the Bailey horses, with all of them let down to between twenty and thirty. Most of them they have a good line on from previous seasons, and among the newcomers they are developing a healthy respect for the Montana horse with the Bar Box brand on him—R. C. H. 2:18. Marvin gave him his best mile Saturday in 2:27 with a half in 1:09 and the lad did it very nicely indeed. Tom Smith is picking up speed like a genuine come back and Major By By looks like he would stand the gaff this year. At any rate he and Hal Boy are being entered for Marvin to take down the big line, while Frank rather favors a combination of part Grand and part Great Western Circuits.

George Ramage teamed Clara Mills a bit Friday and Grace Fowler, the sister to Sonoma Girl, on Saturday, both mares showing to an advantage. Clara is a pretty well proven one and the regulars credit her as being a candidate for 2:05 honors, while the Fowler girl is learning and has reached a mile in 2:34½. Will DeRyder breezed Spriggan and Dicto through the stretch at a good clip and the former has the marks of a high class trotter. The Schwartz horses haven't set any track records since their arrival, but they are taking their work in good shape and dropping a bit from one work to the next. Lou Taylor is still on the forty side of thirty with his string, but drove Luana a nicely rated mile in 2:35½ and is making steady headway with the balance of the youngsters. Barney Simpson's mares are coming on for all the demands made and Al McDonald wears that kind of a smile whenever the railbirds cheep a few cheeps about his The Bondsman—Washington McKinney two-year-old trotter, which is quite often.

Frank Perry, the "wreck" that Frank Malcolm bought last fall for Bert Webster and George Ryan, is standing up manfully today, and if his jinx is broken Bert will give some folks a rude jolt with this horse later on. Madam Mac hasn't passed the forty point yet as she was not taken up until late, but looks good and has a fast brush on tap. Her education last year and a windup trial late in the season close to seven make her a promising green one for 1915 and the bunch touts her as a probable new fast one for Expressive Mac. Pedlar Direct, Mr. Longley's Baron Direct pacer, is making friends and speed steadily. Onward McGregor is getting some nice mares to serve, and if he stands up this year is the prospect of a right good trotter. A car accident en route to California is all that has delayed his faster development, and he is by nature a nice big colt, good tempered and speedy at the trot. Bert's young stuff also is all doing nicely and their Sidney Dillon matron, Miss Harris, promises to land in the table of great brood mares with a bump before many seasons.

H. E. Armstrong has not yet returned to Oregon, and is getting some nice rides behind Hal J. 2:09 and the other Jessie M. youngsters that Horace Feindel is handling. All the Jessie M. foals have plenty of lick and the Joe Patchen II filly looks so good that Mr. Armstrong bred the black daughter of Del Norte back to the MacKenzie favorite last week. Johano is coming along well and Horace is very proud of the foal by him recently dropped by Birdie, the dam of Bodaker.

Mel Keefer and Charley Spencer are rapidly approaching the point where they will be registering some fast performances, though going moderately at present. The Proof has worked his best mile so far in 2:26, with the half in 1:11 and the quarter in :35 and handles himself in a brush in a very nice way indeed. He is one of the very few of the Bingens in California and there is no need to go farther than Pleasanton to see the quality of his foals. The Charley Marley filly by him out of Nusta 2:23¼ by Nushagak is learning very rapidly and has gone the route in 2:45, 1:17, :37 and :18, which is a right nice showing for a lass of her age and education. She is entered at the June meeting at the fair in the two-year-old trot and Spencer promises some good man a horse race for the fifty per cent. Bonnie Ansel, the Brown entry for the big trot, has been asked for a mile in 2:29½ only but she is coming faster right along.

Tim Sexton and his father motored up from Oakland Saturday, Tim to work his trotter Future Tramp, in Henry Smith's stable, and the senior member of the firm for the pleasure of a day in the open with the men and horses quartered at the track. The "hobo horse," as the gang generally label—or libel—him is an honest little horse and meeting demands very satisfactorily. Smith with his Charley D. filly accompanied the Sexton hitch in a few nice easy miles, the fastest in 2:21 with the half in 1:09, Tim winning the heat handily by a couple of lengths with Henry putting up a startling lifelike imitation of a man "talking him back," explaining copiously that it was just a little faster than he wanted to work. This man Smith is some mechanic in his line, all right, and was doing very nicely until Tim spilled a jewel of wisdom to the effect that it must be a mighty poor owner that can't beat his trainer a few lengths early in the month with the preceding one's bill unpaid. Now Henry is laying for somebody.

Vernon McKinney has another good card at his home grounds in the two-year-old pacer Verna McKinney, out of Ramona, the dam of Del Rey 2:03¾. The lass reaches right out for more country in a very easy fashion and has worked in 2:34, last quarter in :34, while all the stable of any age is traveling below thirty. Zorene 2:10¼ and Zoetrix breeze through the stretch in midsummer fashion and the older members of the trotting contingent, Harold C., Bon Cress and Vallejo King, are picking up speed right along. Some of the other members of the Sutherland-Chadbourne string will also bear clocking from now on.

Lou Childs gets up behind one occasionally but his star performance is putting on every day or so his now famous specialty entitled "His Son's Younger Brother," Al Ruthven of Kansas City being one of the recent victims of L. A.'s perennial youthfulness. Ruthven, whose horses preceded him a few days, put

n an appearance at the track Saturday morning, and after giving his stable the once over, started out in tow of Charley Snow to make a few local acquaintances. About the first bunch of roosters that the pair ran into included Mr. Childs, whom Ruthven greeted warmly, being a young man himself, an old time acquaintance of Frank. "Oh, yes," he said heartily, "this is Frank's brother, the northwestern Murphy." The gang took it all in for a few moments before breaking it to the Missourian that his new acquaintance was the head of the family instead of the junior brother. Al enjoyed it as much as anyone and he has the satisfaction of knowing he isn't alone in his mistake, as Lou counts that week lost that passes without some stranger taking him for one of the boys.

Letter B. Jr. by Benton Boy, dam Letter B. 2:17¼ by Ward B. has been booked to Mahomet Watts 2:08¼. She is owned by J. F. Dunne of Gilroy and is the dam of Cresto 2:12½, Dicto trial 2:08¼, etc.

THE PRODUCE OF MY IRENE S. (2) 2:28¾.

The recent sale of the yearling brother to Esperanza (3) 2:09 to Clarence J. Berry for a thousand dollars, emphasizes the fact that in My Irene S. her owner has one of the greatest young matrons in the land—one that bids fair to attain high rank among the producers of extreme speed.

My Irene S. was foaled in 1904, bred by F. W. Wadham of Nestor, California, who still owns her dam. She is a daughter of Petigru 2:10½ and Johana Treat 2:24¾ by Thomas Rysdyk and is a full sister to A. Ottinger's good double gaited campaigner, Zulu Belle, who will doubtless achieve fame as a brood mare herself when her racing days are over. The chestnut filly passed from the Wadham to the Durfee stables, and late in November was given a time record of 2:28¾ at Los Angeles as Irene S., the "My" being necessarily prefixed at the time of registration on account of conflict.

In 1908 she was put to breeding and was mated with Zolock 2:05¼, the result of the mating being the chestnut mare Zorene 2:10¼ now in the stable of Sutherland & Chadbourn at Pleasanton. Zorene was originally trained by Mr. Durfee on the trot and when an even two years of age traveled a half mile at that gait in 1:10. She was disposed of in a trade which her breeder estimates at this time to have made him enough to call the filly sold in excess of the thousand dollar mark.

The following year began her matings to Carlokin 2:07½, her first foal to the cover of the son of McKinney and Carlotta Wilkes being the black colt Carlos (2) 2:29½, sold at auction for $1000, money winner in two futurities as a two-year-old and close up as a three-year-old in 2:11¼, with work to his credit that season in 2:12½. Next came the bay filly Esperanza (3) 2:09, sold to Mr. Berry at eleven months of age for $1500, and whose performances as a two- and three-year-old have been unequaled on the Pacific coast. Again bred to Carlokin she produced the trotter Carl (2) 2:19¾, sold as a yearling to Wm. Loftus for an even thousand. This lad took his record in a time performance at Los Angeles in July, was second to Byron in the junior division of the State Fair futurity, winning one heat in 2:23¼, finished fourth in the Pleasanton futurity, and after his return home trotted the Los Angeles track in 2:14¾. He is highly regarded as a candidate for this year's stakes.

In the spring of 1912 before the departure of the Durfee stable for their eastern campaign she was bred to the great colt trotter Manrico 2:07¼ and in due time dropped the chestnut colt Manuelito, which Mr. Berry paid $1200 for when but a week old. That he didn't go wrong in staying by the foals of his favorite has been pretty well proven by the showing made so far, as the lad pulled a cart a half as a yearling in 1:14, with the final eighth in :17½, and his owner has refused $2000 for him. This refusal is not "hearsay," as the writer has a buyer for the lad at that price, and if the gentleman from Alaska has changed his mind he has only to drop in and get a draft and turn over the colt.

The next foal—and, incidentally, Mr. Berry's latest purchase—was Troubadour by Carlokin, now twelve months old and just turned over to Mr. Berry. He is a nice youngster, just broken, and a healthy profit would be necessary to "start anything" in the way of a sale. Another baby to the cover of Carlokin is now about a month old, a filly, and for this lass Mr. Durfee has refused an offer of six hundred dollars some ten days ago.

The record established by My Irene S. up to the present time is a truly remarkable one on many counts. Every one of her foals has had trotting speed of high order, and of the four first foals every one could trot a half in 1:10 or better as two-year-olds, a performance which the present two-year-old will undoubtedly equal or surpass. Her first foal paced last year in 2:08, and every one started has achieved a standard record and won money, while Esperanza has set a mark previously unapproached in the west by being a most excellent two-year-old and an unbeaten three-year-old. She has never failed to raise a colt since put to breeding, and as she is but eleven years of age and is now suckling her seventh foal she has everything in her favor for setting a new record for speed production. To date, Mr. Durfee has sold youngsters from her that brought in $6700 in all and left the purchasers well satisfied.

Even if it is "dog days" in the horse business in California, the right kind still pay a handsome profit.

Jim Logan 2:01¾

Among the many families of the light harness horse that have been established with marked success in California, there have been few that surpassed that of Charles Derby 2:20 in the production of the "every day" kind that went out and paid a profit with exceptional regularity in all kinds of weather, on all kinds of tracks, and in all kinds of company. For all of this, of course, there is that most excellent foundation—the Strathmore-Electioneer cross, of whose potency the branch of the trotter under consideration is the most striking example.

Bred to Strathmore by her owner, R. G. Stoner of Paris, Kentucky, the mare Abbess by Albion first produced Steinway (3) 2:25¾ (whose record, made in 1879, was a world's mark at that time) and, the year following, Solo 2:28¾. Brought to California by Daniel Cook the bay horse gave early evidence of his worth as a sire, two of his earliest foals in his new home being Charles Derby 2:20 and Strathway 2:19, both of whom were to achieve signal success in future years. Cricket, the first 2:10 pacing mare, was begotten by Steinway from a mare of no known trotting blood, and the world's champion three-year-old pacing stallion, Klatawah 2:05½, was the produce of one of his matings with Katy G. by Electioneer, the cross of breeding which was also productive of Charles Derby 2:20 and Steineer 2:29½. It is a marked coincidence that Charles Derby should in his turn become sire of the youthful speed marvel, Jim Logan, who was to share with Klatawah in future years the three-year-old laurels. There is this marked difference—Klatawah reached the zenith of his racing career at the age when Jim Logan's was just beginning. Klatawah failed to come back; Jim Logan not only "came back" but has kept coming back year by year, with a five-year-old record of 2:04¼, six 2:03¼, seven 2:02¾, and eight 2:01¾, all winning race records.

Backed by the gait controlling, potent blood of Strathmore and Electioneer, it was but natural that Charles Derby should establish a family for himself. His first foal trained was begotten when he was a three-year-old, the initial performer being Diablo 2:09¼, one of his best sons. Incidentally, Bertha by Alcantara, greatest of western matrons, owed a surprising portion of her fame to the happiness of her matings to Charles Derby, his sons, or his sire. To the cover of Steinway she produced the double gaited Elf 2:22¼ trotting, 2:12½ pacing; mated with Charles Derby she gave birth to Diablo 2:09¼, Ed Lafferty 2:16½, Demonio 2:11¼, Don Derby 2:04¼, Arner 2:17¾, and Derbertha 2:07½, while from the cross to Owyhee came Bernice 2:25¾ and Owyho 2:07¼.

Reckoned in terms of 2:30 performers the family has a very large representation, but the figures that mean the most to present day breeders are the ones that can be classified as "2:10 or better," and it is on this basis that consideration is given to the doings of the Charles Derbys. Headed by Jim Logan 2:01¾, the select members of the first generation appear as follows: Jim Logan 2:01¾, Don Derby 2:04½, Captain Derby 2:06½, Queen Derby 2:06¾, Much Better 2:07¼, Dan Logan 2:07½, Derbertha 2:07¾, Derby Princess 2:08½, Margaret Derby 2:09 and Diablo 2:09¼, while daughters of Charles Derby have produced Gracie Pointer 2:07¾ and the good trotter Brilliant Girl 2:08¼

Twelve sons have become sires of standard speed, of which number four have begotten 2:10 speed, while others have performers only fractional parts of seconds removed from the coveted mark. Don Derby 2:04½ is represented by Castanada 2:09¾; Owyhee 2:11 is credited with Owyho 2:07¼; Demonio 2:11¼ has Mona Wilkes 2:03¼, Airlie Demonio 2:05½, Denervo 2:06½, Nordwell 2:08½, Oro Mo 2:09¼, Memonia 2:09½, Demonio Wilkes 2:09¾ and Ramona, the dam of Del Rey 2:03¾, while his full brother Diablo finds included among his get such good ones as Sir Albert S. 2:03¾ (half brother to Jim Logan 2:01¾ and Dan Logan 2:07½), Sir John S. 2:04½, Clipper 2:06, John R. Conway 2:07, Daedalion 2:08½, Diablito 2:08½, Tom Carneal 2:08½, Chiquito 2:10 and the dams of Chiquita 2:08½, Little Lucille (3) 2:09, and Ginger 2:10. Dan Logan is the sire of John Malcolm (2) 2:11½, a world's record when made, and others, and the most recent comer to the ranks of the speed siring sons of Charles Derby is Jim Logan himself.

Jim Logan has been too busy as a race horse to have become by this date the father of a large and flourishing family—qualify that statement, for though the family is not large it certainly is flourishing. Probably four foals by Jim Logan have ever received the slightest handling for speed prior to the present season, all of whom showed natural speed and of whom but one was ever trained with the expectation of racing. This one lone campaigner of an illustrious dad is the filly Maxine (3) 2:15, winner of the three-year-old pacing division of the Breeders futurity in 1914, her only engagement. She gave evidence of the justice of her sire's claim to recognition as a true representative of his line by pacing a trial mile in 2:09, with the half in 1:01 and the quarter in :29. With other Jim Logans and the old warrior himself she is in the stable of Elmo Montgomery at Woodland being fitted for some real racing this season, and anyone calling to investigate the merits of the get of the son of Charles Derby and Effie Logan can be "shown" very readily and convincingly.

Potent as is the blood of Charles Derby, the Montgomery champion does not rely upon that alone, as through his dam he comes from lines that have for four generations been productive of extreme speed. Effie Logan's three developed foals have an average record of 2:04¼, and her dam, Ripple, was a daughter of Prompter, sire of the dam of Graft 2:02¼, famous for his speed and gameness; Grace, dam of Ripple, produced also Daedalion 2:08¼, Eagle 2:19½ and Creole 2:15, sire of Javelin 2:08¼, and was by Buccaneer, sire of the dam of the trotter Dr. Leek 2:09¾, etc. Mary, fourth dam of Jim Logan, was one of the very best daughters of Flaxtail, being the dam of Apex 2:26 (sire of the second dam of Clara Mac 2:04½, etc.) and Lettie, who produced Welcome 2:10½ and Wayland W. 2:12½, sire of California's fastest racing pacer, Bolivar 2:00¾. With an inheritance of this kind it is more readily understood why Jim Logan has been able to remain a race champion to this day, why he is again preparing for a strenuous season, and why he should in coming years achieve an enviable standing among the progenitors of extreme speed.

SIDE MONEY ON THE BIG STAKE.

[Robert A. Smith, Correspondent.]

One of the matters of interest to bridge over the chasm between the two seasons is a wager made, as the result of a discussion, at Exposition Park recently, between Will Durfee and Saml. Watkins, upon the nature and relative merits of the pacing mares Little Bernice 2:06¼ and White Sox 2:06¼, both daughters of the expatriated stallion Del Coronado 2:09½.

Durfee emphasized the statement that the written history of Watkins' mare Little Bernice as a three-year-old was too much forward, while that recorded of her as a four-year-old was too much backward. Watkins, being sufficiently conscientious and loyal to his mare, said that while she might not be equal to the duplication of the performances of Dan Patch 1:55¼ for the reason that the rules do not now recognize windshield records, and admitting that the events he finds recorded of her four-year-old career are not of dramatic interest to race followers, that her four-year-old racing was fragmentary and vague and is free to concede and adjust the detail to coincide with Durfee's views, but the light her three-year-old races cast on her normal condition and generally prevalent ability has instilled in him the vivid and satisfactory thought that she is essentially better than any of the pacers yet produced in California and especially White Sox, and in this thought he does not like to be repudiated. Each one aspiring higher and to have an eminently respectable claim to a better position than the other, in the $20,000 stake for 2:06 class pacers to be raced in June at the big meeting to be given in connection with the Panama-Pacific International Exposition, a wager was made of five hundred against two-fifty—Watkins writing the check for the larger amount. Their merits must not, of necessity, be tested by the actual results of the race, as in the event either one does not start the one starting collects. Durfee will be guide for White Sox, while Watkins, who has owned her since she was a two-year-old and drove her in several of her winning races, will steer Little Bernice.

It appears at present, in view of a perusal of the racing qualities of both mares, that the demands on the resources of both teamsters will be taxed to the utmost, and that their task of conditioning and training the mares for the contest will be so fascinating and so comprehensive that it will doubtless absorb their whole energies in their dreams. Both mares are sound, big and stout and acting perfectly in their preliminary work. The contemplated inspiring aspect of the contest between Del Coronado's daughters will be watched with much interest by their respective admirers, for as usual, horsemen are deeply divided in their sympathies and tastes. Who is qualified to discern the future relative merits of any two pacers?

THE GREAT WESTERN CIRCUIT.

The stewards of the Great Western Circuit met in Chicago on the twenty-fourth of last month and arranged the circuit dates for the season of 1915, beginning at Cleveland on July 19 and ending up at Phoenix on November 13. Small change was made from the customary schedule, save that Dubuque and Burlington were assigned the time previously given Grand Rapids and Kalamazoo, so that Cleveland and Detroit are the only points where the Grand and Great Western Circuits merge. Fifteen weeks of racing is provided as follows:

Cleveland, Ohio	July 19-24
Detroit, Mich.	July 26-31
Peoria, Ill.	August 2- 7
Burlington, Iowa	August 9-14
Galesburg, Ill.	August 16-21
Dubuque, Iowa	August 23-28
Des Moines, Iowa	Aug. 27-Sept. 3
Hamline, Minn.	September 4-11
Milwaukee, Wis.	September 12-18
Springfield, Ill.	September 20-25
Sedalia, Mo.	Sept. 27-Oct. 3
Muskogee, Okla	October 4- 9
Dallas, Texas	October 16-31
Phoenix, Ariz.	November 8-13

CLEVELAND'S EARLY CLOSERS.

Sweepstakes races for colt trotters are the outstanding features of the early-closing event program for the Cleveland meeting, which opens the Grand Circuit of 1915. Two of the events are for three-year-olds, and the third is for two-year-olds. In each the sum of $500 is added by the company, and all the money paid in, plus the added money, is raced for. One of the three-year-old events is a free-for-all, and the other is for colts eligible to the 2:18 class. The two-year-old event is open to all colts. The payments are $10 March 15, $20 April 15, $30 June 15, and there will be no extra charge to money winners. In the two-year-old trot, there will be but two heats. The total purse will be evenly split and raced for in two heats, the division in each heat being on the basis of 50, 25, 15 and 10 per cent., and any colt may be drawn after the first heat without losing what he may already have won.

The purses for aged horses are $3,000, and are for 2:09 trotters, for trotters that never beat 2:13¼ in a race, and for 2:10 pacers. The first payment is but $15, and the final payment of 2½ per cent. ($75) does not fall due until June 15.

In making up this program of early-closing events, the Forest City Live Stock and Fair Company is following an idea which has taken deep root among track managers and campaigners, which is that less money should be offered in early-closers and more money offered in purses. An association can afford to give about so much, and the question is how best to distribute it. The general opinion is that there should be no further discrimination against the horses which are not provided with stake engagements. Hence, Cleveland, while cutting down its stake offerings, will increase its purse offerings, thereby doing the greatest good to the greatest number.

J. MALCOLM FORBES AND ETAWAH.

It is very evident that the meeting of the Panama-Pacific Exposition will attract more than one of the more powerful stables, as I have been told that, in addition to Tommy Murphy, who may take the champion Directum I 1:58, as well as the green pacer Peter Farren 2:10, which horse, by the way, was not far from a 2:02 trial last autumn, Mr. Geers is likely to be seen on the slope. Peter Farren, after being converted to the pace, brushed a quarter in 28½ seconds in his three-year-old form, and Murphy and Scott Hudson, who is interested in him even if he is not the actual owner, regard the son of Peter the Great 2:07¼ as a coming two-minute pacer, and feel that he is quite capable of holding his own in one of the richest purses to be given during the summer in California. If Geers goes west he is sure to make his presence felt and it is not unlikely that the stallion J. Malcolm Forbes 2:08, if all goes well with him, will be a starter in good company in the land of sunshine and flowers. Should Etawah find himself in California, he may gain the laurels that go with a championship record, for the atmosphere is such in that state that a trotter can invariably do better than in this section of the country. It has been stated that the son of Al Stanley 2:08¼ has trotted his last race, and if this is final there will be no meeting between the two greatest trotters in training, and, instead, each will attempt to reach the coveted goal, to use the expression once applied to the two-minute mark.—Hawley, American Horse Breeder.

MID-WINTER SALE.

The mid-winter sale of the Fasig-Tipton Company was held early last week at Madison Square Garden, with many yearlings in the offerings. About 250 horses in all were disposed of at an average figure close to $280, a few instances being noted of youngsters that did not happen to take the public's fancy selling considerably below one hundred dollars. The yearling demand for the most part was excellent, the sale being topped by the bay colt Sanardo by San Francisco 2:07¾, who was knocked down to A. H. Cosden for the nice sum of $3,200. The lad is entered in eight of the eastern colt classics and comes from a worthy maternal line, his dam being by Mobel 2:10¼ and out of the dam of Tenara 2:05¾, Charmond 2:10¼, etc. Real Lady by Moko, out of Fruity Worthy by Axworthy, also went to Mr. Cosden at a good figure, $2,200. The Walnut Hall Farm disposed of a total of forty-seven head at an average price of $361, the youngsters by San Francisco again bringing a better average—$445—than those by his illustrious stud companions. The first of the Manrico's went into good hands at fair figures.

The Curles Neck Farm yearlings were in good demand and a few first performances by them will bring their future prices up to a really excellent figure. Virginia Lou, out of Lou Dillon 1:58½, sold to John Ryan of Ottawa, Canada, for $700, Canadian buyers taking quite a number that suited them. The Hudson River Farm was a good buyer, and Curles Neck Farm selected a few high class mares to be added to the band of matrons already assembled at the home of The Harvester. One of the tops of the sale was the two-year-old filly Rose Knight, staked in the main futurities, by Border Knight 2:12¼, dam Rose Manning by Chatterton 2:18. She showed fast as a yearling, and was taken for $3000 by George W. Leavitt of Boston.

Drink Jackson's Napa Soda.

GREAT INCREASE IN EXPORTS.

It is of considerable interest to note that the trade in Percheron horses shows an appreciable increase in spite of war, foot and mouth disease, and drop in prices on cloven hoofed animals, which depressed trade in general.

During February, 1914 the Percheron Society of America cleared 1101 transfers; for February, 1915, 1192 transfers. Trade so far in March shows steady gains.

Importations of pure bred draft horses from abroad amounted to nine thousand one hundred and three head in 1911, 1912 and 1913. This made an everage of about one and one-half million dollars' worth of breeding draft horses annually, for which American gold was spent abroad. These importations are now wholly shut off and probably will be for years to come.

About eight or nine thousand American bred Percherons are now annually produced and recorded. The registration of pure bred draft horses of the other draft breeds — Clydesdale, Shire, Belgian, French Draft and Suffolk—amounts to approximately four thousand animals annually, so that only twelve to thirteen thousand pure bred draft American bred horses are being produced annually, and recorded. As the sex runs about half and half, this means that but six thousand pure bred draft stallions of all breeds (approximately) are now being produced annually. This is a small number in proportion to the twenty-three million horses owned in the United States, and it is inevitable that prices must rise on good pure bred draft sires of any breed.

The marvelous gain in exports of horses is the most marked development of the general trade. Total exports of horses from the United States to other countries (per data supplied us by the Bureau of Foreign Commerce, U. S. A.) amounted to but one million two hundred eighty-six thousand, three hundred and sixty-nine dollars ($1,286,369) for the last five months of 1913. During the last five months of 1914 exports totaled fifteen million, four hundred thirty-nine thousand, six hundred and four dollars ($15,439,604), a gain of more than fourteen million dollars. Tabulated, our exports by months for the last five months of 1914 are:

Month.	No. Head Horses.	Value.
August	804	$ 96,706
September	7146	999,267
October	12091	1,918,433
November	18071	5,034,353
December	30687	7,390,845
	78799	$15,439,604

WESTERN NATIONAL DAIRY SHOW.

The organization of the Western National Dairy Show, at Seattle, November 8-13, 1915, will be of more than passing interest to breeders and dairymen of the coast. The promoters of the enterprise have gone about the work carefully, and before announcing plans of any sort interviewed many prominent men interested along breeding or dairy lines and apparently obtained a hearty and unanimous endorsement of the plan. While the breeders of dairy cattle do not intend to lessen their interest in the fairs and other livestock exhibitions, they feel that the industry has reached the stage where they can have one event during the year devoted entirely to dairy cattle, products, appliances and processes.

No stronger board of directors has been named for any enterprise of the Northwest, and the plan is to add to the directors until the board has reached a hundred, to comprise men interested directly in the industry.

The temporary directors are: D. S. Troy, Chimacum; E. R. Brady, Satsop; E. E. Flood, Rosalia; John L. Smith, Spokane; H. C. Davis, Granger; A. L. Gile, Chinook; J. W. Clise, E. A. Stuart, A. L. Brown, H. E. Turner, J. V. Sheppard, and A. N. Henderson of Seattle. Jno. W. Pace, well known in connection with northwestern fairs, will be secretary and manager.

The plan for a big dairy show, national in scope and western in management, has received the endorsement of the Washington Dairymen's Association, the Purebred Livestock Association and the various dairy cattle clubs.

In speaking of the matter Senator Troy, acting as chairman of the organizing and directing committee, said: "There has been nothing but encouragement wherever the Western National Dairy Show has been mentioned among dairymen, and I believe it will prove to be a big enterprise and one that will enlist the interest of breeders all over the Northwest. Those of us engaged directly in dairying realize its progress but it is certain that a small percentage of the business men realize the tremendous strides being made by the dairy industry in the states of the Pacific slope. It is so rapidly assuming a place at the head of all industries as to warrant an exhibition devoted exclusively to dairying and its products."

The Western National Dairy Show has been capitalized at $50,000, stock of which is being taken by those directly interested in the industry. It is planned to offer prizes for either four or five breeds of dairy cattle with an average prize list of $1500 for each breed. This is almost as large as the offerings of the National Dairy Show.

The dates of the 1915 dairy show have been fixed to follow the dairy division of the Panama-Pacific exposition which releases dairy cattle on Oct. 30th, giving shippers a week in which to move and rest their cattle for the Western National Show. It is predicted that in addition to the northwestern cattle shown, the prize herds of the East participating at the Panama-Pacific exposition will be exhibited, giving the thousands of people who are unable to attend the San Francisco exhibition an opportunity to see them.

Offices have been opened in Seattle by the Manager and Secretary at 612 Mutual Life Building, where correspondence may be addressed.

GEERS! MURPHY! CATON!

(Is their endorsement worth anything?)

Memphis, Tenn., Jan. 21, 1915.

California Track Harrow Co.,
Kalamazoo, Mich.,

Gentlemen: I have used your implements on both track and road and consider them as good or better than any made.

With best wishes, I remain,

Yours truly,

E. F. GEERS.

Po'keepsie, N. Y., Jan. 10, 1915.

Dr. A. A. Guerne, Kalamazoo, Mich.

Dear Sir: Yours at hand and note what you ask in regard to my experience with the California track harrows. In reply, will say from my personal experience I don't think there is but the one harrow and that is yours. If a man understands operating them he can put a track in most any kind of condition he wishes and one who can afford to be connected with a track can't afford to be without one of your harrows.

Wishing you the compliments of the season, I am

Very truly yours,

THOS. W. MURPHY.

Russia's most famous turfman, Mr. Frank Caton, spent Feb. 5th and 6th at Kalamazoo, Mich., looking over the different California Track Harrows. He ordered four to be sent to him at Moscow, Russia.

Ted Hayes writes from Butte under date of March 3rd, giving the pleasing information that Bon Courage (2) 2:12¾ is to be raced again this year, and that if all goes well he will make two or three starts at the June meeting at the exposition. Henry Peterson wintered the son of Bon McKinney and Helen Keyes at Los Angeles, though our correspondent there overlooked him in the big bunch in his recent news letter, and will begin giving him slow work this month, it being the owner's intention to come down some weeks in advance of his engagements and administer the finishing touches of his prep in person. Bon Courage has a great turn of speed, as his numerous duels with Esperanza duly attest, and he will be warmly welcomed by a large number of California admirers when he appears again in June. Apropos of the action recently taken by the Montana legislators abolishing betting on horse racing, Ted says it is the "old old story" of long protracted running meetings and an inordinate greed on the part of promoters of racing. "It would have been an easy matter to have had a bill passed allowing six days in each county with betting," he writes, "but this did not suit the running horse bunch; they wanted it all or nothing and they finally got nothing." Rather reminiscent of the situation in another state we all know, isn't it? It seems strange that the American people have such a hard time attaining the balance of affairs achieved by older countries, but it will come to us some day. In the meantime the present generation grows old fighting an up-hill game, but there seems no immediate help for it.

◈◈◈

Clarence J. Berry has been spending a bit of time in Los Angeles recently and while there purchased the yearling colt Troubadour, brother to Esperanza (3) 2:09, etc., from Will Durfee for a thousand dollars. Mr. Berry has almost a monopoly on the produce of My Irene S. and not one so far has turned him down, as all have shown true quality and the one filly has paid for the bunch. Incidentally, the Berry-Durfee combination promises to be right there in this year's stakes with the My Irene S. two- and three-year-olds.

◈◈◈

Rags, according to last week's Breeder and Sportsman, is a much older horse than was generally supposed, or else one of those miracles happened and a certain sire whose racing days are long, long gone did a "comeback" unrivaled in history. At any rate we had the Durfee horse trotting second to Allerton, which you will admit, Genevieve, was "some trot" for one or the other of 'em. On investigation we find that it was Albaloma instead of Allerton—as everybody already knew, anyway. The intertype operator has kindly shouldered the blame as an incident in making a rush revision on a proof, and we haste to alibi ourselves before some of our genial friends or eastern contemps make us the fall guy for racing a dead one, as they endeavored to do in the matter of Guy Borden and the 2:06 pace. These little things add much to the gayety of affairs in general and the harm done is not overly serious, so with these slight remarks the writer and the operator beg pardon and promise never to do it again—never again—until next time. This ought to satisfy everybody.

◈◈◈

The Salinas Driving Club recently elected J. N. Anderson president, N. A. Holaday secretary, Worthington Parsons treasurer, and Dr. J. P. Nichols veterinarian. Hostilities for the campaign of 1915 will commence on May Day, when the club will hold a one-day meeting with a card of four races for which a goodly entry list is already assured.

PACIFIC BREEDERS FUTURITY STAKE No. 15.

One hundred and twenty-eight second payments were made on March 1st in Pacific Breeders Futurity Stake No. 15, for foals of 1915, as follows:

D. A. Allen's foal by Leonid, dam Almah McKinney by McKinney.

J. N. Anderson's foal by Peter the Great, dam Della Derby by Chas. Derby.

C. A. Arvedson's foal by Prince Ansel, dam Constancia by McKinney; foal by McAntara, dam Colusa Maid by Sutter.

E. T. Barnette's foal by Carlokin, dam Zephyr by Zombro; foal by Copa de Oro, dam Phyllis Barnette by Director General.

C. J. Berry's foal by Carlokin, dam De Ora by Copa de Ora.

I. L. Borden's foal by Ed. McKinney, dam Ramona by Prince Robert; foal by Ed. McKinney, dam Roberta by Robert I; foal by Ed. McKinney, dam Miss Nutwood by Nutwood Wilkes; foal by Ed. McKinney, dam Hester McKinney by McKinney; foal by Ed. McKinney, dam Ella G. by Hamb. Wilkes; foal by Ed. McKinney, dam Cleopatra by Zolock; foal by Ed. McKinney, dam Directola by Direct; foal by Ed. McKinney, dam Maude Adams by Cresco Wilkes; foal by Ed. McKinney, dam Dolly B. by Welcome.

Robt. S. Brown's foal by Allen Jay, dam Mercedes by Dictatus.

Chas. Butters' foal by The Bondsman, dam Lottie Lynwood by Lynwood W.

J. J. Campbell's foal by Robert Bingen, dam Kate Kopje by Cresceus; foal by Bon Cres, dam Silver Fir by Silver Bow.

S. Christenson's foal by The Bondsman, dam Reina Directum by Rey Direct.

Chas. Cook's foal by Onward McGregor, dam Gypsy C. by Nutwood Wilkes.

S. H. Cowell's foal by Panama, dam Harvest Queen by Silver Arrow; foal by Panama, dam Zaza by Henry Nutwood.

R. R. Dalzell's foal by Leonid, dam Cloudlight by Searchlight.

Chas. L. DeRyder's foal by Joe Patchen II, dam Arawanna B. by Sidney Dillon.

Wm. E. Detels' foal by Geo. N. Patterson, dam Daphne McKinney by McKinney.

Dr. Wm. Dodge's foal by Bon McKinney, dam Johanna R. by Limonero.

J. Doran's foal by Joe Patchen II, dam Azwalam by Searchlight.

Jas. F. Dunne's foal by Tom Smith, dam Letter B. Jr. by Benton Boy.

W. G. Durfee's foal by Carlokin, dam Atherine by Patron; foal by Carlokin, dam Blanche Hall by Directum Penn; foal by Copa de Oro, dam Christianita by Zolock; foal by Carlokin, dam My Irene S. by Petigru; foal by Copa de Oro, dam May Marion by Carlokin; foal by Copa de Oro, dam Dixie W. by Zolock; foal by Copa de Oro, dam Pavlowa B. by Petigru; foal by Carlokin, dam Honey Healey by Zombro.

Revel Lindsay English's foal by Kinney de Lopez, dam Lady Bertha by Constantine.

Byron Erkenbrecher's foal by Copa de Oro, dam Reta H. by McKinney.

E. A. Gammon's foal by Peter McKlyo, dam Cleo Dillon by Sidney Dillon.

Alex. Grant's foal by Wilbur Lou, dam Sona by McKinney.

Geo. F. Heilbron's foal by Lijero, dam Califa by Silver Bow.

Hemet Stock Farm's foal by Wilbur Lou, dam Eradiate by Geo. W. McKinney; foal by Wilbur Lou, dam Fiesta Queen by On Stanley; foal by Wilbur Lou, dam Zeta W. by Nutwood Wilkes; foal by Wilbur Lou, dam Hemet Girl by Geo. W. McKinney; foal by Wilbur Lou, dam Nealy W. by Geo. W. McKinney; foal by Wilbur Lou, dam Stambia by Stam B.; foal by Wilbur Lou, dam Lady Zombro by Zombro; foal by Wilbur Lou, dam Little Louise A. by Boodle; foal by Wilbur Lou, dam Muriel C. by Nutwood Wilkes; foal by Wilbur Lou, dam Rosemary Lou by Kinney Lou; foal by Kinney de Lopez, dam Louise Carter by Chestnut Tom.

H. A. Hershey's foal by Jim Logan, dam Palo Maid by Palo King.

H. S. Hogoboom's foal by Palo King, dam Beautiful Morn by Iran Alto; foal by Robert Bingen, dam Beautiful Bird by Nutwood Wilkes.

Craig Hyde's foal by Jim Logan, dam by Demonio.

Abe W. Johnson's br c by Directum Penn, dam Belle Raymon by Raymon; foal by Directum Penn, dam Anna Elton by Elton.

Ed. Lavin's foal by George Hammett, dam Stella McKinney by Ed. McKinney.

I. M. Lipson's foal by Uganda, dam Jane C. by Zolock.

Wm. Loftus' foal by Copa de Oro, dam Leonor McKay by McKinney; foal by Copa de Oro, dam Annabelle L. by Hamb. Wilkes; foal by Carlokin, dam Iran Belle by Iran Alto.

Walter Maben's foal by Carlokin, dam Zomar by Zombro.

R. J. MacKenzie's foal by Zomblack, dam Martha Spy by The Spy; foal by Joe Patchen II, dam Merry Widow by Red Pac; foal by Joe Patchen II, dam Zombro Belle by Zombro; foal by Quintell, dam Eugenia B. by Zombro; foal by Joe Patchen II, dam Hawthorne by McKinney; foal by Quintell, dam Ava J. by Zombro; foal by Quintell, dam Greggie by Steinway; foal by Quintell, dam Madalca by Alcymont; foal by Vernon McKinney, dam by Carlokin.

Frank Malcolm's foal by Joe Patchen II, dam Fresno Girl by Seymour Wilkes.

L. E. Middleton's foal by Sir John S., dam Jennie L. by Moses S.

Carey Montgomery's foal by Jim Logan, dam Lela H. L. by Nutwood Wilkes.

J. H. Nelson's foal by Expressive Mac, dam Zyphryus by Zombro; foal by Expressive Mac, dam Guy's Guycara by Guy Dillon.

A. L. Nichols' foal by Robert Bingen, dam Silver Benton by Senator Boggs.

J. A. Paine's foal by Carlokin, dam Truly Ansel by Prince Ansel.

J. W. Pendleton's foal by Derbertha Bells, dam Abbie McNutward by Guy McKinney; foal by Derbertha Bells, dam Madsie McNutward by Madison McKinney; foal by Rapallo, dam Beautiful Bertha by Moormont.

Frank Rees' foal by Wilbur Lou, dam Ollivetta by Longworth.

Ryan & Webster's foal by Onward McGregor, dam Miss Harris by Sidney Dillon.

A. L. Scott's foal by Wilbur Lou, dam Icora by Ira; foal by Wilbur Lou, dam Rosie Woodburn by Easter W.; foal by Wilbur Lou, dam Lady Nez by Nutwood Wilkes; foal by The Bondsman, dam Sibyl Derby by Chas. Derby; foal by Wilbur Lou, dam Weatewater by Sidney Dillon.

J. E. Short's foal by Skido Wilkes, dam Keno by Prismo; foal by Skido Wilkes, dam Honda Girl by Rubino.

Mrs. Jas. Stewart's foal by Copa de Oro, dam Easter D. by Diablo.

C. F. M. Stone's foal by Carlokin, dam Cora Jane by Del Coronado.

L. H. Todhunter's foal by Peter McKlyo, dam Zombowyette by Zombro; foal by Peter McKlyo, dam Osmuda by Bon Voyage; foal by Peter the Great, dam Zombelle by Zombro.

J. Wheeler's foal by Guacho, dam Carita by Greco B.

Woodland Stock Farm's foal by Prince Ansel, dam Caratina by McKinney; foal by Prince Ansel, dam Maggie Hall by Moko; foal by Prince Ansel, dam Goldie McKinney by Prince McKinney; foal by Prince Ansel, dam Ila Moko by Moko; foal by Prince Ansel, dam Eocita by Moko; foal by Prince Ansel, dam Bonhilda by Moko; foal by Prince Ansel, dam Baroness Spier by Directum Spier; foal by Prince Ansel, dam Edna Saunders by Axworthy; foal by Prince Ansel, dam Alma McGregor by Jay McGregor; foal by Prince Ansel, dam Ella J. by Bob Mason; foal by Prince Ansel, dam Aleema by Nutwood Wilkes; foal by Prince Ansel, dam Ida Millerton by Millerton; b c by Prince Ansel, dam Mista Lockheart by Lockheart; foal by Prince Ansel, dam Silver Haw by Silver Bow; foal by Robert Bingen, dam Ruby Crellin by C. The Limit; foal by Robert Bingen, dam Bela Hall by Walnut Hall; foal by Robert Bingen, dam Nutflower by Nutwood Wilkes; foal by Robert Bingen, dam Fair Recluse by Moko; foal by Robert Bingen, dam Centerguy by McKinney; foal by Robert Bingen, dam Caritone by Antone; foal by Robert Bingen, dam Gay Princess by Prince Ansel; foal by Peter the Great, dam Carrietta by Directman; foal by True Kinney, dam The Attraction by Peter the Great; foal by True Kinney, dam Josie D. by Nutwood Wilkes; foal by True Kinney, dam Serpolo by Mendocino.

M. L. Woy's foal by Stanford McKinney, dam Loma B. by Stam B.; foal by Black Hall, dam Strathalie by Strathway.

O. H. Wright's foal by Reflector, dam Rosie Wilkes by Falrose.

ENTRIES IN THE STANFORD-OCCIDENT STAKE OF 1917.

I. L. Borden's foal by Ed. McKinney, dam Miss Nutwood by Nutwood Wilkes; foal by Ed. McKinney, dam Dolly B. by Welcome; foal by Ed. McKinney, dam Ramona by Prince Robert; foal by Ed. McKinney, dam Ella G. by Hamb. Wilkes; foal by Albaloma, dam Hester McKinney by McKinney; foal by Ed. McKinney, dam Maude Adams by Cresco Wilkes; foal by Tom Smith, dam Directola by Direct; foal by Tom Smith, dam Carrie B. by Alex. Button.

A. M. Bracken's b f Jane L. by Jim Logan, dam Bernice Marshall by Owyhee.

S. Brolliar's b g Hunny Bug by Graham Bellini, dam Nelly by Diawood.

J. J. Campbell's b c J. Silver Bond by The Bondsman, dam Silver Fir by Silver Bow.

J. Lyman Chandler's b c Vernon Pointer by Vernon McKinney, dam Poinsetta K. by Star Pointer.

I. J. Cornett's b f Boness by The Bondsman, dam Salinas Princess by Eugeneer.

S. H. Cowell's b s Bill Logwood by Jim Logan, dam Two Minutes by Wildnut; ch s Don Alberta by Palo King, dam Hulda C. by Dexter Prince; b c by Peter the Great, dam Pretoria Bingen by Bingen; b f by Peter the Great, dam Ione M. by Gambetta Wilkes.

W. E. Detels' b f by Graham Bellini, dam Daphne McKinney by McKinney.

W. G. Durfee's b c by Carlokin, dam Carolyn C. by Axtell; b c by Carlokin, dam My Irene S. by Petigru; b c by Carlokin, dam Zephyr by Zombro; b c by Carlokin, dam by Six Bells; b c by Copa de Oro, dam Lady H. by Del Coronado; b f by Copa de Oro, dam Subito by Steinway; ch f by Copa de Oro, dam Pavlowa B. by Petigru; b f by Copa de Oro, dam Reta H. by McKinney; b c by Copa de Oro, dam Lillie Mc by McKinney.

Revel L. English's ch f by Wilbur Lou, dam Lady Bertha by Constantine.

Sam Gault's b h Peter Klyo Bell by Peter McKlyo, dam Iran Belle by Iran Alto.

M. L. Woy's b f Expressive B. by Expressive Mac, dam Loma B. by Stam B.

The Ruthven Stable

Another good central western stable—that of A. F. Ruthven of Kansas City—arrived at Pleasanton recently to be gotten ready for the big stakes and class races at the exposition. As in the case of the other eastern stables that preceded them, their run was a good one, the horses unloaded in fine shape and are "fit as fit" to start making a little speed. The six head brought out were wintered at Topeka, with C. L. Overt looking after their welfare, and loaded out from that city at 1:20 Saturday and unloaded about six o'clock the following Tuesday, Mr. Ruthven following a bit later and showing up at Pleasanton last Saturday morning.

The stable is evenly divided between aged performers and youngsters, the former being the good pacers Walnut Grove 2:05¼ and Rose Equity 2:07¾ and the old reliable trotting mare Miss Johnson, who has a breeder's mark of 2:08¾ made last year at Cleveland but whose eligibility record is some seconds slower than that. Both Walnut Grove and Rose Equity are entered in the 2:06 pacing stake at both exposition meetings, the former named in the big event by J. A. Young of Port Arthur, Texas, and the latter by Mr. Ruthven.
